In flashes of chrome. And blazes of steel. In the sparks that flare and blow a million times over.  
Unrelenting, quiet, by design. Thundering, roaring or simmering, to the tune of the road.  
Blazing trails on roads and hearts. Playing to gears concealed behind buttons.  
A metallic wind alive with whooshes, whizzes and wows. In an island of calm, submerged beneath  
this roaring dry sea. In its circle of care and safety. They meet in a blend. Engineered to be.

## Performance meets comfort. And how?

Presenting, the 8th generation of the most sought after luxury sedan,  
the new Honda Accord. Performance and Comfort. The Perfect Match.

# The flash of chrome. The blaze of steel.

A definitive symbol of sophistication, the Accord stands out with its distinctive front grille, sporty alloy wheels and the new electric sunroof. In fact, even at a first glance, the Accord, with its aerodynamic contours, is a real stunner. A bold aggressive look, muscular strokes connoting power and a striking presence with its sheer size make it among the most commanding car on the Indian roads. A forward thrusting nose with chiseled corners, flared fenders for a wider, solid stance, long and sleek headlights give it an unmistakable character. The Accord features a rigid chassis, wide opening doors and a shapely rounded cabin.

# The sparks that flare and blow a million times over. Unrelenting, quiet, by design.

An impressive example of Honda's power of technology, the Accord 2.4L i-VTEC, delivers an impressive power, as well as fuel economy and lower emissions.

#### **2.4L i-VTEC and 180ps**

The advanced i-VTEC engine delivers 180ps@6500rpm of power and ensures powerful acceleration as well as optimum fuel efficiency and low emissions. In fact, it is a thrill to drive with the Drive-by-Wire technology, that uses an electronic position sensor connected to the accelerator pedal that sends an electronic signal to PCM (Powertrain Control Module).

2.4L i-VTEC Engine

# The new Honda Accord V6 - Ultra performance, that thunders to your tune.

## 3.5L i-VTEC and 275ps

The revolutionary 6 cylinder 3.5L i-VTEC VCM engine delivers 275ps@6200rpm of power, making the Accord V6 one of the most powerful cars in its class. It combines two characteristics that rarely co-exist in conventional engines: performance and fuel economy.

## Variable Cylinder Management (VCM) Technology

With its flexible use of cylinders, the unique VCM (Variable Cylinder Management) technology virtually gives you three engines in one car. During start-up, accelerating or heading uphill, it will fire all 6 cylinders to give you maximum power. Once you've reached cruising speed, it will automatically drop down to 4 cylinders, or even 3, if it is an easy cruise. This maximizes both performance and fuel economy. What's more, the transition happens so smoothly that you won't even notice it, but for a discreet indicator light on the dashboard.

## ACM and ANC Technology

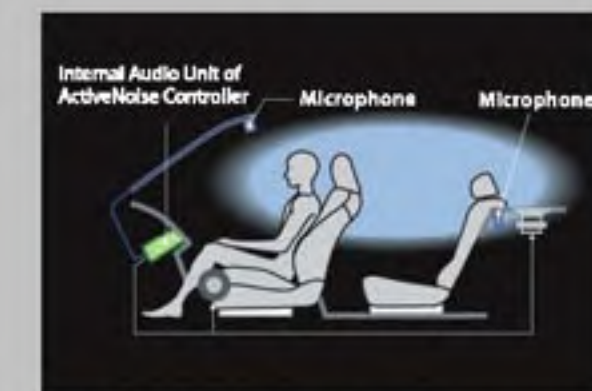

The ACM (Active Engine Mount System) cancels out engine vibration, ensuring a smoother, more comfortable ride. You can enjoy a silent ride with ANC (Active Noise Control) which nullifies unwanted noise that may occur due to the harmonics of cylinder operation, by generating out-of-phase sound waves

## Others

New Alloy Wheels, New Front Grille, Dual Exhaust and Wooden Panel on Steering.

3.5L i-VTEC Engine

ANC (Active Noise Control)

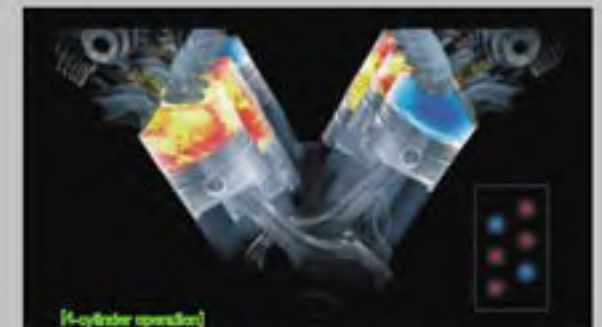

New Alloy Wheel\*

## VCM Technology

All 6 cylinders in use while starting up, accelerating or going up.

Usage drops from 6 to 4 at high cruising speeds or on mild incline.

At low cruising speeds and with low engine loads, it runs on just 3 cylinders.

New Front Grille\*

\*new V6 features

What blazes trails on roads and hearts. What plays to secret gears concealed behind buttons. What whooshes, whizzes and wows.

#### VGR

The VGR (Variable Gear Ratio) steering system responds sensitively and precisely, giving the sedan a smaller turning radius, making the car easily maneuverable, despite its size.

#### Intelligent 5-speed Automatic Transmission with Paddle Shift

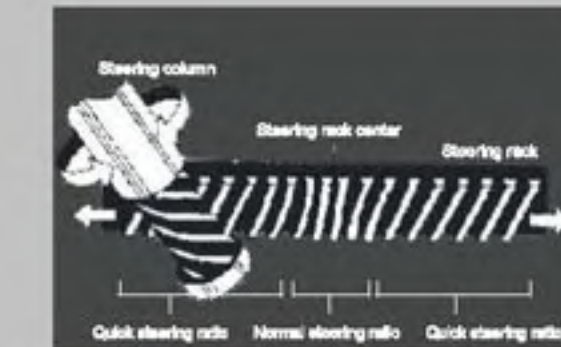

The intelligent electronically controlled 5-speed Paddle Shift takes driving comfort to a new level. A shift hold control system reduces unnecessary gear shift in cornering and supplies acceleration immediately after taking a turn.

#### Advanced Suspension

The advanced Double Wishbone Suspension in the front uses both lower and upper control links for better cornering or maneuvering. The Double Wishbone Suspension in the front and Multi-Link Rear Suspension ensures a smoother drive and better stability while cornering or taking fast turns.

#### The Platform Chassis and Rigid Body

The low floor and the underbody airflow management significantly reduce drag and lift in the Accord, giving it better maneuverability.

## Comfortable Position

Elegant yet modern, the vast, well-appointed cabin and the graceful woody panel of the Accord is designed to transport you to a new level of indulgence. The internal geometry of the Accord is so ingeniously conceived that it makes brilliant use of every inch of available space. The seating is as comfortable for rear passengers as it is for those in the front.

## Cruise Control

Now you can keep your eyes on the road, rather than the speedometer. The conveniently placed Cruise Control buttons on the steering wheel allow you to relax on long drives and maintain speed without bothering with the accelerator.

## Advanced Audio System

Tune in to an advanced audio system with a centre multi-selector jog dial, and rear audio controls. The intuitive interface makes it very easy to operate, while the scroll-down screen displays multiple data through different connections. The USB port gives you the luxury of connecting to an external device.

## Optimized Driving Position

Being in the driver's seat has never been so pleasurable. Accord lets you select a precise, natural and comfortable driving position unique to your height and comfort level, thanks to its 8-way power seat adjustment with lumbar support along with a tilt and telescopic steering.

## Rear Seat Comfort

Relaxing in the backseat is just as satisfying with improved rear legroom, rear AC vents, a reading light and rear audio controls.

# The circle of care and safety.

Not just power and performance, the Accord also sets the standard for safety. It comes equipped with VSA (Vehicle Stability Assist) along with the standard Accord safety features like the ABS, EBD, intelligent 6 airbags and G-CON.

## Intelligent Six Airbags

The Accord comes with six airbags - which protect from side impacts as well. In the event of frontal impact, the dual-stage, dual-threshold front airbags (i-SRS) inflate at different rates depending upon crash severity. The side airbags with OPDS (Occupant Position Detection System) inflate to help protect the driver and the front passenger's upper body in the event of a side impact.

## VSA

The Accord comes with the VSA (Vehicle Stability Assist) technology, which during an understeer or oversteer condition, brakes individual wheel and reduces engine power to help restore the intended course.

## ABS + EBD

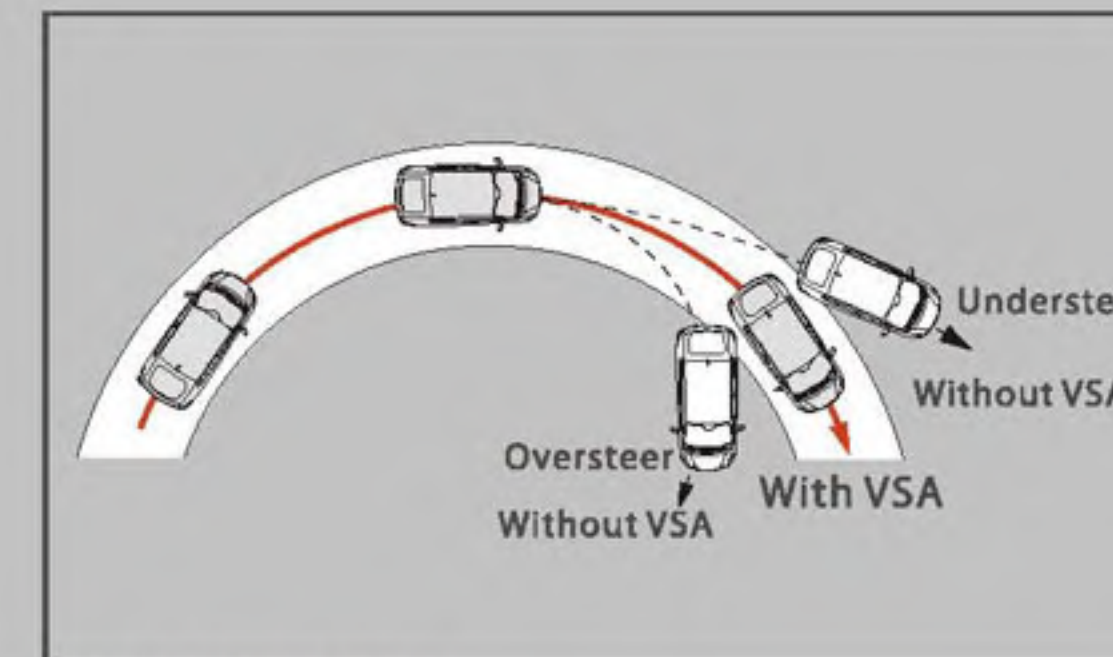

All Accord models feature 4-wheel disc brakes with Anti-lock Braking System (ABS) and Brake Assist. Also standard is Electronic Brake Force Distribution (EBD), helping braking performance by distributing brake force among the four wheels based on the load each wheel is bearing.

## Active Headrest

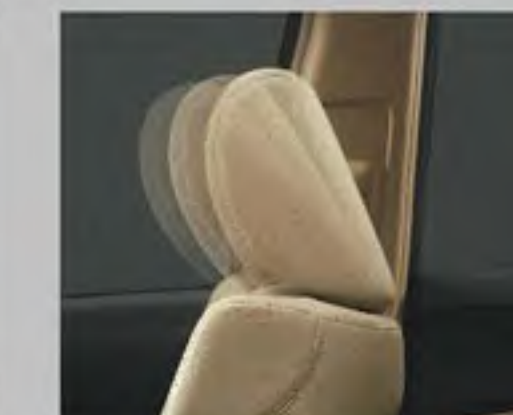

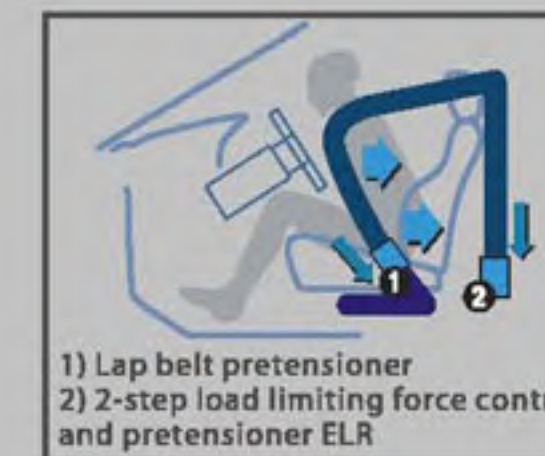

Front active headrests help mitigate neck shock in a rear-end collision. A link mechanism in the seat moves the headrest forward and upward to support the passenger's head.

## G-CON

Honda's original G-CON technology reduces the impact in the event of a car crash. Impact absorbing zones created with engineering expertise distribute G-force through the body structure. It also features pedestrian safety. In the event of a person coming in front of the car, it controls G-force transferred from the car to the person and helps reduce injuries.

# The Power of Dreams.

The power of dreams.

The dream of giving joy.

The dream of creating roads without accidents, a cleaner planet for ourselves and our children and technology that doesn't cost the earth.

The results.

Our G-CON technology that provides a safer driving experience.

The FCX Clarity - the world's first dedicated platform hydrogen vehicle.

The revolutionary i-VTEC engine that couples incredible power with great fuel efficiency.

Innovations like ASIMO, the FCX Clarity and HondaJet that push mobility beyond the realms of the conventional.

That help us inch towards realizing dreams.

That's the philosophy that drives us here at Honda.
