

TUCSON

Experience that open feeling.

A feeling of openness welcomes you the moment you step into TUCSON's cabin. The open-type cluster is a major innovation in design that establishes a premium, high-tech atmosphere that makes you feel safe, relaxed, and confident. Hidden out of sight, the innovative multi-air mode system diffuses cold or warm air gently and indirectly so it's not as harsh on your skin.

10.25" open cluster

Multi air vent

Full-touch center fascia (Personalized profiles)

Live for the moment.

Whether it's a solo adventure or a long weekend excursion with the entire family, TUCSON offers you exceptional versatility like the rear seat folding feature that provides 1,903 litres of flat storage space. The passenger space is equally accommodating with abundant amounts of room to keep everyone seated comfortably.

Your digital journey starts here.

Whatever the journey, time seems to fly by when you have a reliable travel companion along for the ride like TUCSON's 10.25-in infotainment system and the premium speakers from Bose. The touchscreen is easy to operate and synchs effortlessly with your smartphone to provide you some entertainment and information you need while on the road. And with Smart Cruise Control, highway driving is a lot more convenient.

10.25" LCD touchscreen

Cruise Control

Bose premium audio

You set the tempo.

Press the accelerator pedal and your pulse rate quickens as TUCSON responds with a surge of smooth, quiet power made possible by Smartstream, Hyundai's latest engine technology. You have a choice of three types of engines and for a nice high tech touch, push button gear selection is now a standard feature across the entire model range.

Smartstream engines

Gasoline 2.0

156 Maximum Power
ps/6,200 rpm

19.6 Maximum Torque
kg·m/4,500 rpm

Diesel 2.0

186 Maximum Power
ps/4,000 rpm

42.5 Maximum Torque
kg·m/2,000–2,750 rpm

Ready for anything.

Press the accelerator pedal and your pulse rate quickens as TUCSON responds with a surge of smooth, quiet power made possible by Smartstream, Hyundai's latest engine technology. You have a choice of three types of engines and for a nice high tech touch, push button gear selection is now a standard feature across the entire model range.

HTRAC All-Wheel Drive

When the weather takes a turn for the worse, HTRAC keeps you moving. The heart of this all-wheel drive system is an advanced electronic controller that continuously analyzes your speed and road conditions. It automatically optimizes torque distribution among the four wheels and will apply the brakes, if necessary, to ensure maximum traction and directional stability when the going gets rough.

Terrain Mode

With a quick flick of the switch, you can adjust the powertrain to suit challenging road and weather conditions: SNOW, MUD and SAND settings ensure you are getting maximum traction when the going gets really rough.

* Applies only to Smartstream Diesel 2.0 engine.

Drive Mode

With Drive mode, you get to pick the style suits you best: NORMAL is for relaxed everyday driving while ECO gives you optimal fuel efficiency. SPORT is for quicker acceleration, and SMART automatically adjusts gear shift intervals based on an analysis of your recent driving patterns.

Hyundai SmartSense

Forward Collision-Avoidance Assist (FCA, Junction Turning)

FCA capabilities have been expanded to include Junction Turning function. While driving if there is a risk of collision with an oncoming vehicle while turning right at an intersection, the function automatically assists with emergency braking.

Blind-Spot Collision-Avoidance Assist (BCA)

BCA uses rear corner radar to monitor both of your blind spots. If a vehicle is detected in the blind spot while the turn signal is flashing, BCA will automatically apply differential braking during your attempted lane change thus helping you avoid an unsafe lane change and a potential collision.

Rear Cross-Traffic Collision-Avoidance Assist (RCCA)

When backing out, RCCA warns the driver to the approach of a vehicle crossing his rearward path; if necessary, the emergency braking is automatically applied to avoid a collision.

Cruise Control (CC)

CC maintains the set speed while keeping a set distance away from the vehicle ahead without ever requiring any additional inputs from the driver.

Electric Park Brake With Auto Hold

Auto-hold is an extension of the electric park brake (EPB) that stops your car from accidentally rolling when you are stopping on a hill. To activate EPB, pull and hold the auto-hold button until the indicator light turns on, then your car is securely parked on even the steepest of hills.

Forward/Reverse Parking Distance Warning (PDW)

If your car is too close with obstacle, PDW warns you by using ultrasonic sensors in the front and rear bumpers. So you can avoid scratches and park safely.
