50+ Safety & Security Features

1	Active turn signals
2	Dual stage passenger air bag. Standard driver and passenger airbag
3	All-row full-length side-curtain air bags
4	All-speed traction control system
5	Anti-lock brake system (ABS)
6	Auto-reverse windows
7	BeltAlert
8	Brake-throttle override
9	Brake/park interlock
10	Capless fuel-filler door
11	Child-protection rear door locks
12	Child seat anchor system:
13	Driver Information Display (DID) instrument cluster display
14	Daytime running lamps (DRL)
15	Dual-note electric horns
16	Electric parking brake (EPB)
17	Electronic brake-force distribution
18	Electronic roll mitigation (ERM)
19	Electronic stability control (ESC)
20	Electric Vehicle Information System (EVIC)
21	Energy-absorbing steering column
22	Energy Management System
23	Express up/down windows
24	Front Cornering Fog Lamps
25	Front seat-belt adaptive/active load limiters
26	Front seat-belt pretensioners
27	Front-seat mounted side pelvic thorax bags

28	Global position sensor (GPS)
29	Height-adjustable seat belts (front-row)
30	Hill-start Assist (HSA)
31	Keyless Enter-N-Go
32	Occupant Restraint Controller
33	ParkSense rear park assist system
34	ParkView rear backup camera
35	Remote keyless entry
36	Safety Laminated Glass
37	Seat Belt Latch with Dual Locking Tongue
38	Selec-Terrain
39	Sentry Key engine immobilizer
40	Side guard door beams
41	Steering Wheel Mounted Audio Controls
42	Supplemental turn signals
43	Three-point seat belts
44	Tilt-and-telescoping steering column
45	Trailer-sway control (TSC)
46	Uconnect Voice Command
47	Rear Window Wiper
48	DST
49	PBA
50	EBP
51	Brake lights
52	HBFC
53	Rear Defog
54	Xenon Headlamps
55	Double crank prevention
56	Speed Sensitive power door lock

30+ Premium Features

1	Frequency Selective damping
2	Standard Traction Control
3	Standard ESC
4	Panic Brake Assist
5	Adaptive Brake Lights
6	Selec Terrain
7	Hydraulic rebound for Front Suspension
8	Driveline disconnect technology
9	Seven slot grille (Closed)
10	Trapezoidal wheel Archs
11	All round DLO
12	A Serpentine Suspension for Seat
13	Black Seat Foam
14	Dynamic Steering Torque
15	All Season Tyres
16	Integrated Centre Stack
17	Capless Fuel Tank
18	Bi-Xenon Headlamps
19	Water tight Sealing
20	Zinc Weight in Steering wheel to increase polar moment: Steering
21	cast magnesium armature : Steering
22	Soft Touch Dashboard
23	Sewed Vinyl touch armrests
24	Door Module
25	Electric Parking Brake
26	Dual Zone Auto AC
27	Exhaust System with Dual Substrate DPF Gross Bulk Density canning
28	Tripple Door Seal
29	Android Auto & Google Carplay
30	Hill Start Assist
31	Multiair Engine
32	7 DDCT

20+ Pioneering Technologies

1	Tyre Bead Optimizer
2	Negative Vacuum Foaming
3	Hot Stamping
4	High Strength Steel
5	Integrated door module
6	Seat - Frame Design
7	Ingrain Moulding
8	Full Body Hemming 2K sealant
9	All around sealing
10	State of Art Metrology
11	Laser Welding
12	Plasma Cutting
13	Vision System Cell
14	Adaptive Weld Guns
15	Robotic Glass Glazing Cell
16	Skillet Conveyor
17	Twenty eight baffles
18	Inline diagnostics
19	Advance Vehicle Diagnostics
20	Online Feeding of Tyres /Seats
21	Barcoding of parts before it gets on vehicle

Jeep® Compass USPs

Jeep

**CAPABLE
SUV**

High Angles of Capability

Jeep

Approach Angle	17°
Departure Angle	32°
Ground Clearance	178mm

Capable of handling poor to no road surfaces

www.Team-BHP.com

Jeep Active Drive

Jeep

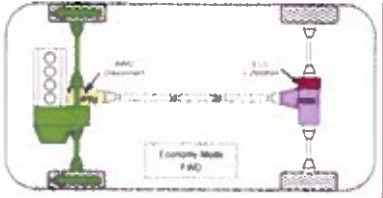

- Jeep Active Drive 4X4 System can send up to 100% of available torque to any one wheel when required
- Features Rear-axle Disconnect with Power Transfer Unit (PTU) to efficiently manage 4X4 system
- With Selec-Terrain System, Compass is able to conquer any terrain that comes its way

ACTIVE DRIVE
4 X 4 SYSTEM

Jeep

Jeep Active Drive: Rear-axle Disconnect

Jeep

Economy Mode

- ✦ The Compass drives in front wheel drive (FWD) mode to ensure maximum fuel efficiency
- ✦ Best suited for city & highway driving

Traction Mode

- ✦ The Compass shifts to all wheel drive (AWD) mode to negotiate unusual terrains
- ✦ Best suited for bad roads, slippery surfaces & inclines (fly overs etc.)

Hi-torque Traction Mode

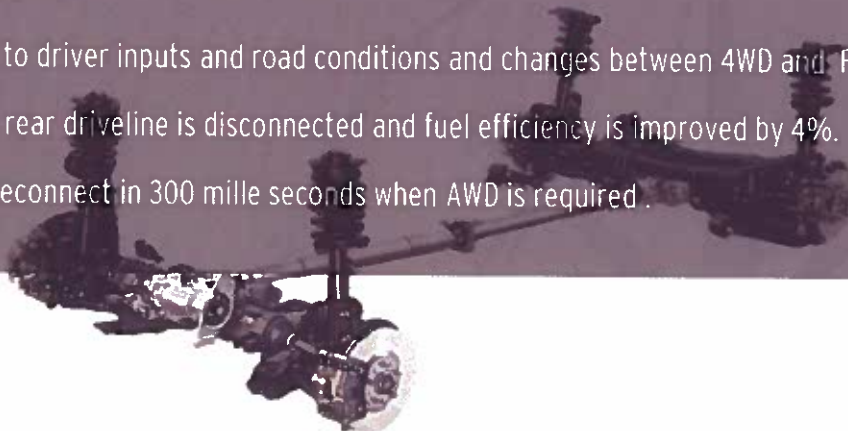

- ✦ The Compass provides high torque & traction to all four wheels to tackle rough terrains
- ✦ Best suited for off-roading

www.Team-BHP.com

Jeep Active Drive: Rear-axle Disconnect

Jeep

- ✦ The disconnect system combines better traction, dynamics and stability of AWD with improved efficiency of a FWD.
- ✦ The system reacts to driver inputs and road conditions and changes between 4WD and FWD seamlessly
- ✦ At cruising speeds rear driveline is disconnected and fuel efficiency is improved by 4%.
- ✦ The driveline can reconnect in 300 mille seconds when AWD is required.

Intelligently combines capability with fuel efficiency.

Jeep Active Drive: Selec-Terrain System

Jeep

Enables driver selectable, real-time, on-the-fly traction management

Allows you to choose from 4 different mode as per the terrain:

- Auto
- Snow
- Sand
- Mud

Knows no limits.

www.Team-BHP.com

Jeep Active Drive: Selec-Terrain System

Jeep

Auto Mode

- + Remains in FWD under normal conditions
- + Automatically changes to AWD when detects required conditions & driving style and reverts to FWD when AWD is not required
- + Engages AWD when:
 - Traction at the front wheels is compromised
 - Accelerating (upto 30-40kmph) to improve launch traction
 - Turning (as needed) to prevent understeer
- + Can be used on and off road

Everyday drive mode.

Jeep Active Drive: Selec-Terrain System

Jeep

Snow Mode

- ✦ AWD calibrated to inspire confidence & stability on slippery or snow-covered surface
- ✦ Adjusts Electronic Stability Control and steering to minimise oversteer and helps prevent skidding, especially at low speeds

Reduces wheel slippage & Increases traction

www.Team-BHP.com

Jeep Active Drive: Selec-Terrain System

Jeep

Sand Mode

- ✦ AWD with an off-road calibration for low-traction surfaces such as sand or wet grass
- ✦ To help the Compass move forward on these surfaces:
 - Throttle control is adjusted to maintain higher engine speeds
 - The transmission is adjusted to hold its gear longer
 - Electronic brake controls are adjusted to allow more wheel slip

Reduces low speed traction on looser surfaces to allow you to drive freely

Jeep Active Drive: Selec-Terrain System

Jeep

Mud Mode

- ✦ AWD with an off-road calibration for low-traction surfaces such as mud or wet grass(similar to sand mode)
- ✦ To help the Compass move forward on these surfaces:
 - Throttle control is adjusted to maintain higher engine speeds
 - The transmission is adjusted to hold its gear longer
 - Electronic brake controls are adjusted to allow more wheel slip

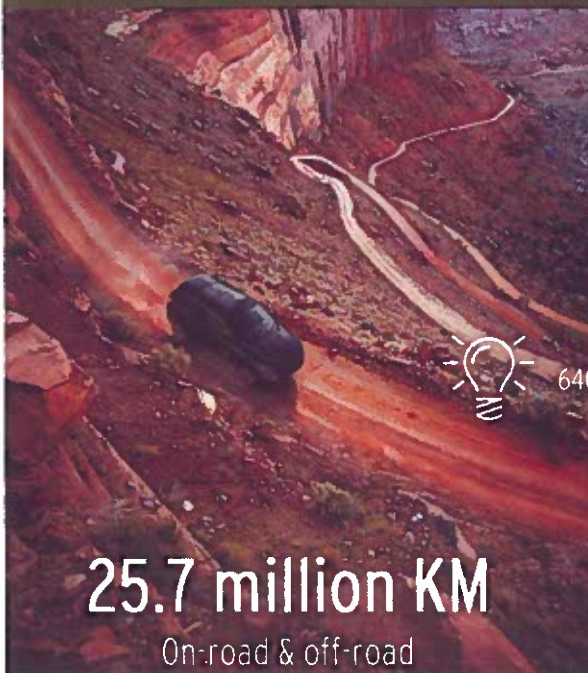

Reduces low speed traction on mud slick surfaces to allow you to drive freely

Multijet
16V

2.0L Multi-jet Turbo DIESEL Engine

Jeep

Parameter	2.0L Multi-jet
Engine capacity (cc)	1956
Engine configuration	Inline-4
Max. Power (PS/kW @ rpm)	172/126.7 @ 3750*
Max. Torque (Nm @ rpm)	350 @ 1750-2500*

Advanced 8 stage fuel injection technology

The Jeep[®] Compass is powered by FCA's legendary diesel technology - Multi-jet II, for a thrilling drive experience.

*Source: AutoCar

www.Team-BHP.com

Multi-jet Engine Benefits

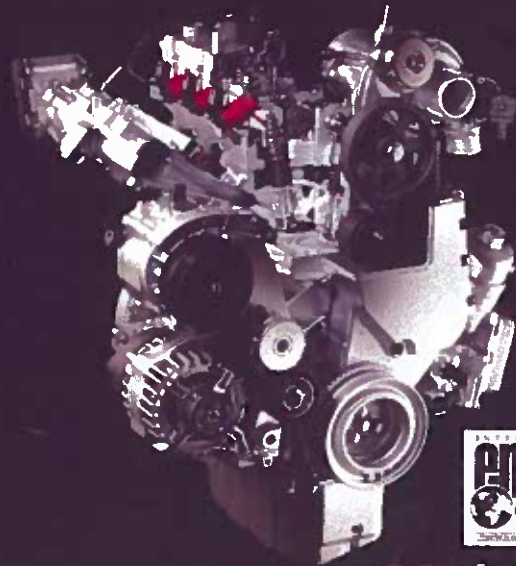

Jeep

- Gives excellent performance with great Power, torque and Fuel Economy
- Next generation Emission Standards make the engine Euro 6b ready
- Reduces Noise & Vibration resulting into a quite cabin
- Results into improved Reliability & Less Maintenance of the engine

1.4 L Turbo MultiAir Petrol Engine

Jeep

Parameter	1.4L MultiAir
Engine configuration	Inline-4
Max. Power (PS/kW)	164/120.8
Max. Torque (Nm)	250

MultiAir

World acclaimed petrol engine technology providing the right mix of performance, thrill and efficiency.

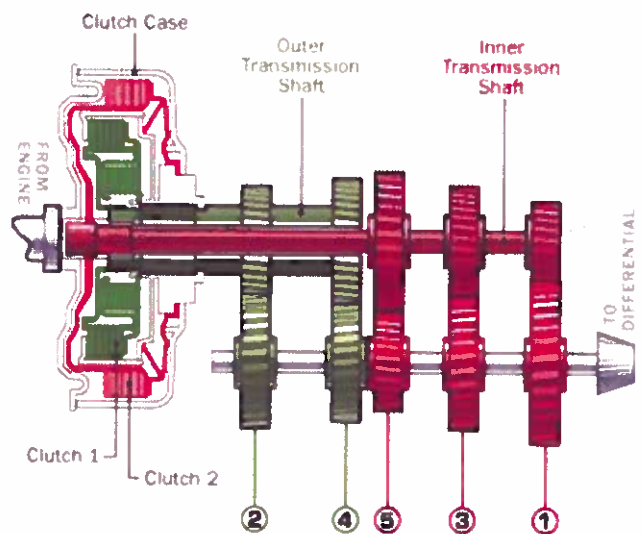

Will be launched with Multi-jet II DIESEL Engine only. MultiAir Petrol Engine will be available later.

www.Team-BHP.com

7 speed DDCT

Jeep

- ✦ 7 speed dry dual clutch transmissions.
- ✦ 2 dry clutches one for the odd gears and the other for even gears.
- ✦ Gear shifting through rapid shifting of clutches.
- ✦ Vehicle traction kept constant during gear shifting.

Smooth and quick gearshifts with maximum fuel economy.

Inspiration

Jeep

SR71 jet = sharp lines, simple draped surfaces

Form and Sculpture

Jeep

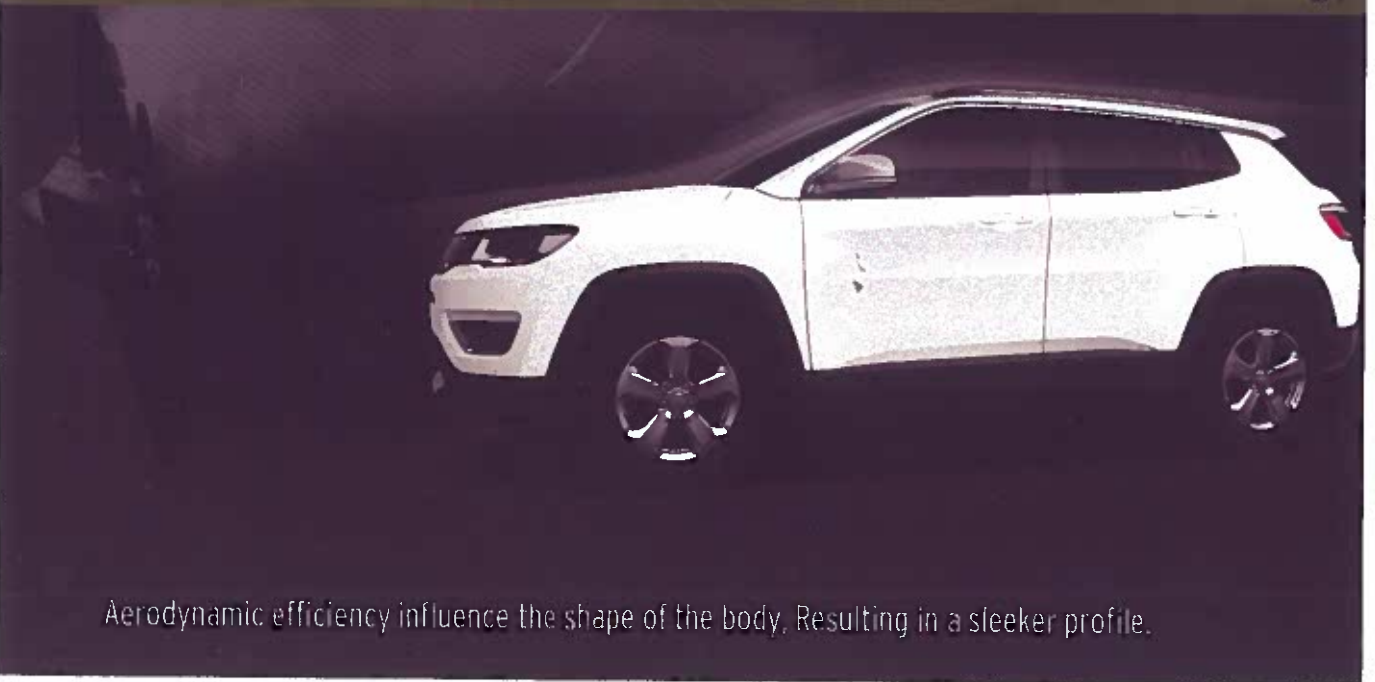

An early sketch showing influence from the inspiration - connecting wheel flares and hood edge with draped surfacing

www.Team-BHP.com

Efficient Profile

Jeep

Aerodynamic efficiency influence the shape of the body, Resulting in a sleeker profile.

Design Signature

Jeep

Each Jeep design should fit within the jeep family but have a unique personality of its own

www.Team-BHP.com

Design Signature

Jeep

The bright accent running along the front pillar, roof line and back lite is inspire by Jeep open air heritage.

Design Signature

Jeep

Trapezoidal wheel flares - A Design element within every Jeep that is inspired by original Willy's MB flat fender.

www.Team-BHP.com

Design Signature

Jeep

NO two Jeeps are sculpted the same. Each Jeep has it's own personality in the way the forms are sculpted.

Jeep® Compass Exterior Design

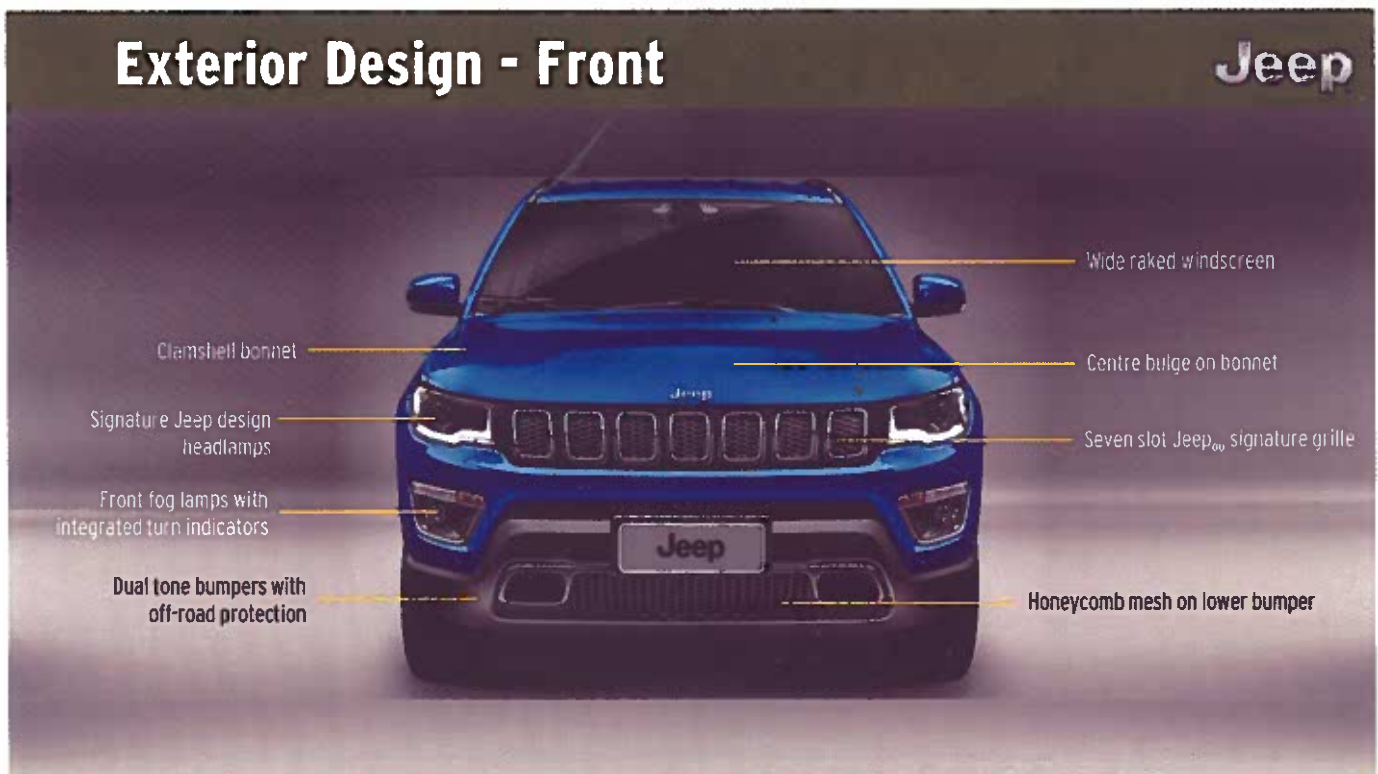

Jeep

www.Team-BHP.com

Exterior Design - Front

Jeep

Clamshell Bonnet

Jeep

- ◆ Raised-up bonnet profile
- ◆ Bonnet edges gelling with the fender profile
- ◆ Clean and clear upper bonnet surface

Aggressive and Dominating Road Presence.

www.Team-BHP.com

Bi-Xenon Headlamps

- ◆ High-intensity discharge light source for high or low beam
- ◆ Light is produced by an electric arc that forms between two tungsten electrodes
- ◆ When low beam is selected, the light beam is partially shielded by a moving shutter.

Provide a much brighter light with less energy consumption.

Bumpers with Off-road Protection

Jeep

- Dual tone bumpers - Body coloured upper portion & matte Black lower portion
- Signature design element of a potent SUV

Tough and rugged look to the Compass.

www.Team-BHP.com

Seven Slot Jeep® Signature Grille

Jeep

- Seven slots with chrome lining and honeycomb mesh insert
- High quality Piano Black surround

Makes Compass a True Jeep.

Exterior Design - Side

Jeep

Wide, planted and athletic stance.

Frequency Selective Dampening Suspension

Jeep

- + Mechanically adjusts the dampening based on road surfaces & driver inputs to fit the needs
- + Acts as hydraulic amplifier that delays the build-up of pressure
- + Alternative damping characteristics for:
 - Car body control (low frequency)
 - Axle input (high frequency)
- + Provides more stability during cornering & braking and more comfort while on bad roads

Outstanding combination of ride & handling

Latest Uconnect 7.0 Infotainment System

Jeep

- High Definition Capacitive 7" Touch Screen
- Offers connectivity via Bluetooth, Apple CarPlay and Android Auto
- Allows you to play music via Radio, AUX & USB as well
- Features a ParkView rear back-up camera
- Also allows you to control the dual zone AC from the unit

www.Team-BHP.com

Steering with DST -Dynamic Steering Torque Jeep

- Jeep Compass is equipped with Electric power Steering and DST system .
- Mechanical steering gear combined with column mounted electric power assist unit.
- Sensor detects torque generated on steering wheel by the driver to give precise control.
- As soon as the wheel starts to turn information is forwarded to the controller module which causes the electric motor to assist in the steering manoeuvre .
- The DST system works in sync with the ESC to ensure safety on all road surfaces .

Precise steering and low harshness and vibrations felt .

Electric parking brake

Jeep

Push button electronic parking brake controlled by the ECU

Operates in 5 different modes:

Dynamic Apply - Accomplished by continually pulling up on the switch while driving.

Static Apply and Release - While at a standstill, lift the park brake switch a single time. Release by pressing the brake pedal and pushing on the park brake switch simultaneously

Drive Away Release - Automatically release if the driver seat belt is buckled and the vehicle is accelerated

Safe Hold - Applies automatically when speed is below 5 km/h and the driver exiting the vehicle

Auto Apply - When the vehicle's speed is below 3 km/h, and the automatic transmission is put in Park position. With manual transmissions when the vehicle proceeds in the "key off" position

Advanced safety technology

www.Team-BHP.com

Dual Zone AC

Jeep

Allows you to maintain different temperatures for driver & co-driver side

Can be operated from the 7" touchscreen system

Compass features AC vents at the rear for uniform cooling at front & rear seat passengers

Perfect cooling for every occupant.

ParkView Rear Back-up Camera

Jeep

www.Team-BHP.com

NVH Package

Jeep

Quiet cabin and premium feel

Other Advanced Features

Jeep

Cap-less Fuel Lid

Offer ease of filling fuel and avoids any unwanted contact of the fuel with human body

Operation Buttons on the Back Side of the Steering Wheel

Allow you to easily operate tracks, channel, source & volume without unnecessarily stretching your thumb

All Season Tyres

Specially engineered tyres by Firestone to provide traction and handling on wet, dry and snowy terrains

SAFETY AND SECURITY FEATURES

The Jeep Compass is the first to offer an interior of comfort with 10x state-of-the-art airbags that ensure maximum protection every time you drive. The Jeep Compass. Go Anywhere. Live Anywhere. www.Jeep.com/compass

COMPASS

Jeep

www.Team-BHP.com

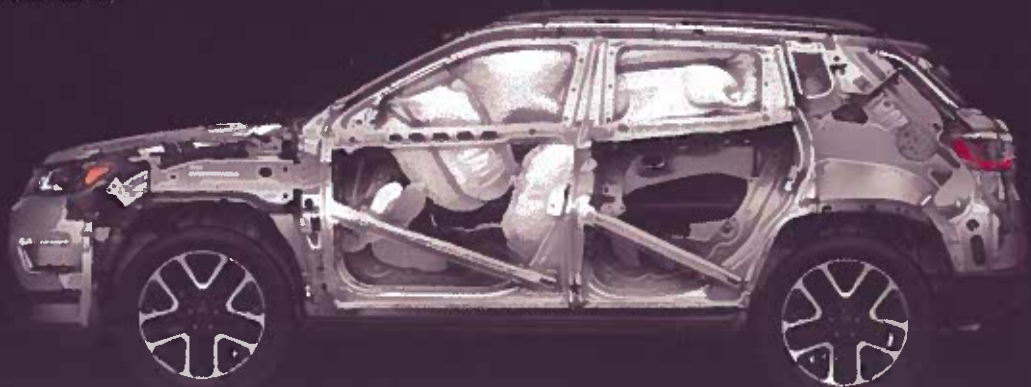

6 Airbags

Jeep

- Airbags inflate instantly in case of a collision and reduce the risk of injury to occupants.
- Dual front airbags, 2 side airbags and 2 curtain airbags

All-around occupant safety.

Electronic Stability Control

Jeep

- ESC detects critical handling situations (skidding) and takes corrective action to keep the vehicle on course
- Vehicle stability is maintained even at the time of high speed cornering
- ESC uses data supplied by a network of sensors to determine instability of a vehicle
- Corrective measures are taken by tweaks in the braking and engine management system to avoid skidding
- Prevents conditions like over-steer and under-steer

- Gives you total control of the Compass on any driving or road conditions.

www.Team-BHP.com

Electronic Stability Control

Jeep

Vehicle stability is maintained even in the most braking condition

With ESC :SC

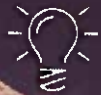

Hill Start Assist Control

Jeep

Automatically activates to prevent the vehicle from rolling backwards on up-hill drives
Keeps the brake pressed for few seconds after driver lifts foot from brake to give time to accelerate.

No roll back while starting from incline surfaces.

Perfect uphill starts eliminating roll back.

www.Team-BHP.com

Hill Start Assist Control

Jeep

Without HAS

With HAS

Source: SLS Pvt. Ltd.

Traction Control

Jeep

- Maintains optimum traction when sudden driving manoeuvres are made by the driver.
- Also activated on loose wet slippery road surfaces .
- Traction control works in sync with ESP system on Jeep vehicles .
- Independent brake force is applied to spinning wheel to shift torque to wheel with traction.

Maximum Traction when required .

www.Team-BHP.com

Cornering Fog lamps

Jeep

- Cornering fog lamp comes on automatically when the compass turns while the turn indicators are on.
- Also activate when sudden lane changes are made by driver

Cornering Fog Lamps

Great illumination while turning into dark corners.

Electronic Roll Over Mitigation

Jeep

When sudden direction change manoeuvres are made, the vehicle tends to roll over.

A YAW sensor measures change in vehicle rotation and activates roll over mitigation to prevent roll over.

ROM is connected to the traction control and EBD; additional brake force is applied to independent wheels to prevent roll over.

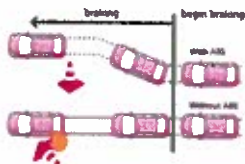

Prevents rolling over of the vehicle during evasive driving situations.

www.Team-BHP.com

Other Safety Features

Jeep

Four Channel ABS (Anti-lock Braking System)

Monitors the speed of each wheel individually, thus allowing individual wheel braking for superior control and avoiding skidding. Also provides back-up braking, in case one of the two braking circuit fails.

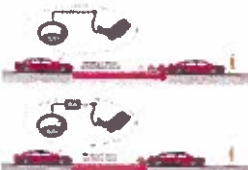

EBD

Electronic Brakeforce Distribution (EBD)

Regulates braking pressure front-to-end to optimize stopping distance and control under all vehicle loading conditions

Panic Brake Assist (PBA)

Senses emergency braking by detecting the rate of brake application and boosts brake power. Under certain cases activates ABS more quickly reducing the stopping distance, thus avoiding collision

Other Safety Features

Jeep

Hydraulic Boost Failure Compensation (HBFC)

If a failure is detected in the vacuum brake booster or related lines, the brake controller runs the ABS pump 'full time' and brakes perform normally until serviced, thus avoiding any unfortunate mishaps.

Electronic Brake Pre-fill (EBP)

Increases pressure in the brake system if the accelerator is released abruptly. Speeds up the braking effect in the event of subsequent heavy braking, thus enhancing safety.

**STRONG BUILD
QUALITY**

www.Team-BHP.com

Laser Welding Technology

Jeep

- ✦ Two or more pieces are joined together through the use of a laser beam
- ✦ No physical contact between the material and laser head.
- ✦ The laser weld is narrow with an excellent depth-to-width ratio and higher strength to joints
- ✦ Uniform rubber sitting over joints

Greater strength, Improved safety & Enhanced aesthetics

Plasma Cutting

Jeep

- + Cuts through electrically conductive materials by means of an accelerated jet of hot plasma
- + Aligns starting point of hood, bumper and headlights which most cars in India fail to do
- + Maintains precise gaps & flushness throughout the vehicle

Excellent fit & finish

www.Team-BHP.com

Hot Stamping

Jeep

- + Makes it possible to manufacture light, strong parts with complex geometry
- + Ideal for components requiring dimensional accuracy, high strength, toughness, good weldability, and light weight
- + Constructed of approximately 70-percent advanced, hot-stamped/high strength steels
- + The body structure is more solid and stiff than any in its competitive set

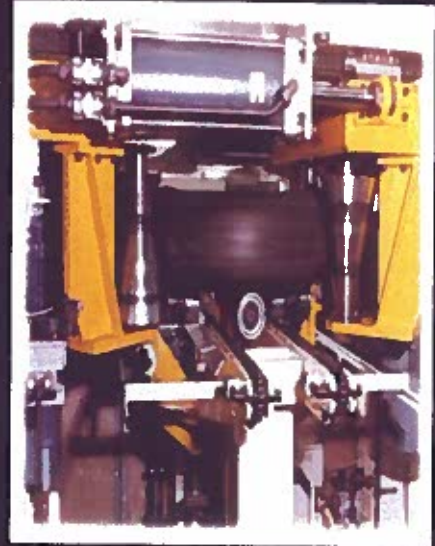

Ultra safe body shell with precise tuning

Tyre Bead Optimizer

Jeep

- Tyre fitment process optimized by using 4 conical rollers
- Operational load carried out by conical rollers to improve bead-seating
- No contact to rim and Centre Bore surface avoids deformation or damages
- Process ensures optimized tyre sitting in the rim without any damage

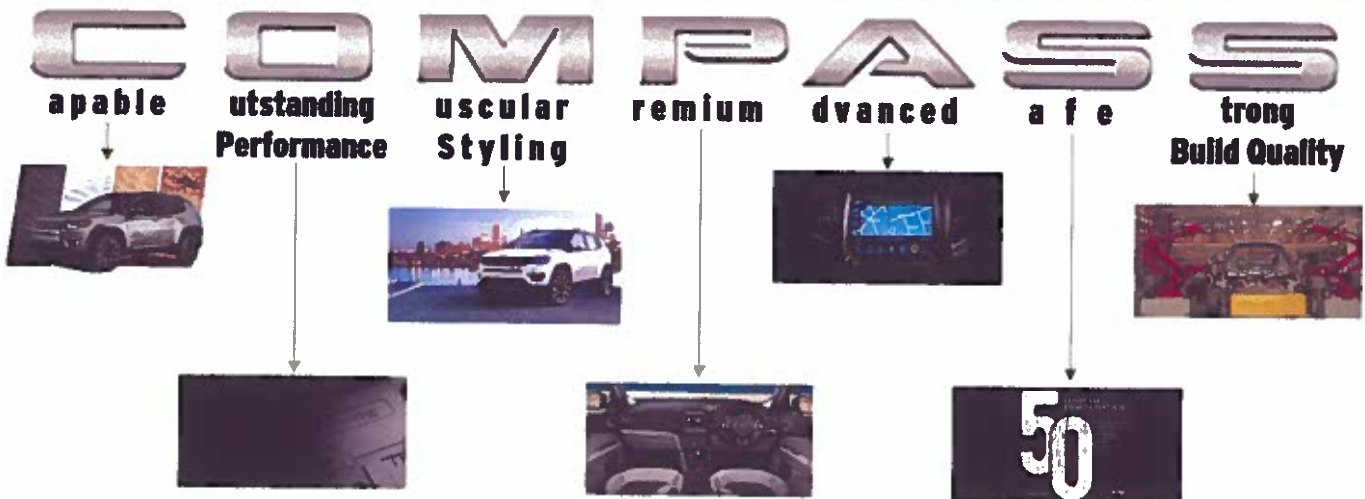

Perfectly balanced wheels for optimum ride and handling.
