

# WATER-TO-AIR MONO PORTABLE AIR-CONDITIONER

## PAC W150 ECO

LOW GLOBAL WARMING IMPACT

ECO models do not contain gases (CFC/HCFC) dangerous to the ozone layer or with a marked greenhouse effect (HFC). The air-conditioner uses a completely natural and non-toxic fluid: R 290.

De'Longhi recycles the condensate, pumping the water over the condensing coils, the coils cool much faster than by air alone. This creates greater performance and efficiency with the added bonus of never needing to empty the tank. Making these units ideal for high humidity environments.

NO DRIP TECHNOLOGY

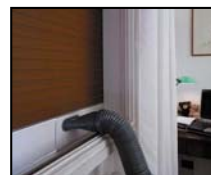

With the capacity to operate in high humidity, Turbopower takes 'No-Drip' technology a step further. This is done by pumping additional water from a tank over the condensing coils. This provides cooling output that's 20 to 30% higher than traditional air cooled systems

TURBOPOWER

WINDOW KIT

A window kit is supplied to allow you to vent the hot air efficiently outside your room. Window kits are adjustable and suit most sliding windows and allow you to make your home safe and secure while using your air conditioner

AIR-CONDITIONING

TECHNICAL DATA		
Dimensions (h x w x d)	mm	910x570x460
Weight	Kg	51
Rated voltage/Frequency	V-Hz	230-50
EER		3.67
Cooling capacity	BTU/h-W	15000-4400
Input power	W	1200
Air flow	m³/h	450
Moisture removal	l/24h	33
Refrigerant		R290
Noise level	dB(A)	45-49
Water tank capacity	l	14

### PACW150 ECO WATER TO AIR MONO PORTABLE AIR CONDITIONER

Maximum cooling capacity: 4400 W (15000 BTU/h)  
Cooling energy efficiency rating: 3.67

- **Environmentally friendly** – ECO models do not contain gases (CFC/HCFC) dangerous to the ozone layer or with a marked greenhouse effect (HFC). The air-conditioner uses a completely natural and non-toxic fluid: R 290.
- **Digital technology**: with LED display for ease of use.
- **No-drip technology**: for faster cooling efficiency and no need to empty the water tank
- **Turbo power**: Max cooling with water and high speed fan 4400W (15000 BTU/h)
- **Auto Fan function**: the appliance registers the room temperature and automatically ensures the best fan speed.
- **Sleep function**: The microprocessor controls the operation at a minimum noise, while the thermostat carefully controls the temperature in the room
- Window kit included
- LCD Remote Control with wide LCD display controls all the functions of the unit
- **Water save function**: operates on water for up to 10 hours
- Separate dehumidifying function, removes up to 33 litres per day
- Digital timer and thermostat
- Fill the internal 14-litre tank with either container provided or built in extendable tube
- Cord storage
- 2 year warranty and 5 year parts warranty on the compressor

*Who can resist a good looking Italian?*
