# The best of the city

New Renault Captur has its eye on everything: it weighs up parking spaces before helping you park, warns you about potential hazards, helps you brake in an emergency and observes everything that goes on around you. New Captur: stay in control of your adventures!

## Protection

Fitted with front and front side airbags, New Renault Captur has very protective instincts. In the rear, the Isofix attachment system ensures that child seats can be safely installed.

## Hill Start Assist

When starting the vehicle on a slope, brake pressure is automatically maintained for two seconds, giving you time to move away.

## Hands Free Parking

Make parallel parking effortless! With its sensors, the system measures the available space before taking over the steering and completing the manoeuvre for you. Available from Dynamique S Nav.

#### Blind spot warning

The system detects the presence of any vehicle in the area that your rear-view mirrors do not allow you to see. Enabled between 19 and 87mph, the blind spot warning system immediately activates a warning light. Available from Dynamique S Nav.

#### Emergency Brake Assist

A sudden obstacle? Let your reflexes take over. When pressed abruptly, the brake pedal automatically boosts your braking in order to reduce your stopping distance.

#### Front fog lights with cornering function

When taking corners, the fog light on the side nearest the bend lights up automatically to give you a wider field of vision. Available from Dynamique S Nav
