SYSTEM DESCRIPTION

SMART ExR TECHNOLOGY

SMART ExR system represents the essence of Lovato's innovation and it has been designed for petrol engines from 2 to 4 cylinders. By selecting components, which perfectly complimented each other, the system is able to guarantee reliability and performance.

SMART ExR system uses the multipoint sequential injection technology: the injectors, controlled by the ECU, enter the gas into each cylinder and strictly replicate what happens during petrol operations.

SMART ExR system contains all the advanced functions required to ensure an unchanged driving experience with the latest cars.

More than 6 million people rely on Lovato to make the planet a better place.

Then what are you waiting for?

CNG MAIN ADVANTAGES

Saving in fuel cost

Lower CO₂ emissions

CNG vehicles are not subject to any kind of limits and can be parked anywhere

CNG service stations are rapidly growing
