Palio Stile

The drive of the new generation

Multijet

After years of pioneering work in the world of diesel engines, Fiat introduces the next generation of the Common Rail Diesel Technology: Multijet.

This technology in the Palio Stile will make your car significantly more powerful and noiseless than any other similar car in the market. Plus you're now assured of more mileage and very little emission.

Of course, smooth drives apart, the new Palio Stile comes packed with several features to make it not just a smart looking car but also a smart buy.

The plush new interiors. The attractive new front grills. A lovely choice of colours.

So go ahead, test drive a car that's driven by the revolutionary new Multijet. And welcome a technology that car lovers and car makers are saluting the world over.
