Our AirBrush Perfections

Custom painting allows one to paint a variety of patterns on your car. What impresses people the most about custom painting is the organic visual effect and an element of individuality. Difference makes a difference, and difference defines one's stature. Because the aim is to celebrate and reveal the unique personality of each and every one. There are no boundaries to this art.

Custom painted cars not only can highlight the personality of the owner, but also gradually become a beautiful scene out there on the road. Active, passionate, fun-seeking people love to show their unique personalities and lifestyles to the outside world by means of such art.

At Mahindra Customisation, our key challenge is to produce the highest quality custom paint jobs for our valued customers which are tailor-made to their varied requirements. Our mission is to give each and every customer, a superior customised artwork with realism that stands out. We will endeavour to figure out the likings of people & the themes that they desire.

As the customer, you should always get a choice. So we let you decide how to go about the procedure.

- 1) Either choose from any of our classy designs OR
- 2) Give us a brief description of what you want & we'll make it for you!

LET THE ART DO
THE TALKING

THAR

Wars were won by machines and people, of course. The machine is here, GET UP PEOPLE!

The battle on the roads is yours, even before it begins! All of this and even more is possible with your own imagination..!!

With authentic custom air-brush painting offered only by Mahindra Customisation...!! Go Ahead.. Get Customed..!!!

INTRODUCTION

We at Mahindra & Mahindra take pride in being a consumer-centric organization. Now, we become the first Indian Automotive Manufacturers to give you a unique experience. We are in fact the only original equipment manufacturer in India to pursue automotive customisation.

When you purchase a vehicle, you have your personal tastes, special needs, different applications and unique lifestyle. To address each distinctive need through mass production is next to impossible. In order to reach out to enthusiasts and connoisseurs like you, we provide vehicles that reflect your true spirit.

Customisation is not simply 'modifying a product as per a customer's needs'. It is a personality match and involves intense interactions with you. Whether it is a new vehicle that's being revamped, you get a vehicle with 'a sense of belonging'.

As an original equipment manufacturer, we understand the unique business of customisation and hence give you nothing but the best!
