

Shear bolt:

Keep the shear bolt clean and lubricated to keep it from wearing out.

Climbing Pins and Springs:

Keep both climbing pins and springs lubricated and free from dirt and rust.

Do not use motor oil or grease to lubricate the jack.

IF YOUR JACK BINDS

As your Jack becomes older, the climbing pins may start binding in the holes of the steel standard (bar). This will prevent the Jack from operating properly and safely. Rusty climbing pins, dirt, or a worn bar can cause binding. Clean and lubricate the lifting mechanism. Test the Jack by jacking it up without a load. If the binding continues, send it to the address below for repair. If your Jack binds while under a load, use a jack with equal or larger load capacity to lower the load safely to the ground. Repeat the steps in this paragraph to the binding Jack.

REPAIRING THE JACK

When repairing your Jack use only genuine Hi-Lift® parts. **Using replacement parts not supplied by Hi-Lift® Jack Company will make the Jack unsafe to use.**

Hi-Lift® Jack Company will repair a damaged Jack. Pack the Jack in a carton and send prepaid to:

Hi-Lift® Jack Company
Factory Service Department
46 West Spring Street
Bloomfield, Indiana 47424

The repaired Jack will be returned to you U.S. Postal, UPS, RPS or C.O.D. for the cost of replacement parts, service, and transportation. We will notify you with an estimate before we do any work.
