Mack

Mack's deliveries in January totaled 1,276 vehicles, up 43% compared with the year-earlier period.

Demand, in general, continued on an upward trend, largely spurred by the need to replace the aging population of heavy-duty trucks and the positive response of customers to the Mack EPA2010 trucks featuring Mack ClearTech™ SCR technology. A notable exception was the construction segment of the market.

VOLVO

While there are some indications of improvement in the construction environment as a whole, underutilization of the existing fleet of dumps and mixers is having a dampening effect on new truck sales.
