GENESIS

India has long been considered a country of compromise, where to desire the best was but a dream.

The lack of good products in the car audio market forced music lovers and enthusiasts to head overseas for quality audio products. High custom duties, complete lack of after sales support and poor installation expertise forced the Indian consumer to be content with the burnt end of the rope.

Five years ago, a dream was born. We came into existence with a desire to provide the discerning Indian customer with a truly vivid musical experience in the automobile environment. 2010 presents us all with new challenges, and we are proud to be able to say we are committed to delivering more value for your money, raising the bar once again for the Industry.

With a hand picked selection of the best In-Car Entertainment products available worldwide, competitive pricing, nationwide presence and the best technical support in the industry, we are proud to introduce ourselves…
