Dear Friend,

Karting today, is considered as the most important & crucial step towards a career in racing. Besides being a stepping stone, karting by itself, is the largest form of motorsport. Formula 1 drivers like Michael Schumacher, Lewis Hamilton, Sebastin Vettel, Fernando Alonso, Kimi Raikonen and many more, all, started their careers in go-karts. Most of them continue to drive go-karts in their spare time even today.

Karting in India has come a long way in recent times. Today, boys & girls are able to participate in the National Championship at the age of just 7 years!

Whether you kart just for fun or are interested in taking the sport seriously, karting in the correct manner will give you a lot of satisfaction. Driving in a controlled manner with specific instructions and guidance is important. Mistakes need to be identified and corrected to improve driving skills and speed. Good karting is the perfect balance between smooth driving and speed. The key to a quick lap time is achieving a high corner speed.
