GET INTO SOMETHING GOOD

the centre of attention: the all-new i20

From January 2009 there'll be a new shape on the street and it's called the Hyundai i20. As you would expect from a car company that buzzes with fresh ideas, novel solutions and top technology, the i20 is the epitome of the modern supermini. Sharp and stylish on the outside, spacious and versatile inside, it combines comfort, safety and reliability in a package that is affordable and economical.

SG PETCH
GET INTO SOMETHING GOOD

Key moment

i20's stylish design can be found even in the folding ignition key, which has a remote locking and unlocking facility and convenient folding bayonet.

Vehicles shown are not to UK specification and may show options or features not available in the UK.

style, space and versatility

Intelligent design has created a car with an airy interior and lots of space. Moreover, the space is used to generate practical and versatile solutions to different carrying requirements. Like the eye-catching exterior, the inside is superbly designed and beautifully put together. With high levels of comfort and numerous convenience features, the i20 has the capacity to cocoon you on your journey through the rigours of the modern world.

Guaranteed comfort

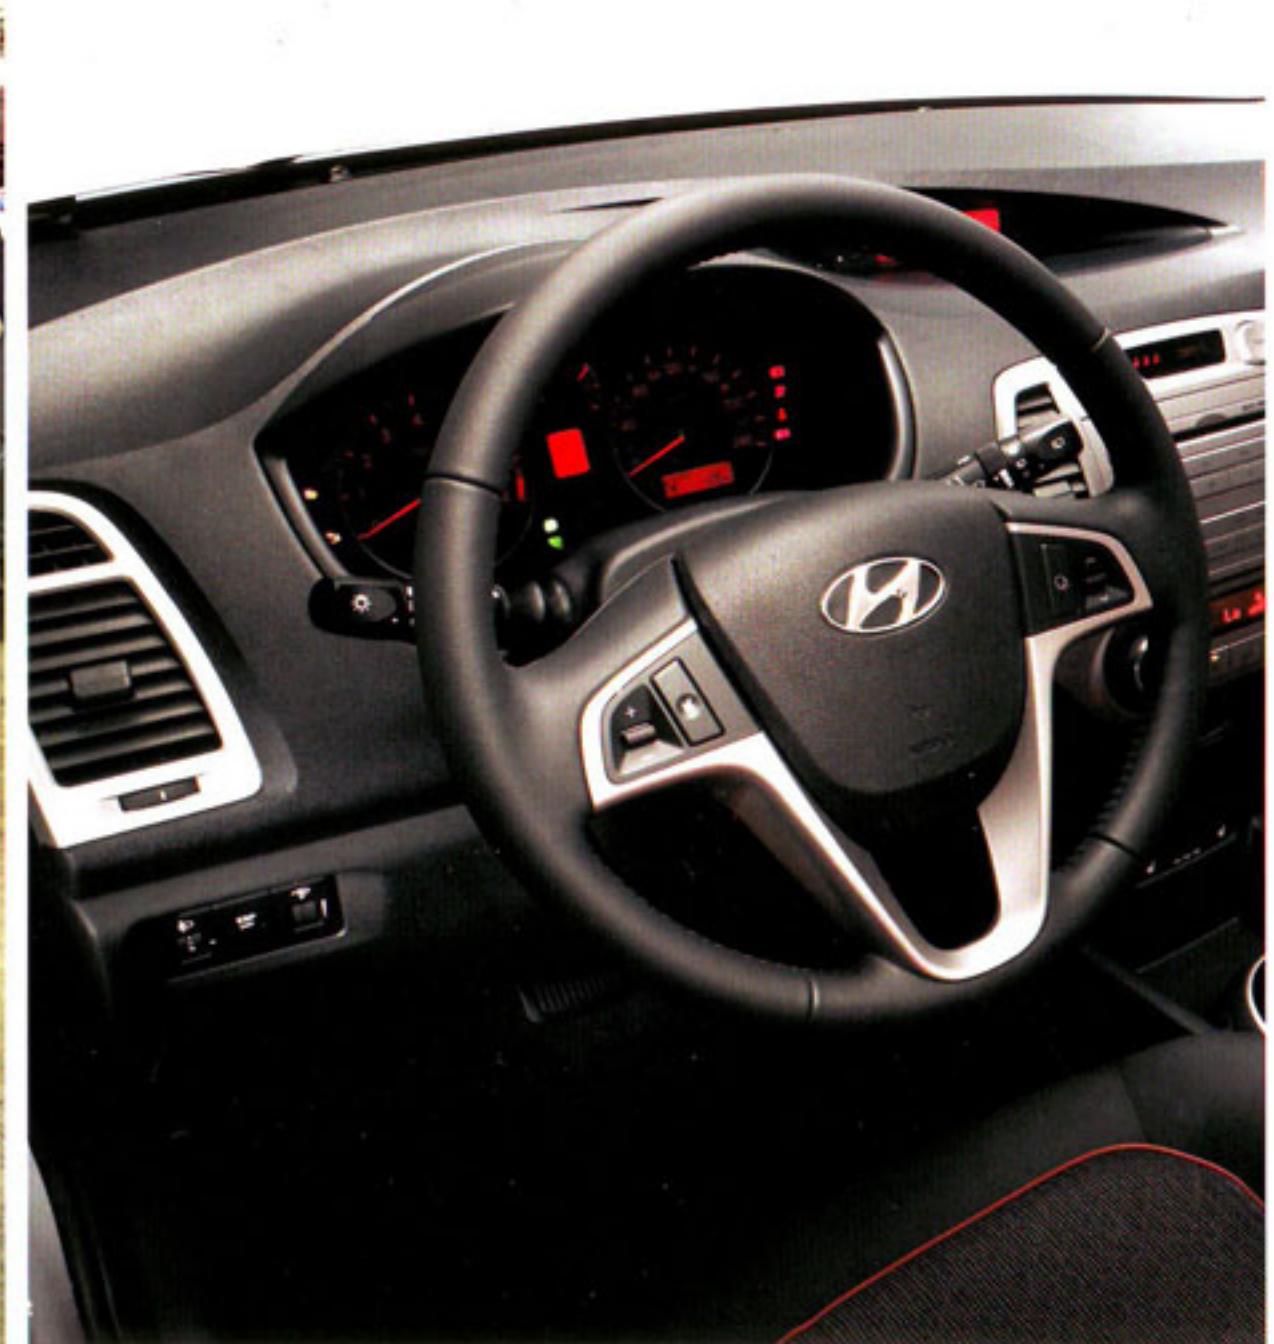

Everyone has experience of unpredictable weather extremes these days: unbearable heat, ice, snow, and rain. None of it matters to the occupants of the i20. Whatever the weather is like outside, the i20's air conditioning system helps you stay cool in summer, whilst its efficient heater warms up those chilly mornings in winter. Selected models benefit from climate control* providing effortless temperature adjustment whatever the weather.

*Climate control is standard on Style models

Information centre

The instrument panel's critical dials - the speedometer, engine rev counter and fuel gauge - are simple and clear. They surround a cluster of warning lights and on Comfort and Style models, a digital display panel that can reveal the trip distance, outside temperature, distance to empty and fuel consumption rate.

□ Something for everyone

The i20's bright, modern interior is a revelation. It contains a wealth of standard equipment, all beautifully put together and all within easy ergonomic reach. There's no need to be without your favourite music. At the base of the centre console there is a storage area with a built-in jack for an MP3 player*. On the transmission front (below), there is the choice of a super-slick five-speed manual gearbox or a four-speed automatic** gearbox, which is available as an optional extra.

* An additional USB socket is standard on Comfort and Style models

** Automatic gearbox available on 1.4 petrol Comfort

Vehicles shown are not to UK specification and may show options or features not available in the UK.

the choice is yours

There is an i20 for everyone, with three trim levels and a choice of six exterior body colours, according to preference. With a choice of petrol or turbo diesel engines and manual or automatic* transmissions, the difficulty for you is which combination to choose.

*Automatic gearbox available on 1.4 petrol Comfort

1.2-litre petrol

The new 1.2-litre petrol engine produces 78 PS and over 118 Nm of torque. It features a 16-valve cylinder head and light aluminium alloy construction for the block and head.

1.4-litre diesel

Two power output levels are available with the 1.4 common rail injection turbo diesel: 75 PS and 90 PS. Both produce the same excellent torque output of 220 Nm. All diesel engines comply with Euro IV emissions regulations.

1.4-litre petrol

The 1.4-litre petrol engine produces a remarkable 100 PS and torque in excess of 137 Nm. It has a 16-valve CVT cylinder head and all-alloy construction. All petrol engines comply with Euro IV emissions regulations.

safety standards

Rest assured, the i20 is your faithful ally in all safety matters thanks to the engineering integrity that went into its suspension, braking and body structure and to the safety systems that reduce injuries if an accident does happen. Not to mention the six airbags and active front head restraints as standard. In the event of a collision, the front of the car is designed to absorb as much of the impact energy as possible.

□ Active safety

i20 features an Anti-lock Braking System (ABS) with Electronic Brakeforce Distribution (EBD) as standard. This combination of systems helps prevent the brakes from locking when they are harshly applied, enhancing steering ability and retaining vehicle directional control in emergency situations or poor driving conditions.

Electronic Stability Programme (ESP)* is available as an optional extra for the i20 range. ESP works in combination with the ABS system to control the brake pressure to each wheel, manage the engine power output during acceleration and braking on low friction road surfaces, and help to deliver the maximum road holding and vehicle stability keeping you firmly in control.

*Electronic Stability Programme (ESP) is available as a special order only option. Therefore factory leadtimes apply when placing your order.

□ Passive safety

In the event of a collision, the i20's safety systems are designed to be instantly activated helping to protect you and your passengers in an emergency. Seat belt pre-tensioners are deployed fractionally ahead of the standard front, side and curtain airbags, keeping you firmly in place. In the event of a collision, active front head restraints provide further protection, reducing the possibility of sustaining a neck injury.
