**MOTORCOATS™**  
CHARACTER LIKE NO OTHER

**MotorCoats** offer effective rats/ mouse control odours. MotorCoats Rat Guard generally work by taking advantage of rat's natural aversion to something, and often the thing chosen is something that the rats has learned to avoid (or instinctively avoids) in its natural environment.

Notorious for their nature of harming valuable property, rats can create havoc in agricultural produce or in residences. They contaminate food by their urine, faeces, and impart foul odour. This menace is efficiently addressed by our rodent control programme.

#### Why Rats Are Attracted to Vehicles?

Rats are attracted to any area that provides opportunities for safe harbourage. An ideal harbourage is accessible to the rat, a vehicle engine compartment is close to perfect. Additionally, the sound proofing insulation under the hood provides excellent nest-making material and engine wires are just right for the chewing necessary to maintain sharp teeth.

#### What is MotorCoats Rat Guard?

MotorCoats Rat Guard is a unique formulated odour base chemicals rat/mouse repellent. MotorCoats Rat Guard affects the mucous membrane of rats. As a result of which rats after a long exposure, gradually start developing fear from the smell and hence, moves away from the area where Rat Guard is positioned.

#### Why MotorCoats Rat Guard?

- To avoid starting problem in vehicles when rats cut the wires in engine bay and u will survive for the whole day till repair.
- With MotorCoats Rat Guard you can forget the days of removing dead rats and enjoy a world free from rat menace.
- MotorCoats Rat Guard is an ideal and long-term solution to Rat menace.
- The logic is that if rat cuts the factory wiring, and it is left alone so Manufacturer really cannot void your electrical warranty.

#### Where to place Rat Guard?

Engine Bay: place the container in engine bay where needed.  
House/ Buildings: Place the provided container in the kitchen, work area and rooms with rat trouble.  
Open area/agriculture fields: Place the container in the infested area.  
May be used only in the area of disturbance in your complete field.

#### Instructions

- Ensure keeping the container in the same spot continuously for better results
- Rat Guard gives best results when used in the area of infestation than keeping in Engine Bay
- Keep Container in all the infested areas of your compound / building if needed place more than one

#### How does it work?

The application of MotorCoats Rat Guard temporarily affects the mucous membrane of rats. The rats after a long exposure, gradually starts developing a fear to the smell and hence, moves away from the area where it is. The fear is well communicated with the other rats. As a result, its application can keep away other rats also from the area for a long time.

#### Why are Rodenticide/ Rat traps often ineffective?

Rats become aware of rodenticide after few rats are poisoned and also recognize traps upon seeing trapped rats. They also communicate the danger to other rats. Hence, it becomes impossible to catch or kill more than few rats by these methods. The ineffectiveness of Rodenticide/ Rat traps is evident from the amount of damage rats create in spite of its usage. High breeding rates and comparatively low killing rates of rats due to its fast awareness to traps and poisons stand as the main reason to the ineffective result of rodenticide / rat traps.

#### How does it work?

The application of MotorCoats Rat Guard temporarily affects the mucous membrane of rats. The rats after a long exposure, gradually starts developing a fear to the smell and hence, moves away from the area where it is. The fear is well communicated with the other rats. As a result, its application can keep away other rats also from the area for a long time.

#### AREA OF USES

Residence, Vehicle EngineBay, Food Godown, Factories, Shops, Hotels etc.
