

The shining star of Air Conditioners

Star has the highest cooling capacity in its category and is one of the highest energy efficient models in the industry, which means you not only get the best cooling, but also enjoy savings on your power bills.

Tonnage Class	1.8	2.2
Star Rating		

Minus Ion Stick

This unique stick strongly draws in airborne particles like dust, pollen, mite, germs etc., to ensure cleaner and healthier air in the room.

Circulation Mode

The IDU fan motor automatically stops when the room temperature is less than the set temperature and vice-versa.

Auto Fan Speed

The fan speed is automatically adjusted for comfort depending on the running state of your air conditioner, i.e., if the compressor is cut off, the fan speed automatically comes down to a low level and vice-versa. Similarly, once the set

temperature is achieved, the fan speed comes down to a low level to optimise your comfort level.

Nano Titanium Filter

A unique filter that deodorises the air and promptly eliminates even the smallest size bacteria to make the air free from odour and bacteria.

UV Fresh Technology

The air conditioner comes with UV Fresh, a unique technology with a really powerful germicidal effect. Source of UV light continuously emits UV rays on to the filter, destroying microbes in the environment while also stopping their growth. Thus giving you a clean and healthy environment.

TECHNICAL SPECIFICATIONS

Description	Unit	STAR	
		1.8	2.2
