

BLUE STAR

Room airconditioners from the Experts

Wide range of Split ACs and Window ACs

Advantage Blue Star

Blue Star, India's leading airconditioning company brings you expert cooling solutions for all your needs. Drawing from over six decades of cooling expertise, it offers you a wide range of Split ACs and Window ACs to choose from. These ACs assure exceptional cooling, superior technology and unmatched performance. What's more, they are backed by a wide network of 800 dealers and direct service centres across the country.

Opt for the Expert. Opt for Blue Star.

User-friendly Features

I Feel

I Feel is an advanced feature designed to offer maximum comfort to the user. The remote comes fitted with a mini sensor which senses the surrounding temperature and transmits the signal back to the indoor unit. The indoor unit then adjusts the temperature accordingly, ensuring an appropriate temperature around the user and not the unit, thus optimising user comfort.

Ag⁺

Silver Ion Filter

The Silver Ion Filter is a highly efficient sterilising ion filter that kills more than 99% bacteria and prevents it from growing again.

Catechin Filter

The Catechin Air Purifying Filter catches dust, mites, cigarette smoke and other pollutants. It also traps and inactivates microscopic virus and bacteria. This remarkable filter keeps your air clean and you healthy.

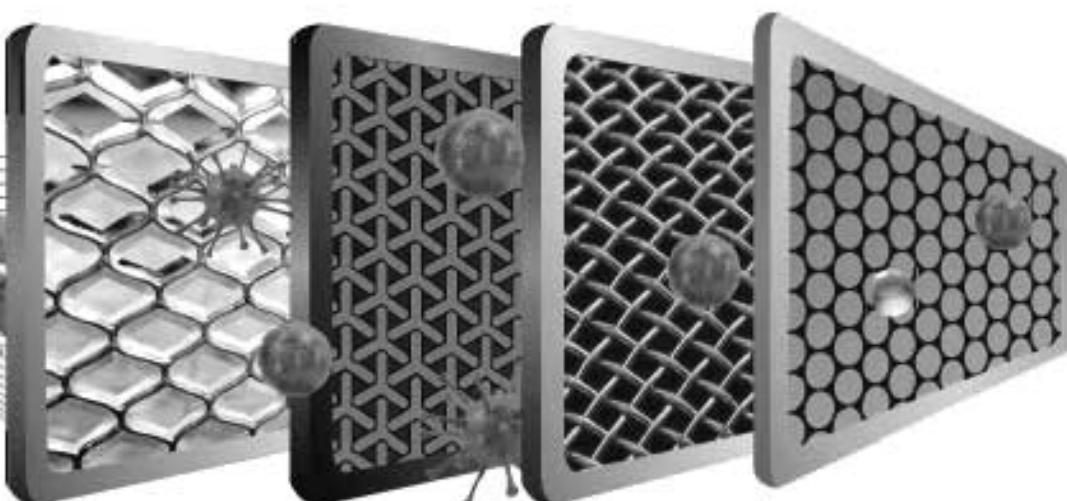

Bio cum Eco Filter

The Bio Filter consists of a specialised Eco Filter and Biological Enzyme that help purify air. The Eco Filter traps minute airborne dust particles and prevents bacterial, fungal and microbial growth. The Biological Enzyme kills bacteria by dissolving their cell walls. This ensures that the bacteria does not grow again and the user gets pure, healthy air.

Vitamin C Filter

This Vitamin C Filter helps reduce stress and softens the skin, as Vitamin C is well known for increasing immunity.

Polluted Air

Silver Ion Filter

Catechin Filter

Bio cum Eco Filter

Vitamin C Filter

Anti-Acarien Filter

This anti-dust mite filter helps prevent the reproduction of dust mites, and keeps the air fresh.

Anti-Bacterial Filter

The Anti-Bacterial Filter is a specially designed filter that helps reduce the spread of infections and diseases through air. This filter contains bio-bactericide that collects dust, limits the metabolism and growth of bacteria and sterilises the air. It also removes more than 95% Esherichis Coli and Staphylococcus Aureus that cause boils, infections and diarrheal diseases.

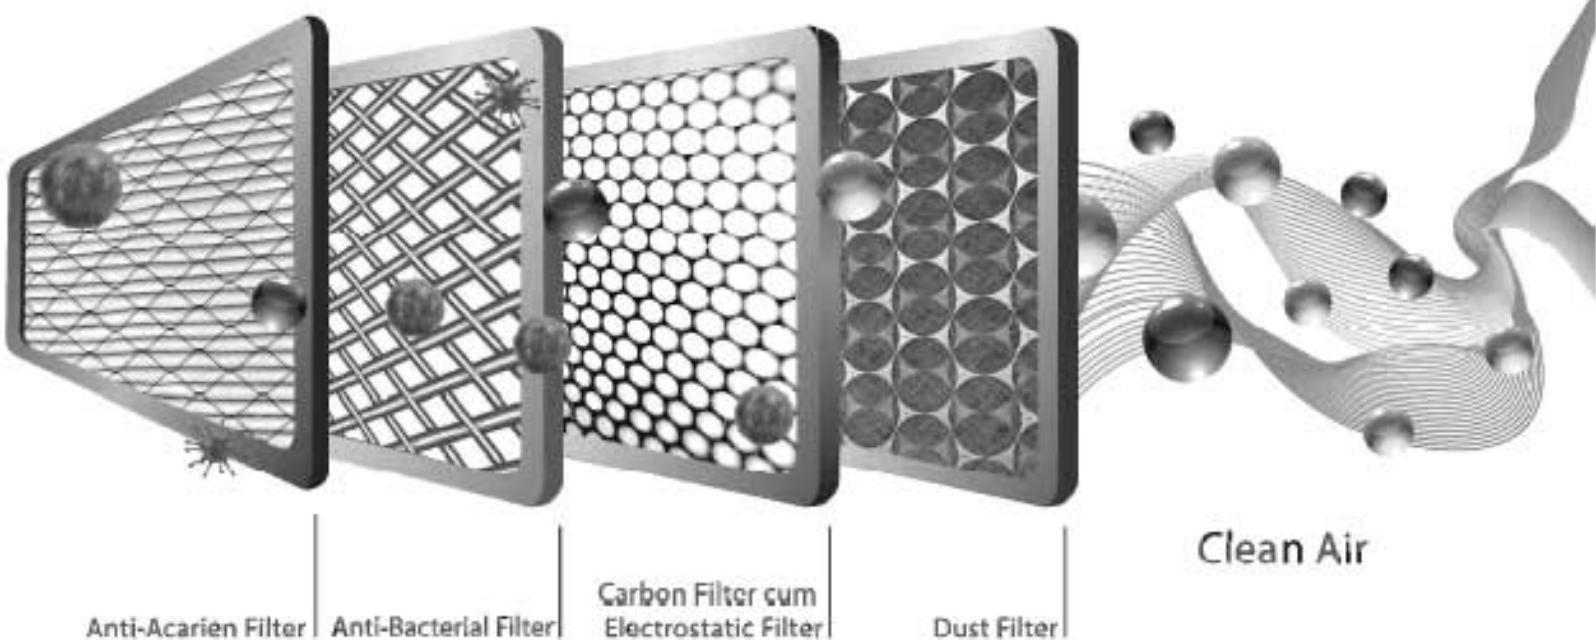

Carbon Filter cum Electrostatic Filter

The Carbon Filter eliminates odours such as that of ammonia and inactivates harmful chemical gases such as formaldehyde and benzene. By forming pre-charged ions on the filter surface, the Electrostatic Filter traps small dust particles and smoke, thus improving indoor air quality.

Dust Filter

The Dust Filter is a special advanced filter that traps dust particles in the room, keeping it dust-free and healthy.

Blow Button

In this mode, the indoor blower in a Blue Star AC runs for 10 minutes even after the airconditioner is switched off. This helps keep the indoor coil dry and prevents dust or mold accumulation. Also, the growth of bacteria in the indoor coil due to moisture is reduced significantly.

TURBO

Turbo Operation

In this Mode, the AC switches to High/Turbo Fan Speed to help reach the pre-set temperature in the shortest time possible.

Wide Angle Airflow

The Wide Angle Louvres ensure that cool air is distributed evenly across the room, and that it reaches every corner of the room.

Fixed and Swing Louvres

Fixed and Swing Louvres help the user adjust the swing or even stop it at a particular angle. This adds to the user's comfort by letting him manage the airflow to suit his needs.

Air Flow Direction Control

This feature controls the swing angle of the Horizontal Louvre. It allows the user to change the air flow direction to avoid direct draft of cold air.

Sleep Mode

Sleep Mode is an intelligent feature that ensures a comfortable temperature throughout the night. The user sets a particular temperature before sleeping. In the Sleep Mode, this user-set temperature increases for a short period of time. So even if the temperature outside dips later in the night, the user is comfortable and doesn't feel too cold. The Sleep Mode helps save energy and also adds to the comfort of the user.

Auto Mode

The unit will automatically select the suitable running method according to the room temperature, making the room comfortable. This can be set while in Cooling Mode.

Dry Mode

The Dry Mode is useful when the room feels humid and clammy. This feature helps remove the moisture from the air quicker.

Hydrophilic Aluminium Evaporator Fins

Since the Evaporator (indoor coil) has a low temperature, water condensation can happen. This results in accumulation of dust particles, thereby affecting performance of the AC. The hydrophilicity in the aluminium fins doesn't allow water condensate to accumulate. This reduces the accumulation of dust particles and improves the cooling performance of the AC.

Anti-Freeze Thermostat

If the unit is running in the Cool Mode and is set at a very low temperature, frost is formed on the heat exchanger. The Anti-Freeze Thermostat acts as a safety feature and stops the compressor, thus protecting the unit.

Multi-Fan Speed

All Blue Star ACs offer Multi-Fan Speed options to suit your comfort level. The Window ACs come with Three Speed Fan Cooling whereas the Split ACs come with Four Speed Fan Cooling (Low/Medium/High/Auto) that adjust the Fan Speed.

ON/OFF Timer

This feature adds to the convenience of the users as they can set the timer for On or Off as per the requirement.

Display Panel

All indoor Split ACs come with advanced digital display that helps indicate the mode of operation of the AC.

Auto Restart with Memory Function

This feature is very useful in case of a power cut. Thanks to this feature, the airconditioner restarts at the previous setting automatically, when the power resumes.

Energy Saver Mode

If the room temperature is lower than the set temperature, the fan speed will switch to low, thereby saving power.

Self Diagnosis

In case of faulty conditions, the ACs show error codes. This ensures proper care and protects the AC from any damage.

Cleanable Panel

The front panel of the indoor unit can be easily detached for periodic cleaning. This helps in the maintenance of the AC.

Elegant Remote Control

Blue Star ACs come with modern-looking, easy-to-use remotes that are packed with features.

Advanced Outdoor Unit Features

High Efficiency Rotary Compressor

Every Blue Star AC uses highly energy efficient rotary compressor with a built-in accumulator. This compressor is specially designed to deliver maximum cooling while using low power and helps you save on your power bills.

Powder-Coated Outer Body

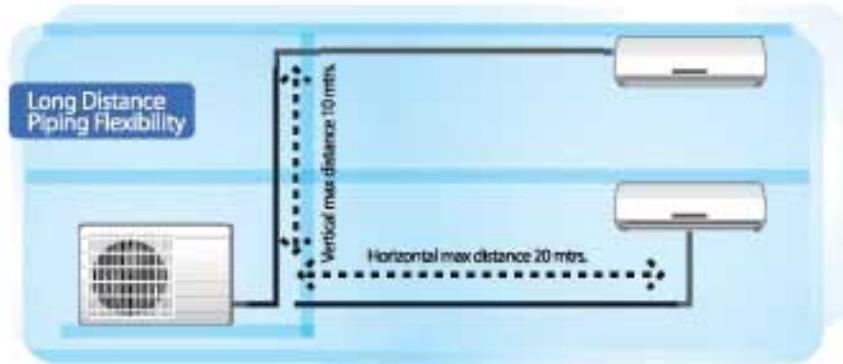

Blue Star outdoor units have been built keeping in mind harsh Indian climatic conditions. The metal bodies of the units use galvanised steel and are coated with polyester powder paint. This protects them from rusting and increases their life significantly.

Long Distance Piping Flexibility

A Long Distance Piping Flexibility allows you to keep the outdoor unit far from the indoor unit. This adds to the convenience and facilitates easy installation of the ACs.

Anti-Corrosive Condenser Blue Fins

Special Anti-Corrosive Blue Fins are used to resist the corrosion of the condenser and to increase its life, thus increasing the AC's life.

Inverter Split AC

It's so smart, it adjusts for you.

Here's an AC that thinks and adjusts according to your needs. Blue Star's Inverter AC. Its compressor changes frequency according to the ambient load. As the frequency changes, RPM of the compressor also changes. This eliminates any temperature fluctuations and helps maintain a comfortable temperature. For example, a 1.5 ton Inverter AC can decrease its capacity to 1 ton or increase its capacity to 1.75 tons, as per the requirement. As there is no cut in and cut off, the Inverter AC saves up to 30% more power.

Inverter AC comes with a special heat pump that's useful during severe winters. What's more, this AC uses the latest environment-friendly refrigerant, R410A, that has almost nil ozone depleting substances. So the AC is healthy for the environment too.

VARIABLE CAPACITY OPERATION

Inverter airconditioners are able to vary their operating capacity. Non-Inverter ACs can operate only at a fixed capacity.

Star Rated Hi-Wall Split ACs

They cool. They purify. They save.

Certified by the BEE (Bureau of Energy Efficiency), Blue Star's star rated range of Hi-Wall Split ACs offers you the dual advantage of high performance cooling and low electricity bills.

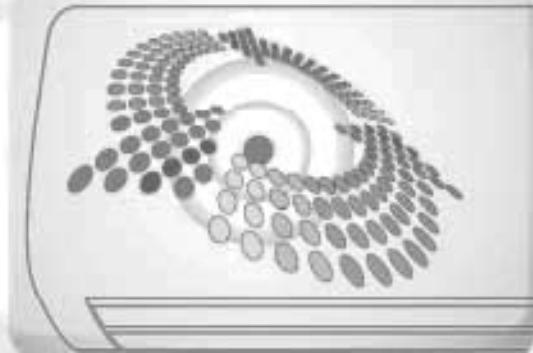

5 Star - D

The best in the 5 star range, this AC combines stylish looks with ultimate savings. What's more, it comes with special filters that ensure clean, healthy air at all times. The I Feel feature helps the AC to direct its cooling according to your needs. This helps save energy and therefore reduces your power bills.

SELF CLEAN

If this mode is activated under Cool and Dry Mode and the compressor is switched off, the fan will run under low speed for 30 mins. This cleans the evaporator and prevents mold generation, keeping the evaporator fresh for next operation.

Features

Filters

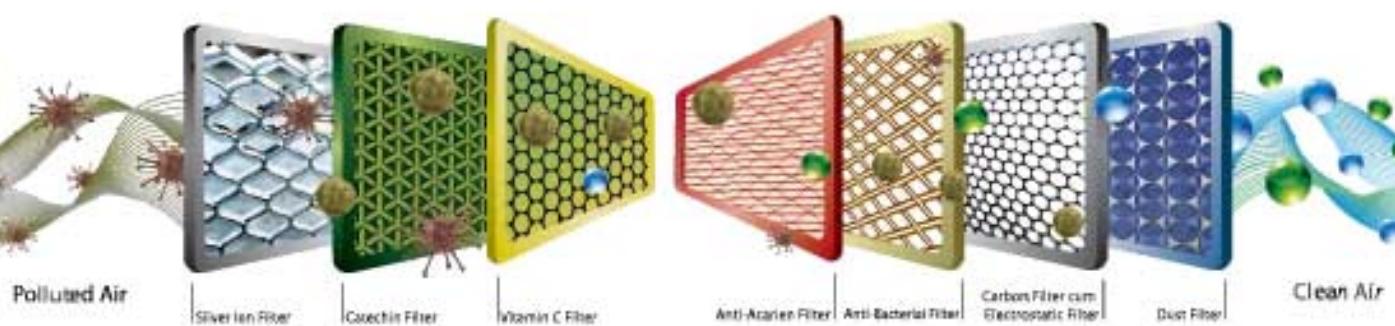

5 STAR - ZW

Pearl White

Stylish, elegant and good looking, this AC certainly adds to the beauty of your home. In fact, it comes in three attractive colours, Champagne Gold, Two Tone Silver and Pearl White, for you to choose from. A special film on the panel gives this AC the extra shine and enhances its beauty, giving your room a designer look. And being a 5 star rated AC, it helps you save on your electricity bills too.

5 STAR - ZS

Two Tone Silver

5 STAR - ZG

Champagne Gold

Multiple colour options for panels to suit your décor.

Features

On/Off Timer	Dry Mode	Wide Angle Airflow	Fixed and Swing Louvres	Air Flow Direction Control	LED Display Panel	Hydrophilic Fins Evaporator	TURBO Operation

Specialised Eco Filter and Biological Enzyme for purification of air.

Star Rated Window ACs

Good looks. Great performance.

Blue Star's star rated range of Window ACs brings together the benefits of superior cooling, energy-saving performance and aesthetic looks, all in one unit.

Available in 3 star, 2 star and 1 star, this AC offers you nothing but the best. With three fan speeds to choose from, an auto-restart with memory function, a filter check LED on the front panel and cordless LCD remote; this AC is specially designed keeping all your needs in mind.

Features

After 250 hours of operation, when the filter needs cleaning, the LED illuminates to remind you of it.

Saving 5 Star Vis-a-vis 3 & 2 Star AC

	5 Star	1.0 Ton	
		3 Star	2 Star
Power Input in Watt Per Hour	1050	1135	1212
Unit Consumption Per Hour	1.05	1.14	1.21
10 Hour Unit Consumption	10.5	11.4	12.1
Compressor Run Time 75% Unit Consumption	7.88	8.51	9.09
Per Unit Cost at Rs. 5.5	43.31	46.82	50
30 Day Running Cost in Rs.	1299.38	1404.56	1499.85
		5 Star Saving Versus 3 Star	5 Star Saving Versus 2 Star
5 Star Saving Per Month in Rs.	NA	105.19	200.48
5 Star Saving for 9 Month Operations in Rs.	NA	946.69	1804.28
5 Star Saving for 5 Year Operations in Rs.	NA	4733.44	9021.38

Savings on a 1.0 ton 5 Star AC over a 2 Star AC is approximately Rs. 9000 over 5 years of operation.

	5 Star	1.5 Ton	
		3 Star	2 Star
Power Input in Watt Per Hour	1650	1865	1950
Unit Consumption Per Hour	1.65	1.87	1.95
10 Hour Unit Consumption	16.5	18.65	19.5
Compressor Run Time 75% Unit Consumption	12.38	13.99	14.63
Per Unit Cost at Rs. 5.5	68.06	76.93	80.44
30 Day Running Cost in Rs.	2041.88	2307.94	2413.13
		5 Star Saving Versus 3 Star	5 Star Saving Versus 2 Star
5 Star Saving Per Month in Rs.	NA	266.06	371.25
5 Star Saving for 9 Month Operations in Rs.	NA	2394.56	3341.25
5 Star Saving for 5 Year Operations in Rs.	NA	11972.81	16706.25

Savings on a 1.5 ton 5 Star AC over a 2 Star AC is approximately Rs. 16,700 over 5 years of operation.
