OWNER'S MANUAL & SERVICE BOOKLET

- Keep With Vehicle At All Times
- Contains Warranty policy and Important Information On Safety, Operation & Maintenance

Part No. 99011M80T00-74E May, 2023 <u>ENG</u> This owner's manual applies to the JIMNY series.

NOTE: The illustrated model is one of the JIMNY series.

Copyright © **Maruti Suzuki India Limited.** 2023 All Rights Reserved No part of this document may be reproduced or transmitted in any form or by any means, electronic or mechanical, for any purpose, without the express written permission of Suzuki Motor Corporation.

FOREWORD

This manual is an essential part of your vehicle and should remain with the vehicle when resold or otherwise transferred to a new owner or operator. Please read this manual carefully before operating your new MARUTI SUZUKI and review the manual from time to time. It contains important information on safety, operation and maintenance. You are invited to avail the three Free Inspection Services as described in the manual. Three free inspection coupons are attached to this manual. Please show this manual to your dealer workshop while you take your MARUTI SUZUKI for any Service.

To prolong the life of your vehicle and reduce maintenance cost, the periodic maintenance must be carried out according to "PERIODIC MAINTENANCE SCHEDULE" described in "INSPECTION AND MAINTENANCE" section of this manual. It is essential for preventing trouble and accidents to ensure your satisfaction and safety.

Daily inspection and care as per "DAILY INSPECTION CHECKLIST" described in the "OPERATING YOUR VEHICLE" section of this manual is essential for prolonging the life of the vehicle and for safe driving.

Vehicle and the available features/accessories therein should be used and plied by the owner/user in accordance with the applicable legal requirements.

MARUTI SUZUKI INDIA LIMITED believes in conservation and protection of Earth's natural resources.

To that end, we encourage every vehicle owner to recycle, trade-in or properly dispose of, as appropriate, used Engine Oil, coolant and other fluids, batteries and tyres etc.

MARUTI SUZUKI INDIA LIMITED

All information in this manual is based on the latest product information available at the time of publication. Due to improvements or other changes, there may be discrepancies between information in this manual and your vehicle. MARUTI SUZUKI INDIA LIMITED reserves the right to make production changes at any time, without notice and without incurring any obligation to make the same or similar changes to vehicles previously built or sold.

This vehicle may not comply with standards or regulations of other countries. Before attempting to register this vehicle in any other country, check all applicable regulations and make any necessary modifications.

IMPORTANT

WARNING/ CAUTION/NOTICE/

Please read this manual and follow its instructions carefully. To emphasize special information, the symbol and the words **WARNING**, **CAUTION**, **NOTICE** and **NOTE** have special meanings. Pay particular attention to messages highlighted by these signal words:

WARNING

Indicates a potential hazard that could result in death or serious injury.

A CAUTION

Indicates a potential hazard that could result in minor or moderate injury.

NOTICE

Indicates a potential hazard that could result in vehicle damage.

NOTE:

Indicates special information to make maintenance easier or instructions clearer.

75F135

The circle with a slash in this manual means "Don't do this" or "Don't let this happen".

NOTE:

- Words like car, model/variant are invariably used in this manual to denote the "Vehicle".
- Pictorial representations used in this manual are for reference purposes only.

MODIFICATION WARNING

WARNING

Do not modify your vehicle. Modification could adversely affect safety, handling, performance, or durability and may violate governmental regulations. In addition, damage or performance problems resulting from modification shall not be covered under warranty.

NOTICE

Improper installation of mobile communication equipment such as cellular telephones, CB (Citizen's Band) radios may cause electronic interference with your vehicle's ignition system, resulting in vehicle performance problems. Consult your Maruti Suzuki authorized workshop or qualified service technician for advice on installing such mobile communication equipment.

NOTICE

The diagnostic connector of your vehicle is prepared only for the specific diagnostic tool for inspection and service purpose. Connecting any other tool or device may interfere with electronic parts operations and cause running out of batteries.

"WARNING"

Vehicle may break-down, meet with an accident or catch fire due to

- 1. Installation of
 - High wattage bulbs
 - Non genuine lamps / horns
 - Modified suspension / wheels
 - Non genuine parts/accessories etc.
- 2. Retrofitment of LPG / CNG fuel systems/kits.
- 3. Usage of domestic LPG.
- 4. Short circuiting due to tampering of wiring harness.

CAUTION: DO NOT STORE OR CARRY INFLAMMABLE MATERIALS IN THE VEHICLE.

Avoid driving into or starting the vehicle in a heavily water logged area. Vehicle may breakdown or engine may fail due to

- 1. Water entry into the engine (which may lead to hydrostatic lock).
- 2. Short circuiting of the electrical systems.

If the vehicle is stuck in deep water, do not start / crank the vehicle until the level of water drops below the level of exhaust pipe.

NOTE:

IF THE VEHICLE IS SUBMERGED IN WATER, REPORT TO THE NEAREST AUTHORIZED WORKSHOP.

"CAUTION"

- 1. Retro-fitment of LPG / CNG kit may deteriorate vehicle performance, reduce engine & engine related component's life and also warranty will be null and void for such vehicles.
- 2. Do not use domestic LPG/LPG cylinder for your factory fitted LPG vehicles.
- 3. Usage of domestic LPG for running vehicles is prohibited as per law.
- 4. Do not remove company fitted LPG/CNG kit to install some other kit. It may affect vehicle performance and may cause fire.
- 5. Drive slowly on wet roads. Tires may slip while braking at higher speeds due to aquaplaning.(reduced contact area between tire and road due to presence of water)
- 6. Do not leave engine running in garages or confined areas, with passengers inside. This may result in accumulation of carbon-monoxide in cabin and may lead to suffocation or breathing problems.
- 7. Do not park vehicle on dry leaves or grass. This may lead to fire due to hot catalytic converter, igniting the dry leaves/grass.
- 8. If the vehicle is equipped with CNG/LPG, ensure availability of fire extinguisher in the vehicle all the time.
- 9. Always wear seat belt at all the times.
- 10. Do not use mobile phone while driving.
- 11. Avoid Smoking in the car, live bud thrown in car may cause fire.
- 12. Do not put any body part under the vehicle when it is supported on a Jack.
- 13. Do not use non-genuine accessories in your vehicle.
- 14. Do not fit accessories from unauthorized workshops/sources.
- 15. Usage of non-approved electrical accessories in your vehicle may result in spark, fire or personal injury.
- 16. Do not use camphor, incense sticks inside cabin room. Doing so may cause fire.
- 17. Avoid usage of cellular phones while refueling. Electric current and/or electronic interference from cellular phones can potentially ignite fuel vapors and cause fire.
- 18. Avoid entry inside vehicle immediately once after you have begun refueling. You can generate a build up of static electricity by touching, rubbing or sliding against any item or fabric capable of producing static electricity. Static electricity discharge can ignite fuel vapors and may causing a fire.
- 19. Do not check the engine room / open the hood near the fire area (Outside the vehicle). Fuel, washer fluid, etc. are flammable oils that may cause fire.
- 20. Avoid driving when vehicle has met with an accident. Before driving, Please contact with authorized MSIL dealership.

WARRANTY POLICY

Maruti Suzuki India Limited (hereinafter called "Maruti Suzuki"), warrants that each new Maruti Suzuki vehicle distributed in India by Maruti Suzuki and sold by a Maruti Suzuki authorised dealer will be free, under normal use and service, from any defects in material and workmanship at the time of manufacture SUBJECT TO THE FOLLOWING TERMS AND CONDITIONS:

(1) Qualification:

To qualify for this warranty the vehicle must be delivered by a Maruti Suzuki authorised dealer and set-up, and serviced by a Maruti Suzuki authorised workshop.

(2) Term:

The term of the warranty shall be twenty-four (24) months or 40,000 kilometers (whichever occurs first) from the date of invoice to the first owner.

NOTICE

Maruti Suzuki offers warranty of sixty (60) months or 1,00,000 kilometers (whichever occurs first) for Lithiumion battery & Integrated Starter Generator (ISG) in petrol model from the date of invoice to the first owner.

(3) Maruti Suzuki Warranty Obligation:

If any defect(s) should be found in a Maruti Suzuki vehicle within the term stipulated above, Maruti Suzuki's only obligation is to repair or replace at its sole discretion any part shown to be defective, with a new part or the equivalent at no cost to the owner for parts or labour, when Maruti Suzuki acknowledges that such a defect is attributable to faulty material or workmanship at the time of manufacture. Such defective parts, which have been replaced, will become the property of Maruti Suzuki. The owner is responsible for any repair or replacements which are not covered by this warranty. The decision of Maruti Suzuki shall be final & binding.

(4) Limitation:

This warranty shall not apply to:

- (a) Normal maintenance service required other than the three free services, including without limitation, oil and fluid changes, Consumables, headlight aiming, fastener retightening, wheel balancing, wheel alignment and tyre rotation, cleaning of injectors, adjustments of clutch and valve clearance.
- (b) The normal wear of parts including without limitation, bulbs, tyres* and tubes, spark plugs, belts, hoses, filters, wiper blades, brushes, contact points, fuses, clutch disc, brake shoes, brake pads, cable and all rubber parts (except oil seal and glass run).
- (c) Any vehicle which has been used for competition, rallies or racing.
- (d) Any repairs or replacement arising from accidents or collision.
- (e) Any defect/ damage caused by misuse, negligence, abnormal use, insufficient care, vandalism, theft, riot, fire, flooding not limited to entry of water in the components resulting in engine seizure, hydrostatic lock, etc. or external damages to the body/ components.
- (f) Any damage resulting due to usage of adulterated fuel/ lubricants/ oil/ coolant/ fluids/ polishing products and fuel/ lubricants/ oil/ coolant/ fluids used other than those specified in the Owner's Manual.
- (g) Any vehicle which has been modified or altered, including without limitation, the installation of performance accessories, enlargements of lights, other changes and external/ consequential reasons.
- (h) Any vehicle on which parts or accessories not approved by Maruti Suzuki (Non-MSGA, Non-MSGP) have been used.

(* - If there is a complaint related to tyre, the customer may contact respective tyre manufacturer.)

- Any vehicle which has not been operated in accordance with the operating instructions in this Owner's Manual and Service Booklet.
- Any vehicle which has not received the service inspections prescribed in this Owner's Manual and Service Booklet.
- (k) Any vehicle which has been assembled, disassembled, adjusted or repaired by other than a Maruti Suzuki authorised workshop.
- (I) Any vehicle which has been used for purposes other than what it was designed for.
- (m) Any damage or deterioration caused by airborne fallout, industrial fallout, acid rain, hail or hail storm, wind storm, lightning, bird droppings, rodents bite / rat bite and such other thing that result in damage to the vehicle.
- (n) Insignificant defects / noise which do not affect the function of the vehicle including without limitation, sound, vibration and fluid seep.
- (o) Any natural wear and tear including without limitation, ageing, wear & tear or deterioration such as discoloration, fading, deformation or blurring and fabric discoloration.
- (p) Installation and usage of domestic LPG gas/LPG Cylinder.
- (q) V-belts, hoses and gas leaks.
- (r) Any vehicle retrofitted with LPG/CNG kits.
- (s) Repainting including patchwork, bodywork and mouldings and interior trims.
- (t) Corrosion, rusting of body parts and/ or components.
- (u) Any vehicle on which odometer has been changed unauthorisedly or odometer reading has been modified/ tampered with/ or not matching the service records.
- (v) The damage(s) caused to the vehicle being unattended despite knowledge that the defect exists and ignorance by the owner/ user of the vehicle.
- (w) Any damage(s) caused to vehicle including battery/ tyre due to parking of the vehicle in idle condition for long duration of time periods.

- (x) Any vehicle on which the retro-fitment is not authorized and/ or type approved as per the standards prescribed by the relevant authority including but not limited to Automotive Standards of India.
- (y) Any vehicle on which the retro-fitment is such which directly or indirectly causes any damage to the vehicle or affects the functions of the vehicle in any manner whatsoever.

(5) Extent of Warranty:

This warranty is the entire written warranty given by Maruti Suzuki for Maruti Suzuki vehicles and no dealer or its or his agent or employee is authorised to extend or enlarge this warranty and no dealer or its or his agent or employee is authorised to make any oral warranty or representation or assurance on behalf of Maruti Suzuki.

Maruti Suzuki reserves the right to add any improvements or change the design of any model at any time with no obligation to make the same changes on units previously sold.

(6) Warranty Service:

To obtain warranty service, the complete vehicle must be presented at the owner's expenses to Maruti Suzuki authorised workshop.

The customer shall be responsible for his belongings or accessories fitted in the vehicle at the time of presenting the vehicle for service and no claim shall be entertained in any manner under any circumstances.

(7) Owner's Warranty Obligations:

NOTICE

The owner shall not use the vehicle in a damaged condition and report the same immediately to the nearest Maruti Suzuki authorized workshop. This would result in early inspection and repair of the vehicle and any possible harm to the person or aggravation of damage to the vehicle can be prevented.

It is responsibility of each owner to:

- Have performed, at his own expenses, by a Maruti Suzuki authorised workshop all the service inspections specified in the Maruti Suzuki "Owner's Manual and Service Booklet" and maintain adequate proof that such service inspections have been performed.
- Update and maintain the 'Customer service maintenance records' page in the "Owner's Manual and Service Booklet", whenever service inspection or warranty service is carried out on the vehicle in a Maruti Suzuki authorised workshop.
- Present the Maruti Suzuki "Owner's Manual and Service Booklet" to the Maruti Suzuki authorised workshop whenever requesting service inspections or warranty service.

If the "Owner's Manual and Service Booklet" should be lost or destroyed the owner should consult the Maruti Suzuki authorised dealer from whom the vehicle was purchased for instructions concerning replacement of the "Owner's Manual and Service Booklet".

(8) Disclaimer of Consequential Damage:

Maruti Suzuki assumes no responsibility for loss of vehicle, loss of time, inconvenience or any other indirect incidental or consequential damage resulting from the vehicle not being available to the owner because of any defect covered by this warranty.

(9) Change of Owner

Even if ownership of the vehicle changes, the remaining warranty period is effective for the new owner.

This warranty is applicable only in India and not transferable to any other country.

NOTE:

Notwithstanding the warranty obligations, Maruti Suzuki may reuse reworked (refurbished) parts for undertaking rectification of recalled vehicles in terms of applicable laws.

EMISSION WARRANTY POLICY

Maruti Suzuki offers the Emission Warranty on all Maruti Suzuki vehicles (apart from the Regular Warranty and will run parallel to the regular product warranty) only in four metropolitan cities (New Delhi, Kolkata, Mumbai and Chennai) with effect from July 1st, 2001

Terms:

The Emission Warranty will be applicable for **80,000 kms or 3 years** (Whichever comes earlier) from the date of invoice to the first owner. The remaining warranty terms will be valid in case of any change in ownership provided the production of all valid documents.

Conditions:

- Under Emission Warranty, Warranty claims will be admitted for a prima-facie examination, in case vehicle fails to meet the Emission Standard as specified in sub rule (2) of rule no. 115 of Central Motor Vehicles Rules (CMVR), 1989.
- The warranty claims will only be accepted after examination carried out by Maruti Suzuki or Maruti Suzuki authorised workshop which leads to firm conclusions that the
 - a) Original settings have not been tampered in any case.
 - b) Part (as given in Annexure A) has a manufacturing defect.
 - c) Vehicle is unable to meet the Emission Standards (as given in 1.), inspite of the vehicle having been maintained and used in accordance with the instructions as specified in Owner's Manual and Service Booklet and the used fuel and different oils (Engine oil, Transmission oil, Brake oil etc.) are also as per specification.

- 3. The method of examination for deciding the warranty of the parts will be at the sole discretion of Maruti Suzuki and Maruti Suzuki authorised workshop and results of the examination will be final and binding. If after examination, the warrantable condition is not established, Maruti Suzuki and Maruti Suzuki authorised workshop has the right to charge all, or part of the cost of such examination.
- Under Emission Warranty, the parts (as given in Annexure A) will be changed free of cost, but the consumables will be charged as per actual.
- 5. If the part covered under Emission Warranty or the associated parts, are not independently replaceable, on account of these being integral parts of a complete assembly, Maruti Suzuki and Maruti Suzuki authorised workshop will have the sole discretion to replace either the entire assembly or by using some of the parts of the system through suitable repairs or modifications.
- 6. Any consequential repairs or replacement of parts which may be found necessary to establish compliance of Emission Warranty, will not be considered under warranty, unless the same is under product warranty. The consumable will be charged as per actual under such repair or replacement.
- 7. Maruti Suzuki will not be responsible for the cost of transportation of the vehicle to the nearest Maruti Suzuki authorised workshop or any loss due to non-availability of the vehicle during the period of lodging of a warranty claim and examination and/or repair by Maruti Suzuki authorised workshop.
- Maruti Suzuki will not be responsible for any penalty that may be charged by statutory authorities on account of failure to comply with the EMISSION STANDARDS.
- Emission Warranty will not be affected by the change of owner, provided all the documents are available.

- All maintenance actions (as specified in the Owner's Manual and Service Booklet) need to be followed and recorded in the manual for emission warranty.
- 11. The customer needs to produce the PUC (Pollution Under Control) certificate valid for the period preceding the test during which the failure is discovered. The receipts (for the maintenance of the vehicle as per specification in Owner's Manual and Service Booklet from the date of original purchase of the vehicle) will also be required.

Conditions under which the Emission Warranty is not APPLICABLE

- 1. In the absence of valid PUC certificate.
- Vehicle not serviced from Maruti Suzuki authorised workshop as per the schedule specified in the Owner's Manual.
- 3. Vehicle subjected to abnormal use (accident, motor race, rallies or for the purpose of establishing the records etc).
- 4. Use of non MSGP (Maruti Suzuki Genuine Part).
- 5. Vehicle that has been tampered with.
- Tampering with odometer so that the actual kilometer reading cannot be determined.
- 7. Use of adulterated fuel and/or unspecified oils (Engine oil, Transmission oil and Brake oil etc).

Annexure - A

List of parts (if applicable) covered under Emission Warranty

- Fuel Injection Assembly, Pressure Regulator, Throttle Body Assembly.
- 2. Electronic Control Module (ECM).
- Intake Manifold.
- 4. EGR valve.
- 5. Ignition Coil.
- 6. Canister Assembly.
- 7. Vapour Liquid Seperator.
- 8. Fuel Tank and Filler Cap.
- 9. PCV (Positive Crankcase Ventilation) Valve.
- 10. Oil Filler Cap.
- 11. Catalytic Convertor.
- 12. Exhaust Manifold.
- 13. All Fuel Injection System related Sensors.
- 14. High Pressure Fuel Pump.
- 15. Glow Plug.
- 16. Glow Plug Controller.

Warning Lights and Indicators Warning Lights

80TM01001

- If a warning light continues to be lit or is blinking, there may be a problem with the vehicle or the system. Carefully read the following reference information and consult with a Maruti Suzuki authorized workshop.
- It is considered normal that warning lights and indicators marked with an asterisk (*) are lit when turn the ignition switch to "ON" position or pressing the engine switch to change the ignition mode to ON (i.e., high engine coolant temperature warning light initially lights up in red). If such lights do not light up, consult with a Maruti Suzuki authorized workshop.
- For the ENG A-STOP system, there is the particular condition that a warning light or an indicator is lit.

FAQ Q&A

Refer to the following list of frequently asked questions.

Door opening / closing

- Q. The keyless entry system does not work. What should I do?
- A. There is a possibility that something is interfering with the function of the keyless entry system. Refer to "Keyless Entry System" in the "BEFORE DRIVING" section.
- A. If the battery of the keyless entry system transmitter or keyless push start system remote controller is dead, replace it. Refer to "Battery Replacement" in the "BEFORE DRIVING" section.
- Q. A loud alarm sounds when opening the door. What does this mean?
- A. The security system has been activated. Press the engine switch to change the ignition mode to ON to stop the alarm. For the correct method of handling, refer to "Security System (if equipped)" in the "BEFORE DRIVING" section.

Window glass

- Q. How can I clear fog on the inside of the windshield and door glass areas?
- A. Use the defroster switch. Refer to "Manual Heating and Air Conditioning System" or "Automatic Heating and Air Conditioning System" in the "OTHER CONTROLS AND EQUIPMENT" section.
- Q. How can I clear fog on the inside of the rear window glass?
- A. Use the heated rear window switch. Refer to "Heated Rear Window Switch" in the "BEFORE DRIVING" section.

QUICK GUIDE

Tyres

- Q. I get a flat tyre. What should I do?
- A. Change the flat tyre with a spare tyre. Refer to "Changing Wheels" in the "EMERGENCY SERVICE" section.

Running out of battery

- Q. The battery runs out and the engine does not start. What should I do?
- A. Connect the battery of a vehicle for assistance to jump leads and start the engine. Refer to "Jump-starting Instructions" in the "EMERGENCY SERVICE" section.

Engine oil

- Q. I would like to change the engine oil. What should I do?
- A. Refer to "Engine Oil and Filter" in the "INSPECTION AND MAINTENANCE" section and "Specifications" in the "SPECIFICATIONS" section.

ENG A-STOP system

- Q. The ENG A-STOP system does not work. What should I do?
- A. Refer to "ENG A-STOP" in the "OPERATING YOUR VEHICLE" section.

Electrical equipment

- Q. The headlights or brake lights do not light up. What should I do?
- A. Check the light bulbs. Refer to "Bulb Replacement" in the "INSPECTION AND MAINTENANCE" section and "Specifications" in the "SPECIFICATIONS" section.
- Q. I cannot use an electrical device. What should I do?
- A. Check the fuses. Refer to "Fuses" in the "INSPECTION AND MAINTENANCE" section.

Driver's Seat Floor Floor Mats

55T020010

To prevent the driver's side floor mat from sliding forward and possibly interfering with the operation of the pedals, genuine Maruti Suzuki floor mats are recommended.

Whenever you put the driver's side floor mat back in the vehicle after it has been removed, hook the floor mat grommets to the fasteners and position the floor mat properly in the footwell.

When you replace the floor mats in your vehicle with a different type such as all-weather floor mats, we highly recommend to use genuine Maruti Suzuki floor mats for proper fitting.

▲ WARNING

Failure to take the following precautions may result in the driver's side floor mat interfering with the pedals and causing a loss of vehicle control or an accident.

- Check that the floor mat grommets are hooked to the fasteners.
- · Never stack floor mats.
- Never use a floor mat which does not fit the floor as the same may cause hindrance/damage in vehicle and its functioning.
- · Never use damaged floor mats.

Clearing the Floor

69RHS157

WARNING

Do not leave empty cans, etc. at your feet. These objects may interfere with pedal operation and cause accidents.

Seat Belts and Child Restraint **Systems**

59RN02300

WARNING

- · Wear your seat belts at all times.
- · An airbag supplements or adds to the frontal collision protection offered by seat belts. The driver and all passengers must be properly restrained by wearing seat belts at all times, even if driving for a very short distance, whether or not an airbag is mounted at their seating position, to minimize the risk of severe injury or death in the event of a collision.

(Continued)

▲ WARNING

(Continued)

· Do not modify, remove, disassemble seat belts. Doing so may prevent them from functioning properly and cause the risk of severe injury or death in the event of a collision.

59RN02400

2-2

- Never allow persons to ride in the cargo area of a vehicle. In the event of an accident, there is a much greater risk of injury for persons who are not riding in a seat with their seat belt securely fastened.
- Ensure that all seat belts are worn correctly. An improperly worn seat belt increases the risk of injury or death if a collision occurs.
- Seat belts should always be adjusted as follows:
 - the lap portion of the belt should be worn low across the pelvis, not across the waist.
 - the shoulder straps should be worn on the outside shoulder only, and never under the arm.
 - the shoulder straps should be away from your face and neck, but not falling off your shoulder.
- Seat belts should never be worn with the straps twisted and should be adjusted as tightly as is comfortable to provide the protection for which they have been designed. A slack belt will provide less protection than a snug belt.
- Check that seat belt latch plate (tongue) is inserted into the proper buckle especially in the rear seats. It is not possible to insert into the wrong buckles in the rear seats.

(Continued)

WARNING

(Continued)

- Pregnant women should use seat belts, although specific recommendations about driving should be made by the woman's medical advisor. Remember that the lap portion of the belt should be worn as low as possible across the hips, as shown in the illustration.
- Do not wear seat belts over hard, fragile, or sharp items such as pens, keys, eyeglasses, etc in pockets or on clothing. The pressure from seat belt on such items can cause injury in case of an accident.

50RNI02///

 Do not hold a child on a passenger's lap. Even if the passenger holds the child tightly, he/she would not be supported enough in the event of an accident and it could result in a serious injury of the child.

(Continued)

WARNING

(Continued)

- Never use the same seat belt for more than one occupant and never attach a seat belt over an infant or child being held on an occupant's lap. Such seat belt use could cause serious injury in the event of an accident.
- Periodically inspect seat belt assemblies for excessive wear and damage. Seat belts should be replaced if webbing becomes frayed, contaminated or damaged in any way. It is essential to replace the entire seat belt assembly after it has been worn in a severe impact, even if damage to the assembly is not obvious.
- Children aged 12 and under should ride properly restrained in the rear seat.

(Continued)

(Continued)

- Infants and small children should never be transported unless they are properly restrained. Restraint systems for infants and small children can be purchased locally and should be used. Check that the system you purchase meets applicable safety standards. Read and follow all the directions provided by the manufacturer.
- For child, if the seat belt irritates the neck or face, use a child restraint system appropriately for the child. The seat belts of your vehicle are principally designed for persons of adult size.
- Avoid contamination of seat belt webbing by polishes, oils, chemicals, and particularly battery acid. Cleaning may safely be carried out using mild soap and water.
- Do not insert any items such as coins and clips into the seat belt buckles, and be careful not to spill liquids into these parts. If foreign materials get into a seat belt buckle, the seat belt may not work properly.
- All seatbacks should always be in an upright position when driving, or seat belt effectiveness may be reduced. Seat belts are designed to offer maximum protection when seatbacks are in the upright position.

Adjustment before Driving

80J014

WARNING

- When driving, do not adjust the steering wheel (only adjustable type with certain specifications), the seat, the inside rearview mirror or the outside rearview mirrors. Otherwise, there is the risk of mistaken operation of the steering wheel or reduced awareness of what is in front of you, possibly leading to an accident.
- Do not tilt the seatback further back than necessary. Otherwise, the head restraint and the seat belt cannot function as intended.

Correct Use of Seat Belt

69RHS158

- Adjust the seat to the correct position.
 Sit your body fully into the seat.
- Make sure that the seat belt is not twisted.
- Make sure that you place the lap portion of the belt as low as possible across the pelvis.
- The upper belt should rest on the area midway between the shoulder and the base of the neck.
- Confirm that the belt is not twisted in any way, and remove any slack.

77R20050

- If you do not fasten your seat belt properly, your body may not be restrained in a sudden braking and a collision. This may cause severe injury.
 - Fasten your seat belt properly before driving.
- If all the passengers do not fasten their seat belts properly, their body may not be restrained in a sudden braking and a collision. This may cause severe injury.

Ask all the passengers on the front passenger's seat and the rear seats to fasten their seat belts properly before driving.

Front Seats Seat Adjustment

WARNING

- Never attempt to adjust the driver's seat or seatback while driving. The seat or seatback could move unexpectedly, causing loss of control. Check that the driver's seat and seatback are properly adjusted before you start driving.
- To avoid excessive seat belt slack, which reduces the effectiveness of the seat belts as a safety device, check that the seats are adjusted before the seat belts are fastened.
- All seatbacks should always be in an upright position when driving, or seat belt effectiveness may be reduced. Seat belts are designed to offer maximum protection when seatbacks are in the upright position.

(Continued)

WARNING

(Continued)

- If you place a cushion, etc. between the seatback and your back, you may not be able to drive the vehicle in a correct posture. Also, the seat belt and the head restraint may not provide the best performance. This may cause severe injury in an accident.
 - Do not place a cushion, etc. between the seatback and your back.
- Do not place any object under the front seat. If an object gets stuck under the front seat, the seat shall not be latched properly and may cause injury.
- Do not leave cigarette lighters or spray cans on the floor. If a cigarette lighter or spray can is on the floor, it may light accidentally when luggage is loaded or the seat is adjusted, causing a fire.

80T020260

Seat position adjustment lever (1)Pull the lever up and slide the seat.

80T020270

Seatback angle adjustment lever (2)
Pull the lever up and move the seatback.

NOTE:

To operate the seat back smoothly, pull the seat back adjustment lever (2) in upward direction. Ensure to move seat back only after lever is moved to fully up position. After adjustment of seat back, release the lever gently. Check that seat back is locked by moving it forward and backward.

Head Restraints

80J001

Head restraints are designed to help reduce the risk of neck injuries in the case of an accident. Adjust the head restraint to the position which places the center of the head restraint closest to the top of your ears. If this is not possible for very tall passengers, adjust the head restraint as high as possible.

- If you drive the vehicle with the head restraint removed, a passenger's backward tilting cannot be prevented in a collision from the backward and the impact to a passenger's head cannot be reduced in a sudden braking or a collision. This may cause severe injury. Never drive the vehicle with the head restraints removed.
- If the head restraint is installed back to front or it is not installed securely, the head restraint may not provide the best performance in case of emergency, resulting in severe injury.

If the head restraint is installed back to front, you cannot adjust the height and install it securely.

Make sure to install the head restraint securely in the right direction.

 Being distracted by head restraint adjustment could lead to an accident.

Do not attempt to adjust the head restraint while driving.

NOTE:

It may be necessary to recline the seatback to provide enough overhead clearance to remove the head restraint.

77R30530

To raise the front head restraint, pull upward the head restraint until it clicks. To lower the head restraint, push down the head restraint while holding in the lock button (1). If a head restraint must be removed (for cleaning, replacement, etc.), push in the lock button (1) and pull the head restraint all the way out.

Tilt Steering Lock Lever

77D3023

(1) LOCK (2) UNLOCK

The lock lever is located under the steering column. To adjust the steering wheel height:

- 1) Push down the lock lever to unlock the steering column.
- Adjust the steering wheel to the desired height and lock the steering column by pulling up the lock lever.
- Try moving the steering wheel up and down back and forth to check that it is securely locked in position.

▲ WARNING

Never attempt to adjust the steering wheel while the vehicle is moving or you could lose control of the vehicle.

Mirrors

WARNING

Failure to observe following point may result in loss of vehicle control and cause an accident, leading to death or serious injury. Always follow below points while driving.

- Always unfold all the outside rearview mirrors and adjust properly before driving.
- Do not place objects in the rear of the vehicle which may hinder visibility or interfere with your vision from the rear window glass.

Inside Rearview Mirror

81M30360

83S02352

- (1) Night driving
- (2) Day driving
- (3) Selector tab

You can adjust the inside rearview mirror by hand to see the rear of your vehicle in the mirror. To adjust the mirror, set the selector tab (3) to the day position, then move the mirror up, down or sideways by hand to obtain the best view.

When driving at night, you can move the selector tab (3) to the night position to reduce glare from the headlights of vehicles behind you.

▲ WARNING

- If you adjust the inside rearview mirror while driving, you could lose control of the vehicle, resulting in an accident.
 - Adjust the inside rearview mirror before driving.
- Only use the night position if it is necessary to reduce glare from the headlights of vehicles behind you.
 Be aware that in this position you may not be able to see some objects that could be seen in the day position.

A CAUTION

Do not modify the inside rearview mirror or install a non-genuine wide mirror. It could result in injury during accident.

FOR SAFE DRIVING

Outside Rearview Mirrors

Adjust the outside rearview mirrors so you can just see the side of your vehicle in the mirrors.

WARNING

If you adjust the outside rearview mirror while driving, you could lose control of the vehicle, resulting in an accident.

Adjust the outside rearview mirror before driving.

Electric mirrors (if equipped)

80T020020

The switch to control the electric mirrors is located on the instrument panel. You can adjust the mirrors when the ignition switch is in "ACC" or "ON" position, or the ignition mode is ACC or ON. To adjust the mirrors:

- Move the selector switch (1) to the left or right to select the mirror you wish to adjust.
- 2) Press the outer part of the switch (2) that corresponds to the direction in which you wish to move the mirror.
- Return the selector switch (1) to the center position to help prevent unintended adjustment.

NOTICE

- The electric type outside rearview mirror operates even though the ignition switch is in the ACC position. However, to prevent unnecessary battery discharge, do not adjust the mirrors longer than necessary while the engine is not running.
- The mirrors stop moving when they reach the maximum adjusting angles, but the motor continues to operate while the switch is pressed. Do not continue to press the switch in such a situation as the motor may be damaged.
- Do not attempt to adjust the outside rearview mirror by hand which may cause damage to the motor.
- Do not fold the electrical foldable outside rearview mirror by hand. It could cause motor failure.

Outside Rearview Mirror Folding Switch (if equipped)

80T020040

80T020070

- (1) Unfold
- (2) fold

78RB20202

You can fold the mirrors when you park the vehicle in a narrow space. Push the folding switch (3) to fold and unfold the mirrors. Make sure the mirrors are completely unfolded before you start driving.

WARNING

If you drive the vehicle with the outside rearview mirrors folded, it may result in an accident.

Do not drive the vehicle with the outside rearview mirrors folded.

A CAUTION

Moving mirrors can pinch and injure a hand. Do not allow anyone's hand to get near the mirrors when folding and unfolding the mirrors.

NOTE:

- If you press the folding switch to open the outside rearview mirrors and simultaneously start the engine, then the outside rearview mirrors may get stuck during that moment. To open the outside rearview mirrors completely, again press the folding switch after starting the engine.
- Slight time difference in opening of both outside rearview mirrors is due to angular positioning of the driver seat.

Rear Seats Seat Adjustment

▲ WARNING

- To avoid excessive seat belt slack, which reduces the effectiveness of the seat belts as a safety device, check that the seats are adjusted before the seat belts are fastened.
- All seatbacks should always be in an upright position when driving, or seat belt effectiveness may be reduced. Seat belts are designed to offer maximum protection when seatbacks are in the upright position.
- Do not place any object under the rear seat equipped with the seat position adjustment lever. If an object becomes caught under the rear seat, the seat will not be latched.

30T020290

Pull the lever (1) up and move the seat-back.

After adjustment, move the seat and seatback forward and backward to check that it is securely latched.

Head Restraints

Head restraints are designed to help reduce the risk of neck injuries in the case of an accident.

WARNING

 If you drive the vehicle with the head restraint removed, a passenger's backward tilting cannot be prevented in a collision from the backward and the impact to a passenger's head cannot be reduced in a sudden braking or a collision. This may cause severe injury.
 Never drive the vehicle with the

Never drive the vehicle with the head restraints removed.

 If the head restraint is installed back to front or it is not installed securely, the head restraint may not provide the best performance in case of emergency, resulting in severe injury.

If the head restraint is installed back to front, you cannot adjust the height and install it securely.

Make sure to install the head restraint securely in the right direction.

(Continued)

WARNING

(Continued)

- Being distracted by head restraint adjustment could lead to an accident.
 - Do not attempt to adjust the head restraint while driving.
- If you try to install a child restraint system and it touches the head restraint, a child may be severely injured in a collision.

When you install a child restraint system, adjust the height of the head restraint as high as possible or remove the head restraint for avoiding that the child restraint system touches the head restraint.

A CAUTION

If you leave the removed head restraint in the vehicle, it may jump out and hit passengers or objects, resulting in injury or damage.

Do not leave the removed head

Do not leave the removed head restraint in the vehicle.

NOTE:

It may be necessary to fold forward the seatback to provide enough overhead clearance to remove the head restraint.

80T020120

To raise the rear head restraint, pull up the head restraint until it clicks.

80T020130

To lower the head restraint, push down the head restraint while holding in the lock button (1). If a head restraint must be removed (for cleaning, replacement, etc.), push in the lock button (1) and pull the head restraint all the way out.

When installing a child restraint system, adjust the height of the head restraint or remove it for fitting the child restraint system, as necessary.

Seat Utility Folding Rear seats

A CAUTION

Remove objects from the rear seats before folding the rear seats. There may be a case that the rear seat belt reminder will not be activated, if objects are remained on the rear seats.

To fold the rear seats forward:

1) Lower the head restraint fully.

80T020100

Pull the release lever (1) on the top of each split seat, and fold the seatbacks forward

NOTICE

After folding the rear seatback forward, do not allow any foreign material to enter the lock opening. This may cause damage to the inside of the lock and prevent the seatback from being locked securely.

WARNING

If you need to carry cargo in the passenger compartment with the rear seatback folded forward, secure the cargo or it may be thrown about, causing injury. Never pile cargo higher than the seatbacks.

To return the seat to the normal position, follow the procedure below.

A CAUTION

When returning the rear seatback to the normal position, be careful that your finger is not caught between the lock and the striker.

NOTICE

When returning the rear seatback to the normal position, check that there is nothing around the striker. Any foreign materials prevent the seatback from being locked securely.

80T020110

Raise the seatback until it locks into place.

After returning the seat, move the seatback forward and backward to check that it is securely latched.

A CAUTION

- Do not put your hand into the rear seatback lock opening, or your finger may get caught and be injured.
- After securing the rear seatback, check that it is locked securely. If it is not, red button will appear beside the release lever.

NOTICE

- When returning the rear seatback to the normal position, do not allow any foreign material to enter the lock opening. This may prevent the seatback from being locked securely.
- When returning the rear seatback to the normal position, handle it carefully by hand to avoid any damage to the lock itself. Do not push it by using some material or by applying excessive force.
- As the lock is designed exclusively for securing the rear seatback, do not use it for any other purpose. Incorrect use of it may cause damage to the inside of the lock and prevent the seatback from being locked securely.

NOTE:

After returning the rear seatback, check that the seat belts are not twisted or caught in the rear seatback.

Safety for Child

For safety, carefully drive at lower speed than usual.

Place a Child in the Rear Seat

51K0188

- Seat a child next to an adult when possible, and ensure that the child can be visually monitored.
- Select an appropriate child restraint system suitable for the child's age and physical size.

WARNING

- If you do not use the child-proof lock, a child may open a door and the child may be thrown out, resulting in severe injury. To avoid this, use the child-proof lock setting.
- When it is necessary to seat the child who does not need a child restraint system in the front passenger's seat, observe the following point.
 - Slide the front passenger's seat all the way back. If the front passenger's seat is in a forward position, there is a risk of serious injury due to major impact if the front passenger's seat airbag was to be deployed.

(Continued)

▲ WARNING

(Continued)

59RN04650

- If a child put a hand out of the window or lean on a door, the child may get severe injury by a strong impact of side or curtain airbag activation.
 - Do not allow a child to put hand out of the window or lean on a door.
- Do not allow the hands or feet, etc., of a child near movable parts inside a vehicle, such as the seat rails. Otherwise, there is the possibility of injury.

FOR SAFE DRIVING

A Child Needs to Wear Seat Belt

69RHS159

WARNING

- Do not drive with a child on your lap. Even if you hold the child tightly, proper support is not possible, and in the event of a collision, etc., the child may get serious injury.
- If a child does not wear a seat belt. in a sudden braking and a collision. the child may get serious injury. Be sure to always have a child wear a seat belt.

(Continued)

WARNING

(Continued)

• If two or more people use a single seat belt, in a sudden braking and a collision, the seat belt may not provide the best performance, resulting in severe injury.

Do not allow two or more people to use a single seat belt.

69RHS160

▲ WARNING

- The seat belts of this vehicle are designed to be suitable for occupants of adult size. If the shoulder strap rests on the neck or chin of a child rather than the shoulder, or if the lap portion of the belt does not rest securely on the hipbone, ensure that the child is seated in a child restraint system placed in the rear seat. Failure to properly use a seat belt may result in serious injury to the child.
- Use a child restraint system securely fastened to the rear seat for any child that cannot hold their head upright or sit on their own.

Do not Let a Child Play with Seat Belt

69RHS161

WARNING

If a child play with a seat belt, for example, if the child's body is wrapped by the seat belt, it may cause severe injury such as suffocation. In case of emergency, cut the seat belt with scissors.

Using the Child Restraint SystemRefer to "Securing Child Restraint System by Seat Belt" in this section.

An Adult Needs to Open or Close Each Door or Window, and Adjust Seats

Only an adult should open or close each door or window and adjust seats, not to get a child's hands, arms, legs or neck, etc. caught in.

69RHS162

WARNING

 If the windows are not locked, a child may operate the windows by mistake or the other passengers may be caught in the windows.
 To avoid unintended operation of the power window by a child, use the window lock switch.

(Continued)

WARNING

(Continued)

 If you leave the power window in ready condition, it may cause unintended operation of the power window by a child, resulting in an accident.

When you leave the vehicle, make sure to turn the ignition switch to "OFF" position or press the engine switch to change the ignition mode to OFF, keep the key with you and leave the vehicle with your child.

Do not Let a Child Stick His/her Head or Hands out of the Window

69RHS163

Do not Leave a Child Unattended in the Vehicle

69RHS164

Do not Place a Child in Luggage Compartment

69RHS165

WARNING

Ensure that a child does not put their hands or heads, etc., out the windows. Otherwise, serious injuries due to falling out or sudden braking may occur. Moreover, serious injury could also occur if a child were to come into contact with objects outside the vehicle.

WARNING

When getting out of the vehicle, do not allow a child to stay in the vehicle without you.

- Unintended and wrong operations by a child may cause a fire or an accident from the vehicle start.
- As the inside temperature of the vehicle will become hot under the blazing sun, a child may suffer from heat stroke or dehydration, resulting in severe health problems or death in the worst case. Even if you turn on the air conditioner. do not leave a child alone in the vehicle.

WARNING

The luggage areas do not feature a structure that can accommodate people. Do not allow a child to ride in such areas. Otherwise, there is the danger of accidents due to sudden braking, etc. Do not let a child play in luggage areas even while the vehicle is stopped on the road.

Seat Belt

A Child Needs to Wear Seat Belt Refer to "Safety for Child" in this section.

Information for Pregnant Woman and the Sick Person

69RHS166

WARNING

- Those that are pregnant or sick/disabled must also wear their seat belts. However, in the event of a collision, there is the danger of heavy pressure focused on certain body areas. Consultation with a physician is recommended.
- For those that are pregnant, ensure that the lap portion of the belt is as low as possible across the pelvis, avoiding to touch the abdomen.
 Make sure that the shoulder strap rests halfway between the shoulder and the base of the neck, crossing the chest and avoiding to touch the abdomen.

Lap-shoulder Belt

Emergency locking retractor (ELR)

The seat belt has an emergency locking retractor (ELR), which is designed to lock the seat belt only during a sudden stop or impact. It also may lock if you pull the belt across your body very quickly. If this happens, let the belt go back to unlock it, and then pull the belt across your body more slowly.

Safety reminder

59RN02310

FOR SAFE DRIVING

59RN02320

To reduce the risk of sliding under the belt during a collision, position the lap portion of the belt across your lap as low on your hips as possible and adjust it to a snug fit by pulling the shoulder portion of the belt upward through the latch plate. The length of the diagonal shoulder strap adjusts itself to allow freedom of movement.

59RN02330

To fasten the seat belt, sit up straight and far back into the seat, pull the latch plate attached to the seat belt across your body and press it straight into the buckle until you hear a click. After pressing the latch plate into the buckle, pull the seat belt to make sure it is securely latched.

- 78RB0
- (1) Correct (2) Wrong

WARNING

When fastening the rear seat belt, always use the closest buckle to you. If you use the buckle for your next rear seat position by mistake, the rear seat belt may not function properly.

59RN02340

To unfasten the seat belt, push the red "PRESS" button on the buckle and retract the belt slowly while holding the belt or/and the latch plate.

NOTE:

If the seat belt cannot be pulled from its fully retracted position, firmly pull the belt and release it. Then smoothly pull the belt out of the retractor.

Adjustment of Seat Belt Length

The seat belt does not require length adjustment. The seat belt extends and retracts according to the movement of the body. If the seat belt gets a strong impact, the belt locks its tension automatically, in order to secure the body.

Correct Use of Seat Belt

WARNING

Use the seat belt correctly. Otherwise, in a sudden braking or a collision, the body may not be restrained, resulting in severe injury. Observe the following points.

- If the seat belt is twisted or contains excessive slack, there is danger of heavy pressure focused on certain body areas.
- If the seat belt rests on the abdomen, this area may sustain heavy pressure when you get a strong impact.
- If the seat belt does not rest firmly over the shoulder, you may be thrown forward when you get a strong impact.

FOR SAFE DRIVING

Seat Belt Reminder

80TM02001

(1) Driver's seat belt reminder light / front passenger's seat belt reminder light / rear passenger's seat belt reminder light*

When the driver and/or passenger (front passenger and/or rear passenger*) do(does) not fasten their seat belts, the seat belt reminder lights will come on or blink and a buzzer will sound to remind the driver and/or passenger (front passenger and/or rear passenger*) to fasten their seat belts. For more details, refer to the explanation below.

▲ WARNING

It is absolutely essential that the driver, front passenger and rear passenger* fasten their seat belts at all times. Persons who are not fastening seat belts have a much greater risk of injury if an accident occurs. Make a regular habit of buckling your seat belt before starting the engine.

NOTE:

The driver's seat belt reminder light / front passenger's seat belt reminder light / rear passenger's seat belt reminder light* is for all the driver, front passenger and rear passenger.

*: If equipped

Driver's seat belt reminder

If the driver's seat belt remains unbuckled when the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON, the reminder works as follows:

- 1) The driver's seat belt reminder light will come on. The front passenger's seat belt reminder light will also come on if a front passenger does not fasten his/her seat belt.
- 2) After the vehicle's speed has reached about 15 km/h, the driver's seat belt reminder light will blink and a buzzer will sound for about 95 seconds.
- 3) The reminder light will remain on until the driver's seat belt is buckled.

If the driver has buckled his or her seat belt and later unbuckles the seat belt, the reminder system will be activated from Step 1) or 2) according to the vehicle's speed. When the vehicle's speed is less than 15 km/h, the reminder will start from Step 1). When the vehicle's speed is more than 15 km/h, the reminder will start from Step 2).

The reminder will be automatically canceled when the driver's seat belt is buckled or the ignition switch is turned to off, or the engine switch is pressed to change the ignition mode to LOCK (OFF).

Front passenger's seat belt reminder

If there is a person sitting in the front passenger seat and the front passenger seat belt is unbuckled when the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON, the front passenger's seat belt reminder will activate

(2) The sensor of the front passenger's seat belt reminder

The seat belt reminder sensor (2) detects whether a person is sitting in the front seat. The sensor of the front passenger's seat belt reminder is located in the seat cushion. The front passenger's seat belt reminder works in the same manner as the driver's seat belt reminder.

NOTICE

- · The sensor of the front passenger's seat belt reminder is located in the seat cushion. If heavy or sharp objects are put on the seat cushion, or a removal, disassembly and modification of the passenger's seat are performed, the sensor may not work properly or can be damaged. Do not put heavy or sharp objects on the seat cushion. Do not remove, disassemble and modify the passenger's seat.
- Depending on the variety of seat cover, operation of the sensor may be adversely affected. Maruti Suzuki highly recommends that you use Maruti Suzuki genuine seat cover exclusively for this vehicle. If a seat cover is installed, consult with a Maruti Suzuki authorized workshop.
- · If you spill liquid such as liquid aromatics, soft drinks or juice on the front passenger's seat cushion, the sensor of the front passenger's seat belt reminder located in the seat cushion can be damaged. Immediately wipe it dry with a soft cloth when spilled.

(Continued)

NOTICE

(Continued)

· When sitting on the front passenger's seat, it is very important that the passenger sits upright, leaning against the seat backrest and centered on the seat cushion in order for the seatbelt reminder system to function effectively. An occupant sitting improperly (slouches, turns sideways, sits forward or sideways) may hamper the functioning of this system as it may not detect the occupant.

NOTE:

- If you put an object on the passenger's seat, the weight of the object will be sensed by the sensor and the front passenger's seat belt reminder light will come on and then the interior buzzer mav beep.
- If a child or a small sized person sit on the front passenger's seat or the cushion is put on the front passenger's seat, the weight will not be sensed by the sensor and the interior buzzer may not beep.

Rear passenger's seat belt reminder

If the rear passenger's seat belt remains unbuckled when the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON, the reminder works as follows:

- 1) The rear passenger's seat belt reminder light will come on.
- 2) After the vehicle's speed has reached about 15 km/h, the rear passenger's seat belt reminder light will blink and a buzzer will sound for about 95 seconds.
- 3) The reminder light will remain on until the rear passenger's seat belt is buckled.

If the rear passenger has buckled his or her seat belt and later unbuckles the seat belt, the reminder system will be activated from Step 1) or 2) according to the vehicle's speed. When the vehicle's speed is less than 15 km/h, the reminder will start from Step 1). When the vehicle's speed is more than 15 km/h, the reminder will start from Step 2).

The reminder will be automatically canceled when the rear passenger's seat belt is buckled or the ignition switch is turned to off, or the engine switch is pressed to change the ignition mode to LOCK (OFF).

Handling and Care for Seat Belt

Seat Belt Handling

Periodically check if the seat belts work properly and are not damaged. Check the webbing, buckles, latch plates, retractors, anchorages and guide loops. Replace any seat belts which do not work properly or are damaged.

- Inspect all seat belt assemblies after any collision. Any seat belt assembly which was in use during a collision (other than a very minor one) should be replaced, even if damage to the assembly is not obvious. Any seat belt assembly even which was not in use during a collision must be replaced if the seat belt pretensioners were activated. The pretensioners and the load limiter only function once. In case they did not activate, consult with a Maruti Suzuki authorized workshop.
- If frays, scratches, cuts are found on the seat belt, replace it with a new one.
- If the buckle does not work properly, ask your Maruti Suzuki authorized workshop for inspection.
- If strong force was applied to the seat belt in a collision, the seat belt function may be damaged, even though its appearance is normal. Replace the seat belt with a new one.

(Continued)

WARNING

(Continued)

- As the seat belt may not provide the best performance and it may result in severe injury in case of emergency, observe the following points.
 - When foreign material enters into the buckle or you spill a drink, the seat belt may not work properly. In this case, ask your Maruti Suzuki authorized workshop for inspection.
 - As the seat belt may be damaged, be careful not to get the seat belt caught in the door. Before closing the door, check that the seat belt is retracted without any slack.
 - Do not modify or remove the seat belt.

Seat Belt Care

Caring for seat belts is the same as caring for any type of regular cloth material, etc.

▲ WARNING

Do not use bleach, solvent or dyes on seat belts. Doing so may cause stains, discoloration and strength deterioration, and the seat belt may not function properly.

Seat Belt Pretensioner System (Only for Front Seat)

55T020520

WARNING

This section describes your Maruti Suzuki vehicle's seat belt pretensioner system. Read and follow all these instructions carefully to minimize your risk of severe injury or death.

To determine if your vehicle is equipped with a seat belt pretensioner system at the front or rear seating positions, check the label on the seat belt at the bottom part. If the letter "p" appears as illustrated, your vehicle is equipped with the seat belt pretensioner system. You can use the preten-

sioner seat belts in the same manner as ordinary seat belts.

Read this section and "Supplemental Restraint System (Airbags)" section to learn more about the pretensioner system.

The seat belt pretensioner system works with the supplemental restraint system (airbags). The crash sensors and the electronic controller of the airbag system also control the seat belt pretensioners. The pretensioners are triggered only when there is a frontal or side collision severe enough to trigger the airbags and the seat belts are fastened. For precautions and general information including servicing the pretensioner system, refer to "Supplemental Restraint System (Airbags)" section in addition to this "Seat Belt Pretensioner system" section, and follow all those precautions.

The pretensioner is located in each front seat belt retractor. The pretensioner tightens the seat belt so the belt fits the occupant's body more snugly in the event of a frontal or side collision. The retractors will remain locked after the pretensioners are activated. Upon activation, some noise will occur and some smoke may be released. These conditions are not harmful and do not indicate a fire in the vehicle.

The driver and all passengers must be properly restrained by fastening seat belts at all times, whether or not a pretensioner is equipped at their seating position, to minimize the risk of severe injury or death in the event of a collision.

Sit fully back in the seat; sit up straight; do not lean forward or sideways. Adjust the belt so the lap portion of the belt is worn low across the pelvis, not across the waist. Please refer to "Seat Adjustment" section and the instructions and precautions about the seat belts in this "Seat Belts and Child Restraint Systems" section for details on proper seat and seat belt adjustments.

Please note that the pretensioners along with the airbags will activate in severe frontal or side collisions. They are not designed to activate in rear impacts, rollovers, or minor frontal side collisions. The pretensioners can be activated only once. If the pretensioners are activated (that is, if the airbags are activated), have the pretensioner system serviced by Maruti Suzuki authorized workshop as soon as possible.

The pretensioner system or the airbag system may not work properly if any of the following conditions occurs:

- 1) If the air bag warning light on the instrument cluster does not come on briefly, when the ignition switch is turned to the "ON" position or the engine switch is pressed to change the ignition mode to "ON".
- 2) If the air bag light comes on and stays on for more than 10 seconds, when the

ignition switch is turned to the "ON" position or the engine switch is pressed to change the ignition mode to "ON".

3) If the air bag light comes on while driving.

Have both systems inspected by Maruti Suzuki authorized workshop as soon as possible.

Service on or around the pretensioner system components or wiring must be performed only by Maruti Suzuki authorized workshop. who is specially trained. Improper service could result in unintended activation of pretensioners or could render the pretensioner inoperative. Either of these two conditions may result in personal injury.

To prevent damage or unintended activation of the pretensioners, check that the lead-acid battery is disconnected and the ignition switch has been in "LOCK" position or the ignition mode has been in LOCK (OFF) for at least 90 seconds before performing any electrical service work on your Maruti Suzuki vehicle.

Do not touch pretensioner system components or wiring. The wires are wrapped with yellow tape or yellow tubing, and the couplers are yellow. When scrapping your Maruti Suzuki vehicle, ask a Maruti Suzuki authorized workshop, body repair shop, or scrap yard for assistance.

For Proper Operation of Seat Belt Pretensioner System

Do not modify any parts that can affect the functionality of the seat belt pretensioner system. The seat belt may be retracted unexpectedly, or it may not be properly retracted when necessary.

Disposal and Scrapping

Seat belt pretensioners that have not been activated must be activated according to the predetermined procedure before disposal.

WARNING

If you do not handle a pretensioner properly for disposal, the pretensioner system may activate unexpectedly, resulting in severe injury. When disposing of a pretensioner or scrapping the vehicle equipped with a pretensioner, consult with a Maruti Suzuki authorized workshop

Seat Belt Force Limiter System (if equipped)

69RHS167

In the event of a strong impact coming from the front, the seat belt force limiter operates in two stages (driver's seat) and one stage (front and rear passenger's seat) to reduce a force to the shoulder strap, thus lessening the impact being sustained by the front passengers.

FOR SAFE DRIVING

80T020160

WARNING

If the seat belt sustains strong impact, the resin of the shoulder anchor part (1) and the tongue plate part (2) could soften due to heavy friction, thus sticking to the seat belt, making the belt slide less easily. In such a case, the seat belt may not provide the best performance, resulting in severe injury in case of emergency. Have the seat belt replaced by Maruti Suzuki authorized workshop.

Child Restraint Systems Child Restraint System Usage

59RN02280

The following types of child restraint system are available generally.

Infant restraint

80JC007

Child restraint

59RN02350

Booster seat

59RN02290

Maruti Suzuki highly recommends that you use a child restraint system to restrain infants and small children. Many different types of child restraint systems are available; check that the restraint system you select meets applicable safety standards.

All child restraint systems are designed to be secured in vehicle seats either by seat belts (lap belts or the lap portion of lapshoulder belts) or by special rigid lower anchor bars built onto the floor. Whenever possible, Maruti Suzuki recommends that child restraint systems be installed on the rear seat. According to accident statistics, children are safer when properly restrained in rear seating positions than in front seating positions.

NOTE:

Observe any statutory regulation about child restraints.

• Do not install a child restraint system on the front passenger's seat.

(Continued)

WARNING

(Continued)

- When installing a child restraint system to the rear seat, touching the child's foot or the child restraint system to the seatback of the front seat can cause serious injury to the child in the event of an accident. Adjust the front seat so that it does not touch the child or the child restraint system.
- If child restraint systems are not installed properly, children or other occupants could be seriously injured in the event of an accident. Secure the child restraint system firmly according to both this manual and the instruction provided by child restraint system's manufacturer.

(Continued)

(Continued)

- If the child is not secured properly in the child restraint system, it could cause serious injury to the child in the event of an accident. Use the child restraint system correctly following the instruction provided by child restraint system's manufacturer.
- If you recline the seatback, a child restraint system may not be secured properly and a child body may slip beneath the seat belt. This may cause severe injury.
 Do not recline the seatback when a child restraint system is installed on the seat.
- If you use the child restraint system which was severely damaged by an accident, etc., it may not provide the best performance. This may cause severe injury to a child. If the child restraint system was severely damaged by an accident, etc., do not reuse the child restraint system even though its appearance looks normal.

Child Restraint Systems for India Child Restraint

The suitability of each passenger's seat position for carriage of children and fitting of child restraint system is shown in the table below. Whenever you carry children up to 12 years of age, properly use the child restraints which conform to AIS 072, the standard for child restraints, referring to the table.

MASS GROUP		Seating position (or other site)					
		Front Passenger	Rear Outboard	Rear Center	Intermediate Outboard	Intermediate Center	
Group 0	Up to 10 kg	Х	U	N.A.	N.A.	N.A.	
Group 0+	Up to 13 kg	Х	U	N.A.	N.A.	N.A.	
Group I	9 to 18 kg	Х	U	N.A.	N.A.	N.A.	
Group II	15 to 25 kg	Х	U	N.A.	N.A.	N.A.	
Group III	22 to 36 kg	Х	U	N.A.	N.A.	N.A.	

Key of letters to be inserted in the above table:

U =Suitable for 'universal' category restraints approved for use in this mass group

X =Seat position not suitable for children in this mass group

N.A = Seat position not available for children in this mass group.

NOTE:

- 'universal' is the category in the AIS 072.
- · 'Outboard' indicates window side seat.

Securing Child Restraint System by Seat Belt

Choose the appropriate seat for the child's age and physical size.

61M0241

- Do not install a child restraint system on the front passenger's seat.
- If you install a child restraint system in the rear seat, slide the front seat far enough forward so that the child's feet do not contact the front seatback. This will help avoid injury to the child in the event of an accident.

(Continued)

WARNING

(Continued)

- Do not hold a child on passenger'S lap when the vehicle is in motion.
- Even if the passenger holds the child tightly, he/she would not be supported enough in the event of an accident and it could result in a serious injury of the child.

A CAUTION

If your vehicle is equipped with the head restraint, adjust the height of the head restraint or remove it for fitting the child restraint, as necessary. However, if a booster cushion not equipped with the head restraint is fitted, the head restraint should not be removed. If the head restraint is removed for fitting the child restraint, you need to install it again after removing the child restraint. If the child restraint is fitted improp-

NOTE:

Stow the removed head restraint in the luggage compartment so it will not cause inconvenience to the occupants.

erly, a child sitting in it could be

injured in a collision.

Securing

This section explains securing the child restraint system in the rear seat.

80T020120

 When the child restraint system contacts the head restraint, adjust the height of the head restraint or remove it for fitting the child restraint system.

If the child restraint system contacts the head restraint, the child restraint system cannot be secured firmly. This may cause severe injury to a child in a collision.

When installing the child restraint system, adjust the head restraint height to the highest position as much as possible or remove the head restraint so that the child restraint system would not contact the head restraint.

- 2) If your vehicle is equipped with the reclining mechanism of rear seatback, adjust the angle of the seatback so that there is no gap between the child restraint system and the seatback.
- Make sure that the child restraint system is securely fastened to the main seat.
- 4) Make sure to pass the seat belt of the passenger's seat through the specified parts, according to the instruction manual that came with the child restraint system.

59RN02140

- Insert the tongue plate (3) firmly into the seat belt buckle (4) until you hear a click.
 - The child restraint system in the above figure is a typical example.

72M00172

- 6) If the child restraint system does not have a seat belt locking mechanism or a locking clip, secure it to the seat by using an aftermarket locking clip.
 - The aftermarket locking clip shown in the above figure is a typical example.

WARNING

Failure to securely fasten a child restraint system via the seat belt locking mechanism or a locking clip may cause serious injury to a child when sudden braking or a collision occurs.

FOR SAFE DRIVING

- Shake the child restraint system back and forth, and left and right to check if it is securely in position.
 - If you cannot ensure secure positioning, check the instruction manual that came with the child restraint system or consult the dealer where you purchased the seat.

WARNING

Make sure to position the child restraint system securely. Failure in doing so could result in the child sustaining serious injury when sudden braking or a collision occurs.

Securing Child Restraint System by ISOFIX

Securing

80T020170

(1) Lower anchorage

Your vehicle is equipped with the lower anchorages in the rear seats for securing a ISOFIX type of child restraints with the connecting bars. The lower anchorages are located where the rear of the seat cushion meets the bottom of the seatback.

Install the ISOFIX type child restraint system according to the instructions provided by the child restraint system manufacturer. After installation, try moving the child restraint system in all directions especially forward to check that connecting bars are securely latched to the anchorages.

80T020180

(2) Top tether anchorage

Your vehicle is equipped with the top tether anchorages. Use the top tether strap of the child restraint according to the instructions provided by the child restraint system manufacturer.

Here is a general instruction:

A CAUTION

If your vehicle is equipped with the head restraint, adjust the height of the rear head restraint or remove it for fitting the child restraint, as necessary. However, if a booster cushion not equipped with the head restraint is fitted, the head restraint should not be removed. If the head restraint is removed for fitting the child restraint, you need to install it again after removing the child restraint. If the child restraint is fitted improperly, a child sitting in it could be injured in a collision.

NOTE:

Stow the removed head restraint in the luggage compartment so it will not cause inconvenience to the occupants.

80T020120

 When the child restraint system contacts the head restraint, adjust the height of the head restraint or remove it for fitting the child restraint system.

MARNING

If the child restraint system contacts the head restraint, the child restraint system cannot be secured firmly. This may cause severe injury to a child in a collision.

When installing the child restraint system, adjust the head restraint height to the highest position as much as possible or remove the head restraint so that the child restraint system would not contact the head restraint.

80T020190

 Place the child restraint in the rear seat, inserting the connecting bars (3) to the lower anchorages (1) between the seat cushion and the seatback.

FOR SAFE DRIVING

80T020340

3) Use your hands to carefully align the connecting bar tips with the anchorages. Take care not to pinch your fingers.

4) Push the child restraint toward the anchorages so that the connecting bar tips are partially hooked to the anchorages. Use your hands to confirm the position.

54G185

- 5) Grasp the front of the child restraint and push the child restraint forcefully to latch the connecting bars. Check that they are securely latched by trying to move the child restraint system in all directions, especially forward.
- 6) Attach the top tether strap referring to "Installation of child restraint with top tether" section. When you put your child in the child restraint system, appropriately slide the front seat forward not to touch a part of vour child's body.

NOTICE

When installing a child restraint system to the rear seat, adjust the front seat position so that the front seat does not interfere with the child restraint system.

Installation of Child Restraint with **Top Tether**

Some child restraint systems require the use of a top tether strap. Top tether anchorages are provided in your vehicle at the locations shown in the illustrations.

The number of the top tether anchorage brackets provided in your vehicle depends on the vehicle specification. Install the child restraint system as follows:

1) Secure the child restraint on the rear seat using the procedure described above for securing a restraint system that does not require a top tether strap.

2) Hook the top tether strap to the top tether anchorage and tighten the top tether strap according to the instructions provided by the child restraint system manufacturer. Attach the top tether strap to the corresponding top tether anchorage located directly behind the child restraint. Do not attach the top tether strap to the luggage restraint loops (if equipped).

WARNING

Do not attach the child restraint top tether strap to the luggage restraint loops. Incorrectly attached top tether strap will reduce the intended effectiveness of the child restraint system.

52RS20431

- When routing the top tether strap, pass the top tether strap as shown in the illustration. (Refer to "Head Restraints" section for details on how to adjust the height of head restraint or remove it.)
- 4) Check that cargo does not interfere with routing of the top tether strap.

WARNING

If the seat belt, etc. gets stuck in the child restraint system, it may not be secured properly and this may cause severe injury to a child in a collision. When you install the child restraint system, check that obstacles and the seat belt do not exist near the ISOFIX anchorages and the top tether anchorages.

Supplemental Restraint System (Airbags)

▲ WARNING

This section describes the protection provided by your Maruti Suzuki vehicle's supplemental restraint system (airbags). Read and follow all instructions carefully to minimize your risk of severe injury or death in the event of a collision.

Your vehicle is equipped with a supplemental restraint system consisting of the following components in addition to a lapshoulder belt at each seating position.

- (1) Side curtain airbag module (if equipped)
- (2) Side crash sensor (if equipped)
- (3) Forward crash sensor
- (4) Front passenger's front airbag module
- (5) Driver's front airbag module
- (6) Front seat belt pretensioner
- (7) Side airbag module (if equipped)
- (8) Airbag controller

What is SRS Airbag System?

SRS stands for "Supplemental Restraint System". This system aims to restrain passengers in their seats for safety.

80T020320

If airbag warning light on the instrument cluster does not blink or come on when the ignition switch is first turned to "ON" position, or the ignition mode is first changed to ON, or airbag warning light stays on, or comes on while driving, the airbag system (or the seat belt pretensioner system) may not work properly. Have the airbag system inspected by Maruti Suzuki authorized workshop as soon as possible.

WARNING

SRS airbag system is not a substitute for seat belts. SRS airbag system is the supplemental restraint system and will provide the effectiveness by using the seat belts at the same time.

If you and the passengers do not fasten their seat belts, it may result in severe injury in a sudden braking or a collision.

Even when you drive the vehicle equipped with SRS airbag system, make sure to fasten seat belt.

 If the seat belts are not fastened properly, airbags may not provide the best performance. This may cause severe injury in a sudden braking and a collision.

Make sure that the driver and all the passengers fasten the seat belts properly in a correct posture.

NOTE:

Via the event data recorder (EDR) system, this vehicle records and accumulates data when the airbag is deployed.

Front airbags

80J090

Front airbags are designed to inflate in severe frontal collisions when the ignition switch is in "ON" position or the ignition mode is ON.

NOTE:

In a frontal angle collision, the side airbags (if equipped) and side curtain airbags (if equipped) may inflate.

Front airbags are not designed to inflate in rear impacts, side impacts, rollovers or minor frontal collisions, since they would offer no protection in those types of accidents. Since an airbag deploys only one time during an accident, seat belts are needed to restrain occupants from further movements during the accident.

Therefore, an airbag is not a substitute for seat belts. To maximize your protection, always fasten your seat belts. Be aware that no system can prevent all possible injuries that may occur in an accident.

FOR SAFE DRIVING

Side airbags (if equipped) and side curtain airbags (if equipped)

68KM090

Side airbags and side curtain airbags are designed to inflate in severe side impact collisions when the ignition mode is ON.

Side airbags and side curtain airbags are not designed to inflate in frontal or rear collisions, rollovers or minor side collisions, since they would offer no protection in those types of accidents. Only the side airbag and side curtain airbag on the side of the vehicle that is struck will inflate. However, in a frontal angle collision, the side airbags and side curtain airbags may inflate. Since an airbag deploys only one time during an accident, seat belts are needed to restrain occupants from further movements during the accident.

Therefore, an airbag is not a substitute for seat belts. To maximize your protection, always fasten your seat belts. Be aware that no system can prevent all possible injuries that may occur in an accident.

When Driving the Vehicle with SRS Airbag System

Make Sure to Fasten Seat Belt

65,1106

WARNING

SRS airbag system is not a substitute for seat belts. SRS airbag system is the supplemental restraint system and will provide the effectiveness by using the seat belts at the same time. If you and the passengers do not fasten their seat belts, it may result in severe injury in a sudden braking or a collision.

Even when you drive the vehicle equipped with SRS airbag system, make sure to fasten seat belt.

Correct Sitting Posture

80 101

There is a possibility of major impact from the front airbags when the airbags activate and deploy instantaneously, the driver and the passenger should sit deeply into their seats and touch their backs lightly to the seatback. In addition, the seat should be positioned so that it is not too far forward.

- Do not position your face, chest, etc., close to the steering wheel or instrument cluster, and do not rest your feet up into this area. Otherwise, there is the risk of serious injury due to major impact if the airbag were to be deployed.
- If side airbags (if equipped) or side curtain airbags (if equipped) activate, you may get strong impact, resulting in severe injury. Do not put hands out of the window or lean on the door. Also, when sitting in the rear seat, do not hug the seatback of the front seat.

For Proper SRS Airbag System Operation

69RHS169

WARNING

- Do not modify the steering wheel, such as replacing it, placing stickers on it, painting it or putting the cover on it.
- Do not place stickers on the airbag units or the surrounding areas or paint them. Also, do not attach any accessories, fragrances, electronic toll control units, portable car navigation systems, etc. to this area, and do not lean umbrellas or other objects against it.
- Do not attach accessories (except for Maruti Suzuki genuine products), etc., to the windshield or the inside rearview mirror.

59RN02200

WARNING

For the vehicle with side airbags or side curtain airbags, do not attach accessories such as cup holders or hangers near the door. Also, do not lean umbrellas against the door.

FOR SAFE DRIVING

Warning Label of SRS Airbag for Front Passenger's Seat

72M00150

You may find this label on the sun visor.

WARNING

NEVER use a rearward facing child restraint on a seat protected by an ACTIVE AIRBAG in front of it, DEATH or SERIOUS INJURY to the CHILD can occur.

Description of warning label

Symbol	Symbol meaning
	Do not install a rear-facing child restraint system to the front passenger's seat equipped with an airbag.
	If the front passenger's seat airbag were to be deployed, a major impact could be applied to a rearfacing child restraint system and the child.
<u> </u>	For more details, read this owner's manual.

"SRS AIRBAG" Mark and Location Driver's front airbag

77R30400

Front passenger's front airbag

77R30410

Side airbags (if equipped)

80T020330

Side curtain airbags (if equipped)

80T020250

The driver's front airbag is located behind the center pad of the steering wheel and the front passenger's front airbag is located behind the passenger's side of the dashboard.

Side airbags are located in the part of the front seatbacks closest to the doors.

Side curtain airbags are located in the roof lining.

The words "SRS AIRBAG" are molded into the airbag covers to identify the location of the airbags.

WARNING

- If the airbag stored place is damaged or cracked, the airbag system may not work properly, which could result in serious injury in the event of a collision. Have your vehicle inspected by Maruti Suzuki authorized workshop.
- If you smash the airbag stored place or apply a strong impact to it, the airbag may not work properly or may inflate unexpectedly, resulting in serious injury.

Do not smash the airbag stored place or apply a strong impact to it.

Installation of Child Restraint System

Refer to "Seat Belts and Child Restraint Systems" section for details on securing your child.

Handling for Airbags For Proper SRS Airbag System

Operation
If objects are positioned within the range

where the airbag deploys, such objects might be impacted and blown off or the airbag may not deploy properly.

WARNING

- As the airbag may not provide the best performance and it may result in severe injury in case of emergency, observe the following points.
 - Do not modify the suspension. If the vehicle height or the stiffness of the suspension were to change, airbag malfunction may result.
 - When installing a grille guard, etc., on the front of the vehicle, consult with a Maruti Suzuki authorized workshop. If you modify the front part of the vehicle, the airbag system may not work properly.
 - When installing radio equipment, etc., consult with a Maruti Suzuki authorized workshop. Radio waves, etc., from a radio may adversely affect the computer module used in the airbag system.

(Continued)

WARNING

(Continued)

- Even though your vehicle is damaged by a collision, it may not be severe enough to trigger front, side or side curtain airbags to inflate. If your vehicle sustains any front-end or side damage, have the airbag system inspected by a Maruti Suzuki authorized workshop to ensure that it works properly. If the original function of airbag system is damaged, airbag may not function effectively and fully in case of an emergency.
- If the airbag-related parts are replaced or repaired, which has an impact on the airbag functions, the airbag may activate unnecessarily or may not activate when necessary.

The following situations may give a negative impact to the airbag system. In these cases, consult with a Maruti Suzuki authorized workshop beforehand.

 Removing the steering wheel, repairing the areas around the steering wheel, etc.

(Continued)

WARNING

(Continued)

- Center console repair, repairs around the instrument cluster, repairs under the front seat, and repairs of electrical wiring
- Installation of audio equipment, etc.
- Sheet metal painting and repairs around the dashboard
- Replacement of the front seat and repairs around the seat
- Repairs around the front pillar, the back pillar or the roof side
- Repairs around the center pillar

Driver's front airbag precautions

69RHS022

WARNING

- Do not position your hands, face, chest, etc., close to airbag unit area or lean on the steering wheel. Otherwise, there is the risk of serious injury due to major impact if the airbag were to be deployed.
- Do not modify the steering wheel, such as replacing it, placing stickers on it, painting it or putting the cover on it. Otherwise, the airbag may not deploy normally in case of emergency, resulting in severe injury.

Front passenger's front airbag precautions

69RHS170

WARNING

- When riding in the front passenger's seat or when allowing a child to ride in this seat, be sure to observe the following points. Failure to do so may result in serious injury due to major impact if the airbag is deployed.
 - Do not position your hands or feet on the airbag unit area, and do not position your face, chest, etc., close to this area.
- Do not allow a child to stand in front of the airbag unit area or sit on a passenger's lap in the front passenger's seat. Have a child ride in the rear seat wearing a seat belt.

(Continued)

WARNING

(Continued)

 For a child that is not yet big enough to wear a seat belt properly, be sure to use a child restraint system on the rear seat.

69RHS171

- As the airbag may not provide the best performance and it may result in severe injury in case of emergency, observe the following points.
 - Do not place stickers on the airbag units or the surrounding areas or paint them. Also, do not attach any accessories, fragrances, electronic toll control units, portable car navigation systems, etc. to this area, and do not lean umbrellas or other objects against it.
 - Do not attach accessories (except for Maruti Suzuki genuine products), etc., to the windshield or the inside rearview mirror.

Side airbags (if equipped) and side curtain airbags (if equipped) precautions

59RN02200

WARNING

If you attach accessories such as cup holders or hangers near the door, or if you lean umbrellas against the door, when side airbags or side curtain airbags activate, these objects may be thrown out and may not inflate properly, resulting in severe injury.

Do not attach accessories such as cup holders or hangers near the door. Also, do not lean umbrellas against the door.

Function of Airbags How the System Works

In a frontal collision, the collision sensors will detect rapid deceleration, and if the controller judges that the deceleration represents a severe frontal collision, the controller will trigger the inflators. The inflators inflate the appropriate airbags with nitrogen or argon gas. The inflated airbags provide a cushion for your head and upper body. The airbag inflates and deflates so quickly that you may not even realize that it has activated. The airbag will neither hinder your view nor make it harder to exit the vehicle.

A seat belt helps keep you in the proper position for maximum protection when an airbag inflates. Adjust your seat as far back as possible while still maintaining control of the vehicle. Sit fully back in your seat; sit up straight; do not lean over the steering wheel or dashboard. Front occupants should not lean on or sleep against the door. Refer to "Seat Adjustment" section and "Seat Belts and Child Restraint Systems" section in this section for details on proper seat and seat belt adjustments.

59RN04670

59RN02360

• The driver should not lean over the steering wheel. The front passenger should not rest his or her body against the dashboard where a front air bag is mounted or a child should not stand in front of the dashboard. Otherwise, he or she will get too close to the dashboard. For vehicles with side air bags and side curtain air bag, occupants should not lean on or sleep against the door. In these situations, the out-of-position occupant would be too close to an inflating airbag, and may suffer severe injury.

(Continued)

WARNING

(Continued)

- Do not attach any objects to, or place any objects over, the steering wheel or dashboard. Do not place any objects between the airbag and the driver or front passenger. These objects may interfere with airbag operation or may be propelled by the airbag in the event of a collision. Also, these objects may move when you start moving vehicle or while vehicle is moving, they may interfere with driver's view or safe driving. In each condition, it may cause severe injury.
- For vehicles with side airbags, do not use non-genuine seat covers on the front seats, because non-genuine seat covers may obstruct the inflation of side airbags. Maruti Suzuki highly recommends Maruti Suzuki-genuine seat covers to be used when covering the front seats of such vehicles with side airbags. Also, near the door, do not place cup holders, hangers or any other objects and do not lean an umbrella. as these objects could be propelled by the airbag in the event of a collision. Either of these conditions may cause severe injury.

(Continued)

(Continued)

- Do not strike or apply significant levels of impact to the airbag component areas. It can cause the airbags to malfunction.
- Even though your vehicle is damaged by a collision, it may not be severe enough to trigger front, side or side curtain airbags to inflate. If your vehicle sustains any front-end or side damage, have the airbag system inspected by Maruti Suzuki authorized workshop to ensure that it works properly. If the original function of air bag system is damaged, air bag may not function effectively and fully in case of an emergency.

A CAUTION

Airbags must inflate quickly and forcefully in order to reduce the chance of serious or fatal injuries. However, an unavoidable consequence of the quick inflation is that the airbag may irritate bare skin, such as the facial area against a front airbag. Wash off any residue as soon as possible to prevent skin irritation. Also, upon inflation, a loud noise will occur and some powder and smoke will be released. These conditions are not harmful and do not indicate a fire in the vehicle. Be aware, however. that some airbag components may be hot for a while after inflation. This may cause burn injury.

Your vehicle is equipped with a diagnostic module which records information about the airbag system if the airbags deploy in a collision. The module records information about overall system status, and which sensors activated the deployment.

Servicing the airbag system

If the airbags inflate, have the airbags and related components replaced by Maruti Suzuki authorized workshop as soon as possible.

If your vehicle ever gets in deep water and the driver's floor is submerged, the airbag controller could be damaged. If this happens, ask your Maruti Suzuki authorized workshop to check the airbag system as soon as possible.

Special procedures are required for servicing or replacing an airbag. For that reason, only Maruti Suzuki authorized workshop should be allowed to service or replace your airbags. Remind anyone who services your Maruti Suzuki vehicle that it has airbags.

Service on or around airbag components or wiring must be performed only by Maruti Suzuki authorized workshop. Improper service could result in unintended airbag deployment or could render the airbag inoperative. Either of these two conditions may result in severe injury.

To prevent damage or unintended inflation of the airbag system, check that the battery is disconnected and the ignition switch has been in "LOCK" position or the ignition mode has been in LOCK (OFF) for at least 90 seconds before performing any electrical service work on your Maruti Suzuki vehicle. Do not touch airbag system components or wires. The wires are wrapped with yellow tape or yellow tubing, and the couplers are yellow for easy identification.

A CAUTION

If you do not handle the airbags properly, they may inflate unexpectedly, resulting in personal injury. When scrapping the airbags or the

When scrapping the airbags or the vehicle that has the airbags, consult with a Maruti Suzuki authorized workshop.

Front Airbag Deployment Conditions

Front airbags deploy (inflation)

76J30450

 Frontal collision with a fixed wall that does not move or deform at more than about 25 km/h

76J30460

 Strong impact equivalent to frontal collision such as above at left and right angles of about 30 degrees (1) or less from the front of your vehicle

Front airbags may inflate

Receiving a strong impact to the lower body of your vehicle, the front airbags may inflate.

76J30470

· Hitting a curb or medial strip

FOR SAFE DRIVING

76J30480

· Falling into a deep hole or ditch

76J30490

· Landing hard or falling

Front airbags may not inflate

The front airbags may not inflate when a strong impact has not occurred since the collision object (including living beings like animals) was easy to be deformed or moved, or the crashed portion of your vehicle was easy to be deformed.

Also, front airbags may not inflate in many cases when the collision angle is greater than about 30 degrees at left and right angles from the front of your vehicle. Also, in certain collisions at low speed, the airbag may not inflate.

76J30500

 Frontal collision to a stopped vehicle at less than about 50 km/h

76J30510

 Collision that the front of your vehicle goes under the bed of a truck etc.

76J30520.

· Collision with a utility pole or stumpage

76J30530

 Collision with a fixed wall or guardrail at left and right angles of greater than about 30 degrees (1) from the front of your vehicle

76J30540

 Frontal collision with a fixed wall that does not move or deform at less than about 25 km/h

Front airbags do not inflate

Front airbags do not inflate in rear impacts, side impacts or rollovers, etc. However, these might inflate in a strong impact.

76J30561

76J30571

· Impact from the side

· Impact from the rear

76J30580

Vehicle rollover

FOR SAFE DRIVING

Side Airbags (if equipped) and Side Curtain Airbags (if equipped) Deployment Conditions

Side airbags and side curtain airbags deploy (inflation)

76J30571

 Impacts from the side at about a right angle by a general passenger car to your vehicle at more than about 30 km/h or in a greater impact

Side airbags and side curtain airbags may inflate in a strong impact

Side airbags and side curtain airbags may inflate even in a frontal collision, if there is a strong impact to the lateral direction.

76J30500

Frontal collision

77R30880

· Hitting a curb or bump

76J30480

• Falling into a deep hole or ditch

76J30490

· Landing hard or falling

Side airbags and side curtain airbags may not inflate

77R30890

Impact from the side at an oblique angle

77R30930

• Impact from the side by a motorcycle or bicycle

 Impact from the side to the vehicle body other than the passenger compartment

Impact from the side by a high hood vehicle

77R30940

· Collision with a utility pole or stumpage

Side airbags and side curtain airbags do not inflate

76J30561

· Impact from the rear

76J30580

Vehicle rollover

When Starting the Engine Be Careful of Carbon Monoxide Poisoning

▲ WARNING

Exhaust gases contain carbon monoxide, a potentially lethal gas that is colorless and odorless. If you breath exhaust gases, you may feel drowsy, resulting in severe health problems or death in the worst case.

If you start the engine, be careful of carbon monoxide poisoning.

Do not Run Engine in a Poorly-ventilated Area

52D334

WARNING

Avoid breathing exhaust gases. Exhaust gases contain carbon monoxide, a potentially lethal gas that is colorless and odorless. Since carbon monoxide is difficult to detect by itself, take the following precautions to help prevent carbon monoxide from entering your vehicle.

Otherwise, it may result in severe health problems or death in the worst case.

- Do not leave the engine running in garages or confined areas, with passengers inside. This may result in accumulation of carbon monoxide in cabin and may lead to suffocation or breathing problem and lead to death.
- Do not park with the engine running for a long period of time, even in an open area. In case of long periods, danger of choking and death on being inside the vehicle is a possibility when the engine is running. If it is necessary to sit for a short time in a parked vehicle with the engine running, check that the air intake selector is set to "FRESH AIR" and the blower is at high speed.

(Continued)

(Continued)

- Avoid operating the vehicle with the tailgate or trunk open. If it is necessary to do so, check that the all windows are closed, and the blower is at high speed with the air intake selector set to "FRESH AIR".
- To allow proper operation of your vehicle's ventilation system, keep the air inlet grill in front of the windshield clear of snow, leaves or other obstructions at all times.
- Keep the exhaust tailpipe area clear of snow and other material to help reduce the buildup of exhaust gases under the vehicle. This is particularly important when parked in blizzard conditions.
- Have the exhaust system inspected periodically for damage and leakage. Any damage or leakage should be repaired immediately.

Do not Take a Nap with Engine Running

69RHS172

WARNING

Do not take a nap with the engine running. Otherwise, it may result in an accident, severe health problems or death in the worst case.

- Exhaust gases can enter the vehicle due to surrounding conditions and wind direction, possibly causing carbon monoxide poisoning.
- The gearshift lever could change unintentionally, or the accelerator pedal could be depressed accidentally, causing an accident.
- If you were to accidentally step on the accelerator pedal while asleep, the engine and exhaust system could overheat, resulting in danger of fire.

When Loading the Luggage

Loading too much luggage in the vehicle may have negative effects to the vehicle body or driving performance.

59RN02230

 Fuel, chemical containers, spray cans etc. may catch a fire or cause an explosion.

Do not bring these objects into the vehicle.

(Continued)

(Continued)

 If you place any objects on the instrument panel, these objects may move and interfere with driver's view or safe driving. Also, the front passenger's front airbag may not work properly or these objects may be thrown out when the airbag inflates in an accident. Do not place any objects on the instrument panel.

59RN07290

A CAUTION

- If you hang any objects on the gearshift lever or use it as a handrest, the gearshift lever may not work properly, resulting in a malfunction or an accident.
- Do not hang any objects on the gearshift lever or use it as a handrest.
- If you pile up luggage, it may interfere with driver's view. Also, in a sudden braking, the luggage would jump out and it may result in an accident.
 - Do not pile up luggage in the vehicle.
- If animals move about in the vehicle, it may interfere with driver's view. Also, in a sudden braking, it may result in an accident.

When you bring animals into the vehicle, make sure that animals do not move about.

BEFORE DRIVING

Keys

Your vehicle comes with a pair of identical keys. Keep one of the keys as a spare key in a safe place. One key can open all of the locks on the vehicle.

Key Number Plate

55T030020

The key identification number (1) is stamped on a metal tag (2) provided with the keys. Keep the tag in a safe place. If you lose your keys, you will need this number to have new keys made. Write the number below for your future reference.

KEY NUMBER:	

NOTE:

- Carefully keep the tag in the place other than your vehicle, so that someone does not find out about the key identification number. If you lose your key, inform the key identification number to a Maruti Suzuki authorized workshop
- When you resell or transfer your vehicle to a new owner or operator, give the key number plate with your vehicle to him or her.

Immobilizer System

For detail of immobilizer system, "Immobilizer System" in the "OPERATING YOUR VEHICLE" section

Doors

WARNING

- When a seat belt or luggage is caught by a door, the door cannot be shut properly and it may open while driving. This may cause an accident. Close a door not to catch a seat belt or luggage in the door.
- When you keep the tailgate open with the engine running, exhaust gases will enter the vehicle and cause carbon monoxide poisoning. This may cause severe health problems or death in the worst case. Do not keep the tailgate open with the engine running.
- To prevent fire or theft, stop the engine and lock the doors when leaving the vehicle.
- When opening a door, be careful of the surrounding area. An accident, such as a collision with the vehicle or a pedestrian behind your vehicle, may occur. Be very careful when opening a door especially on a windy day.

A CAUTION

- · When a child opens or closes a door, his / her hands, legs or head may be caught in the door and this may cause injury. Opening or closing a door should be performed not by a child but by an adult.
- · When the tailgate is not fully opened, it may be unexpectedly closed and this may cause injury. When opening the tailgate, open it fully.
- Opening the tailgate right behind the exhaust pipes may cause burn injury. With the engine running, do not open the tailgate right behind the exhaust pipes.

NOTICE

80T030330

Do not put your foot on the side sill splash quard (1).

This might cause it to damage.

NOTE:

- · When leaving the vehicle even for a short period of time, do not leave cash or valuables in the vehicle, to avoid risk of theft.
- Depending on the setting conditions of the security alarm and the opening conditions of the doors, an alarm may operate. Refer to "Security System" in this section.

Side Door Locks

59RN03180

- (1) UNLOCK
- (2) LOCK (3) Front
- (4) Rear

To lock a front door from outside the vehicle:

- Insert the key and turn the top of the key toward the front of the vehicle, or
- Turn the lock knob forward, then pull and hold the door handle as you close the door.

To unlock a front door from outside the vehicle, insert the key and turn the top of the key toward the rear of the vehicle.

BEFORE DRIVING

(1) LOCK (2) UNLOCK

To lock a door from inside the vehicle, turn the lock knob forward. Turn the lock knob rearward to unlock the door.

To lock a rear door from outside the vehicle, turn the lock knob forward and close the door. You do not need to pull and hold the door handle as you close the door.

NOTE:

Be sure to hold the door handle when you close a locked front door, or the door will not remain locked.

Central Door Locking System

59RN03180

NOTE:

You can switch the function that unlocks all doors from requiring two turns to requiring one turn, and vice versa, via the information display setting mode. For details on how to use the information Display, refer to "Information Display" in "INSTRUMENT CLUSTER" section.

- (1) UNLOCK
- (2) LOCK
- (3) Front
- (4) Rear

You can lock and unlock all doors (including the tailgate) simultaneously by using the key in the driver's door lock.

To lock all doors simultaneously, insert the key in the driver's door lock and turn the top of the key toward the front of the vehicle.

To unlock all doors simultaneously, insert the key in the driver's door lock and turn the top of the key toward the rear of the vehicle.

Child-proof Locks (rear door)

80T030100

- (1) UNLOCK (2) LOCK
- Each of the rear doors is equipped with a child-proof lock which can be used to help prevent unwanted opening of the door from inside the vehicle. When the lock lever is in the lock position (2), the rear door can only be opened from outside. When the lock lever is in the unlock position (1), the rear door can be opened from inside or outside.

WARNING

Be sure to place the child-proof lock in the lock position whenever children are seated in the rear.

NOTE:

When you open a door from inside, put your hand out of the window and use the door handle.

Tailgate

WARNING

Always check that the tailgate is closed and latched securely. Completely closing the tailgate helps prevent occupants from being thrown from the vehicle in the event of an accident. Completely closing it also helps keep exhaust gases from entering the vehicle.

A CAUTION

If you unlock the tailgate, pull up the tailgate handle and pull the tailgate, it will continue to open to the fully-open position by the damper stay performance. Check that no obstacle exists within the opening and closing range of the tailgate.

Locking and unlocking from outside the vehicle

80T030260

(1) Tailgate handle

You can lock and unlock the tailgate by using the key in the driver's door lock.

To open the tailgate, pull up the tailgate handle (1) and pull the tailgate.

BEFORE DRIVING

Unlocking from inside the vehicle

If you cannot unlock the tailgate by using the key in the driver's door lock due to a discharged lead-acid battery or malfunction, follow the procedure below to unlatch the tailgate from inside the vehicle.

 Fold the rear seat forward for easier access. Refer to "Folding Rear seats" in "FOR SAFE DRIVING" section for details on how to fold the rear seat forward.

Remove the trim (2) of the tailgate.
 Insert a flat-bladed screwdriver covered with a soft cloth between the trim and the tailgate to make a space for fingers, and then pull out the trim with your fingers.

78RB02004

3) Move the lever (3) in arrow direction to unlock the tailgate.

80T030110

 From outside the vehicle, pull up the tailgate handle (4) and open the tailgate.

If the tailgate cannot be unlatched by pulling up the tailgate handle, have the vehicle inspected by a Maruti Suzuki authorized workshop.

A CAUTION

Check that there is no one near the tailgate when pushing open the tailgate from inside the vehicle.

Keyless Entry System Transmitter / Keyless Push Start System Remote Controller

55T030010

Your vehicle is equipped with either a keyless entry system transmitter (1) or a keyless push start system remote controller (2). The transmitter has only a keyless entry system. The remote controller has a keyless entry system and a keyless push start system. For details, refer to the following explanations.

WARNING

Radio waves from the keyless push start system antenna(s) may interfere with operation of electrical medical equipment such as pacemakers. Failure to take the precautions listed below can increase the risk of severe injury or death due to radio wave interference.

- Anyone who uses electrical medical equipment such as a pacemaker should consult the medical equipment supplier or their medical advisor about whether radio waves from the antenna(s) can interfere with the medical equipment.
- If radio wave interference is a concern, have the function of the antenna(s) disabled by a Maruti Suzuki authorized workshop.

Keyless Entry System Transmitter (if equipped)

79MH0237

- (1) LOCK button
- (2) UNLOCK button

You can lock or unlock all doors (including the tailgate) simultaneously by operating the transmitter near the vehicle.

BEFORE DRIVING

Central door locking system

- To lock all doors, push LOCK button (1) once.
- To unlock only the driver's door, push UNLOCK button (2) once.
- To unlock other doors, push UNLOCK button (2) once again.

The turn signal lights will flash once and the siren will sound once (if equipped) when the doors are locked.

When the doors are unlocked:

- The turn signal lights will flash twice and the siren will sound twice (if equipped).
- If the interior light switch is in DOOR position, the interior light will turn on for about 15 seconds and then fade out. If you insert the key into the ignition switch during this time, the light will start to fade out immediately.

Check that the doors are locked after you operate LOCK button (1).

NOTE:

- If no door is opened within about 30 seconds after UNLOCK button (2) is operated, the doors will automatically lock again.
- If you lock the doors using the transmitter when the engine hood is open, the siren will sound 3 times to remind you (if equipped).

- If the security system was triggered due to an unauthorized entry into the vehicle and then you unlock the doors using the transmitter, the siren will sound 4 times to remind you. If this happens, check whether your vehicle has been broken into while you were away from it.
- Once you push both of the LOCK button (1) and UNLOCK button (2), then you push one of the buttons within 5 seconds, the siren will not sound (if equipped). However, push one of the buttons 5 seconds later, the siren will sound.
- You can set whether the siren sounds (if equipped) when locking or unlocking the door(s) via the setting mode of the information display. For details on how to use the information display, refer to "Information Display" in "INSTRUMENT CLUS-TER" section.
- The maximum operating distance of the keyless entry system transmitter is about 5 m (16 ft.), but this can vary depending on the surroundings, especially near other transmitting devices such as radio towers or CB (Citizen's Band) radios.
- The door locks cannot be operated with the transmitter, if the ignition key is inserted in the ignition switch.
- When any door is open, the door locks can only be unlocked with the transmitter, and the turn signal light will not flash.

 If you lose one of the transmitters, ask your Maruti Suzuki authorized workshop as soon as possible for a replacement. Have your Maruti Suzuki authorized workshop for program the new transmitter code in your vehicle's memory so that the old code is erased.

NOTICE

The transmitter is a sensitive electronic instrument. To avoid damaging the transmitter:

- Do not expose it to impacts, moisture or high temperature such as by leaving it on the dashboard under direct sunlight.
- Keep the transmitter away from magnetic objects such as a television.

Car locator function (if equipped)

This function helps in locating the vehicle. Push both of the LOCK button (1) and UNLOCK button (2) for more than 3 seconds.

The turn signal lights will blink for about 27.5 seconds. Also, the siren will sound for about 27.5 seconds at the same time.

To cancel the car locator function, press any button (LOCK or UNLOCK).

You can also turn the ignition switch to the "ON" position or the press the engine switch to change the ignition mode to ON to cancel the car locator function.

NOTE:

The car locator function will not activate when the key is in the ignition switch.

Battery replacement

If the transmitter becomes unusable, replace the battery.

NOTE:

You may damage the transmitter when replacing its battery. Ask your Maruti Suzuki authorized workshop to inspect the system.

To replace the battery of the transmitter:

738020030

- 1) Remove the screw (1), and open the transmitter cover (2).
- 2) Remove the transmitter (3) from the transmitter holder (4).

73S020010

- (6) Lithium disc type battery: CR1616
- 3) Separate the case up and down while applying force to the slot (5) on the side of the transmitter (3).
- 4) Replace the battery (6) so its + terminal faces "+" mark of the transmitter.
- 5) Close the case and install it into the transmitter holder (4).
- 6) Close the transmitter cover (2), install and tighten the screw (1).
- 7) Check that the door locks can be operated with the transmitter.
- Dispose of the used battery properly according to applicable rules or regulations. Do not dispose of lithium batteries with ordinary household trash.

Swallowing a lithium battery may cause serious internal injury. Do not allow anyone to swallow a lithium battery. Keep lithium batteries away from children and pets. If swallowed, contact a physician immediately.

NOTICE

- The transmitter is a sensitive electronic instrument. To avoid damaging it, do not expose it to dust or moisture or tamper with internal parts.
- When replacing the battery by yourself, the transmitter controller could be damaged affected by static electricity. Discharge the static electricity built up in your body by touching metal before replacing the battery.

NOTE:

Used batteries must be disposed of properly according to applicable rules or regulations and must not be disposed of with ordinary household trash.

80JM133

(1) Crossed-out wheeled bin symbol

The crossed-out wheeled bin symbol (1) indicates that a used battery should be collected separately from ordinary household trash.

By ensuring the used battery is disposed of or recycled correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate battery disposal. The recycling of materials will help to conserve natural resources. For more detailed information about disposing of or recycling of the used battery, consult with a Maruti Suzuki authorized workshop.

Be careful not to lose your key and to leave it in the locked vehicle.

▲ WARNING

When you take the remote controller in an airplane, do not press the lock button or the unlock button. When you put the remote controller in a bag, place it so that either of these buttons is not pressed easily. If either of these buttons is pressed, radio wave may interfere with operation of the airplane.

*The remote controller is an electronic device which has a restriction on its use in the airplane.

Keyless Push Start System Remote Controller (if equipped)

The remote controller enables the following operations:

- You can lock or unlock the doors by operating LOCK/UNLOCK buttons on the remote controller. Refer to the explanation in this section.
- You can lock or unlock the doors by pushing the request switch. For details, refer to the explanation in this section.
- You can start the engine without using an ignition key. For details, refer to "Engine Switch (Vehicle with Keyless Push Start System) (if equipped)" in "OPERATING YOUR VEHICLE" section.

52RM20060

(1) LOCK button (2) UNLOCK button There are two ways to lock or unlock all doors (including the tailgate) simultaneously by operating the remote controller near the vehicle.

Central door locking system

- To lock all doors, push LOCK button (1) once.
- To unlock only the driver's door, push UNLOCK button (2) once.
- To unlock other doors, push UNLOCK button (2) once again.

The turn signal lights will flash once and the siren will sound once (if equipped) when the doors are locked.

When the doors are unlocked:

- The turn signal lights will flash twice and the siren will sound twice (if equipped).
- If the interior light switch is in DOOR position, the interior light will turn on for about 15 seconds and then fade out. If you press the engine switch during this time, the light will start to fade out immediately.

Check that the doors are locked after you operate LOCK button (1).

NOTE:

- If no door is opened within about 30 seconds after UNLOCK button (2) is operated, the doors will automatically lock again.
- The maximum operating distance of the remote controller is about 5 m (16.4 ft.), but this can vary depending on the surroundings, especially near other transmitting devices such as radio towers or CB (Citizen's Band) radios.
- The door locks cannot be operated with the remote controller if the ignition mode is other than the "LOCK" (OFF).
- When any door is open, if you push LOCK button on the remote controller, the exterior buzzer will sound and doors cannot be locked
- If you lose one of the remote controllers, ask your Maruti Suzuki authorized workshop as soon as possible for a replacement. Have your Maruti Suzuki authorized workshop for program the new remote controller code in your vehicle's memory so that the old code is erased.

Car locator function

This function helps in locating the vehicle. Push both of LOCK button (1) and UNLOCK button (2) for more than 3 seconds. The turn signal lights will blink for about 27.5 seconds. Also, the siren will sound for about 27.5 seconds at the same time.

To cancel the car locator function, press any button (LOCK or UNLOCK).

You can also cancel the car locator function in any of the following operations.

- Press the engine switch to change the ignition mode to ON.
- Bring the remote controller with you and press the request switch.

NOTE:

- The car locator function will not activate when the ignition mode is "ACC" or "ON".
- If you lock the doors using the remote controller when the engine hood are open, the siren will sound 3 times to remind you.
- If the security system was triggered due to an unauthorized entry into the vehicle and then you unlock the doors using the remote controller, the siren will sound 4 times to remind you. If this happens, check whether your vehicle has been broken into while you were away from it.
- Once you push both of LOCK button (1) and UNLOCK button (2), then you push one of the buttons within 5 seconds, the siren will not sound. However, push one

of the buttons 5 seconds later, the siren will sound.

- You can set whether the siren sounds when locking or unlocking the door(s) via the setting mode of the information display.
- For details on how to use the information display, refer to "Information Display" in "INSTRUMENT CLUSTER" section.
- The maximum operating distance of the remote controller is about 5 m (16 ft.), but this can vary depending on the surroundings, especially near other transmitting devices such as radio towers or CB (Citizen's Band) radios.
- The door locks cannot be operated with the remote controller if the ignition mode is other than the LOCK (OFF).
- When any door is open, if you push LOCK button on the remote controller, the exterior buzzer will sound and doors cannot be locked.
- If you lose one of the remote controllers, ask your Maruti Suzuki authorized workshop as soon as possible for a replacement. Have your Maruti Suzuki authorized workshop for program the new remote controller code in your vehicle's memory so that the old code is erased.

Keyless unlocking / locking using the request switches

80T030130

When the remote controller is within the operating range described in this section, you can lock or unlock all the doors (including tailgate) by pushing the request switch (1) on the driver's door or front passenger's door or tailgate.

When all doors are unlocked:

 To lock all doors, push one of the request switches once.

The turn signal lights will flash once and the siren will sound once when the doors are locked.

To unlock a door or all doors:

- Push one of the request switches once to unlock only one door.
- Push one of the request switches twice to unlock all doors.

When the doors are unlocked:

- The turn signal lights will flash twice and the exterior buzzer will sound twice.
- If the interior light switch is in DOOR position, the interior light will turn on for about 15 seconds and then fade out. If you press the engine switch during this time, the light will start to fade out immediately.

Check that the doors are locked after you operate the request switch to lock the doors.

NOTE:

- The door locks cannot be operated by the request switch under the following conditions:
 - If any door is open or is not completely closed.
 - If the ignition mode is in any other mode than LOCK (OFF).
- If no doors are opened within about 30 seconds after unlocking the doors by pushing the request switch, the doors will be locked again automatically.

80T030140

(3) 80 cm (2.6 ft)

When the remote controller is within approximately 80 cm (2.6 ft) from a front door handle or the tailgate switch, you can lock or unlock the doors by pushing the request switch.

NOTE:

- If the remote controller is outside the request switch operating range described above, you will not be able to operate the request switch.
- If the battery of the remote controller runs down or there are strong radio waves or noise, the request switch operating range may be reduced or the remote controller may be inoperative.
- If the remote controller is too close to the door glass, the request switches may not operate.

- If a spare remote controller is in the vehicle, the request switches may not operate normally.
- The remote controller will only operate a request switch if it is within the switch's operating range. For example, if the remote controller is within the operating range of the driver's door request switch but not the front passenger's door request switch or the tailgate request switch, the driver's door switch can be operated but the front passenger's door switch or tailgate switch cannot be operated.

NOTICE

The remote controller is a sensitive electronic instrument. To avoid damaging the remote controller:

- Do not expose it to impacts, moisture or high temperature such as by leaving it on the dashboard under direct sunlight.
- Keep the remote controller away from magnetic objects such as a television.

NOTE:

The keyless push start system may not function correctly in certain environments or under certain operating conditions such as the following:

 When there are strong signals coming from a television, power station or a cellular phone.

- When the remote controller is in contact with or covered by a metal object.
- When a radio wave type remote keyless entry is used nearby.
- When the remote controller is placed near an electronic device such as personal computer.

Some additional precautions you should take and information you should be aware of are:

- Check that the key is stowed in the remote controller. If the remote controller becomes unusable, you will not be able to lock or unlock the doors.
- Check that the driver always carries the remote controller.
- If you lose one of the remote controllers, ask your Maruti Suzuki authorized workshop as soon as possible for a replacement. Have your Maruti Suzuki authorized workshop for program the new remote controller code in your vehicle's memory so that the old code is erased.
- You can use up to four remote controllers and the keys for your vehicle. Ask your Maruti Suzuki authorized workshop for details.
- The battery life of the remote controller is about two years, but it can vary depending on usage conditions.

55T030030

To stow the key into the remote controller, push the key in the remote controller until you hear a click.

To remove the key from the remote controller, slide the lock knob (A) in arrow direc-

tion and pull the key out from the remote controller.

Request switch warning buzzer

The exterior buzzer beeps for about 2 seconds in the following conditions to warn you that the request switch is not working:

- The request switch is pressed after all doors are closed with the ignition mode changed to ACC or ON position by pressing the engine switch when the remote controller is outside the vehicle.
- The request switch is pressed in any of the following conditions after changing the ignition mode to LOCK (OFF) by pressing the engine switch.
 - The remote controller is left inside the vehicle.
 - Any door (including the tailgate) is open.

Press the request switch again after doing the following:

With the ignition mode changed to LOCK (OFF) by pressing the engine switch, bring out the remote controller if it is inside the vehicle and check that all doors are completely closed.

Reminder function

77R40040

If the remote controller is not in the vehicle under the following conditions, the buzzer sounds intermittently for about 2 seconds and the immobilizer/keyless push start system warning light on the instrument cluster blinks:

When one or more doors are opened and all of the doors are later closed with the ignition in any other mode than LOCK (OFF).

The indicator light will turn off within several seconds after the remote controller is returned to an area of the vehicle other than the rear luggage area.

If the remote controller is left in the vehicle and you lock the driver's door or front passenger's door as described below, the door will be automatically unlocked.

- If you open the driver's door and lock the door by turning the lock knob forward, the driver's door will be automatically unlocked.
- If you open the front passenger's door and lock the door by turning the lock knob forward, the front passenger's door will be automatically unlocked.

NOTE:

- The reminder will not operate when the remote controller is on the instrument panel, in the glove box, in a storage compartment, in the sun visor or on the floor, etc.
- Check that the driver always carries the remote controller.
- Do not leave the remote controller in the vehicle when leaving the vehicle.

Battery Replacement

▲ WARNING

Swallowing a lithium battery may cause serious internal injury or death in the worst case. Do not allow anyone to swallow a lithium battery. Keep lithium batteries away from children and pets. If swallowed, contact a physician immediately.

NOTICE

- The remote controller is a sensitive electronic instrument. To avoid damaging it, do not expose it to dust or moisture or tamper with internal parts.
- When you replace the battery by yourself, touch a metallic part and remove static electricity to prevent damaging the remote controller.

NOTE:

- · Used batteries must be disposed of properly according to applicable rules or regulations and must not be disposed of with ordinary household trash.
- You may damage the remote controller when replacing its battery. Ask your Maruti Suzuki authorized workshop to inspect the system.
- · When you purchase the battery by yourself at Maruti Suzuki authorized workshop, check the year of manufacture for the battery.

If the remote controller becomes unreliable, replace the battery as follows:

NOTE:

You may damage the remote controller when replacing its battery. Ask your Maruti Suzuki authorized workshop for details.

- 1) Pull the key out from the remote controller.
- 2) Separate the remote controller up and down while applying force to the slot (1) on the side of the remote controller.
- 3) Replace the old battery.

55T030490

- (2) Lithium disc type battery: CR2032
- 4) Place the battery (2) so its + terminal faces up as shown in the illustration.
- 5) Close the remote controller firmly.
- 6) Make sure the door locks can be operated with the remote controller.
- 7) Dispose of the used battery properly according to applicable rules or regulations. Do not dispose of lithium batteries with ordinary household trash.

80JM133

(1) Crossed-out wheeled bin symbol

The crossed-out wheeled bin symbol (1) indicates that a used battery should be collected separately from ordinary household trash.

By ensuring the used battery is disposed of or recycled correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate battery disposal. The recycling of materials will help to conserve natural resources. For more detailed information about disposing of or recycling of the used battery, consult with a Maruti Suzuki authorized workshop.

Security System

The security system is armed after you close and lock all doors (including engine hood and tailgate) by using the keyless entry system transmitter, keyless push start system remote controller or request switch.

Once the system is armed, any attempt to open a door by using any other means (*) than the keyless entry system transmitter, keyless push start system remote controller or request switch, or open the engine hood will cause the alarm to be triggered.

- The key
- The lock knob on a door

NOTE:

- The security system generates alarms when any of the predetermined conditions is met. However, the system does not have any function of blocking unauthorized entry into the vehicle.
- Always use the keyless entry system transmitter, keyless push start system remote controller or request switch to unlock the doors when the security system has been armed. Using a key instead will trigger the alarm.
- If a person who does not know the security system is going to drive the vehicle, we recommend you explain the system and its operation to the person. Mistakenly triggering the alarm may cause a nuisance to others

 Even if the security system is armed, you should still be careful to guard against theft. Do not leave money or valuable things in the vehicle.

How to Arm the Security System

Lock all doors (including engine hood and tailgate) using the keyless entry system transmitter, keyless push start system remote controller or request switch.

When the system is armed, the indicator (1) continues to blink at intervals of approximately 2 seconds.

77R3011

NOTE:

- To prevent the alarm from being accidentally triggered, avoid arming it while anyone remains inside the vehicle. The alarm will be triggered if any person inside opens the door, tailgate, engine hood, or the warning may be triggered.
- The security system is not armed when all doors are locked using the key from

- outside, using the door lock knobs or the central door locking switch from inside.
- If any door is not operated within approximately 30 seconds after the doors have been unlocked using the keyless entry system transmitter, keyless push start system remote controller or request switch, the doors are automatically locked again. When the doors are locked, the security system will be armed.
- If the security system indicator (1) blinks when the ignition switch is in the "ON" position or the ignition mode is "ON", there may be something wrong with the security system. Ask your Maruti Suzuki authorized workshop for inspection.

How to Disarm the Security System Simply unlock the doors using the keyless entry system transmitter, keyless push start system remote controller or request switch. The security system indicator will go out, indicating that the security system is disarmed.

How to Stop the Alarm

Should the alarm be triggered accidentally, the alarm will stop by the following operations.

- Turn the ignition switch to "ON" position or press the engine switch to change the ignition mode to ON in case of emergency.
- Unlock the doors using the keyless entry system transmitter, keyless push start system remote controller or request switch.

NOTE:

- Even after the alarm has stopped, if you lock the doors using the keyless entry system transmitter, keyless push start system remote controller or request switch, the security system will be rearmed.
- If you disconnect the battery while the security system is in the armed condition or the alarm is actually in operation, the alarm will be re-triggered when the battery is reconnected.
- Even after the alarm has stopped at the end of the predetermined operation time, it will be triggered again if any of the doors, tailgate or engine hood is opened, without disarming the security system.

Checking Whether the Alarm has Been Triggered During Parking

If the alarm was triggered and you then turn the ignition switch to "ON" position or the ignition mode is ON the security system indicator will blink rapidly for about 8 seconds and a buzzer will beep 4 times during this period. If this happens, check whether the vehicle has been broken into while you were away from it.

Security System Indication

- If any of the doors or tailgate are opened without unlocking by the keyless entry system transmitter, keyless push start system remote controller or request switch, all turn signal lights start to blink and the interior buzzer beeps intermittently. After 5 seconds, the siren will sound for about 27.5 seconds. The security system indicator continues to blink during this time.
- If the engine hood is opened, all turn signal lights blink, and the siren sounds for about 27.5 seconds. The security system indicator continues to blink during this time.

Windows

Electric Window Controls

The electric windows can only be operated when the ignition switch is in "ON" position or the ignition mode is ON.

Front

80T030150

The center console has a switch (1) to operate the driver's window, and a switch (2) to operate the front passenger's window.

78RB02007

To open a window, push the switch. To close the window, lift up the switch.

The driver's window has AUTO-DOWN and AUTO-UP (if equipped) features for greater convenience (at toll booths or drive-through restaurants, for example). These features allow the driver to open or close the window without holding the window switch in DOWN or UP position. Press down or lift up the driver's window switch completely and release it. To stop the window before it reaches the FULL-DOWN or FULL-UP position, pull up or push down the switch briefly.

(0)

The floor console has switches (3) and (4) to operate the rear left and right passenger windows.

81A009

To open a window, push the top part of the switch. To close the window, lift up the top part of the switch.

Off-delay timer function for the driver's window

After you turn the ignition switch to "ACC" or "LOCK" position or press the engine switch to change ON mode to ACC or LOCK (OFF) mode, you can open or close the driver's window within 30 seconds.

NOTE:

Even within 30 seconds, if the driver's door or the passenger's door is opened, you cannot open or close the driver's window.

Rear

80T03005

The rear passenger's door has a switch (5) to operate the passenger's window.

80T030060

To open a window, push the top part of the switch. To close the window, lift up the top part of the switch.

WARNING

- When opening or closing a window, a part of body such as hands, legs and neck may be caught by the window and an accident may occur. When you operate a window, observe the following precautions:
 - A driver and the other passengers should be careful when opening or closing a window.
 - Do not allow a child to operate the window switches.
 - You should always lock the passenger's window operation when there are children in the vehicle.
 Children can be seriously injured if they get part of their body caught by the window during operation.
 Refer to "Window Lock Switch" in this section for details.
 - When you leave your vehicle, make sure to turn the ignition switch to "LOCK" or press the engine switch to change the ignition mode to OFF. Then, carry your key with you and take a child or children out of the vehicle.

(Continued)

WARNING

(Continued)

- When you open or close the front passenger's window or the rear windows on the driver's side, check that the other passengers and children do not take their hands and faces outside the vehicle, before the window operation.
 Also, make sure to inform them that you will perform the window operation.
- When you operate the electric window controls from the outside of the window, your hands or neck may be caught by the window and an accident may occur. Do not operate the electric window controls from the outside of the window.

NOTE:

If you drive with one of the rear windows open, you may hear a loud sound caused by air vibration. To reduce the sound, open the driver's or front passenger's window, or narrow the rear window opening.

Window Lock Switch

80T030040

The floor console also has a lock switch for the rear passenger's window(s). When you push in the lock switch, the rear passenger's window(s) cannot be raised or lowered by operating any of the switches (3), (4) or (5). To restore normal operation, release the lock switch by pushing it again.

Pinching Prevention Function

The driver's window is equipped with a pinching prevention function. This function detects a foreign object that is caught in the window as it is being closed by AUTO-UP feature, which allows you to close the window without holding the window switch in UP position, and stops the window from closing to prevent damage.

WARNING

The function may not detect the object depending on shape, size, hardness and position of the object caught by the closing window. This may cause severe injury.

Be very careful when opening or closing the windows.

A CAUTION

- The pinching prevention function does not operate while you are holding the window switch in UP position.
- The pinching prevention function may not detect an object caught in the window just before the window is fully closed.

NOTE:

Even if you cannot close the window by the AUTO-UP feature because there may be something wrong with the pinching prevention function, you can close the window by holding the window switch in UP position. If you drive in extreme off-road condition, the pinching prevention function may operate accidentally because the window reacts to vehicle jolting.

Pinching prevention function initialization

When you disconnect and reconnect the lead-acid battery or replace the fuse, the function will be deactivated. In this condition, the AUTO-DOWN feature will be deactivated, while the AUTO-UP feature may remain activated. The pinching prevention function needs to be initialized.

To initialize the pinching prevention function, use the following procedure:

- 1) Turn the ignition switch to "ON" position or press the engine switch to change the ignition mode to ON.
- 2) Open the driver's window fully by holding the window switch in DOWN position
- 3) Close the driver's window by holding the switch in UP position, and keep holding the switch for 2 seconds after the window is fully closed.
- 4) Check the driver's window to see if the AUTO-DOWN/UP feature works.

WARNING

As the pinching prevention function will not operate until its initialization is completed, an accident may occur. Make sure to perform the pinching prevention function initialization.

If the AUTO-DOWN/UP feature will not work after initialization, there might be something wrong with the pinching prevention function. Have your vehicle inspected by a Maruti Suzuki authorized workshop.

Lighting Control Lever Automatic Light Operation (if equipped)

80T030360

Your vehicle's lighting system is controlled by two main systems: the lighting switch and the auto-on headlight system (when the lighting switch is in "AUTO" position). The two systems work together to operate your lights as shown in the following chart:

ON: Lights ON

LIGHT: When it is light around the light sensor (5). DARK: When it is dark around the light sensor (5).

Lighting switch position	Main lights to be operated	Ignition switch in the "LOCK" or "ACC" position / Ignition mode LOCK (OFF) or ACC		Ignition switch in the "ON" position / Ignition mode ON	
•		LIGHT	DARK	LIGHT	DARK
(1) OFF	Position lights, Tail lights	_	_	_	-
	Headlights	_	_	_	_
(2) AUTO	Position lights, Tail lights	_	_	_	ON
	Headlights	-	-	-	ON
(3) ₹0 0€	Position lights, Tail lights	ON	ON	ON	ON
	Headlights	-	-	-	_
(4) ≣□	Position lights, Tail lights	ON	ON	ON	ON
	Headlights	ON	ON	ON	ON

To turn the lights on or off, twist the knob on the end of the lever. There are four positions:

OFF (1)

All lights are off.

AUTO (2)

This function works when the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON. The headlights and position lights are turned on and off automatically according to the amount of outside light detected by a sensor. They go out automatically when you turn the ignition switch to "ACC" or "LOCK" position or change the ignition mode to ACC or LOCK (OFF) by pressing the engine switch.

The light sensor (5) for sensing the amount of outside light is installed on the passenger's seat side of instrument panel.

A CAUTION

If the light sensor area of the windshield is covered with mud, ice, or other similar substances, the headlights and position lights may be turned on even when it is still light outside.

NOTE:

- Avoid covering the light sensor area of the windshield with a sticker. The sticker may impair the performance of the sensor and make the system unable to control operation of the lights correctly.
- If you turned the ignition switch to "ON" position or changed the ignition mode to ON by pressing the engine switch and "AUTO" position remains selected, the headlights and position lights come on automatically as it gets dark outside, even with the engine not running. Leaving the lights lit for a long time may lead to a completely discharged battery.

=00€ (3)

Front position lights, tail lights, license plate light and instrument lights are on, but headlights are off.

≣○ (4)

Front position lights, tail lights, license plate light, instrument lights and headlights are on.

80T030370

With the headlights on, push the lever forward to switch to the high beams (main beams) and pull the lever toward you to switch to the low beams. When the high beams (main beams) are on, a light on the instrument cluster will come on. To momentarily activate the high beams (main beams) as a passing signal, pull the lever slightly toward you and release it when you have completed the signal.

Auto-on headlight system

80T03028

The auto-on headlight system automatically turns on all lights that are operated by the lighting switch, when the following three conditions are all met.

Conditions for auto-on headlight system operation:

- 1) It is dark around the light sensor (5).
- 2) The lighting switch is in "AUTO" position.
- 3) You turn the ignition switch to "ON" position or press the engine switch to change the ignition mode to ON.

This system is activated by a signal from the light sensor (5) on the passenger side of instrument panel. Do not cover the sensor (5). Otherwise, the system will not work correctly.

WARNING

It takes about 5 seconds for the light sensor to react to a change in lighting conditions. To help avoid an accident due to reduced visibility, turn on your headlights before driving into a tunnel, parking structure, etc.

NOTE:

The light sensor reacts even to infrared rays, so it may operate incorrectly when there are strong infrared rays.

Light Reminder Buzzer

The interior buzzer continuously beeps if you open the driver's door without turning off the headlights and position lights. This function is triggered under the following condition:

The headlights and/or position lights are on even after the ignition switch is turned to "LOCK" position, or the engine switch is pressed to change the ignition mode to LOCK (OFF).

The buzzer stops sounding when you turn off the headlights and position lights.

NOTE:

A message is indicated on the information display in the instrument cluster while the buzzer is sounding.

Front Fog Light Switch (if equipped)

55T030110

To turn the front fog light on, twist the knob as shown in the illustration with the position lights, tail lights and/or the headlights are on. When the front fog light is on, an indicator light on the instrument cluster will come on.

NOTE:

In some countries the lighting operation may be different from the above description according to local regulations.

Headlight Leveling Switch

80T030190

Level the headlight beam according to the load condition of your vehicle by turning this switch. The chart shows the appropriate switch position for different vehicle load conditions.

Vehicle Load Condition	Switch Position
Driver only	0
Driver + 1 passenger (in front seat)	0
Driver + 3 passengers, no cargo	1.5
Driver + 3 passengers, cargo added	2.0
Driver + full cargo	3.5

Headlight Washer Switch (if equipped)

80T030220

With the ignition switch in the "ON" or the ignition mode ON and the headlights are turned on, push the headlight washer switch to wash the headlight lenses. Washer fluid is sprayed for half a second. If necessary, push the switch again.

Under the same conditions, if you operate the windshield washer two or more times successively at short intervals, the headlight washers also operate automatically but only once at the same time as the first windshield washer operation.

Turn Signal Control Lever

You can use the turn signal control lever when the ignition switch is in "ON" position or the engine switch is in ON mode.

Turn Signal Operation

55T030340

With the ignition switch in "ON" position or the ignition mode ON, move the lever upward or downward to activate the right or left turn signals.

- Move the turn signal control lever (1) as follows:
 - Turning left: Move the lever upward.
 - Turning right: Move the lever downward
- When you move the lever, the turn signal lights and the turn signal light indicators on the instrument cluster will flash simultaneously.

- When you move the lever to its original position, the turn signal lights and the turn signal light indicators on the instrument cluster will be turned off.
- When changing lanes, if you lightly press the turn signal control lever in the directions (a) or (b) in which you want to change lanes, the turn signal lights and turn signal light indicators on the instrument cluster will flash only while the turn signal control lever is pressed.
- The turn signal control lever in the above figure is a typical example; the actual equipment depends on the vehicle type.

NOTE:

If the angle which you turn the steering wheel is small, the lever will not automatically returned to its original position. In this case, return the lever to its original position by your hand.

Lane change signal

55T030510

Move the lever partially upward or downward to turn right or left and hold the lever in the moved position.

- The turn signal and its indicator flash while the lever is held at the moved position.
- The turn signal and its indicator flash 3 times even if you returned the lever immediately after the activation.

NOTE:

- The turn signal and its indicator can be set whether they flash 3 times after the turn signal lever is returned via the information display. Refer to "Information Display" in "INSTRUMENT CLUSTER" section.
- You can customize the setting for the number of flashing times of the turn signal and its indicator (1 to 4 times).
 Please ask your Maruti Suzuki authorized workshop for the customization.

Hazard Warning Switch

77R30850

You can use the hazard warning switch to warn the other drivers of possible risk of traffic hazard when you park your vehicle in case of emergency.

- Push the hazard warning switch to activate the hazard warning lights. The turn signal lights and the turn signal indicators on the instrument cluster will flash simultaneously.
- Push the switch again to turn off the hazard warning switch.
- The instrument panel in the above figure is a typical example; the actual equipment depends on the vehicle type.

NOTICE

If you use the hazard warning switch for many hours with the engine stopped, the lead-acid battery may run out.

Do not use the hazard warning switch for many hours with the engine stopped.

Windshield Wiper and Washer Lever

When the ignition switch is in "ON" position or the ignition mode is ON, you can use the wiper/washer lever.

A CAUTION

In cold weather, the sprayed washer fluid on the glass may get frozen and it may cause poor visibility to a driver. Use the defroster to warm the glass and spray the washer fluid. Refer to "Heating And Air Conditioning" in the "OTHER CONTROLS AND EQUIPMENT" section.

NOTICE

- If you use the wipers with the glass dried, the glass and the wiper blade rubbers may be damaged. When the glass is dry, use the washer fluid and then use wipers.
- If you operate the wipers with the wiper blades stuck on the glass, the wiper blade rubbers may be damaged or the wipers may be broken. When the wiper blades are stuck on the glass, do not operate the wipers.
- If you use the washer when the washer fluid cannot be sprayed enough, the washer pump may be broken. When the washer fluid cannot be sprayed enough, turn off the washer switch.

When the operative wipers suddenly stop

When the wipers are under heavy load such as covered by snow and the temperature of the wiper motor becomes high. the breaker will be activated and the wipers will temporarily stop to protect the wiper motor from overheating.

If this happens, perform the following operations:

- 1) Stop the vehicle in a safe place, and turn the ignition switch to "ACC" or "LOCK" position or press the engine switch to change the ignition mode to ACC or LOCK (OFF).
- 2) Move the wiper lever and switch to "OFF" position.
- 3) Remove obstacles such as snow on the wipers.
- 4) After a while, when the temperature of the wiper motor becomes low enough, the breaker will be reset automatically and you can use the wipers.

If you cannot use the wipers after a while, there may be another problem. Ask your Maruti Suzuki authorized workshop to have the wipers inspected.

Windshield Wipers

52R30460

You can operate the windshield wipers by moving the lever (1) upward or downward.

MIST	Temporary operation only while the lever is up		
OFF	Off		
INT	Intermittent operation		
LO	Low speed operation		
HI High speed operation			

80T030250

The lever is equipped with the "INT TIME" control. Turn the control forward or rearward to adjust the intermittent wiper operation to the desired interval.

Windshield Washer

81P31000

If you pull the lever (1) toward you, the windshield washer fluid will be sprayed and the windshield wipers will automatically operate a few times.

▲ WARNING

- To prevent windshield icing in cold weather, turn on the defroster to heat the windshield before and during windshield washer use.
- Do not use radiator antifreeze in the windshield washer reservoir. It can severely impair visibility when sprayed on the windshield, and can also damage your vehicle's paint.

NOTICE

To help prevent damage to the windshield wiper and washer system components, you should take the following precautions:

- Do not continue to hold in the lever when there is no windshield washer fluid being sprayed or the washer motor can be damaged.
- Do not attempt to remove dirt from a dry windshield with the wipers or you can damage the windshield and the wiper blades. Always wet the windshield with washer fluid before operating the wipers.
- Clear ice or packed snow from the wiper blades before using the wipers.
- Check the washer fluid level regularly. Check it often when the weather is bad.

Rear Window Wiper

80T030350

You can operate the rear window wiper by twisting the lever (2) as shown in the illustration.

ON	Normal operation	
INT	Intermittent operation	
OFF	Off	

NOTICE

Clear ice or snow from the rear window and rear wiper blade before using the rear wiper. Accumulated ice or snow could prevent the wiper blade from moving, causing damage to the wiper motor.

Rear Window Washer

76TS30560

- If you twist the lever (2) in the direction
 of

 and align it to

 (washer) position
 above "ON" position, the rear window
 washer fluid will be sprayed and the rear
 wiper will operate simultaneously. If you
 release your hand from the lever, it will
 return to "ON" position.
- If you twist the lever (2) in the direction
 of and align it to □ (washer) position
 below "OFF" position, the rear window
 washer fluid will be sprayed and the rear
 wiper will operate simultaneously. If
 you release your hand from the lever, it
 will return to "OFF" position.

Horn

80TM03001

Press the horn button of the steering wheel to sound the horn.

Heated Rear Window Switch Type 1

80T030320

Type 2

78RB02064

When the rear window is misted, push this switch (1) to clear the window.

An indicator light will come on when the defogger is on. The defogger will work only when the engine is running. To turn off the defogger, push the switch (1) again.

NOTICE

The heated rear window use a large amount of electricity. Turn off the switch after the window have become clear.

NOTE:

- The defogger will work only when the engine is running.
- The defogger will automatically turn off after the defogger remains on for 15 minutes to prevent discharging of the leadacid battery.

Instrument Cluster	4-1
Information Switch (if equipped)	4-3
Information Display	4-4
Warning and Indicator Lights	4-2

Instrument Cluster

- (1) Speedometer

- (2) Tachometer(3) Information display(4) Trip meter selector knob
- (5) Indicator selector knob(6) Warning and indicator lights

80TM04001

Speedometer

The speedometer indicates vehicle speed.

Tachometer

The tachometer indicates engine speed in revolutions per minute.

NOTICE

Never drive the vehicle with the engine revving in the red zone or severe engine damage can result. Keep the engine speed below the red zone even when downshifting to a lower gear position.

Refer to "Downshifting maximum allowable speeds" in "OPERATING YOUR VEHICLE" section.

Fuel Gauge

78RB02036

When the ignition switch is in "ON" position or the ignition mode is ON, this gauge gives an approximate indication of the amount of fuel in the fuel tank. "F" stands for full and "E" stands for empty.

• If the indicator shows only one segment to "E", refill the tank as soon as possible.

If the last segment blinks, it means that the fuel is almost empty. If the low fuel warning light (1) comes on, fill the fuel tank immediately. Refer to "Low fuel warning light" in "Warning and indicator lights" in this section for details. The mark (2) indicates that the fuel filler door is located on the right side of the vehicle.

NOTICE

To minimize the possibility of damage to catalytic converter or other components of the vehicle, avoid driving the vehicle near empty fuel tank level.

Brightness Control

80TM04004

80TM04005

When the ignition switch is in "ON" position or the ignition mode is ON, the instrument panel lights come on.

Your vehicle has a system to automatically dim the brightness of the instrument panel lights when the position lights or headlights are on.

When the position lights and/or headlights are on, you can adjust the meter illumination brightness.

To increase the brightness of the instrument panel lights, turn the indicator selector knob (1) clockwise. To reduce the brightness of the instrument panel lights, turn the indicator selector knob (1) counterclockwise.

▲ WARNING

Do not adjust the brightness of the instrument panel lights while driving. Otherwise, you could lose control of the vehicle.

NOTE:

- If you do not turn the knob within several seconds, the brightness control display will be canceled automatically.
- When you reconnect the lead-acid battery, the brightness of the instrument panel lights will be reinitialized. Readjust the brightness according to your preference.
- If you adjust to the maximum brightness level when the position lights or headlights are on, the following functions will be cancelled.
 - The function which automatically dims the brightness of instrument panel lights
 - The function which operates with the brightness control, except maximum brightness level

Information Switch (if equipped)

You can use the information switch to switch the display indication when the ignition switch is in "ON" position and the vehicle is stationary.

78RB02099

- (1) Information switch
- (2) Indicator selector knob

To switch to the setting mode

- 1) Push and hold the information switch (1) when the vehicle is stationary.
- 2) After the display of setting mode is shown, select the setting item that you want to change by turning the indicator selector knob (2) left or right. Refer to "Setting mode" in this section for details.

NOTE:

If you switch to the setting mode while either of the following items is shown on the information display, the current value will be reset. If you do not want to reset its value, push the indicator selector knob (2) quickly beforehand and switch to the other item.

- Average fuel consumption
- · Driving time
- Average speed

To exit the setting mode

To exit the setting mode, select "Back" and push the indicator selector knob (2) or push the information switch (1) quickly.

NOTE:

You can exit the setting mode by either of the following operations:

- Turn the ignition switch to "ACC" or "LOCK" position or change the ignition mode to ACC or LOCK (OFF) by pressing the engine switch.
- Start driving your vehicle.

Information Display

The information display is shown when the ignition switch is in "ON" position or the ignition mode is ON.

80 I M04002

(1) Information display

78RB02039

- (2) Trip meter selector knob
- (3) Indicator selector knob

The information display shows the following information.

Display (A)

Clock

Display (B)

Thermometer

Display (C)

Warning and indicator messages / Fuel consumption / Driving range / Average speed / Driving time / Cruise control (if equipped)

Display (D)

Selector position (for Automatic transmission models) / Gearshift indicator (if equipped)

Display (E)

Trip meter / Odometer

Display (F) Fuel gauge

80TM04003

When the ignition switch is turned "ON" position or the ignition mode is ON, the message shown in the above illustration will appear on the display for several seconds.

Some warning and indicator messages may appear on the display when the ignition switch is in "ACC" or "LOCK" position or the ignition mode is ACC or LOCK (OFF).

Clock

When the ignition switch is turned "ON" position or the ignition mode is ON, the display (A) shows the time.

To set the clock, follow "Setting mode" instructions in this section.

WARNING

If you attempt to adjust the display while driving, you could lose control of the vehicle.

Do not attempt to adjust the display while driving.

Thermometer

When the ignition switch is in "ON" position or the ignition mode is ON, the display (B) shows the thermometer.

The thermometer indicates the outside temperature.

78RB02040

If the outside temperature nears freezing condition, the mark (a) will appear on the display.

NOTE:

- The outside temperature indication is not the actual outside temperature when driving at low speed, or when stopped.
- If there is something wrong with the thermometer, or just after the ignition switch is turned "ON" or changed the ignition mode to ON, the display may not indicate the outside temperature.

When the display (C) shows the driving range, you can change the unit of temperature.

To change the unit of temperature, refer to "Setting mode" in this section.

52RM20880

Fuel Consumption / Driving Range / Average Speed / Driving Time

When there are no warning or indicator messages on the display (C), you can select one of the following indications to appear on the display: instantaneous fuel consumption, average fuel consumption, driving range, average speed, driving time or no indication.

- (a) Instantaneous fuel consumption
- (b) Average fuel consumption
- (c) Driving range
- (d) Average speed
- (e) Driving time
- (f) No indication

To switch the display indication, push the indicator selector knob (3) quickly.

NOTE:

The value of fuel consumption, driving range and average speed shown on the display are affected by the following conditions:

- road condition
- · surrounding traffic condition
- driving condition
- · vehicle condition
- a malfunction which causes the malfunction indicator light to come on or blinks

011002041

Instantaneous fuel consumption

The display shows instantaneous fuel consumption with a bar graph only when the vehicle is moving.

NOTE:

- The display does not show the bar graph unless the vehicle is moving.
- Depending on the vehicle's specification, the fuel consumption units of initial setting are indicated as L/100km, km/L.
- The indicated maximum value of instantaneous fuel consumption is one of the followings. No more than the maximum value will be indicated on the display even if the actual instantaneous fuel consumption is higher.
 - For L/100km setting: 30
 - For km/L setting: 50
- The indication on the display may be delayed if fuel consumption is greatly affected by driving conditions.
- The display shows estimated values. Indications may not be the same as actual values

Average fuel consumption

If you previously selected average fuel consumption setting, the display shows average fuel consumption from the last reset to the present when the ignition switch is turned "ON" or the engine switch is pressed to change the ignition mode to ON.

NOTE:

When you reconnect the terminals to the lead-acid battery, the value of average fuel consumption will be shown after driving for a period of time.

You can select the timing to reset the value of average fuel consumption by one of the following three methods;

- Reset after refuel: the value of average fuel consumption will be reset automatically by refueling.
- Reset with trip meter A: the value of average fuel consumption will be reset automatically by resetting trip meter A.
- Reset manually: the value of average fuel consumption will be reset by pushing and holding the indicator selector knob (3) when the display indicates the average fuel consumption.

To change the timing to reset the value of average fuel consumption, refer to "Setting mode" in this section.

NOTE:

If you add only a small amount of fuel when you select "Reset after refuel", the average fuel consumption value may not be reset.

Driving range

If you selected driving range the last time you drove the vehicle, the display indicates "---" for a few seconds and then indicates the current driving range when the ignition switch is turned "ON" or the engine switch is pressed to change the ignition mode to ON.

The driving range shown in the display is an indicative unit of the approximate distance you can drive until the fuel gauge indicates "E", based on current driving conditions and current fuel level in the fuel tank.

When the low fuel warning light comes on, the display "---" will appear.

If the low fuel warning light comes on, fill the fuel tank immediately regardless of the value of driving range shown in the display.

When you refuel, the driving range is updated. However, if you only add a small amount of fuel, the correct value will not be displayed.

NOTE:

- If you refuel when the ignition switch is "ON" or the ignition mode is ON, the driving range may not indicate the correct value.
- When you reconnect the terminals to the lead-acid battery, the value of driving range will be shown after driving for a period of time.

 If there are substantial changes in the driving pattern or vehicle usage, the displayed range may vary significantly.

Average speed

If you selected average speed the last time you drove the vehicle, the display indicates the last value of average speed from previous driving when the ignition switch is turned "ON" or the engine switch is pressed to change the ignition mode to ON. Unless you reset the value of average speed, the display indicates the value of average speed which includes average speed during previous driving.

To reset the value of average speed, push and hold the indicator selector knob (3) for a while when the display indicates an average speed. The display shows "---" and then indicates a new average speed after driving for a short time.

NOTE:

When you reconnect the terminals to the lead-acid battery, the value of average speed will be shown after driving for a period of time.

Driving time

The display shows the total amount of driving time since the indication was reset.

 To reset the driving time, push and hold the indicator selector knob (3) for a while when the display shows the driving time.

NOTE:

- When you reset the indication or reconnect the terminals to the lead-acid battery, the driving time will be shown after driving for a while.
- The indicated maximum value of driving time is 99:59:59. No more than the maximum value will be indicated on the display until you reset the driving time.

Selector Position (for Automatic transmission vehicles) / Gearshift Indicator (for Manual transmission vehicles)

The display (D) shows some of the following indications.

80T040090

- (4) Selector position
- (5) Gearshift indicator

Refer to "Gearshift indicator" in "OPERAT-ING YOUR VEHICLE" section.

Trip Meter / Odometer

The display (E) shows one of the following indications; odometer, trip meter A or trip meter B.

To switch the display indication (E), push the trip meter selector knob (2).

80SM02040

- (a) Odometer
- (b) Trip meter A
- (c) Trip meter B

WARNING

Push the trip meter selector

If you attempt to adjust the display while driving, you could lose control of the vehicle.

Do not attempt to adjust the display while driving.

Trip meter

The trip meter can be used to measure the distance traveled on short trips or between fuel stops.

You can use trip meter A or trip meter B independently.

To reset the trip meter, push and hold the trip meter selector knob (2) until the display shows 0.0.

NOTE:

The indicated maximum value of the trip meter is 9999.9. When you run past the maximum value, the indicated value will return to 0.0.

Odometer

The odometer records the total distance the vehicle has been driven.

NOTICE

Keep track of your odometer reading and check the maintenance schedule regularly for required services. Increased wear or damage to certain parts can result from failure to perform required services at the proper mileage intervals.

Fuel Gauge

The display (F) shows the fuel gauge. Refer to "Fuel gauge" in this section.

Setting Mode

When the ignition switch is in "ON" position or the ignition mode is ON and the vehicle is stationary, you can enter the setting mode of the information display by pushing and holding the indicator selector knob (3) for a while.

- To select the setting that you want to change, turn the indicator selector knob (3) left or right.
- To change the setting, push the indicator selector knob (3).
- To exit the setting mode, select "Back" and push the indicator selector knob (3).

78RB02096

NOTE:

The currently selected setting item is surrounded by a frame.

NOTE:

- If you push and hold the indicator selector knob (3) to enter the setting mode when the display (C) shows average fuel consumption or average speed, driving time, the value will be reset simultaneously. If you do not want to reset the value, push the indicator selector knob quickly to switch the indication of the display.
- If you turn the ignition switch, press the engine switch or start to move the vehicle when the display is in the setting mode, the setting mode will be canceled automatically.

Distance unit

(Odometer / trip meter / driving range / average speed distance unit setting)

You can change the units in which odometer / trip meter / driving range / average speed distance is displayed.

Fuel economy (Fuel consumption unit setting)

You can change the units that fuel consumption is displayed in.

Language

You can change the language of the information display.

Fuel reset

(Average fuel consumption reset setting)

You can change when the value of average fuel consumption is reset.

Temperature

(Temperature unit setting)

You can change the units that temperature is displayed in.

 To change the temperature unit, select "Temperature" in "Setting mode". Then, select "°C" or "°F".

NOTE:

When you change the units that temperature is displayed in, the automatic heating and air conditioning system temperature display units will be changed automatically.

Clock setting (Adjusting the clock)

- Adjust the clock by selecting "Clock setting" in "Setting mode". Then, select "Adjust Clock".
- To change the hour indication, turn the indicator selector knob (3) left or right repeatedly when the hour indication appears as reversed color. To change the hour indication quickly, turn and hold indicator selector knob (3). To set the hour indication, push the indicator selector knob (3) and the minute indication appears as reversed color.
- To change the minute indication, turn the indicator selector knob (3) left or right repeatedly when the minute indication appears as reversed color. To change the minute indication quickly, turn and hold indicator selector knob (3). To set the minute indication, push the indicator selector knob (3).

(Selecting 12H/24H format)

 Switch the time indication between 12hour and 24-hour format by selecting "Clock setting" in "Setting mode". Then, select "12H" or "24H".

Door lock (Door lock setting) (Auto lock)

- Manual Lock: Disable the automatic door locking function
- Speed Sync: Lock all doors when the vehicle speed reaches 15 km/h (default setting)
- Gear shift sync: (if equipped)
 Lock all doors when the gearshift lever is in other than "P" position.

(Auto unlock)

- Sync Off:
 Disable the automatic door unlocking function (default setting)
- IGN-OFF Sync: (vehicle with keyless push start system) Unlock all doors when the engine switch is pressed to change the ignition mode to LOCK (OFF)
- IGN-OFF Sync: (vehicle without keyless push start system) Unlock all doors when the ignition switch
- is turned to "LOCK" position
 Gear shift sync:
 (for automatic transmission vehicle)
 Unlock all doors when the gearshift lever
 is moved from other position to "P" position.

(Alarm)

 You can turn off or on the siren sound when the door(s) is(are) locked or unlocked.

Lights

(Lane change setting)

The turn signal and its indicator can be set whether they flash three times even if you return the turn signal control lever shortly after operating it.

- To change the lane change setting, select "Lane change" in "Setting mode". Then, select "ON" or "OFF"
- If you want to change the number of flashing, consult with a Maruti Suzuki authorized workshop.

IS A/C (ENG A-STOP system setting)

- When using the automatic heating and air conditioning system (if equipped), you can select one of the following engine auto stop settings.
 - Standard
 - Economy
 - Comfort
- When "Economy" is selected, engine auto stop condition is eased, compared with "Standard". As engine auto stop condition will occur more frequently, the stop time will be longer, leading to reduction of fuel consumption.
- When "Comfort" is selected, engine auto stop condition becomes severe, compared with "Standard". As engine auto stop condition will occur less frequently,

the stop time will be shorter, leading to more comfortable cabin condition by air conditioner.

Default (Initialization setting)

If you select "YES" and push the indicator selector knob (3), all settings will be reinitialized.

Warning and Indicator Messages

The display shows warning and indicator messages to let you know about certain vehicle problems.

In some cases, the internal buzzer may also sound at the same time to alert you.

If warning and indicator messages appear on the display, follow the messages.

Master warning indicator light

80P0382

When the display shows warning and indicator messages, the master warning indicator light may also blink.

NOTE:

- When the problem that causes a message to appear is corrected, the message will disappear.
- If a message is displayed, and other problems requiring a message occur, the message for each of the problems will be alternately displayed about every 5 seconds.

 When you push and hold the indicator selector knob (3) for several seconds while a message is displayed, the message will disappear temporarily. If the problem that caused the message is not corrected, the message will appear again after several seconds.

Warning and indicator messages

When ignition switch is in "ACC" or "LOCK" position or ignition mode is ACC or LOCK (OFF)

All models

Warning and indicator message	Master warning indicator light	Sound	Cause and remedy
80T040280	Off	Off	A door or tailgate is not properly closed. Stop the vehicle in a safe place and close the door or tailgate properly.
E0 05 LIGHTS ON 61MM0A172	Blinks	Continuous beep (from interior buzzer)	The headlights and/or the position lights are left on. Turn them off.

PLACE KEY FOB ON START SWITCH 75RM	17		

Warning and Indicator Lights

NOTE:

If warning and indicator lights blink or come on, the corresponding messages may be shown on the information display.

Brake System Warning Light

82K170

Three different types of operations exist depending on the vehicle's specification.

- The light comes on briefly when the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON. The light comes on when the parking brake is engaged with the ignition mode ON.
- 2) The light comes on when under either or both of above two conditions.

The light also comes on when the fluid in the brake fluid reservoir falls below the specified level.

The light should go out after starting the engine and fully releasing the parking brake, if the fluid level in the brake fluid reservoir is adequate.

The light also comes on together with the ABS warning light when the rear brake force control function (proportioning valve function) of the ABS system fails.

If the brake system warning light comes on while you are driving the vehicle, it may mean that there is something wrong with the vehicle's brake system. If this happens, you should:

1) Pull off the road and stop carefully.

WARNING

Remember that stopping distance may be longer, you may have to push harder on the pedal, and the pedal may go down farther than normal.

- 2) Test the brakes by carefully starting and stopping on the shoulder of the road.
- 3) If you determine that it is safe, drive the vehicle cautiously at low speed to the nearest Maruti Suzuki authorized workshop for repairs or tow the vehicle to the nearest Maruti Suzuki authorized workshop for repairs.

WARNING

If any of the following conditions occur, you should immediately ask your Maruti Suzuki authorized workshop to inspect the brake system.

- If the brake system warning light does not go out after the engine has been started and the parking brake has been fully released.
- If the brake system warning light does not come on when the ignition switch is turned "ON" or the engine switch is pressed to change the ignition mode to ON.
- If the brake system warning light comes on at any time during vehicle operation.

NOTE:

Because the brake system is self-adjusting, the fluid level will drop as the brake pads become worn. Replenishing the brake fluid reservoir is considered normal periodic maintenance.

NOTE:

(Parking Brake Reminder Buzzer)

A buzzer sounds intermittently to remind you to release the parking brake if you start the vehicle without releasing the parking brake. Make sure that the parking brake is fully released and the brake system warning light turns off.

Anti-lock Brake System (ABS) Warning Light

80J127

When the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON, the light comes on briefly so you can check that the light is working.

If the light stays on, or comes on when driving, there may be something wrong with the ABS.

If this happens:

- 1) Pull off the road and stop carefully.
- 2) Turn the ignition switch to "LOCK" position or change the ignition mode to LOCK (OFF) by pressing the engine switch and then start the engine again.

If the warning light comes on briefly then turns off, the system is normal. If the warning light still stays on, the system will be something wrong.

If the light and the brake system warning light stay on, or come on simultaneously when driving, your ABS system is equipped with the rear brake force control function (proportioning valve function) and there may be something wrong with both the rear brake force control function and anti-lock function of the ABS system.

If one of these happens, have the system inspected by a Maruti Suzuki authorized workshop.

If the ABS becomes inoperative, the brake system will function as an ordinary brake system that does not have this ABS system.

For details of ABS system, refer to "Anti-Lock Brake System (ABS)" in the "OPER-ATING YOUR VEHICLE" section.

ESP[®] Warning Light

52KM133

FSP[®] is a registered trademark of Mercedes-Benz Group AG.

This light blinks 5 times per second when one of the ESP® systems other than ABS is activated. If this light blinks, drive carefully.

When the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON, the light comes on briefly so you can check that the light is working. If the light stays on, or comes on when driving and remains on, there may be something wrong with the ESP® systems (other than ABS). You should have your vehicle inspected by a Maruti Suzuki authorized workshop.

For details of the ESP® systems, refer to "Electronic Stability Program (ESP®)" in the "OPERATING YOUR VEHICLE" section.

▲ WARNING

The ESP[®] systems cannot prevent accidents. Always drive carefully.

ESP[®] OFF Indicator Light

57L30045

When the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON, this light comes on briefly so you can check that the light is working.

When the ESP® OFF switch is pushed to turn off the ESP® systems (other than ABS), the ESP® OFF indicator light comes on and stays on.

For details of the ESP[®] systems, refer to "Electronic Stability Program (ESP[®])" in the "OPERATING YOUR VEHICLE" section.

NOTE:

- If the vehicle speed is greater than approximately 30 km/h, the ESP[®] systems (other than ABS) will be activated automatically and the light will go out.
- When the transfer lever is in "4L" (4-wheel drive low range) position, the ESP® system (other than ABS) will be canceled automatically. The light will come on and stay on.

Hill Descent Control Indicator Light

79K050

When the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON, this light comes on briefly so you can check that the light is working. When you push the hill descent control switch and the hill descent control operating conditions are fulfilled, the hill descent control indicator comes on. If the hill descent control indicator blinks, the hill descent control will not be activated.

For details of the hill descent control system, refer to "Hill descent control system" in the "OPERATING YOUR VEHICLE" section.

Engine Oil Pressure Warning Light

80J223

This light comes on when the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON, and goes out when the engine is started. The light will come on and remain on if there is insufficient oil pressure. If the light comes on when driving, pull off the road as soon as you can and stop the engine.

Check the oil level and add oil if necessary. If there is enough oil, the lubrication system should be inspected by a Maruti Suzuki authorized workshop before you drive the vehicle again.

NOTICE

- If you operate the engine with this light on, severe engine damage can result.
- Do not rely on the engine oil pressure warning light to indicate the need to add oil. Be sure to periodically check the engine oil level.

Charge Warning Light

80J226

This light comes on when the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON, and goes out when the engine is started. The light will come on and remain on if there is something wrong with the battery charging system. If the light comes on when the engine is running, the charging system should be inspected immediately by a Maruti Suzuki authorized workshop.

Seat belt reminder light

60G049

When the driver and/or passenger (front passenger and/or rear passenger*) do(does) not buckle his or her seat belt, this light will come on and/or blink. For details of the seat belt reminder, refer to "Seat belts and child restraint systems" section.

*: If equipped

Airbag Warning Light

63J030

This light blinks or comes on for several seconds when the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON, so you can check if the light is working.

The light will come on and stay on if there is a problem in the airbag system or the seat belt pretensioner system.

WARNING

If the airbag warning light does not blink or come on briefly when the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON, stays on for more than 6 seconds, or comes on while driving, the airbag system or the seat belt pretensioner system may not work properly, which could result in serious injury in the event of a crash. Have both systems inspected by a Maruti Suzuki authorized workshop.

Malfunction Indicator Light

80J222

Your vehicle has a computer-controlled emission control system. A malfunction indicator light is provided on the instrument panel to indicate when it is necessary to have the emission control system serviced. The malfunction indicator light comes on when the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON, to let you know the light is working and goes out when the engine is started.

If the malfunction indicator light comes on or blinks when the engine is running, there is a damage in the emission control system.

Bring the vehicle to a Maruti Suzuki authorized workshop to have the damage fixed.

Also, if this light comes on when the engine is running, there is a problem with the automatic transmission system. Ask vour Maruti Suzuki authorized workshop to inspect the system.

WARNING

If this light blinks, stop your vehicle immediately in a safe place to avoid catalyst's melting problem since there may be a misfire in the engine.

- · Do not drive or stop over such as withered grasses.
- · Drive slowly if required to move the vehicle.

NOTICE

Continuing to drive the vehicle when the malfunction indicator light is on or blinking can cause permanent damage to the vehicle's emission control system, and can affect fuel economy and driveability.

Transmission Warning Light (Automatic Transmission models)

80.1219

When the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON, this light comes on for several seconds so you can check that the light is working.

If this light comes on when the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON, there is a problem with the automatic transmission system. If this light comes on or blinks, stop the vehicle in a safe place and contact a Maruti Suzuki authorized workshop. If the light comes on or blinks again after the light goes out, have the system inspected by a Maruti Suzuki authorized workshop.

Immobilizer / Keyless Push Start **System Warning Light**

80JM122

When the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON, the light comes on briefly so you can check that the light is working.

If this light blinks or stays on, there is a problem with the system.

If this light still blinks or stays on even if you start the engine with normal voltage of the vehicle battery, ask your Maruti Suzuki authorized workshop for inspection.

Open Door Warning Light

54G391

This light remains on until all doors (including the tailgate) are completely closed.

If any door (including the tailgate) is open when the vehicle is moving, a ding sounds to remind you to close all doors completely.

Low Fuel Warning Light

54G343

If this light comes on, refuel the fuel tank as soon as possible. When this light comes on, a ding sounds once to remind you to refuel. If you do not refuel, a ding sounds every time when the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON.

NOTE:

The activation point of this light varies depending on road conditions (for example, slope or curve) and driving conditions because of fuel movement in the tank.

Electric Power Steering Light

80J408

This light comes on when the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON, and goes out when the engine is started.

If this light comes on while driving, the power steering system may not work properly. Have your vehicle inspected by a Maruti Suzuki authorized workshop.

NOTE:

- Following operations of the steering wheel while parking or driving at a very lowspeed may have steering effort bigger gradually. This is not a malfunction of the steering system, but the power steering control system limits the power assist in order to prevent them from overheating.
 - The steering wheel is operated very often.
 - The steering wheel is kept in a fully turned position for a long while.

When the power steering control system cool down, the power steering system back to the original condition.

However, repeating these operations could cause the power steering system damaged.

- If the power steering system does not work properly, you will feel heavier to steer but you still will be able to steer.
- If the steering is operated, you may hear a noise. This is normal and indicates that the power steering system works properly.

Low Engine Coolant Temperature Light (blue color)

54G344

When the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON, this light comes on and stays on if the engine is cold, and goes off after the engine warms up.

If this light still stays on after the engine warms up, there is a problem with the sensor.

Have your vehicle inspected by a Maruti Suzuki authorized workshop.

High Engine Coolant Temperature Warning Light (red color)

54G344

When the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON, this light comes on briefly so you can check that the light is working. If this light blinks while driving, it means the engine is running hot. If the light stays on after blinking, then the engine is overheating. To avoid actual overheating, if this light blinks or stays on while driving, follow the instructions in the "If the Engine Overheats" of "EMERGENCY SERVICE" section.

NOTICE

Continuing to drive the vehicle when engine overheating is indicated can result in severe engine damage.

Turn Signal Indicators

59RN04690

When you turn on the left or right turn signals, the corresponding green arrow on the instrument panel will blink along with the respective turn signal lights. When you turn on the hazard warning switch, both arrows will blink along with all of the turn signal lights.

NOTE:

If any abnormality of the turn signals is observed, such as fast blinking, there may be a malfunction in the turn signal system. Ask your Maruti Suzuki authorized workshop to inspect the system.

Main Beam (High beam) Indicator Light

80.1212

This indicator comes on when headlight main beams (high beams) are turned on.

Illumination Indicator Light

64J045

This indicator light comes on while the position lights, tail light and/or the head-lights are on.

Front Fog Light Indicator Light (if equipped)

74P30830

The front fog light indicator light comes on when the front fog light operates.

Overdrive OFF Switch Light (if equipped)

O/D OFF

76TS40680

The transmission is a 4-speed (3-speed plus overdrive) automatic transmission. By operating the overdrive off switch, the transmission can be converted to a 3-speed automatic transmission that will not move to the overdrive position. To convert the transmission to the 3-speed mode, push in the overdrive off switch and release it.

To return the transmission to the 4-speed mode, push in the overdrive off switch again.

When the ignition switch is turned to "ACC" position or the engine switch is pressed to change the ignition mode to ACC, the transmission in the 3-speed mode is converted to the 4-speed mode automatically. The 3-speed mode is suitable for the following driving conditions:

- Driving on hilly, winding roads
 - You can drive more smoothly with less frequent gear changing
- Going down a steep hill
 - Some engine braking is provided

For details, refer to "Overdrive off switch" in "OPERATING YOUR VEHICLE" section.

4WD Indicator Light

78RB02078

This indicator light comes on when the transfer gear and the air locking hubs are switched to 4-wheel drive condition ("4H" or "4L").

When the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON, this 4WD indicator light will come on for a while and then this light will turned on or off according to the drive condition.

If 4WD indicator light continues to blink, there may be a malfunction of the system. If so, have your vehicle inspected by a Maruti Suzuki authorized workshop.

When you shift the transfer lever from "2H" position to "4H" position at a speed of 100 km/h or more, this indicator light blinks.

When you shift transfer lever again while changing the drive condition, this indicator blinks.

NOTE:

When the drive condition is 4-wheel drive condition and the engine is not running with the ignition switch turned "ON" or the ignition mode to ON, this 4WD indicator light will come on for a while and then blink. In this situation, when you start the engine and this indicator light comes on, the system does not indicate a malfunction.

ENG A-STOP Indicator Light

72M00032

When the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON, this light comes on briefly to let you know the light is working.

When the engine stops automatically, this light comes on.

For details, refer to "ENG A-STOP System (Engine Auto Stop Start System)" in the "OPERATING YOUR VEHICLE" section.

ENG A-STOP OFF Indicator Light

62R0352

When the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON, this light comes on briefly if the system works properly.

When you push the ENG A-STOP OFF switch, this light comes on.

If this light blinks when driving, there may be something wrong with the ENG A-STOP system. You should have the system inspected by a Maruti Suzuki authorized workshop.

For details, refer to "ENG A-STOP System (Engine Auto Stop Start System)" in the "OPERATING YOUR VEHICLE" section.

Security System Indicator

82K269

For details about the security system, refer to "Security System" in the "BEFORE DRIVING" section.

Daily Inspection Checklist Before Driving

59RN05750

- Check that the windows, mirrors, lights and reflectors are clean and unobstructed.
- 2) Visually check the tyres for the following points:
 - the depth of the tread groove
 - abnormal wear, cracks and damage
 - loose wheel nuts
 - existence of foreign material such as nails, stones, etc.

Refer to "Tyres" in "INSPECTION AND MAINTENANCE" section for details.

3) Look for fluid and oil leakage.

NOTE:

It is normal for water to drip from the air conditioning system while and after use.

- 4) Check that the hood is fully closed and latched.
- Check the headlights, turn signal lights, brake lights and horn for proper operation.
- 6) Adjust the seat and head restraint.
- Check the brake pedal feeling and the adjustment condition for the parking brake lever or pedal. Refer to "Brake" in "INSPECTION AND MAINTENANCE" section for details
- 8) Adjust the mirrors.
- 9) Check that you and all the passengers have properly fastened the seat belts.
- 10)Check that all the warning lights come on as the ignition switch is turned to "ON" position or the press the engine switch to change the ignition mode to ON.
- 11)Check all the gauges.
- 12)Check that the brake system warning light turns off when the parking brake is released.

Once a week, or each time you fill your fuel tank, or before a long distance driving (like highway driving) perform the following under-hood checks:

- · Engine oil level
- Coolant level
- · Brake fluid level
- · Battery fluid (acid) level
- · Windshield washer fluid level
- · Hood latch operation

Pull the hood release lever inside the vehicle. Check that you cannot open the hood further without releasing the secondary latch. Close the hood securely after checking for proper latch operation. See the item "All latches, hinges and locks" of "CHAS-SIS AND BODY" in "Maintenance Schedule" in "INSPECTION AND MAINTENANCE" section for lubrication schedule.

WARNING

Check that the hood is fully closed and latched before driving. If it is not, it can fly up unexpectedly during driving, obstructing your view and resulting in an accident.

Once a month, or each time you fill your fuel tank, check the tyre pressure using a tyre pressure gauge. Also check the tyre pressure of the spare tyre.

When You Notice the Following Symptoms

80J009

A CAUTION

If you keep using your vehicle in the following conditions, malfunction and an accident may occur. Consult with a Maruti Suzuki authorized workshop.

- Leaked oil or other liquid appears on the ground below the vehicle.
- Brake fluid level is low.
- There are unusual odors, sounds or vibrations.
- The feeling of operating the steering wheel, the acceleration or the brakes is different than usual.

Check the Tyre Pressure

80T090180

- Periodically check and adjust the tyre pressure. The specified tyre pressure for the tyres of this vehicle can be confirmed by checking the tyre information label (1) affixed to the opening of the driver's door.
- Driving with insufficient tyre pressure can cause the sides of the tyre to wear, in addition to decreasing fuel efficiency.

WARNING

 Driving with extremely low tyre pressure can cause a tyre blowout (bursting) and may result in an accident. Do not drive with extremely low tyre pressure.

69RHS173

- If the specified tyre pressure is not maintained, the full performance of the vehicle cannot be achieved and the following could occur, leading to accidents or malfunctions. Adjust the tyre pressure as specified.
 - Decreased driving stability
 - Longer distance required for braking

(Continued)

WARNING

(Continued)

- Accurate tyre rotation speed cannot be detected, which interferes with the following functions:
 - ABS
 - Electronic stability program (ESP®)

To adjust the tire pressure, refer to "Tyres" in "INSPECTION AND MAINTENANCE" section.

Check the Exhaust Pipe

80J011

Periodically check the exhaust pipes for holes or cracks

WARNING

If leaks in exhaust pipes are present, exhaust gas could enter the vehicle and possibly cause carbon monoxide poisoning. If you feel that something is abnormal, consult with a Maruti Suzuki authorized workshop.

Ignition Switch (Vehicle without Keyless Push Start System)

68PH00310

The ignition switch has the following four positions:

LOCK

This is the normal parking position. It is the only position in which the key can be removed.

Manual transmission

55T050010

Manual transmission vehicles:

You must push in the key to turn it to "LOCK" position. It locks the ignition, and prevents normal use of the steering wheel after the key is removed.

· Automatic transmission vehicles:

The gearshift lever must be in "P" (Park) position to turn the key to "LOCK" position. It locks the ignition and prevents normal use of the steering wheel and gearshift lever.

To release the steering lock, insert the key and turn it clockwise to one of the other positions. If you have trouble turning the key to unlock the steering wheel, try turning the steering wheel slightly to the right or left while turning the key.

ACC

Accessories such as the radio can operate, but the engine is off.

ON

This is the normal operating position. All electrical systems are on.

START

This is the position for starting the engine using the starter motor. The key should be released from this position as soon as the engine starts.

Ignition key reminder

A buzzer sounds intermittently to remind you to remove the ignition key if it is in the ignition switch when the driver's door is opened.

55T050020

WARNING

 Never return the ignition switch to "LOCK" position and remove the ignition key while the vehicle is moving. The steering wheel will lock and you will not be able to steer the vehicle.

(Continued)

WARNING

(Continued)

• Always return the ignition switch to "LOCK" position and remove the ignition key when leaving the vehicle even only for a short time. Also do not leave children alone in a parked vehicle. Unattended children could cause accidental movement of the vehicle or could tamper with power windows. They also could suffer from heat stroke in warm or hot weather. These could result in severe injury or even death.

NOTICE

Do not leave the ignition switch in "ON" position if the engine is not running as the lead-acid battery will discharge.

Engine Switch (Vehicle with Keyless Push Start System)

80T050990

LOCK (OFF)

This mode is for parking the vehicle. When this mode is selected by pressing the engine switch and then any door (including the tailgate) is opened or closed, the steering will be locked automatically.

ACC

Press the engine switch to select this ignition mode to use such electric equipment as the audio system, outside rearview mirrors and accessory socket with the engine off. When this position is selected, the information display in the instrument cluster shows the following message.

61MM0A163

ON

With the engine off

You can use such electric equipment as the power windows and wipers with the engine off. When this ignition mode is selected by pressing the engine switch, the information display in the instrument cluster shows the following message.

75RM214

· With the engine on

All electric equipment is operational. The vehicle can be driven when you have selected this ignition mode by pressing the engine switch.

START

Manual transmission vehicles:

Provided you have the keyless push start system remote controller with you, the engine automatically starts when you press the engine switch to select this ignition mode after shifting to "N" (Neutral) and depressing the brake and clutch pedals.

Automatic transmission vehicles:

Provided you have the keyless push start system remote controller with you, the engine automatically starts when you press the engine switch to select this ignition mode after placing the gearshift lever in "P" (Park) position and depressing the brake pedal. (If you need to restart the engine while the vehicle is moving, shift into "N".)

NOTICE

Do not leave the engine switch in ACC or ON mode when the engine is not running. Avoid using the radio or other electric accessories for a long time when the engine switch is in ACC or ON mode when the engine is not running, otherwise the lead-acid battery may discharge.

NOTE:

 The steering will be unlocked when you press the engine switch to change the ignition mode from LOCK (OFF) to ACC or ON.

- You do not need to keep the engine switch pressed until the engine starts.
- In the presence of strong radio wave or noise, you may not be able to change the ignition mode to ACC or ON or to start the engine using the engine switch. In this case, the information display in the instrument cluster will show the following message.

75RM216

OPERATING YOUR VEHICLE

Unreleased Steering Lock Warning

If the steering lock remains engaged when you press the engine switch to change the ignition mode to ON, the information display in the instrument cluster shows the following message and you cannot start the engine. If this happens, press the engine switch, turning the steering wheel to right or left.

80T050010

NOTE:

The steering lock may not be released and the immobilizer / keyless push start system warning light turns on if some load is applied on the steering wheel. If this happens, turn the steering wheel system to the right or left to relieve it from the load before you press the engine switch again to change to the desired ignition mode.

Immobilizer System

This system is designed to help prevent vehicle theft by electronically disabling the engine starting system.

The engine can be started only with your vehicle's original immobilizer ignition key or keyless push start system remote controller, which has an electronic identification code programmed in it. The key or remote controller communicates the identification code to the vehicle when the ignition switch is turned to "ON" position or the engine switch is pressed to change the ignition mode to ON. If you need to make spare keys or remote controllers, consult with a Maruti Suzuki authorized workshop. The vehicle must be programmed with the correct identification code for the spare. A key made by an ordinary locksmith will not work.

In the case you can start the engine, when you turn the ignition switch to "LOCK" position or press the engine switch to change the ignition mode to ON, the immobilizer system will be released and the immobilizer/keyless push start system warning light will turn on for about 2 seconds and then it will turn off

When you turn the ignition switch to "LOCK" position or press the engine switch to change the ignition mode to LOCK (OFF), the immobilizer system will operate.

NOTICE

If the immobilizer system is modified or removed, it cannot be properly operated. Do not modify or remove the immobilizer system.

NOTE:

This immobilizer system is maintenance-free.

Immobilizer / Keyless Push Start System Warning Light

80JM12

If the immobilizer/keyless push start system warning light blinks when the ignition switch is in "ON" position or the ignition mode is ON, the engine will not start.

NOTE:

If the immobilizer/keyless push start system warning light blinks or comes on, a message may be shown on the information display.

For vehicles without a keyless push start system

If this light blinks, turn the ignition switch to "LOCK" position, and then turn it back to "ON" position.

If the light still blinks after the ignition switch is turned back to "ON" position, there may be something wrong with your key or with the immobilizer system. Ask your Maruti Suzuki authorized workshop for inspection.

For vehicles with a keyless push start system

If this light blinks, change the ignition mode to LOCK (OFF), and then change it back to ON. Also refer to "If the master warning indicator light blinks and the engine cannot be started" in "Starting / stopping engine (vehicle with keyless push start system) (if equipped)" in "OPERATING YOUR VEHICLE" section.

If the light still blinks after the ignition mode is changed back to ON, there may be something wrong with your key or with the immobilizer system. Ask your Maruti Suzuki authorized workshop for inspection.

The immobilizer/keyless push start system warning light may also blink if the remote controller is not in the vehicle when you close the door or attempt to start the engine.

NOTE:

- If you lose your immobilizer ignition key or remote controller, ask your Maruti Suzuki authorized workshop as soon as possible to deactivate the lost one, and to make a new key or remote controller.
- If you own other vehicles with immobilizer keys, keep those keys away from the ignition switch or the engine switch when using your Maruti Suzuki vehicle. Otherwise, the engine may not be started because they may interfere with your Maruti Suzuki vehicle's immobilizer system.
- If you attach any metal objects to the immobilizer key or remote controller, it may not start the engine.

NOTICE

The immobilizer key and remote controller are sensitive electronic instruments. To avoid damaging them:

- Do not expose them to impacts, moisture or high temperature such as on the dashboard under direct sunlight.
- Keep them away from magnetic objects.

Ignition Key Reminder (if equipped)

A buzzer sounds intermittently to remind you to remove the ignition key if it is in the ignition keyhole when the driver's door is opened.

Pedal

Manual transmission

80J2121

Automatic transmission

80J2122

Clutch Pedal (1)

A clutch pedal is used to disengage the driving force to the wheels when starting the engine, stopping, or shifting the gearshift lever. Depressing the pedal disengages the clutch.

▲ WARNING

Do not drive with your foot resting on the clutch pedal. It could result in excessive clutch wear, clutch damage, or unexpected loss of engine braking.

Brake Pedal (2)

Your vehicle is equipped with either front and rear disc brakes or front disc brakes and rear drum brakes. Depressing a brake pedal applies both sets of brakes.

You may hear occasional brake squeal when you apply the brakes. This is a normal condition caused by environmental factors such as temperature, humidity, snow or dust, etc.

WARNING

If brake squeal is excessive and occurs each time the brakes are applied, you should have the brakes checked by a Maruti Suzuki authorized workshop.

WARNING

Do not apply brakes continuously or rest your foot on the brake pedal. This will result in overheating of the brakes which could cause unpredictable braking action, longer stopping distances, or permanent brake damage.

Accelerator Pedal (3)

An accelerator pedal controls the speed of the engine. Depressing the accelerator pedal increases power output and speed.

NOTE:

Your vehicle is equipped with Brake Override System. If you depress both the accelerator pedal and the brake pedal simultaneously, the engine power output may be suppressed.

Keyless Push Start System (if equipped)

Provided the keyless push start system remote controller is within the interior workable area, you can use the engine switch for starting the engine and selecting an ignition mode (ACC or ON). In addition, the following functions can be used:

- Keyless entry function. Refer to "Keyless Push Start System Remote Controller" in "BEFORE DRIVING" section for details.
- · Locking and unlocking doors (including the tailgate) using a request switch. Refer to "Keyless Push Start System Remote Controller" in "BFFORF DRIV-ING" section for details.
- Immobilizer (anti-theft) function. Refer to "Immobilizer System" in this section for details.

81M40230

(1) Interior workable area

The interior workable area is defined as all the interior spaces except for the space on the instrument panel or in the luggage compartment.

NOTE:

- Even when the remote controller is in the interior workable area, if it is in any of the following conditions, you may not be able to start the engine or select the ignition modes, and the remote controller outside warning may be given.
 - -The remote controller's battery is low.
 - -The remote controller is affected by strong radio wave or noise.
 - -The remote controller is in contact with or covered by a metallic object.
 - -The remote controller is in the secluded stowages such as the glove box or a door pocket.
 - -The remote controller is in the sun visor pocket or on the floor.
- · Even when the remote controller is outside the interior workable area, if it is in any of the following conditions, you may be able to start the engine or select the ignition mode. The remote controller outside warning may not be given at that time.
 - -The remote controller is outside the vehicle but very close to a door.
 - -The remote controller is on the instrument panel.

Engine Switch Illumination

The engine switch is illuminated (lit) in the following situations:

- · When the engine is off and the driver's door is open, or for 15 seconds after the driver's door is closed. The illumination will fade out after 15 seconds passed.
- While the headlights and/or the position lights are on, the illumination will turn on. The illumination will go out when the headlights and the position lights are turned off.

NOTE:

To save the lead-acid battery, the illumination will be automatically turned off when both of the following conditions are simultaneously met:

- · The headlights and the position lights are turned off.
- 15 minutes has elapsed since opening the driver's door.

OPERATING YOUR VEHICLE

Selection of Ignition Modes

Press the engine switch to select ACC or ON mode as follows when you use an electric accessory or check the operation of instrument cluster without running the engine.

NOTE:

When selecting the ignition modes, the information display in the instrument cluster show certain messages. Refer to "Information Display" in the "INSTRUMENT CLUSTER" section.

1) Bring the keyless push start system remote controller with you and sit in the driver's seat.

82K254

2) Manual transmission Without depressing the clutch pedal, press the engine switch (1). Automatic transmission - Without depressing the brake pedal, press the engine switch (1).

Every time you press the engine switch, the ignition mode changes as follows.

Manual transmission

68PH00322

Automatic transmission

57L31006

If the master warning indicator light Λ blinks and the ignition modes cannot be selected

Your keyless push start system remote controller may not be sensed as being within the interior workable area (refer to the related explanation in this section). Try again after checking that you have the remote controller with you. If the ignition modes still cannot be selected, the battery of the remote controller may be discharged. To select an ignition mode, you must then use the following method:

1) Manual transmission Without depressing the clutch pedal, push the engine switch (1).

Automatic transmission – Without depressing the brake pedal, press the engine switch (1).

75RM217

2) Within about 10 seconds while the master warning indicator light blinks and the information display in the instrument cluster shows the following message, touch the engine switch with the lock switch end of the remote controller (2) for about 2 seconds.

While the master warning indicator light blinks, the immobilizer/keyless push system warning light will come on for about 5 seconds.

If you still cannot select the ignition modes, there may be the other problem such as the discharged lead-acid battery. In this case, consult with a Maruti Suzuki authorized workshop.

NOTE:

- You may customize the system to cause the interior buzzer to sound once for warning that remote controller is out of sensing range. For this customization, consult with a Maruti Suzuki authorized workshop.
- If the battery of the remote controller is almost discharged, the information display in the instrument cluster shows the following message when you press the engine switch to change the ignition mode to ON. Refer to "Information Display" in "INSTRUMENT CLUSTER" section for details. For details on replacing the battery, refer to "Keyless Push Start System Remote Controller" in "BEFORE DRIVING" section.

75RM220

Remote Controller Outside Warning

When either of the following conditions is met, the system causes the remote controller outside warning by sounding the interior and exterior buzzers. At the same time, the immobilizer/keyless push start system warning light comes on, the master warning indicator light blinks and the information display in the instrument cluster will show the corresponding message.

- Any door is opened and then closed while the remote controller is not inside the vehicle and the engine is running or the ignition mode has been changed to ACC or ON by pressing the engine switch.
- The remote controller is not inside the vehicle when you attempt to start the engine after changing the ignition mode to ACC or ON by pressing the engine switch.

OPERATING YOUR VEHICLE

80T050050

- (1) Immobilizer/keyless push start system warning light (blinks)
- (2) Master warning indicator light (blinks)

If the warning is given, place the remote controller inside the vehicle as soon as possible.

 Any attempt to start the engine will fail while the warning is active. The message appearing in the information display in the instrument cluster will also indicate this condition. Refer to "Information Display" in the "INSTRUMENT CLUSTER" section for details. Normally, the immobilizer/keyless push start system warning light should go out and the master warning indicator light should stop blinking shortly after the remote controller is brought back inside the vehicle. If they remain lit and blinking, change the ignition mode to LOCK (OFF) by pressing the engine switch and then perform the engine starting operation. Refer to "Starting / Stopping Engine (Vehicle with Keyless Push Start System)" in this section.

NOTE:

Always keep the remote controller with you as the driver.

Starting / Stopping Engine (Vehicle without Keyless Push Start System) Starting Engine

80T051100

- 1) Check that the parking brake is set fully.
- 2) Turn off such loads as the headlights and air conditioning system to facilitate starting of the engine.

- 3) Manual transmission vehicles: Shift into "N" (Neutral). Hold the clutch pedal and brake pedal fully depressed.
 - Automatic transmission vehicles: If the gearshift lever is not in "P" (Park) position, shift into "P" (Park). Hold the brake pedal fully depressed.
- 4) With your foot taken off the accelerator pedal, crank the engine by turning the ignition key to "START". Release the key immediately after the engine has started.

NOTICE

- For protection of a lead-acid battery and a starter motor, do not use the starter motor by turning the key to "START" for more than 12 seconds at a time. If the engine does not start, turn the key to "LOCK" position and wait for more than 30 seconds before trying again. If the engine does not start after several attempts, consult with a Maruti Suzuki authorized workshop.
- Automatic transmission vehicles: In case that you need to restart the engine while the vehicle is moving, shift into "N". Otherwise the engine and transmission can be damaged.

 (Continued)

NOTICE

(Continued)

 Do not try to start the engine by pushing or towing the vehicle, or coasting down a hill. This starting method could result in damage to the catalytic converter or damage to other parts.

NOTE:

Automatic transmission vehicles: Automatic transmission vehicles have a starter interlock device. The engine starts when the gearshift lever is in either "P" or "N" position.

Stopping Engine

WARNING

Except in cases of emergency, do not stop the engine while the vehicle is in motion. If you stop the engine while the vehicle is in motion, the steering wheel will lock and you will not be able to steer the vehicle. This may result in an accident. Avoid stopping the engine while driving.

NOTICE

Automatic transmission vehicles: If you stop the engine while the vehicle is in motion, the automatic transmission may be damaged. Avoid stopping the engine while driving.

Starting / Stopping Engine (Vehicle with Keyless Push Start System) Starting Engine

80T050060

- 1) Check that the parking brake is set fully.
- Turn off such loads as the headlights and air conditioning system to facilitate starting of the engine.

- Manual transmission vehicles: Shift into "N" (Neutral). Hold the clutch pedal and brake pedal fully depressed.
 - Automatic transmission vehicles: If the gearshift lever is not in "P" (Park) position, shift into "P" (Park). Hold the brake pedal fully depressed.
- The "PUSH START SWITCH" message will appear in the information display in the instrument cluster.

- 5) With your foot taken off the accelerator pedal, push the engine switch (1). When the engine is started, the starter motor will automatically stop.
 - Even if you fail to start the engine, the starter motor will stop turning automatically after approximately 12 seconds. In this case, press the engine switch to select LOCK (OFF) mode and restart the engine.

- If there is a problem with the system, the engine will not start automatically even if the switch is pressed. In case the starter motor does not turn or stops immediately, start the engine by the following procedure.
 - a. Press the engine switch to select the ON mode.
 - b. Perform the above procedure 1) to 3).
 - Keep the engine switch pressed until the engine starts. Release your finger from the engine switch after the engine has started.

NOTICE

- If the engine does not start, press the engine switch to select LOCK (OFF) mode and wait for more than 30 seconds before trying again, for protection of a lead-acid battery and a starter motor. If the engine does not start after several attempts, consult with a Maruti Suzuki authorized workshop.
- Do not try to start the engine by pushing or towing the vehicle, or coasting down a hill. This starting method could result in damage to the catalytic converter or damage to other parts.

NOTE:

- You do not need to keep the engine switch pressed to start the engine.
- Manual transmission vehicles:
 The engine of a manual transmission vehicle will not start unless the clutch pedal is depressed.
- Automatic transmission vehicles: Automatic transmission vehicles have a starter interlock device. The engine starts when the gearshift lever is in either "P" or "N" position.
- During the engine starting procedure, messages on the information display will help you. Refer to "Information display" in "INSTRUMENT CLUSTER" section for details.
- When the engine stalls in intersection and railway crossing etc., restart the engine by usual procedure.

Stopping Engine

- Depress the engine switch to stop the engine after the vehicle stopped completely.
- If the engine remains stopped for a while after it was stopped unexpectedly or was raced before stopping, a clicking sound may be heard from around the engine when it is restarted. This is not a malfunction. Always let the engine idle before stopping it.

WARNING

Except in cases of emergency, do not stop the engine while the vehicle is in motion. If you stop the engine while the vehicle is in motion, the steering wheel will lock and you will not be able to steer the vehicle. This may result in an accident. Avoid stopping the engine while driving.

NOTICE

Automatic transmission vehicles: If you stop the engine while the vehicle is in motion, the automatic transmission may be damaged. Avoid stopping the engine while driving.

Emergency Stop

In case of emergency, you can stop the engine by quickly pushing the engine switch more than 3 times, or pushing and holding the engine switch for more than 2 seconds while the vehicle is in motion.

NOTE:

Except in cases of emergency, do not stop the engine while the vehicle is in motion. The steering and braking operation will require more effort when the engine is stopped. Refer to "Braking" in this section.

If the Master Warning Indicator Light A Blinks and the Engine cannot be Started

Your keyless push start system remote controller may not be sensed as being within the interior workable area (refer to the related explanation in this section). Try again after checking that you have the remote controller with you. If the engine cannot be started, the battery of the remote controller may be discharged. To start the engine, you must then use the following method:

63R40050

 Check that the gearshift lever is in "P" (Park) position and keep depressing the brake pedal fully.

75RM214

2) If the above message is shown on the information display in the instrument cluster, press the engine switch (1).

75RM217

3) Within about 10 seconds while the master warning indicator light blinks and the information display in the instrument cluster shows the following message, touch the engine switch with the lock switch end of the remote controller (2) for about 2 seconds. While the master warning indicator light blinks, the immobilizer/keyless push system warning light will come on for about 5 seconds.

If you still cannot start the engine, there may be the other problem such as the discharged lead-acid battery. In this case, consult with a Maruti Suzuki authorized workshop.

NOTE:

 You may customize the system to cause the interior buzzer to sound once for warning that remote controller is out of sensing range. For this customization, consult with a Maruti Suzuki authorized workshop. If the battery of the remote controller is almost discharged, the information display in the instrument cluster shows the following message when you press the engine switch to change the ignition mode to ON. Refer to "Information Display" in "INSTRUMENT CLUSTER" section for details. For details on replacing the battery, refer to "Keyless Push Start System Remote Controller" in "BEFORE DRIVING" section.

75RM220

Returning Ignition Mode to LOCK (OFF)

Automatic transmission – To ensure safety, the ignition mode can be returned to LOCK (OFF) by pressing the engine switch only when the gearshift lever is placed in "P" position without pressing the knob button.

NOTE:

In the case of an automatic transmission, the ignition mode cannot be returned to LOCK (OFF) position if the gearshift lever is in any other position than "P".

Certain problems such as a fault in engine system may prevent the engine switch from going back to LOCK (OFF) mode. If this happens, have the vehicle inspected by a Maruti Suzuki authorized workshop after doing the following:

- Lock the doors using the key to prevent theft. (The request switches and the keyless push start system remote controller cannot be used to lock them.)
- Disconnect the negative cable from the lead-acid battery to prevent discharge.

LOCK (OFF) mode reminder buzzer

If the driver's door is opened without returning the ignition mode to LOCK (OFF) by pressing the engine switch, a buzzer sounds to warn you of this condition.

- If you open the driver's door after pressing the engine switch to change the ignition mode to ACC, the interior buzzer beeps intermittently.
- The buzzer will stop sounding if you then push the engine switch twice, thus bringing it back the ignition mode to LOCK (OFF).

NOTE:

Whenever you leave the vehicle, check that you have returned the ignition mode to LOCK (OFF) using the engine switch and then lock the doors. Without returning the ignition mode to LOCK (OFF), you cannot use a request switch or keyless push start system remote controller to lock the doors.

Steering lock warning buzzer

If the steering lock fails to engage due to a fault in the system when the ignition mode is turned to LOCK (OFF) by pressing the engine switch and any door (including the tailgate) is opened or closed, the interior buzzer will warn you of this condition with repeated short beeps. If this happens, have your vehicle inspected by a Maruti Suzuki authorized workshop.

ENG A-STOP System (Engine Auto Stop Start System)

The ENG A-STOP system (engine auto stop start system) automatically stops the engine while waiting briefly at a traffic light, etc., and automatically restarts the engine afterward. This system helps reduce emissions, improve fuel consumption and lower engine noise.

This system stops the engine temporarily under specific conditions. Before parking the vehicle for an extended period of time or leaving the vehicle, properly apply the parking brake and stop the engine with the engine switch.

Once the specific conditions are met, the engine will stop automatically after the vehicle has stopped. However, the engine will not be stopped automatically until confirmation of the system function is finished.

NOTE:

If your vehicle is equipped with automatic heating and air conditioning system, you can change the automatic engine stop condition via the information display. Refer to "Information display" in "INSTRUMENT CLUSTER" section.

WARNING

- Do not get out of the vehicle while the engine is automatically stopped by the ENG A-STOP system. Doing so may lead to an accident.
- If the engine does not restart automatically after having been stopped automatically by the ENG A-STOP system, push the engine switch to start the engine. Trying to move the vehicle when the engine has not yet restarted requires a strong force to turn the steering wheel or depress the brake pedal, potentially leading to an accident.

NOTICE

The vehicle equipped with this system uses a dedicated high-performance battery that supports ENG A-STOP system. Accordingly, observe the instructions listed below. If these instructions are not observed, the system may not actuate properly or the battery may die prematurely.

- When replacing the battery, use a Maruti Suzuki genuine battery specified in the Specification.
- Do not draw power from the battery terminals for electrical products.

72M2042

NOTE:

- Manual transmission vehicle If the driver's seat belt is unfastened and the driver's door is opened, the engine will stall.
- Automatic transmission vehicle If the driver's seat belt is unfastened, even if the brake pedal is pressed down, or the driver's door is opened, the engine will be restarted to warn you that the engine was stopped automatically by the ENG A-STOP system.

Automatic Stopping / Restarting of the Engine

Manual transmission vehicle

With the brake pedal depressed, decelerate the vehicle.

77R40690

- 2) After the vehicle has stopped with the clutch pedal depressed and the gearshift lever shifted to "N", and then release the clutch pedal, the engine will stop automatically. The ENG A-STOP indicator light (green) will come on.
- The ENG A-STOP system will not stop the engine automatically if all the automatic engine stop conditions are not met. For details, refer to "Conditions to stop the engine automatically" in this section
- During the automatic engine stop, the engine may shut down, accompanied by

an interior buzzer or restarted, to ensure safety.

For details, refer to "Precautions of When the Engine is Stopped Automatically" in this section.

NOTICE

- During the automatic engine stop, do not shift the gearshift lever to a position other than "N" without depressing the clutch pedal. If the gearshift lever is in a position other than "N", the engine will not restart automatically even if the clutch pedal is depressed.
- If the driver unfastens the seat belt, the engine does not restart automatically even if the clutch pedal is depressed. Also a buzzer will sound to alert the driver. In this case, fasten the seat belt.

NOTE:

During the automatic engine stop, electric equipment will be in the following conditions:

- The audio and other electrical component can be used during the automatic engine stop, but the air conditioner will switch to the fan mode.
- If the vehicle is equipped with automatic heating and air conditioning system, the fan speed will be limited during the automatic engine stop (only in the auto control mode) to keep the cabin airconditioned for a longer time.
- If the engine stalled by a rapid clutch operation, the engine will restart with the gear positioned "N" (neutral) and the clutch pedal depressed.

77R40700

 Regardless of whether the vehicle has stopped or not, depressing the clutch pedal will restart the engine and ENG A-STOP indicator light (green) will go off.

While the engine is stopped automatically, depressing the clutch pedal will restart the engine consuming fuel. Therefore, for fuel economy, it is recommended to depress the clutch pedal just before the vehicle start.

 Without depressing the clutch pedal, the engine may restart automatically if the automatic engine restart conditions are met.

For details, refer to "Conditions to restart the engine automatically" in this section.

Automatic transmission vehicles

7R4060

- The engine will stop automatically if you stop the vehicle by depressing the brake pedal with the gearshift lever is in the "D" or "N" position. After the engine is stopped automatically, the idling stop indicator light (green) will come on.
 - The ENG A-STOP system will not stop the engine automatically if all the automatic engine stop conditions are not met. For details, refer to "Conditions to restart the engine automatically" in this section.
 - During the automatic engine stop, the engine may shut down, accompanied by an interior buzzer or restarted, to ensure safety.

NOTE:

- The engine is not stopped automatically when decelerating without depressing the brake pedal, for example, by using engine braking.
- Electrical components, such as the navigation system or the audio system, can be used while the engine has been stopped automatically, however, the air conditioner switches to the ventilation position.
- For the automatic heating and air conditioning system, airflow is limited (only under automatic operation) when the engine is stopped automatically, in order to improve the cooling and heating performance.

7R40610

- When you remove your foot from the brake pedal, the engine is restarted and the ENG A-STOP indicator light (green) goes off.
 - The engine is restarted automatically if the conditions to restart the engine automatically are met, even if the brake pedal is depressed.
 - For details on the conditions for automatically restarting the engine, refer to "Conditions to restart the engine automatically" in this section.
 - When restarting the engine, you can prevent the vehicle from creeping ahead and rolling downward on an uphill slope, by keeping force on the brake pedal temporarily.

NOTE:

- The hill hold control system is activated when the engine is restarted automatically.
- If a sound of audio system is loud, the sound may be interrupted when the engine is restarted. This is not a malfunction.

Precautions of When the Engine is Stopped Automatically

A WARNING

Do not perform any of the following operations while the engine has been stopped automatically. This may result in an accident.

	Operation/Vehicle Condition	Solution	
Common	 Engine hood opened The interior buzzer sounds 2 times. After the engine is stopped automatically, it stalls. The ENG A-STOP indicator light (green) goes off. 	To restart the engine, follow the procedure below. 1) Set the parking brake firmly, and then place the gearshift lever in the "N" position (for manual transmission) or "P" position (for automatic transmission). 2) Securely close the engine hood. 3) Turn the ignition switch or press the engine switch to restart the engine.	
Manual transmission	Driver's seat belt unfastened and driver's door opened The interior buzzer sounds 5 times. After the engine is stopped automatically, it stalls. The ENG A-STOP indicator light (green) goes off.	 Before starting the vehicle, close the door and buckle the seat belt. In addition, before getting out of the vehicle, follow the procedure below. 1) Set the parking brake firmly, and then place the gearshift lever in the "N" position. 2) When the vehicle will be stopped for a long time or when you will leave the vehicle unattended, turn the ignition switch or the press the engine switch to stop the engine. 	
	Gearshift lever shifted to a position other than "N" without depressing the clutch pedal The interior buzzer sounds 2 times. After the engine is stopped automatically, it stalls. The ENG A-STOP indicator light (green) goes on.	The gearshift lever is placed returned to the "N" position.	

	Operation/Vehicle Condition	Solution
Auto- matic transmis- sion	Driver's seat belt unfastened, or driver's door opened The interior buzzer sounds 10 times. The engine is restarted automatically. The ENG A-STOP indicator light (green) blinks 5 times, then goes off.	 Before driving, close the door and buckle the seat belt. In addition, before getting out of the vehicle, follow the procedure below. 1) Set the parking brake firmly, and then place the gearshift lever in the "P" position. 2) When the vehicle will be stopped for a long time or when you will leave the vehicle unattended, turn the ignition switch or press the engine switch to stop the engine.

NOTE:

The following indicator lights in the instrument cluster do not come on when the engine is stopped automatically.

• Malfunction indicator light, electric power steering light, oil pressure light, charging light

Operating Conditions of ENG A-STOP System Standby conditions

If all of the following conditions are met while driving, the automatic engine stop will be permitted.

When the engine is started*

(Common	The engine is started with the engine hood securely closed.

^{*:} If the engine is started according to the procedures for the Jump-starting Instructions in "EMERGENCY SERVICE" section, the standby conditions are not met.

When driving

Common	 The ENG A-STOP system is not deactivated (OFF) (For details, refer to "ENG A-STOP OFF Switch" in this section.) The battery is charged more than a certain amount, and the temperature inside the battery is within the specified range (#1) The engine coolant temperature is within the specified range The driver's seat belt is fastened The driver's door is securely closed The engine hood is securely closed There is no signal to prevent stopping the engine from any electronic control systems other than the ENG A-STOP system (#2) The transfer lever is in "2H" position Automatic heating and air conditioning system> The air from the outlets is sufficiently cooled while cooling or sufficiently warmed while heating. The defroster is turned off.
Manual transmission	The gearshift lever is not in "R" position
Automatic transmission	 The gearshift lever is in the "D" or "N" position. The overdrive OFF switch light goes off.

^{#1:} If the battery is discharged, for example, if the vehicle has not been used for a long time or electrical components, such as the navigation system or audio system, have been used for a long time while the engine was stopped, it may take some time until the system can be in standby.

^{#2:} If any of the warning and indicator lights affecting the ENG A-STOP system come on, the engine will not be stopped automatically.

Conditions to stop the engine automatically

If all of the following conditions, the ENG A-ŚTOP indicator light (green) in the instrument cluster will illuminate when the vehicle is stopped and the engine will stop automatically.

Common	The ABS or ESP® system has not been activated Brake booster vacuum pressure is normal
Manual transmission	The gearshift lever is in "N" position The clutch pedal is released
Automatic transmission	The brake pedal is sufficiently depressed (#) The accelerator pedal is not depressed The vehicle is not stopped on a steep hill

^{#:} The engine may not be stopped automatically if the brake pedal was depressed lightly or strongly.

The engine may not stop automatically when the brake pedal is depressed lightly.

In this case, when the brake pedal is depressed additionally, the engine may stop automatically.

The driver can operate whether the engine stops automatically or not depending on how hard the brake pedal is pressed.

Conditions to restart the engine automatically

If any of the following vehicle conditions occur or operations are performed while the engine is stopped automatically, the engine is restarted automatically and the ENG A-STOP indicator light (green) goes off.

Common	The ENG A-STOP system is deactivated (OFF) The battery continues to be discharged (#1) A malfunction was detected in this system (#1) The negative pressure of the brake booster has dropped (#1) The vehicle starts to move on a slope, etc. (#1) Some time (2 minutes or so) has elapsed after the start of the automatic engine stop (#1) Shift the transfer lever into "4H" or "4L" position (#1) Automatic heating and air conditioning system> The temperature of the air from the air conditioner outlets changes greatly after the automatic engine stop, or the cooling and heating performance is insufficient (#1) The temperature selector was greatly set toward COOL while cooling or greatly set toward HOT while heating (#1) The defroster is turned on (#1)
Manual transmission	The clutch pedal is depressed.
Automatic transmission	 The driver releases the seat belt (#1, #2) The driver's door is opened (#1) The foot is removed from the brake pedal (#2) The accelerator pedal is depressed The gearshift lever is placed in the "P", "R", "L" or "2" position, or push the overdrive off switch and release the overdrive After the gearshift lever is placed in the "N" position, it is returned to the "D" position

#1:The ENG A-STOP indicator light (green) will blink and then go off

#2:The interior buzzer sounds intermittently (5 times).

#3:If the brake pedal is not fully depressed, the engine may be restarted automatically. The engine may not be stopped automatically when the brake pedal is depressed lightly, but the engine is stopped automatically by further depressing the brake pedal. The driver can operate whether idling stop is performed or not depending on how much the brake pedal is depressed.

ENG A-STOP OFF Switch

The ENG A-STOP system can be deactivated.

77R40620

- To deactivate the system, press the ENG A-STOP OFF switch (1) to turn on ENG A-STOP OFF light (2).
- To activate the system once again, press the switch (1) again to turn off the indicator.
- Every time the engine is stopped manually, the system is enabled again and the ENG A-STOP OFF light (2) goes off.

NOTE:

Pressing the ENG A-STOP OFF switch (1) during the automatic engine stop will restart the engine automatically and the ENG A-STOP OFF light (2) will come on.

ENG A-STOP OFF Indicator Light

 When you push the ENG A-STOP OFF switch, this light comes on.

56RM03012

- The ENG A-STOP OFF indicator light (orange) in the speedometer comes on or blinks in the following cases as well, and not only to warn you that the ENG A-STOP system is deactivated. If it blinks, have the vehicle inspected by a Maruti Suzuki authorized workshop.
 - If the system is operating normally when the engine switch is pressed to change the ignition mode to ON, the indicator light comes on for approximately 2 seconds, then goes off.
 - If there is something wrong with the system, or if it is time to replace the engine component (starter motor) or the lead-acid battery, the indicator light will blink when the engine switch is pressed to change the ignition mode to ON. (The ENG A-STOP system will not work properly.)

77R4063

NOTE:

If the indicator light blinks when the engine has stopped automatically by the ENG A-STOP system, the engine may restart or stall

Air Conditioning System Settings by ENG A-STOP System

When using the automatic heating and air conditioning system while the engine is stopped automatically by the ENG A-STOP system, you can select the settings via the setting mode of the information display.

For details on how to use the information display, refer to "Setting Mode" of "Information Display" in the "INSTRUMENT CLUSTER" section.

Parking Brake Lever

80T050070

- (1) To set
- (2) To release
- (3) To release

The parking brake lever is located between the front seats. To set the parking brake, depress the brake pedal and pull the parking brake lever all the way up. To release the parking brake, depress the brake pedal and pull up slightly on the parking brake lever, push the button on the end of the lever with your thumb, and lower the lever to its original position.

▲ WARNING

- Never drive your vehicle with the parking brake on: rear brake effectiveness can be reduced from overheating, brake life may be shortened, or permanent brake damage may result.
- If the parking brake does not hold the vehicle securely or does not fully release, have your vehicle inspected by a Maruti Suzuki authorized workshop.
- Always set the parking brake fully before leaving your vehicle or it may move, causing injury or damage. When parking, check that the gearshift lever is in one of the following positions:
 - 1st gear or "R" (Reverse) for manual transmission vehicles.
 - "P" (Park) for automatic transmission vehicles.

Remember, even though the transmission is in gear or in Park, you must set the parking brake fully.

(Continued)

WARNING

(Continued)

- When parking the vehicle in extremely cold weather, the following procedure should be used:
 - 1) Set the parking brake.
 - 2)Manual transmission turn off the engine, then shift into reverse or first gear. Auto (12) (Pork) and turn off the

into "P" (Park) and turn off the engine.

- 3) Get out of the vehicle and put chocks under the wheels.
- 4) Release the parking brake. When you return to your vehicle, first set the parking brake, and then remove the wheel chocks.
- Do not leave cigarette lighters, spray cans, soft drink cans or plastic articles (such as glasses, CD cases, etc.) in sun-heated vehicle. The temperature inside the vehicle may cause as follows:
 - Gas may leak from a cigarette lighter or spray can and may lead to a fire.
 - The glasses, plastic cards or CD cases, etc. may deform or crack.
 - Soft drink cans may fracture.

Parking Brake Reminder Buzzer

A buzzer sounds intermittently to remind you to release the parking brake if you start the vehicle without fully releasing the parking brake. Check that the parking brake is fully released and the brake system warning light turns off.

Precaution for Parking

When Moving the Vehicle

When moving the vehicle, start the engine.

WARNING

If you coast with the engine off, stronger force than normal is required when turning the steering wheel or depressing the brake pedal, resulting in an accident.

Do not coast on a downhill slope with the engine off.

When Taking a Nap in the Vehicle

69RHS172

Do not take a nap in the vehicle with the engine running.

WARNING

- Exhaust gases can enter the vehicle due to surrounding conditions and wind direction, possibly causing carbon monoxide poisoning.
- The gearshift lever could change unintentionally, or the accelerator pedal could be depressed accidentally, causing an accident.
- If you were to accidentally step on the accelerator pedal while you are asleep, the engine and the exhaust system could overheat, resulting in danger of fire.

With the Engine Running, the Cooling Fan (Radiator Fan) may Rotate Suddenly

The cooling fan (radiator fan) in the engine compartment may automatically stop and rotate depending on the conditions of the engine coolant temperature.

WARNING

If you get close to a rotating cooling fan (radiator fan), your hands, hair and clothing may get caught in it, resulting in personal injury.

With the engine running, even when the cooling fan (radiator fan) stops, it may automatically rotate.

Therefore, do not get close to the

When You Park the Vehicle Outside on a Snowy Day

cooling fan (radiator fan).

WARNING

- When you park the vehicle under the eaves or the trees, fallen snow may hit the vehicle's roof and it may be dented.
 - Do not park the vehicle under the eaves or the trees on a snowy day.
- If you park the vehicle outside on a snowy day, the wiper arms may be deformed and the wiper blades may be frozen on the windshield, because of the weight of snow.
 When you park the vehicle outside, raise the wiper arms.

Do not Park the Vehicle Near Flammable Materials

69RHS174

WARNING

If you park the vehicle near flammable materials, the exhaust pipes and exhaust gas will get hot, resulting in danger of fire.

Do not park the vehicle near flammable materials such as dry grass, paper waste and plywood.

When Leaving the Vehicle, Stop the Engine and Lock Doors

69RHS054

Even when leaving the vehicle for a short time, do not leave cash or valuables inside, as there is a risk of theft.

WARNING

If you leave the vehicle unattended with the engine running, problems such as fire or theft can occur. Do not leave the vehicle unattended with the engine running.

Do not Leave the Computer and the Mobile Phone in the Vehicle

There is the possibility of theft, or these items could become damaged due to moisture, humidity or temperature change.

Do not Leave Lighters and Eyeglasses in the Vehicle

69RHS175

WARNING

- · As the inside of the vehicle becomes hotter when parking in areas where strong sunlight causes increased temperature, there is the danger of spontaneous ignition of lighters or spray cans, fire due to explosion, the deformation or cracking of eyeglasses, plastic cards or CD cases, or the rupture of carbonated beverage cans. When parking in those areas, do not leave lighters, spray cans, plastic products (eyeglasses, plastic cards, CD cases, etc.) or carbonated beverage cans in the vehicle.
- When items get pushed around or when the seats are moved, it is possible that gas could escape and lead to a fire. Do not place accessories such lighters or spray cans with exposed operating parts in the glove box, in storage compartments, between the seats, on the floor, etc.

Using Transmission

WARNING

Do not hang any items on the gearshift lever and do not use the gearshift lever as a handrest. Otherwise, it could prevent proper operation of the gearshift lever and cause its malfunction, resulting in an accident.

Manual Transmission

Starting off

To start off, depress the clutch pedal all the way to the floor and shift into 1st gear. After releasing the parking brake, gradually release the clutch. When you hear a change in the engine's sound, slowly press the accelerator while continuing to gradually release the clutch.

Shifting

All forward gears are synchronized and provide quiet and easy shifting. Always depress the clutch pedal all the way to the floor before shifting gears. Keep the engine speed from rising into the red zone of the tachometer.

Downshifting maximum allowable speeds

Transfer lever in "2H" or "4H" position

Downshifting	km/h		
2nd to 1st	20 (12)		
3rd to 2nd	80 (49)		
4th to 3rd	115 (71)		
5th to 4th	160 (99)*		

Transfer lever in "4L" position

Downshifting	km/h		
2nd to 1st	10 (6)		
3rd to 2nd	40 (24)		
4th to 3rd	55 (34)		
5th to 4th	80 (49)*		

*NOTE:

You may not accelerate to the maximum allowable speed because of the driving situation and/or the vehicle condition.

NOTICE

Do not downshift to a lower gear at the speed faster than the maximum allowable speeds for the next lower speed, or severe damage to engine and transmission can result.

WARNING

- Reduce your speed and downshift to a lower gear before going down a long or steep hill. A lower gear will allow the engine to provide braking. Avoid riding the brakes or they may overheat, resulting in brake failure.
- When driving on slippery roads, slow down before downshifting. Excessive and/or sudden changes in engine speed may cause loss of traction, which could cause you to lose control.

NOTICE

- Check that the vehicle is completely stationary before you shift into reverse.
- To help avoid clutch damage, do not use the clutch pedal as a footrest while driving or use the clutch to keep the vehicle stationary on a slope. Depress the clutch fully when shifting.
- When shifting or starting off, do not race the engine. Racing the engine can shorten engine life and cause negative effect to smooth shifting.

NOTE:

If it is difficult to engage reverse gear [R], follow below procedure.

- Put gear lever in neutral [N] position.
- Release clutch pedal once.
- Again depress the clutch pedal and shift from [N] to [R].

Automatic Transmission Gearshift lever

The gearshift lever is designed so that it cannot be shifted out of "P" position unless the ignition switch is in "ON" position and the brake pedal is depressed.

Use the gearshift lever positions as follows:

P (Park)

Use this position to lock the transmission when the vehicle is parked or when starting the engine. Shift into Park only when the vehicle is completely stationary.

R (Reverse)

Use this position to reverse the vehicle from stop. Make sure that vehicle is completely stationary before shifting into Reverse.

N (Neutral)

Use this position for starting the engine if the engine stalls and you need to restart it while the vehicle is moving. You may also shift into Neutral and depress the brake pedal to hold the vehicle stationary during idling.

D (Drive)

Use this position for all normal driving.

With the gearshift lever in "D" range you can get an automatic downshift by pressing the accelerator pedal. The higher the vehicle speed is, the more you need to press the accelerator pedal to get a downshift.

2 (Low 2)

Use this position to provide extra power when climbing hills, or to provide engine braking when going down hills.

L (Low 1)

Use this position to provide maximum power when climbing steep hills or driving through deep snow or mud, or to provide maximum engine braking when going down steep hills.

WARNING

Always depress the brake pedal before shifting from "P" (Park) (or "N" (Neutral) if the vehicle is stationary) to a forward or reverse gear, to help prevent the vehicle from moving unexpectedly when you shift.

A CAUTION

For the vehicles with the keyless push start system, if you cannot press the engine switch firmly, the engine may not start.

Even if you shift the gearshift lever into "R" or "D" position without the engine running, the vehicle does not move.

If you try to move your vehicle under the above-mentioned condition, the vehicle may move in unexpected directions on a slope, etc. This may cause an accident. When starting the engine, press the engine switch firmly. Also, make sure that the engine is running by checking engine sound or warning and indicator lights.

NOTE:

When you shift the gearshift lever into "P" and stop the engine before depressing the parking brake pedal, if you try to restart the engine and shift the gearshift lever into the

position other than "P", it may reduce gearshift lever capability, or unusual sound and shock may occur. However, this is not abnormal.

The gearshift lever has a lock mechanism to help prevent accidental shifting. Shift the gearshift lever as follows:

80T051070

(1) knob button

•	Shift with the knob button (1) pushed in and the brake pedal depressed.				
♦₽	Shift with the knob button (1) pushed in.				
♦	Shift without the knob button (1) pushed in.				

NOTICE

- Do not shift the gearshift lever into "R" while moving forward, or the transmission may be damaged. If you shift into "R" when the vehicle speed is over 10 km/h, the transmission will not shift into reverse.
- Be sure to take the following precautions to help avoid damage to the automatic transmission:
 - Make sure that the vehicle is completely stationary before shifting into "P" or "R".
 - Do not shift from "P" or "N" to "R", "D" or "L" when the engine is running above idle speed.
 - Do not rev the engine with the transmission in a drive position ("R", "D" or "L") and the front wheels not moving.
 - Do not use the accelerator to hold the vehicle on a hill. Use the vehicle's brakes.

NOTE:

- Always shift the gearshift lever without pushing in the knob button except when you shift from "P" to "R", from "D" to "2", from "2" to "L", from "N" to "R" or from "R" to "P". If you always push in the knob button when shifting the gearshift lever, you could shift into "P", "R", "2" or "L" by mistake.
- If driver's or passenger's knee hits the gearshift lever while driving, the lever could move and the gear could be changed unexpectedly.

Overdrive off switch

(1) Overdrive off switch

The transmission is a 4-speed (3-speed plus overdrive) automatic transmission. By operating the overdrive off switch, the transmission can be converted to a 3-speed automatic transmission that will not move to the overdrive position. To convert

the transmission to the 3-speed mode, push in the overdrive off switch and release it.

To return the transmission to the 4-speed mode, push in the overdrive off switch again.

When the ignition switch is turned to the "ACC" position, the transmission in the 3-speed mode is converted to the 4-speed mode automatically.

The 3-speed mode is suitable for the following driving conditions:

- Driving on hilly, winding roads
 - You can drive more smoothly with less frequent gear changing
- Going down a steep hill
- Some engine braking is provided

If you cannot Shift Automatic Transmission Gearshift Lever out of "P" (PARK)

78RB03006

The automatic transmission vehicles have an electrically operated park-lock feature. If the vehicle's lead-acid battery is discharged, or there is some other electrical failure, the automatic transmission cannot be shifted out of Park in the normal way. Jump starting may correct the condition. If not, follow the procedure described below. This procedure will permit shifting the transmission out of Park.

- 1) Be sure the parking brake is firmly applied.
- 2) If the engine is running, stop the engine.
- Make sure the key is in "ON" or "ACC" position.
- 4) With the release button (1) pushed, push the knob button (2) and shift the gearshift lever to the desired position.

This procedure is for emergency use only. If repeated use of this procedure is necessary, or the procedure does not work as described, take the vehicle to a Maruti Suzuki authorized workshop for repair.

Gearshift Indicator (if equipped)

52RM30410

In the following cases, the gearshift indicator is indicated in the information display when the ignition switch is in "ON" position.

- When the gearshift lever is in a position other than "N" (Neutral).
- When the transfer lever is in "2H" or "4H" position.
- For vehicles equipped with the cruise control, when the system is not in use.

The electronic control system monitors driving condition (such as vehicle speed and/or engine revolution), and it shows which gear position is optimal for your driving with the indication on the display.

If UP/DOWN arrow is indicated in the display while driving, we recommend you to shift up or down the gear. It is the optimal gear position for a driving condition that reduces the over revolution and stress to the engine, and improves fuel consumption.

WARNING

The gearshift indicator is designed to indicate optimal gear position for your driving, however, a driver will not be relieved from the duty of care of driving operation or gear change with this indicator.

To drive safe, do not gaze the gearshift indicator, pay attention to your driving situation and shift up or down if necessary.

NOTE:

- The gearshift indicator is not indicated when the gear position is in "N" (Neutral).
- If you depress the clutch pedal while UP/DOWN arrow is indicated, the indication will disappear.
- In ordinary driving, UP arrow will disappear when you release your foot from the accelerator pedal.
 The indication of gearshift indicator timing may differ depending on the vehicle condition and/or driving situation even in the same vehicle speed and engine revolution.
- If any of the electrical systems such as ESP[®] system is working, the gearshift indicator will disappear temporarily.

Example of the gearshift indicator

Indication	Description
	Lower gear position is selected for the vehicle speed and/or engine revolution. Changing to a higher gear position is recommended. • In this case, shifting up is recommended.
•	Higher gear position is selected for the vehicle speed and/or engine revolution. Changing to a lower gear position is recommended. • In this case, shifting down is recommended.

Transfer Lever

78RB03022

(1) Transfer lever

Your vehicle is equipped with the "ALL GRIP PRO" system that consists of a transfer case with a synchronizer (between 2WD-high and 4WD-high positions) and the air locking hubs. With this feature, you can shift the drive mode between 2-wheel drive high range and 4-wheel drive high range by shifting the "2H" or "4H" position. Stop the vehicle or reduce the speed to less than 100 km/h with the front wheels in the straight ahead position. Do not shift the transfer lever without depressing the accelerator pedal. Do not activate the cruise control system when shifting the transfer lever.

Free axle mechanism

80T050140

Fixed axle mechanism

- (1) Air locking hubs
- (2) Transfer case

NOTE:

- The air locking hubs are activated by the vacuum of the engine and changed to shift the front wheel drive. The air locking hubs are not shifted when the engine is stopping. Several seconds are required from the operation of the transfer lever to the activation of air locking hubs.
- When the front tyres receive a big shock during running in 2-wheel drive position on the road surface of the big irregularity, etc, some noise may occur inside the air locking hubs afterwards. In this situation, stop the vehicle and then shift the transfer lever into "4H" position. After that, shift the transfer lever into "2H" position again.

Description of Transfer Lever Positions and Indicator Light

Shift the transfer lever without the lever pressed.

Shift the transfer lever with the lever pressed.

80T050160

(1) 4WD indicator light

Transfer lever	Wheel drive position	Indicator light	Description	
position		4WD indicator light	Description	
2H	2-wheel drive position	_	In this position, engine power is supplied to the rear axle only. Use this position for normal driving.	
4H	4-wheel drive high range position	101 178RB03024	In this position, engine power is supplied to the front and rear axles at normal speed, providing greater traction than 2-wheel drive. Use this position for off-road driving, or for driving on slippery roads (icy, snow-covered, muddy, etc.).	
4L	4-wheel drive low range position	/0/ I-0-1 78RB03024	In this position, engine power is supplied to the front and rear axles at reduced speed. Use this position for off-road driving on soft or slippery surfaces, or for climbing or descending steep, slippery hills.	

NOTICE

- Never operate your vehicle in "4H" or "4L" on dry pavement and, as much as possible, avoid using "4H" or "4L" on wet pavement, as this may seriously damage the drive train.
- If the transfer lever is returned to the original position while shifting the transfer lever, the drive train may be damaged.
- When you turn suddenly on a sharp curve, a side road, or a parking space in "4H" or "4L" position, the turning strength of the steering wheel will be growing big and tight corner braking phenomenon* may occur and result in accidents. 4-wheel drive system damage could also result.

^{*} Tight corner braking phenomenon is the similar situation to depress the brake when the drive train is in 4-wheel drive position ("4H" or "4L") and the steering wheel is turned suddenly and then the revolution difference between the front wheels and the rear wheels could not absorb.

Transfer Lever Operation

NOTICE

- Unevenly worn tyres can cause problems in the operation of the transfer lever. Be sure to rotate the tyres according to the maintenance schedule. Refer to "Tyres" and "Maintenance Schedule" in the "INSPECTION AND MAINTE-NANCE" section for proper tyre rotation procedures.
- If a problem exists during the shifting function, all lights of the 4WD indicator will blink continuously and the transfer lever operation will not work.

If the shift function does not work after trying the shifting operation several times, it may be the result of a system failure. Have your vehicle inspected by a Maruti Suzuki authorized workshop.

NOTE:

- When the temperature of 4-wheel drive system or the transmission is not warm under the low temperature, you may feel it hard to shift the transfer lever or gear noise may occur.
- Unless you can shift the transfer lever, drive your vehicle for a while and then shift the transfer lever again.

Operate the transfer lever according to the appropriate procedure described below:

From "2H" position to "4H" position From "4H" position to "2H" position

78RB03026

The transfer lever can be shifted when the vehicle is either stopped or moving. Position the front wheels straight ahead and shift the transfer lever from "2H" to "4H" or "4H" to "2H". If the vehicle is moving, the speed must be less than 100 km/h during this operation.

WARNING

Do not shift the transfer lever while the rear tyre is spinning. Your vehicle may move to the unexpected direction. 4-wheel drive system may be also damaged.

NOTICE

Pay attention to shifting the transfer lever safely when driving your vehicle.

NOTE:

- After shifting the transfer lever from "2H" to "4H", check that the 4WD indicator light comes on.
- After shifting the transfer lever from "4H" to "2H", check that the 4WD indicator goes off.
- When 4WD indicator light is blinking after shifting the transfer lever to "4H" position, accelerate, slow down your vehicle or stop and reverse your vehicle a little to shift the transfer lever. Pay attention to the vehicles and the circumference toward or backward your vehicle when shifting the transfer lever.
- When you shift the transfer lever while turning the steering wheel or depressing the accelerator pedal, shifting the transfer lever may be difficult.
- Operate the transfer lever while driving at low speed if it may be difficult to shift the transfer lever from "2H" position to "4H" position when the vehicle is stopped.

- Shift the transfer lever again after decelerating or stopping the vehicle if it may be difficult to shift the transfer lever from "2H" position to "4H" position while driving or when the gear noise occurs.
- There may be a case to operate the transfer lever heavily when shifting the transfer lever from "4H" position to "2H" position while driving. In this case, position the front wheels straight ahead and drive for a while and then operate shifting the transfer lever again.
- When the transfer lever is shifted from 2H" position to "4H" position or from "4H" position to 2H" position and the air locking hubs are activated, the air conditioning system may not be operated for several seconds. This is not a malfunction.
- When the ignition switch is turned "ON" after the transfer lever is shifted from 2H" position to "4H" position or from "4H" position to 2H" position while stopping the engine, 4WD indicator light may blink This is not a malfunction

From "4H" position to "4L" position

78RB03027

Stop the vehicle completely, place the transmission in "N" (Neutral) or depress the clutch pedal fully (if equipped), then shift the transfer lever from "4H" position to "4L" position by pressing the transfer lever.

WARNING

When you turn off the engine while the transfer is not finished to shift into "4L" position, follow instructions below.

- 1) Depress the brake pedal* fully.
- 2) Turn the ignition switch to "OFF" position or press the engine switch to change the ignition mode to OFF.
- * Depress the brake pedal until the engine is started again.
- Even though the gearshift lever is shifted into 1st gear or "R" (Reverse) gear for manual transmission vehicles or shifted into "P" (Park) position for automatic transmission vehicles, there may be a case that the wheels of the vehicle is not stationary.

When you turn off the engine in this situation, start the engine again and move the vehicle forward or backward slowly.

A CAUTION

- Do not operate the transfer lever while driving.
- Do not operate the transfer lever while making a left or right turn or while holding rear wheels slipped on icy, snow-covered, or muddy roads. Your vehicle may move to the unexpected direction. 4-wheel drive system may be also damaged.

NOTE:

- There may be a case that you will feel the difficulty to operate the transfer lever when shifting the transfer lever from "4H" position to "4L" position. Operate the transfer lever into "4L" position surely.
- When shifting the transfer lever from "4H" position to "4L" position, the buzzer will sound and the function of the ESP[®] system and the vehicle stability control system will be deactivated.
- There may be a case that shifting into "4L" position is not completed when the transfer system or the transmission is not warm in the cold weather. There may be a possibility of difficulty to shift especially for automatic transmission vehicles in the cold weather. Follow instructions below in this case and operate the transfer lever again.
 - Stop the vehicle completely.
 - Place the transmission in "N" (Neutral).
- Depress the brake pedal* fully.
- Release the parking brake.
- Turn the ignition switch to "OFF" position or press the engine switch to change the ignition mode to OFF.
- Shift the transfer lever from "4H" position to "4L" position by pressing the transfer lever.
- Check whether the vehicle can be moved by moving the vehicle forward or backward slowly.
 - * Depress the brake pedal until the engine is started again.

• There may be a case that it is difficult to operate the transfer lever or the gear noise occurs after driving the vehicle for a while in the cold weather. There may be a possibility of difficulty to shift the transfer lever from "4H" position to "4L" position. In this case, shift the transfer lever into "4H" position or "2H" position and then operate the transfer lever again after driving for a while.

From "4L" position to "4H" position

78RB0302

Stop the vehicle completely, place the transmission in "N" (Neutral) or depress the clutch pedal fully (manual transmission model), then shift the transfer lever from "4L" position to "4H" position.

Cruise Control (if equipped)

The cruise control system allows you to maintain a steady speed without keeping your foot on the accelerator pedal. The controls for operating the cruise control system are on the steering wheel.

You can use the cruise control system under the following conditions:

- · For manual transmission vehicle, the gear position is in 3rd, 4th or 5th
- For automatic transmission vehicle, the gearshift lever is in "D" position
- When the transfer lever is in "2H" or "4H" position
- When 4WD indicator light does not blink
- The vehicle speed is about 40 km/h or higher

▲ WARNING

To help avoid loss of vehicle control. do not use the cruise control system when driving in heavy traffic, on slipperv or winding roads, or on steep downhills.

Setting Cruising Speed Cruise control switch

56RM03017

- (1) Cruise switch
- (2) "CANCEL" switch
- (3) "RES +/SET -" switch

75RM115

- (4) Cruise indicator
- (5) "SET" indicator

- 1) Turn on the cruise control system by pushing cruise switch (1). When the cruise indicator (4) comes on, you can set cruising speed.
- 2) Accelerate or decelerate to the desired speed.
- 3) Push down the "RES +/SET -" switch (3), "SET" indicator (5) comes on. Take vour foot off the accelerator pedal and the set speed will be maintained.

▲ WARNING

If the cruising speed is set by accident, you cannot decelerate or could loose control of the vehicle. This could lead to an accident, resulting in severe injury or death.

Turn off the cruise control system and check that cruise indicator (4). "SET" indicator (5) is off when the system is not in use.

NOTE:

Established cruising speed may differ a little from the speed meter indication depending on the road conditions.

Changing Speed Temporarily

When the cruising speed is maintained, you can temporarily accelerate or decelerate.

To accelerate, depress the accelerator pedal. When you take your foot off the pedal, your vehicle will return to the set speed.

To decelerate, depress the brake pedal. The set speed will be canceled and "SET" indicator (5) will go off.

To resume the previously set speed, push up the "RES +/SET -" switch (3) and turn on "SET" indicator (5) again when vehicle speed is above 40 km/h. The vehicle will accelerate to the previously set speed and maintain its speed.

Changing Cruising Speed

Using the accelerator pedal

To reset at a faster cruising speed, accelerate to the desired speed using the accelerator pedal and push down the "RES +/SET -" switch (3). The new speed will be maintained.

Using the brake pedal

To reset at a slower cruising speed, decelerate to the desired speed using the brake pedal and push down the "RES +/SET -" switch (3). The new speed will be maintained.

NOTE:

When the brake pedal is depressed, "SET" indicator (5) will go off until you reset the cruising speed.

Using "RES +/SET -" switch

To reset at a faster cruising speed, press repeatedly or hold push up the "RES +/SET -" switch (3). Vehicle speed will steadily increase. When you release the switch, the new speed will be maintained.

To reset at a slower cruising speed, press repeatedly or hold push down the "RES +/SET -" switch (3) until the vehicle has slowed to the desired speed, and then release the switch. The new speed will be maintained.

NOTE:

- You can adjust the set speed by approximately 1 km/h by pushing "RES +/SET " switch quickly.
- When the current vehicle speed is about 10 km/h or more faster than the previously set speed, the cruising speed cannot be decreased even if the "RES +/ SET –" switch (3) is pushed down.
- When the current vehicle speed is about 10 km/h or more slower than the previously set speed, the cruising speed cannot be increased even if the "RES +/ SET –" switch (3) is pushed up.

Canceling Cruise Control

"SET" indicator (5) will go off and the cruise control will be canceled temporarily with the following conditions:

- Push "CANCEL" switch (2)
- Depress the brake pedal
- For manual transmission, depress the clutch pedal
- For automatic transmission vehicle, the gear position is changed to "L"
- The vehicle speed falls more than about 20 percent from the set speed
- Any time the vehicle speed falls below 40 km/h
- When the vehicle skids and ESP[®] is activated
- · If the automatic brake system is working
- When the transfer lever is operated

To resume the previously set speed, push up the "RES +/SET -" switch (3) and turn on "SET" indicator (5). The vehicle speed must be above 40 km/h when the vehicle is not under the above conditions.

To turn off the cruise control system, push cruise switch (1) and check that the cruise indicator (4) is off.

Also, if the malfunction indicator light in the instrument cluster comes on or blinks, the cruise control system will be turned off.

NOTE:

If you turn off the cruise control system, the previously set speed in the memory is cleared. Reset your cruising speed again.

Parking Sensors

- The parking sensor system uses ultrasonic sensors to detect obstacles near the rear bumper. If obstacles are sensed while you are parking or moving the vehicle slowly, the system warns you by sounding a buzzer.
- The system emits an ultrasonic wave and the relevant sensor detects the return of the wave reflected by an obstacle. The system measures the time taken by the ultrasonic wave to reach the obstacle and return from it, from which it determines the obstacle's position.
- The parking sensor function can be used when you turn the ignition switch to "ON" position or the engine switch is pressed to change the ignition mode to "ON", the gearshift lever is in the reverse position (manual transmission models) or "R" position (automatic transmission models). This function is helpful in the following cases: pulling over to the curb; parallel-parking the vehicle; steering the vehicle into a garage; driving along an alley; and moving slowly in a place with obstacles

WARNING

- The parking sensor warns you of obstacles with buzzers. However, you must still pay full attention yourself while driving.
- The sensors can detect obstacles only within a limited area and only when the vehicle is moving within a limited speed range. So, in tricky areas, you must move the vehicle slowly while checking around it using your direct vision or rearview mirrors. There is increased risk of an accident if you control the vehicle relying only on the parking sensor.

NOTICE

Parking sensors are only for driver's assistance.

NOTE:

When the gearshift lever is shifted to the reverse position (manual transmission models) or "R" position (automatic transmission models), a buzzer will sound once.

Sensor Locations

80T050680

- (1) Rear center sensors (2 places)
- (2) Rear corner sensors (2 places)

NOTICE

- Avoid hitting the sensor areas or directing the nozzle of a high-pressure car washer onto the sensor areas. Otherwise, the sensors may be damaged.
- If the bumper hits a hard object, the sensors on it may not work properly. If this occurs, have the sensors inspected by a Maruti Suzuki authorized workshop.

Working sensors

The sensors work depending on the gearshift lever position as follows:

Gearshift lever position		Manual transmission		Automatic transmission		Parking brake lever
		R	N, 1st – 5th	R	N, D or L	Diake level
Rear	Center	On	Off	On	Off	No relation
sensors	Corner	On	Off	On	Off	No relation

Upon detecting an obstacle, the parking sensor causes an interior buzzer to sound.

- A buzzer located behind the rear seat sounds when a sensor at the rear detects an obstacle.
- Warnings when obstacles are detected by rear sensors

Distance (approx.)		Buzzer
Center sensors	60–150 cm	Short beeps at long intervals
45–60 cm		Short beeps at short intervals
35–45 cm		Short beeps at very short intervals
Less than 35 cm		Continuous beep

NOTE:

- Buzzer will sound with a short delay after the detection of obstacles.
- If the system detects multiple obstacles simultaneously, however, the buzzers will sound only for the nearest obstacles.

Approximate areas where obstacles can be detected

80T050690

- An obstacle within about 20 cm (8 in) from a sensor or just below a sensor is not detectable.
- The sensors can detect obstacles such as a wall up to about 1.5 m (5 ft) from the rear of vehicle.

WARNING

- Under the following conditions, the parking sensor system may not work normally because the sensors cannot detect obstacles correctly.
 - Sensors are covered with mud, ice or other materials (Such materials must be removed for normal operation).
 - Sensors are wet from water splashes or heavy rain.
 - Sensors are covered by a hand, sticker, accessory, etc.
 - There is an accessory or other object attached within the sensor's sensing area.
 - Items such as tow hooks, commercially available corner poles, radio antenna, etc. are installed on the bumper.
 - The height of the bumper is changed due to alteration to the suspension or other causes.
 - The sensor areas are extremely hot from direct sunlight or cold due to freezing weather.
 - The vehicle is on a rough surface, slope, gravel road or grass field.
 - The vehicle is at a steep angle.

(Continued)

WARNING

(Continued)

- Sensors have intercepted ultrasonic noise from another vehicle's horn, engine, air braking system (large vehicles), or parking sensor.
- Obstacles are too close to the sensors.
- Sensors are at an angle to a highly reflective object such as glass (Ultrasonic waves are not reflected back from the obstacle).
- Sensors may not be able to correctly detect the following types of obstacles:
 - Objects made of a thin material like wire netting and ropes.
- Square-shaped curbstones or other objects with sharp edges.
- Tall objects with a large upper part like a road sign.
- Low-profile objects such as curbstones.
- Sound-absorbing objects such as cotton and snow.

NOTE:

- Thin poles or obstacles lower than the sensors may become undetectable as the vehicle moves closer to them even if they have been detected from longer distances
- The system may calculate the distance to a road sign or similar obstacle to be shorter than the actual distance.

Parking Sensor System Malfunction

If there is a problem or warning regarding the parking sensor system, a buzzer inform it. Follow its instruction.

 The buzzer sounds intermittently. The indicated sensor is contaminated. Wipe it clean with a soft cloth. If the buzzer does not stop after wiping, there may be problem with the parking sensor system. Have your vehicle inspected by a Maruti Suzuki authorized workshop.

Rearview Camera

When the gearshift lever is shifted to "R" position while the ignition switch is in "ON" position or the ignition mode is "ON", the rearview camera system automatically shows the view behind the vehicle on the display.

WARNING

The distance viewed in the rearview camera may differ from the actual distance according to the condition of road or the load the vehicle is carrying. Since the camera display area is also limited, backing up by only looking at the display may cause an accident or a crash with an object.

The rearview camera cannot replace the driver's attention. The driver alone is responsible for parking and similar driving maneuvers.

- Use the rearview camera only to provide driving assistance.
- Always drive carefully confirming the safety of the rear and the surrounding conditions by looking directly with your eyes and using the rear view mirror.
- Check that the trunk lid is securely closed when backing up.

NOTICE

If you use the rearview camera for a long time when the ignition switch is in "ON" position or the ignition mode is ON, but the engine is not running, the battery may discharge.

Do not leave the ignition switch in "ON" position or the ignition mode to ON for a long time when the engine is not running.

Rearview Camera Location

80T050700

(1) Rearview camera

The rearview camera is installed on the tailgate.

NOTICE

- The rearview camera is a precision instrument. If you strike the camera, it may be broken and cause damage resulting in a catch fire or a malfunction.
 - Do not strike the camera.
 - Do not remove snow or mud on the camera lens with a stick.
- If water enters the rearview camera, it may cause a malfunction or catch fire.
 - Do not use high pressure water around the camera.
- This lens is hard coated to prevent damage or discoloration. Damage or discoloration of lens may obscure the image.
 - Do not use a brush to clean lens.
 - Do not use alcohol, benzene or thinner to clean the lens.
 - Do not use wax on the camera lens.

NOTE:

If body wax gets on the camera lens, wipe off the wax with a clean cloth dampened with mild detergent diluted with water, and then wipe the lens with a dry cloth.

How to use Rearview Camera

- Turn the ignition switch to "ON" position or press the engine switch to change the ignition mode to "ON".
- 2) Shift the gearshift lever in "R" position.
 - The display automatically shows the view behind the vehicle.
 - When the gearshift lever is shifted from "R" to another gearshift lever position, the display returns to the previous display.

NOTE:

The rearview camera display has first priority in any display mode. However, the rearview camera display does not show the rear view while the system is initializing.

Display Range of Rearview Camera

The rearview camera display shows the area behind the rear end of the bumper. The display cannot show objects which are close to the bumper or under the bumper. The rearview camera display cannot show obstacles which are higher than the camera. Upper parts of tall objects such as road signs cannot be viewed on the display.

Display range of rearview camera

80T050710

80T050720

(1) Display range

NOTE:

- Images shown on the display from the rearview camera are reversed images (mirror images).
- The colors of objects on the rearview camera may differ from the actual object colors.
- The rearview camera display may be difficult to see under the following conditions, but this is not a system malfunction.
 - In dark areas, on a rainy day or at night.
 - When the temperature around the lens is too high/low, or the camera is wet such as on a rainy day or during periods of high humidity (dew condensation may occur on the camera lens).
 - When a foreign object such as mud or a drop of water is stuck around the camera lens.
 - When strong light directly enters the camera (vertical lines may be seen on the display).
 - Under fluorescent light (The display may flicker).
 - When the outside temperature is low (the image on the display may be darkened).

How to Understand the Displayed Items on the Screen

The rearview camera display and following guide lines will be displayed on the screen.

80T051090

- As each guide line is displayed towards road surface, the distance from your vehicle to an obstacle such as the parked vehicle near
 your vehicle is not accurately displayed.
- Trapezoidal guide lines for the distance and the vehicle width which are displayed on the screen are rough indications and they depend on the actual distance and vehicle width.
- If you modify suspensions or replace a tyre by undesignated tyre, the guide lines will not be accurately displayed.

No.	Item name	Displayed color	Contents
(1)	Guide line for the vehicle width (vertical line)	Purple	This shows the guide line of the position which is slightly outside of the vehicle width (including the width of outside rearview mirrors).

No.	Item name	Displayed color	Contents
(2)		Light blue	This shows the guide line of the position which is about 2 m (6.6 ft) backward from the center of bumper back-end.
(3)	Guide line for the distance	Yellow	This shows the guide line of the position which is about 1 m (3.3 ft) backward from the center of bumper back-end.
(4)		Red	This shows the guide line of the position which is about 0.5 m (1.6 ft) backward from the center of bumper back-end
(5)	Guide line for the vehicle body	Orange	This shows the guide line of the position of the vehicle body shape (including the spare wheel).

Rearview Camera Screen Indication

The distance viewed in the rearview camera may differ from the actual distance according to the condition of the road or the load the vehicle is carrying.

Uphill incline behind the vehicle

80T050730

- (1) Object
- (2) Actual distance
- (3) Distance on the display

When there is an uphill incline behind the vehicle, the object shown on the display appears farther away than the actual distance.

Downhill incline behind the vehicle

80T050740

- (1) Object
- (2) Actual distance
- (3) Distance on the display

When there is a downhill incline behind the vehicle, the object shown on the display appears closer than the actual distance.

If the rear view from the rearview camera is not shown or there is a poor image

- If the rear view from the rearview camera is not shown.
 - Check that the ignition switch is in "ON" position or the ignition mode is "ON".
 - Check that the gearshift lever is shifted to "R" position.

- If the image from the rearview camera is poor.
 - Check that the camera lens is not dirty.
 - Check that light from the sun or the beam of the headlights from the vehicle behind is not shining directly into the lens.

If the rearview camera system is still not working properly after checking the above, have the system inspected by a Maruti Suzuki authorized workshop as soon as possible.

Electronic Stability Program (ESP®)

ESP[®] is a registered trademark of Mercedes-Benz Group AG.

The Electronic Stability Program (ESP®) helps to control the vehicle during cornering if front wheels or rear wheels skid. It also assists you in maintaining traction while accelerating on loose or slippery road surfaces. It does this by regulating the engine's output, and by selectively applying the brakes. In addition, ESP® helps to avoid skidding by controlling braking pressure.

WARNING

The ESP® cannot enhance the vehicle's driving stability in all situations and does not control your vehicle's entire braking system. The ESP® cannot prevent accidents, including those resulting from excessive speed in turns, or hydroplaning. Only safe and attentive drive can prevent accidents.

The capabilities of an ESP[®]-equipped vehicle must never be used as a substitute for careful driving.

A CAUTION

- Observe the following points. Otherwise, ESP[®] may not operate properly or it may result in a malfunction.
 - Adjust the tyre pressure as specified.
 - When replacing tyres, use the same tyres with the size, type, and tread patterns.
 - Do not use the tyres which have excessively worn conditions.
 - Do not modify the suspension or the brake and do not change vehicle height or suspension hardness.
 - Do not drive the vehicle with suspension or brake excessively deteriorated.
 - Do not modify the engine or the muffler.
 - Do not install LSD (limited slip differential).
- When you install the snow chains, ESP[®] may not operate properly.

The ESP[®] has the following systems:

Anti-lock Brake System (ABS)

Refer to "Anti-lock Brake System (ABS)" in this section.

Brake Assist System

Refer to "Brake Assist System" in this section.

Traction Control System

The traction control system automatically helps prevent the spinning of wheels when the vehicle is started or accelerated on slippery road surfaces. The system operates only if it senses that some of the wheels are spinning or beginning to lose traction. When this happens, the system operates the front or rear brakes and reduces engine power to limit wheel spin.

NOTE:

You may hear an operation sound when you start the engine or after the vehicle begins to move. This means that the above systems are in the self-check mode. This sound does not indicate a malfunction.

Stability Control System

The vehicle stability control system helps provide integrated control of systems such as anti-lock brakes, traction control, engine control, etc. This system automatically controls the brakes and engine to help prevent the vehicle from skidding when cornering on a slippery road surface or when turning the steering wheel abruptly.

NOTE:

- If you perform the following operations, you may hear an operation sound or a clicking sound. This means that the ESP[®] system is in the self-check mode and this does not indicate a malfunction.
 - When ignition switch is turned to the "ON" position or pressing the engine switch to change the ignition mode to "ON"
 - When releasing your foot from the brake pedal, after the ignition switch is in "ON" position or the ignition mode is "ON" with the brake pedal depressed
 - When starting the engine
 - When starting the vehicle after starting the engine
- When engine revolutions is high and ESP[®] operates, you may feel the change of engine revolutions or vibration of vehicle body. However, this is normal.

ESP® Warning Light

77R40170

- If there is a problem in the ESP[®] system with the ignition switch in "ON" position or the engine switch in ON mode, this light will come on. While this light comes on, the following situations will occur. In this case, ask your Maruti Suzuki authorized workshop for inspection.
 - The following functions will not work:
 - Traction control system
 - Stability control system
 - Hill descent control system
 - SUZUKI SAFTY SUPPORT
 - ENG A-STOP system
 - Hill hold control system may not work.
 - ABS will work.

- Depending on the malfunction condition, brake assist system may not work.
- If any of the following situations occurs, this light will blink at very short intervals of 0.2 seconds.
 - Traction control system is activated when starting or accelerating the vehicle
 - Stability control system is activated when making a sharp turn or whirling round
 - Hill descent control system is activated when going down steep hills
- If the system is in normal condition, when you turn the ignition switch to "ON" position or press the engine switch to change the ignition mode to ON, this light will come on for about 2 seconds and then come off.

A CAUTION

If this light blinks at very short intervals, there is high possibility that the vehicle will be stuck or skid on a slippery road surface. In this case, drive the vehicle very carefully.

NOTE:

While this light comes on, traction control system and stability control system will not be activated. However, you can use ABS.

ESP® OFF Switch

77R40180

(1) ESP® OFF switch

When the ESP® OFF switch located at the instrument panel is pushed and held to turn off the ESP® systems (other than ABS), the ESP® OFF indicator light in the instrument cluster comes on.

When you have turned the ESP[®] systems (other than ABS) off, turn them back on before resuming ordinary driving.

When you push the ÉSP® ÕFF switch again, the ESP® OFF indicator light will go out and all of the ESP® systems will be activated.

NOTE:

When you push and hold the ESP[®] OFF switch for a while with the transfer lever in "4L" position, the hill hold control system can be deactivate.

75RM223

If the message shown in the above illustration appears on the information display, master warning indicator light blinks and the interior buzzer beeps, there may be a problem with the ESP® system. Have your vehicle inspected by a Maruti Suzuki authorized workshop.

NOTE:

 The ESP[®] system will not activate while this message is displayed.

ESP[®] OFF Indicator Light

77R40190

You should turn the ESP[®] on during your ordinary driving, so that you have the benefits of all of the ESP[®] systems.

It may be required to turn the ESP[®] systems (other than ABS) off if your vehicle is stuck in sand, mud, or snow, where wheel spin is necessary.

- If you press and hold the ESP[®] OFF switch with the ignition switch is in "ON" position or the ignition mode is "ON", this light will come on.
 - While this light comes on, traction control system and stability control system will not work.
- If the system is in normal condition, when you turn the ignition switch to "ON" position or press the engine switch to

change the ignition mode to ON, this light will come on for about 2 seconds and then come off.

NOTE:

- When the vehicle speed is greater than approximately 30 km/h, the ESP[®] systems (other than ABS) will turn on automatically and the ESP[®] OFF indicator light will go out.
- When the transfer gear is in "4L" (4-wheel drive low range) position, the ESP[®] systems (other than ABS) will be canceled to provide improved vehicle traction, and the ESP[®] OFF indicator light will come on.

When the transfer gear is in "4L" (4-wheel drive low range) position, brake traction control can be activated. Brake traction control brakes the spinning wheel to distribute drive power to the other wheels for increased climbing ability or for better performance on a rolling hill or a slippery surface.

Hill Descent Control System

The hill descent control system is designed to reduce the driver's workload when going down steep, rough and/or slippery hills where the vehicle cannot decelerate enough by engine braking alone. The hill descent control system helps to control vehicle speed by automatically engaging the vehicle's brakes, as needed, so you can concentrate on steering the vehicle.

WARNING

Do not rely excessively on the hill descent control system. The hill descent control system may not control the vehicle speed on a hill under all load or road conditions. Always be prepared to control vehicle speed by applying the brakes. Failure to pay attention and control vehicle speed using the brakes when necessary may result in loss of control or an accident.

Hill descent control switch

80T050800

(1) Hill descent control switch

To activate the hill descent control system:

- 1) Shift the transfer lever into 4-wheel drive high range position ("4H") or 4-wheel drive low range position ("4L").
- 2) Shift the gearshift lever into a forward gear or reverse gear.
- 3) Push the hill descent control switch (1) when the vehicle speed is under 25 km/h. The hill descent control indicator on the instrument cluster will come on and the hill descent control system will be activated.

4-wheel drive high range position

When the vehicle speed exceeds about 10 km/h without depressing the accelerator pedal, the hill descent control system applies the brakes automatically to maintain the vehicle speed at about 10 km/h.

4-wheel drive low range position

When the vehicle speed exceeds about 5 km/h without depressing the accelerator pedal, the hill descent control system applies the brakes automatically to maintain the vehicle speed at about 5 km/h.

- When braking, the brake/tail lights come on and the ESP[®] warning light blinks.
- When the vehicle speed exceeds about 35 km/h, the hill descent control system stops functioning and the hill descent control indicator goes blink. When the vehicle slows down below about 25 km/ h, the hill descent control system will be activated again and the hill descent control indicator will come on.

WARNING

- When the hill descent control system is used continuously for a long time, the temperature of the brake system may increase and the hill descent control system may be deactivated temporarily to protect the device of the brake system. The hill descent control indicator blinks to let you know the system is deactivated. Depress the brake pedal and stop the vehicle in a safe place. When the temperature of the brake system goes down, the hill descent control indicator will come on and the system is activated again.
- The hill descent control system may be activated when the gearshift lever is in "N" (Neutral) position, but engine braking will not work. Always use the hill descent control system with the gearshift lever in a forward gear or reverse gear.
- When using the hill descent control system, push the hill descent control switch and make sure that the hill descent control indicator light comes on and no warning message are indicated on the information display.

NOTE:

You may hear a sound coming from the engine when the hill descent control system is activated. This sound is normal and does not indicate a malfunction.

To turn off the hill descent control system, push the hill descent control switch and turn off the hill descent control indicator light.

Hill descent control indicator light

80T05082

When the ignition switch is in "ON" position or the ignition mode is ON, this light comes on briefly so you can check that the light is working.

When you push the hill descent control switch and the hill descent control operating conditions are fulfilled, the hill descent control indicator comes on. If the hill descent control indicator blinks, the hill descent control will not be activated.

If hill descent control indicator light comes on while not operating the hill descent control switch, or the indicator light does not come on after the switch is pushed, there is a problem in this system. Have your vehicle inspected by a Maruti Suzuki authorized workshop.

NOTE:

If the hill descent control indicator blinks when you push the hill descent control switch, check the following conditions.

- The transfer lever is in 4-wheel drive high range position ("4H") or 4-wheel drive low range position ("4L")
- The gearshift lever is in a forward gear or reverse gear
- The vehicle speed is under 25 km/h
- The brake system is under normal operating temperature

NOTE:

If any of the following conditions occur, there may be a problem with the hill descent control system or the ESP® system. Have your vehicle inspected by a Maruti Suzuki authorized workshop.

- The hill descent control indicator does not come on or blink when you push the hill descent control switch.
- The hill descent control indicator stays on when driving without pushing the hill descent control switch.

75RM224

If the message shown in the above illustration appears on the information display, master warning indicator light blinks and the interior buzzer beeps, there may be a problem with the hill descent control system and the hill hold control system. Have your vehicle inspected by a Maruti Suzuki authorized workshop.

NOTE:

You cannot activate the hill descent control system while this message is displayed.

Hill Hold Control System

The hill hold control system is designed to assist you in starting to move up hills. When you start to move up a hill, the system helps prevent the vehicle from rolling downward (for approximately 2 seconds) while you move your foot from the brake pedal to the accelerator pedal.

▲ WARNING

- Do not rely excessively on the hill hold control system. The hill hold control system may not prevent the vehicle from rolling downward on a hill under all load or road conditions. Always be prepared to depress the brake pedal to prevent the vehicle from rolling downward. Failure to pay attention and depress the brake pedal to hold the vehicle on a hill when necessary, may result in loss of control or an accident.
- The hill hold control system is not designed to stop the vehicle on a hill.

(Continued)

WARNING

(Continued)

- After you release your foot from the brake pedal, accelerate the vehicle to move up immediately. If you release your foot from the brake pedal over 2 seconds, the hill hold control system will be canceled. If so, the vehicle may roll downward, which can result in an accident depending on the degree of slope. And, the engine may stall and the power assist for the steering and brakes will not work so steering and braking will be much harder than usual which can result in an accident or vehicle damage.
- If you drive on the steep slope, the gravel, the snow-covered road, or the muddy road and the hill hold control system is activated, there may be a possibility that the wheels will be locked and then the vehicle may lose the control.

The hill hold control system activates for a maximum of about 2 seconds if your foot is moved from the brake pedal when the following conditions are all met.

- 1) The gearshift lever is in a forward gear or reverse gear.
- 2) The parking brake is released.
- 3) The vehicle is on an upward incline.

NOTE:

When the hill hold control system is activated, the following conditions may be found, but this is not a malfunction.

- You may hear a sound from the engine room.
- As brake pedal becomes heavy, it may be difficult for you to depress it.

75RM224

If the message shown in the above illustration appears on the information display, master warning indicator light blinks and the interior buzzer beeps, there may be a problem with the hill descent control system and the hill hold control system. Have your vehicle inspected by a Maruti Suzuki authorized workshop.

NOTE:

The hill hold control system will not activate while this message is displayed.

How to turn off Hill hold control system When driving on a steep slope, or a slippery road (icy, snow-covered, muddy, etc), it is possible to deactivate the hill hold control system.

To deactivate the hill hold control system:

 Make sure that the gear shift lever is in "N" (Neutral) position for manual transmission vehicles and automatic transmission vehicles.

78RB03027

 Shift the transfer lever from 4-wheel high range position ("4H") to 4-wheel low range position ("4L").

80T050940

3) When the ESP® OFF switch is pushed and held to turn off the ESP® system (other than ABS), the message is shown on the display for the vehicles with instrument cluster and the hill hold control system is deactivated.

NOTE:

- When the ESP[®] OFF switch is pushed again, the hill hold control system is activated again.
- When the hill hold control system is deactivated and the transfer lever is shifted from "4L" position to "4H" position, the hill hold control system is activated again.
- When the hill hold control system is deactivated, hill descent control system is also deactivated.

Braking

59RN05770

The distance needed to bring any vehicle to a halt increases with the speed of the vehicle. The braking distance needed, for example, at 60 km/h will be approximately 4 times greater than the braking distance needed at 30 km/h. Start to depress the brake pedal when there is plenty of distance between your vehicle and the stopping point, and slow down gradually.

WARNING

If water gets into the brake devices, brake performance may become poor and unpredictable. After driving through water or washing the underside of the vehicle, test the brakes while driving at a slow speed to see if they have maintained their normal effectiveness. If the brakes are less effective than normal, dry them by repeatedly applying the brakes while driving slowly until the brakes have regained their normal effectiveness.

Power-assisted Brakes

Your vehicle has power-assisted brakes. If power assistance is lost due to a stalled engine or other failures, the system is still fully operational on reserve power and you can bring the vehicle to a complete stop by pressing the brake pedal once and holding it down. The reserve power is partly used up when you depress the brake pedal and reduces each time the pedal is pressed. Apply smooth and even pressure to the pedal. Do not pump the pedal.

WARNING

Even without reserve power in the brake system, you can still stop the vehicle by pressing the brake pedal harder than normally required. However, the stopping distance may be longer.

Brake Assist System

When you slam the brakes on, the brake assist system determines it to be an emergency stop and provides more powerful braking for a driver who cannot hold down the brake pedal firmly.

NOTE:

If you quickly and forcefully depress the brakes, you may hear clicking sound by the brake assist system operation. This is normal and indicates that the brake assist system is activated properly.

Anti-lock Brake System (ABS)

ABS will help you avoid skidding by electronically controlling braking pressure. It will also help you maintain steering control when braking on slippery surfaces or when braking hard.

The ABS works automatically, so you do not need any special braking technique. Just push the brake pedal down without pumping. The ABS will operate whenever it senses that the wheels are locking up. You may feel the brake pedal move a little while the ABS is operating.

WARNING

- Always check the surrounding conditions and drive the vehicle in a safe manner, as controlling the vehicle by ABS has limits and the system may not function properly depending on the surrounding conditions.
- If tyre grip performance is over the limit or hydroplaning occurs, ABS cannot work properly.

NOTE:

 If the ABS system is activated, you may hear a clunking noise and/or feel pulsating in the brake pedal. This is normal and indicates that the brake fluid pressure is being controlled properly. You may hear an operation sound when you start the engine or after the vehicle begins to move. This means that the above systems are in the self-check mode. This sound does not indicate a malfunction.

Braking Distance

ABS is not designed to shorten the stopping distance.

WARNING

- In the following situations, the braking distance required for a vehicle with ABS may be slightly greater than the one required for a vehicle without ABS, resulting in an accident. Drive the vehicle slowly and maintain ample distance between your vehicle and the vehicle in front of you.
 - When driving on rough roads such as unpaved or stone-paved roads
 - When driving on gravel roads or fresh snow roads
 - When driving over bumps on the roads such as joint seams
 - When passing over metal plates such as manholes
 - When snow chains are installed

NOTE:

- When applying sudden brake or applying brake on slippery roads, the braking distance required for a vehicle with ABS is almost the same as the one required for a vehicle without ABS.
- If you would like to suddenly apply brake, just push the brake pedal down firmly without pumping. Otherwise, the longer braking distance will be required.
- The ABS will not work if vehicle speed is under about 9 km/h. This depends on the road conditions.

Vibration and Sound during ABS Operation

When strongly depressing the brake pedal, you might feel vibration of the brake pedal, the steering wheel, and the vehicle body. This is due to ABS operation, and does not indicate a malfunction; continue strongly depressing the brake pedal at this time.

NOTE:

Immediately after starting the engine and beginning to drive, you might temporarily hear a motor sound. This means that the systems are in self-check mode. This sound does not indicate a malfunction.

Tyres

WARNING

ABS detects each wheel rotation speed via a sensor. If tyres or wheels other than those specified in the owner's manual are used for size, type, tread pattern, or if worn conditions of tyres are different, the correct wheel rotation speed cannot be detected and ABS will not work properly. This may result in an accident. When replacing tyres, use the tyres with the size, type, and tread patterns which are specified in this owner's manual.

Also, do not use the tyres which are excessively worn.

Situations where ABS may Activate by Chance when Applying Brake

· When driving on slippery roads

69RHS150

- Manholes

69RHS151

Metal plates in construction zones

69RHS154

- Cobblestone

69RHS156

- Gravel roads
- When driving over joints in roads and other height differences

69RHS153

- Joints in roads

- Height differences in roads
- · When driving on rough roads

69RHS155

- Bumpy roads

ABS Warning Light

77R40200

If there is a problem in the ABS system with the ignition switch in "ON" position or the engine switch in ON mode, this light will come on.

54MN069

- (1) ABS warning light
- (2) Brake system warning light

NOTE:

- If the ABS warning light (1) on the instrument cluster comes on and stays on while driving, there may be a problem with the ABS system. Ask your Maruti Suzuki authorized workshop to inspect the ABS system immediately. If the ABS system becomes inoperative, the brake system will function as an ordinary brake system that has no ABS.
- If the ABS warning light (1) and the brake system warning light (2) on the instrument cluster simultaneously stay on or come on while driving, both antilock function and rear brake force control function (proportioning valve function) of the ABS system may have failed. If so, the rear wheels may easily skid or the vehicle can even spin in the worst case when braking on a slippery road or when hard braking even on a dry paved road. Ask your Maruti Suzuki authorized workshop to inspect the ABS system immediately. Drive carefully, avoiding hard braking as much as possible.

Braking Assist

This function assists you in applying more force when operating the brake. When sudden braking is applied, the time until the ABS comes into full effect is shortened.

- If you do not depress the brake pedal firmly, braking assist will not operate.
- Brake assist is not a device that provides control beyond the original braking performance.

ADVICE FOR YOUR DRIVING

When Driving	6-1
Important Vehicle Design Features to Know	6-1
On-Paved Road Driving	6-2
Off-road Driving	6-10
Improving Fuel Economy	6-12
Precaution for Handling Vehicle	6-1
Running-in	6-1
Catalytic Converter	6-1

When Driving

59RN02300

WARNING

- Wear your seat belts at all times. Even though airbags are equipped at the front seating positions, the driver and all passengers should be properly restrained at all times, using the seat belts provided. Refer to "Seat belts and child restraint systems" in "FOR SAFE DRIVING" section for instructions on proper use of the seat belts.
- Never drive under the influence of alcohol or other drugs. Alcohol and drugs can seriously impair your ability to drive safely, greatly increasing the risk of injury to yourself and others. You should also avoid driving when you are tired, sick, irritated or under stress.

Important Vehicle Design Features to Know

WARNING

Your multipurpose vehicle has handling characteristics that differ from those of a conventional passenger car. For the safety of you and your passengers, please read the following section very carefully.

Multipurpose vehicles such as your new Maruti Suzuki have higher ground clearance and a narrower track than conventional passenger cars, to make them capable of performing in a wide variety of off-road applications. Specific design characteristics give them a higher center of gravity than ordinary cars. An advantage of the higher ground clearance is a better view of the road allowing you to anticipate problems. They are not designed for cornering at the same speed as conventional passenger cars any more than low-slung sports cars are designed to perform satisfactorily under off-road conditions. If at all possible, avoid sharp turns or abrupt maneuvers. As with other vehicles of this type, failure to operate this vehicle correctly may result in loss of control or vehicle rollover. Multipurpose vehicles have a significantly higher rollover rate than other types of vehicles. In a rollover collision, an unbelted person is significantly more likely to die than a person wearing a seat belt.

Important Differences Between Your Multipurpose Vehicle and Ordinary Passenger Cars

Higher Ground Clearance

The higher ground clearance of your vehicle enables it to clear off-road obstacles, such as rocks and tree stumps, that ordinary passenger cars cannot drive over. An unavoidable result of this higher ground clearance is that the vehicle also has a higher center of gravity. Consequently, your vehicle will handle differently than a vehicle with a lower center of gravity.

Narrower Body Width and Track

Your vehicle is narrower than the average passenger car so that it can pass through tight spaces. Without the essential characteristics described above: higher ground clearance, and narrower body width and track -your vehicle could not provide you with excellent off-road driving performance. However, it is also true that onroad driving, handling, and steering will be different from what drivers experience with a conventional passenger car.

On-Paved Road Driving

The data of accidents show that most rollover accidents for multi-purpose vehicles are caused when a driver loses control of the vehicle and leaves the paved portion of the roadway striking a ditch, curb or other off-road object that causes the vehicle to overturn. The following driving practices may reduce the risk of rollover.

Vehicle Slides Off-Road

You can reduce the risk of this kind of rollover accident by always keeping the vehicle under control. Typically, drivers lose control of vehicles, often resulting in rollover accidents, when the driver is impaired because of alcohol or other drugs, falls asleep at the wheel or is otherwise inattentive, or is driving too fast for the road conditions.

Rollovers On the Roadway

If, for any reason, your vehicle slides sideways or spins out of control at highway speeds, while on the paved portion of the roadway, the risk of rollover is greatly increased. This condition can be created when two or more wheels drop off onto the shoulder and you steer sharply in an attempt to reenter the roadway. To reduce the risk of rollover in these circumstances, if conditions permit, you should hold the steering wheel firmly and slow down before pulling back into the travel lanes with controlled steering movements.

All Types of Rollover Accidents

As with many kinds of automobile accidents, rollovers can be greatly reduced by doing what all prudent drivers should do, i.e., don't drink and drive, don't drive when tired and don't do anything behind the wheel that could cause a loss of attention to the driving task.

Additional guidelines are set out as follows for your on-road driving.

Know Your Vehicle

Take time to familiarize yourself with the unique handling characteristics of your vehicle by first driving around in an area away from traffic. Practice turning the vehicle at a variety of speeds and in different directions. Get a feel for the greater steering response that your vehicle has over a conventional car.

Wear Your Seat Belts at All Times

The driver and all passengers should be properly restrained at all times, using the seat belts provided. Refer to the "SEAT BELTS" in "FOR SAFE DRIVING" section for instructions on proper use of the seat belts.

Don't Make Sharp Turns

As mentioned before, small multipurpose vehicles have specific design characteristics that allow them to perform in a wide variety of applications. These characteristics also change the cornering behavior relative to conventional passenger cars. Remember, small multipurpose vehicles have more responsive steering and a higher center of gravity than conventional passenger cars. If at all possible, avoid making sharp turns in your vehicle.

Slow Down on Curves

Learn to approach curves cautiously and at a conservative speed. Do not attempt to take curves at the same speeds that you would in a vehicle with a lower center of gravity. Just as you would not drive a sports car on a trail, you should not attempt to drive your vehicle around curves like a sports car.

ADVICE FOR YOUR DRIVING

Start Driving after Carefully Checking the Surrounding Circumstances

Be sure to always fully check the safety of the surrounding circumstances before beginning to drive.

69RHS17

A CAUTION

You cannot check the safety of the surrounding circumstances enough only by the 360 view camera, the rear parking sensors and the inside mirror. When moving the vehicle forward or backward, check the safety of the surrounding circumstances by directly checking with your eyes.

Do not Race the Engine, and Do not Avoid Fast Starts and Rapid Acceleration Just after Engine Start

Refer to "Avoid Fast Starts, Rapid Acceleration and Hard Braking" and "Do not Race the Engine" in the "Improving Fuel Economy" section.

Do not Concentrate on a Mobile Phone or Navigation System

55T06004

WARNING

- Do not operate a mobile phone, etc. while driving. Being distracted by phone operation could lead to an accident.
- Do not operate navigation/audio equipment, etc. while driving. Otherwise, there is the danger of an accident due to being distracted.

Do not Reach Through the Steering Wheel

WARNING

Reaching through the steering wheel could interfere with steering wheel operation and result in an accident.

Do not Drive with Your Foot on the **Brake Pedal**

A CAUTION

Driving with your foot resting on the brake pedal could cause brake parts to become worn out more quickly than normal or cause brake components to overheat, making them less effective.

When Depressing the Accelerator Pedal and the Brake Pedal Simultaneously

NOTE:

If you depress both the accelerator pedal and the brake pedal simultaneously while driving, the engine power output may be suppressed.

Do not Shift the Gearshift Lever into "N" (Neutral) while Driving

69RHS180

A CAUTION

Do not put the gearshift lever into the "N" (Neutral) position while driving, except in times of emergency, as this disengages engine braking, which could result in an accident.

ADVICE FOR YOUR DRIVING

What Should You Do in Case of Malfunction or Emergency?

· Warning light turns on

Stop immediately in a safe place and take corrective action.

For details, refer to "Warning Lights and Indicators" in the "QUICK GUIDE" section or "Warning and indicator messages" in the "INSTRUMENT CLUSTER".

You feel strong shock from under the floor

Immediately stop in a safe place and check whether there is brake fluid leakage or fuel leakage, and also check whether there is any abnormality in the exhaust pipe, etc. If any abnormality is found, consult with a Maruti Suzuki authorized workshop.

Sudden tyre puncture

Grasp the steering wheel firmly, carefully apply the brake, slowly reduce speed, and stop in a safe place.

You feel that the brake pedal is heavy to use

Via engine vacuum pressure, the vehicle utilizes a brake booster to reduce the force necessary for depressing the brake pedal. If this engine vacuum pressure decreases, you may feel as if the brakes require more force than usual to depress, but this is not abnormal. Depress the brake pedal as strongly as you need to.

Metallic screeching sound is heard from the brakes

Promptly consult with a Maruti Suzuki authorized workshop. The disk brake pads (Maruti Suzuki genuine parts) are designed to emit a creaking/screeching sound as a function to warn the wear, as they have almost reached usage limit and replacement timing.

▲ WARNING

The brakes could be losing their ability to function normally, which could result in an accident.

If you hear a metallic creaking/ screeching sound, do not continue driving.

Use Engine Brake on a Long Downhill Slope

Use engine braking(*) in tandem with regular braking when driving on a long downhill slope. Release the accelerator pedal and shift down according to vehicle speed.

Manual transmission vehicles

80T060010

For manual transmission vehicle, shift down to a lower gear one by one.

Automatic transmission vehicles

80T060020

For automatic transmission vehicle, turn off the overdrive (O/D) switch or shift the gearshift lever into "2" or "L".

*: Engine braking is a braking effect that occurs when you release your foot from the accelerator pedal while driving. The lower the gear, the greater the effect of engine braking becomes.

WARNING

Continuously depressing the brake pedal could cause the brakes to overheat, possibly rendering them ineffective.

When Side Wind Is Strong

At a tunnel exit, on a bridge, or when a large truck passes you, your vehicle might be blown slightly sideways by side wind. Do not panic. Firmly grasp the steering wheel, gradually reduce speed, and regain your intended course.

Drive Slowly on a Slippery Road Surface

59RN06030

Under wet road conditions you should drive at a lower speed than on dry roads due to possible slippage of tyres during braking. When driving on icy, snow-covered, or muddy roads, reduce your speed and avoid sudden acceleration, abrupt braking, or sharp steering movements. Use 4-wheel drive high range (4H) for better traction.

NOTICE

Never operate your vehicle in "4H" or "4L" on dry pavement and, as much as possible, avoid using "4H" or "4L" on wet pavement, as this puts severe stress on the drive train, especially during tight cornering, and can damage it. Also, you may have some difficulty in steering.

Do not Drive on Puddles at High Speed

69RHS182

A CAUTION

When driving on puddles or on wet road surfaces at high speed, a thin surface of water is built between the wheels and the road surface, and the wheels may float. This is called as hydroplaning, which leads to a loss of control in the steering wheel and the brakes and possibly results in an accident.

Check Brake Effectiveness after Driving on Puddles or Washing a Vehicle

72,120360

- After verifying the safety of the surroundings, depress the brake pedal several times at low speed and check the brake effectiveness.
- If the brake effectiveness is still poor, depress the brake pedal at low speed gently and repeatedly until the brake effectiveness is fully recovered, to dry the brake equipment.

Do not Drive Through Deep or Rushing water

61M0075

Driving in deep or rushing water can be hazardous. You could lose control of the vehicle and the occupants could drown. Also, your vehicle could be seriously damaged. To avoid these risks, observe the following instructions and precautions.

 Do not drive through deep or rushing water. Deep or rushing water, such as fast-moving streams or floodwaters, could carry your vehicle away from your intended path. The water is too deep if it covers your wheel hubs, axles, or exhaust tailpipe. Know the depth of the water before you attempt to drive through it. If the vehicle goes across the river unavoidably, follow the instructions below before going across the river.

- 1) Confirm the depth of the river and the terrain.
- Select the place which is less than 30cm in depth of water. Go across the river to a right angle for the river or lower part of the river
- Drive slowly at less than 5 km/h not to raise the wave and go across the river immediately to avoid operating the gearshift lever.

If the vehicle goes across the river that is more than 30 cm in depth of water unavoidably, stop the vehicle in a safe place while checking the brake effectiveness. Then, ask your Maruti Suzuki authorized workshop to check the following inspection items.

- Function of brake
- Function of electrical components
- Changes of oil level and quality for engine, transmission and differential. In case that the oil is turbid whitely, water has been mixed in the oil and an oil change is required.
- Lubricant condition of the bearings, suspension joints, etc.
- If water blocks the tailpipe, the engine may not start or run. If the water is deep enough to get drawn into the engine intake system, the engine will be badly damaged.

- Submerged brakes will have poor braking performance. Drive slowly and carefully. Driving slowly will also help avoid water splashing onto the ignition system, which could cause the engine to stall.
- Even when driving through shallow or still waters, drive carefully since the water may be hiding ground hazards such as holes, ditches, or bumps.

WARNING

In addition to following the driving tips in this section, it is important to observe the following precautions for on-road and off-road driving.

- Driver and passengers should wear seat belts at all times.
- Do not let anyone else drive your vehicle unless they are also aware of the vehicle characteristics and handling differences described in this section.
- Avoid loaning your vehicle to anyone unless you accompany them.
- Make sure your tyres are in good condition and always maintain the specified tyre pressure. Refer to "Tyres" in the "INSPECTION AND MAINTENANCE" section for details.

(Continued)

WARNING

(Continued)

- Do not use tyres other than those specified by Maruti Suzuki. Never use different sizes or types of tyres on the front and rear wheels. For information regarding the specified tyres, refer to the "SPECIFICA-TIONS" section.
- Never use oversized tyres or special shock absorbers and springs to raise (jack up) your vehicle. This will raise the center of gravity of the vehicle and change its handling characteristics.
- After driving through water, mud, or sandy ground, test the brakes while driving at a slow speed to see if they have maintained their normal effectiveness. If the brakes are less effective than normal, dry them by repeatedly applying the brakes while driving slowly until the brakes have regained their normal effectiveness.
- After extended operation in mud, sand, or water, have the brakes, bearings and joint parts etc. Ask your Maruti Suzuki authorized workshop for inspection as soon as possible.

Highway Driving

When driving at highway speeds, pay attention to the following:

- Stopping distance progressively increases with vehicle speed. Apply the brakes far enough ahead of the stopping point to allow for the extra stopping distance.
- On rainy days, hydroplaning can occur. Hydroplaning is the loss of direct contact between the road surface and the vehicle's tyres due to a water film forming between them. Steering or braking the vehicle during hydroplaning can be very difficult, and loss of control can occur. Keep speed down when the road surface is wet.
- At high speeds, the vehicle may be affected by side winds. Therefore, reduce speed and be prepared for unexpected buffeting, which can occur at the exits of tunnels, when passing by a cut of a hill, or when being overtaken by large vehicles, etc.

Driving on Hills

Manual transmission vehicles

80T060010

Automatic transmission vehicles

80T060020

- When driving on steep hills, the vehicle may begin to slow down and show a lack of power. If this happens, you should shift to a lower gear so that the engine will again be operating in its higher power range. Shift rapidly to prevent the vehicle from losing momentum.
- When driving down a hill, the engine should be used for braking by shifting to the next lower gear.

WARNING

Do not hold the brake pedal down too long or too often while going down a steep or long hill. This could cause the brakes to overheat, resulting in reduced braking efficiency. Failure to take this precaution could result in loss of vehicle control.

NOTICE

When descending a downhill, Never turn the ignition key to "LOCK" position or press the engine switch to change the ignition mode to LOCK (OFF). Emission control system and automatic transmission damage may result.

Off-road Driving

Your vehicle has specific design characteristics for off-road driving. When you leave the paved road, you will encounter driving surfaces of all kinds which may change continually as you drive. In most cases, off-road driving requires the use of 4-wheel drive.

Use Caution on Steep Inclines

Always inspect hills before you attempt to drive up them. Know what is on the other side and how you will get back down. If you have any doubt that it is safe, do not attempt to drive over a hill. Never drive your vehicle up an extremely steep incline. Coming down a steep hill can be trickier than getting up one. Keep the vehicle heading straight down the hill and use low gear. Do not lock the brakes. If the vehicle begins to slide, accelerate slightly to regain steering control.

Do not Drive Across the Side of Hills

Driving across the side of a hill can be extremely hazardous. Most of the vehicle's weight will be transferred to the downhill tyres, which could result in the vehicle rolling sideways. Whenever possible, avoid this potential hazard. Also, if you have to exit your vehicle on a side-hill, always get out on the uphill side.

Wear Your Seat Belts at All Times

You and your passengers should use the seat belts at all times when driving off-road. For proper seat belt use, refer to the "Seat Belts" in "FOR SAFE DRIVING" section in this manual.

Avoid Sudden Reactions in Mud, Ice. or Snow

Be careful when off-road conditions are slippery. Reduce your speed and avoid sudden movements of the vehicle. Be aware that driving in deep snow or mud can cause a loss of traction and an increase in the resistance to the vehicle's forward motion. Use 4WD low gear (4L) and maintain a steady but moderate speed with a light touch on the steering wheel and brakes

ADVICE FOR YOUR DRIVING

Snow chains

Snow chains should only be used if they are needed to increase traction or are required by law. Check that the chains you use are the correct size for your vehicle's tyres.

Also check that there is enough clearance between the fenders and the chains as installed on the tyres.

Install the chains on the rear tyres tightly, according to the chain manufacturer's instructions. Retighten the chains after driving about 1.0 km if necessary. With the chains installed, drive slowly.

NOTICE

If you hear the chains hitting against the vehicle body while driving, stop and tighten them.

Do not Drive in the Field Covered with Grown Grass

69RHS181

Do not drive in the field covered with grown grass If you drive in the field covered with grass, it may cause accident or fire or vehicle damage by getting caught in grown grass.

WARNING

If loose grass, etc. becomes entangled in drive train parts or exhaust pipes, drive train components might become damaged or fire may result.

If Your Vehicle Gets Stuck

If your vehicle gets stuck in snow, mud, or sand, follow the directions below:

- Shift the transfer shift lever into the "4L" position.
 - Refer to "Transfer Lever" in "OPARAT-ING YOUR VEHICLE" section for details.
- 2) Shift the transmission back and forth between a forward range (or first gear for manual transmission) and reverse. This will create a rocking motion which may give you enough momentum to free the vehicle. Press gently on the accelerator to keep wheel spin to a minimum. Remove your foot from the accelerator while shifting.
 - Do not race the engine. Excessive wheel spin will cause the tyres to dig deeper, making it more difficult to free the vehicle.
- If your vehicle remains stuck after a few minutes of rocking, get another vehicle to pull you out.

▲ WARNING

Do not allow anyone to stand near the vehicle when you are rocking it, and do not spin the wheels faster than an indicated 40 km/h on the speedometer. Personal injury and/or vehicle damage may result from spinning the wheels too fast.

(Continued)

WARNING

(Continued)

55T060070

- In addition to following the driving tips in this section, it is important to observe the following precautions.
 - Check that your tyres are in good condition and always maintain the specified tyre pressure. Refer to "Tyres" in "INSPECTION AND MAINTENANCE" section for details.
 - Do not use tyres other than those specified by Maruti Suzuki. Never use different sizes or types of tyres on the front and rear wheels. For information regarding the specified tyres, refer to the tyre information label located on the driver's door lock pillar.

(Continued)

WARNING

(Continued)

- Never use oversized tyres or special shock absorbers and springs to raise (jack up) your vehicle. This will change the handling characteristics. Oversized tyres may also rub against the fender over bumps, causing vehicle damage or tyre failure.
- After driving through water, test the brakes while driving at a slow speed to see if they have maintained their normal effectiveness.
 If the brakes are less effective than normal, dry them by repeatedly applying the brakes while driving slowly until the brakes have regained their normal effectiveness.

NOTICE

- Release the accelerator pedal when operating the gearshift lever or the transfer lever. Operating the gearshift lever or the transfer lever with the engine racing can damage the gears and the free axle mechanism.
- Do not continue rocking the vehicle for more than a few minutes. Prolonged rocking can cause engine overheating, transmission, transfer case, axles, propeller shaft or differential damage, or tyre damage.

Improving Fuel Economy

NOTE:

Fuel economy (mileage) of the vehicle may vary due to several factors i.e. driving habits- gear change pattern, usage of A.C, Air pressure in the tyres, wind speed, traffic conditions, fuel quality-non adulterated standard fuel, maintenance of vehicle, road conditions, braking etc.

The following instructions will help you improve fuel economy.

Keep Tyre Pressures Correct

Under-inflation of the tyres can waste fuel due to increased running resistance of the tyres. Keep your tyres inflated to the correct pressure shown on the label on the driver's side door or the driver's door lock pillar.

Keep Weight to a Minimum

The heavier the load is, the more fuel the vehicle consumes. Unload any unnecessary luggage or cargo.

Avoid Excessive idling

If you park your vehicle for more than one minute, stop the engine and start it again later. When warming up a cold engine, do not allow the engine to idle or apply full throttle until the engine has reached operating temperature. Allow the engine to warm up by driving.

ADVICE FOR YOUR DRIVING

Avoid Fast Starts, Rapid Acceleration and Hard Braking

Avoid fast starts

Fast starts away from lights or stop signs will consume fuel unnecessarily and shorten engine life. Start off slowly.

Avoid unnecessary stops

Avoid unnecessary deceleration and stopping. Try to maintain a moderate, steady speed whenever possible. Slowing down and then accelerating again uses more fuel.

Keep a steady cruising speed

Drive at a constant speed that road and traffic conditions will permit.

Do not Race the Engine

69RHS060

Revving the engine only consumes extra fuel and has no benefit.

NOTICE

Immediately after starting, the engine is often not yet fully warmed up. Therefore, revving the engine, starting to drive suddenly, or rapid acceleration can cause engine failure.

Drive with an Appropriate Gear for **Vehicle Speed**

Running the vehicle at a high engine rotation speed by using a low-speed gear will result in poor fuel economy. Use the correct gear according to the vehicle speed.

Keep the Air Cleaner Clean

59RN06050

If the air cleaner is clogged with dust, there will be greater intake resistance, resulting in decreased power output and increased fuel consumption.

Precaution for Handling Vehicle

Do not Apply Strong Force to Exterior Parts

NOTICE

Do not apply strong force to the body panel, front and rear bumper, side sill splash guards, etc. These forces can cause damage to these exterior parts.

Be Careful of Uneven Road Surface

NOTICE

In the following cases, the bumper or the lower part of the vehicle could get damaged. Ensure proper care.

- Entering the areas where there is uneven road surface, such as road shoulder
- Driving on roads with grooves, bumps or potholes

Do not Modify Your Vehicle Illegally

69RHS184

WARNING

 If you modify your vehicle illegally, there is a danger of a fire or an accident. Illegal modifications might adversely affect handling, performance or durability. Also, this could even violate laws and ordinances.

Do not install unsuitable parts to your vehicle or do not make your own adjustments or wiring.

(Continued)

▲ WARNING

(Continued)

 Do not use wheels or wheel nuts other than specified Maruti Suzuki genuine products. Doing so could lead to accidents, such as nuts loosening and the wheel coming off while driving. Also, fuel consumption and driving stability could worsen, or it could result in other malfunctions.

NOTICE

When installing or removing electrical equipment such as radio equipment, navigation, audio equipment or electronic toll control equipment, consult with a Maruti Suzuki authorized workshop. Also, do not operate electrical equipment directly from the battery terminals or connect ground wires directly. Otherwise, there is a danger of hindering the functioning of electronic components, causing fire, malfunction, battery runout, etc.

(Continued)

NOTICE

(Continued)

 Only a troubleshooting device designed for inspection and maintenance for this model can be connected to the vehicle's onboard diagnostics system. Connecting a device other than that specified could hinder the functioning of electronic components and cause battery runout, etc.

When Installing, Removing and Repairing Parts

WARNING

The SRS airbag system and the seat belt pretensioner system could activate unexpectedly or could be rendered ineffective if the parts that affect their functions are adjusted or arranged. In the following cases, these systems will be adversely affected. Consult with a Maruti Suzuki authorized workshop beforehand.

- When removing the steering wheel and conducting repairs around the steering wheel, etc.
- When conducting repairs around the center console, around the instrument cluster, under the front seats or to electrical wiring
- When installing audio equipment, etc.
- When conducting sheet metal painting or repairs around the dashboard
- When replacing the front seats or conducting repairs around the seats
- Repairs around the front pillar, the back pillar or the roof side
- When conducting repairs around the center pillar

Be Careful When Placing Accessories

69RHS185

WARNING

Do not attach accessories to the window glasses. Accessories and suction cups could hinder vision, or a suction cup could act as a lens and cause a fire. Also, if an airbag is activated, such accessories could be ejected outward within the vehicle, possibly resulting in injury.

When Spilling Drinks or Liquids

WARNING

Do not allow liquids to spill, splash or spray inside the vehicle. The following items could malfunction, or fire could result. In the case of spilling drinks, etc., promptly consult with a Maruti Suzuki authorized workshop.

- SRS airbag system
- Audio equipment
- Electrical parts such as switches and wiring
- Movable parts such as the gearshift lever or seat belt buckles

NOTICE

The sensor of the seat belt reminder is built into the front passenger's seat cushion.

If you spill liquid such as soft drinks or juice, the sensor of the seat belt reminder may be damaged.

If you spill any liquid on the seat cushion, immediately wipe it with a soft cloth.

When Replacing Engine Oil Replace engine oil regularly

54M3143

- If the vehicle is normally used, replace the engine oil and filter every 15,000 km or every 12 months, whichever is earlier.
- When the vehicle is used under severe driving conditions, the engine oil and filter replacement is required earlier than the case that the vehicle is normally used.

NOTICE

Observe the periods designed for the engine oil and filter replacement. Degraded oil or clogged filters can cause engine malfunction or abnormal noise. For replacement, consult with a Maruti Suzuki authorized workshop.

Specification and viscosity of engine oil As performance factors such as fuel consumption depend on the engine oil used, use oil that satisfies the specifications in the following Table 1 and Table 2. Using Maruti Suzuki genuine oil is recommended.

Table 1

Specif	Oil quality	
API(*1)	ILSAC(*2)	
SP	GF-6	
SN	_	
SM	_	
SL	_	

Table 2

For India

Specification	All vehicles
Viscosity: SAE(*3)	0W-16

Except for India

Specification	All vehicles
Viscosity: SAE(*3)	0W-16, 0W-20, 5W-30, 10W-30, 10W-40, 15W-40, 20W-40

- *1: The API standard is determined by the American Petroleum Institute and represents the quality grade of engine oil.
- *2: The ILSAC standard is an engine oil standard for automobiles, established by the International Lubricant Specification Advisory Committee, and is based on the API standard while indicating even higher performance specifications such as for fuel conservation and durability.
- *3: SAE viscosity is a standard that determines the viscosity of lubricating oil. The number on the left side (the number with a "W") means the viscosity at low temperature. The smaller this figure is, the stronger the oil resistance to coldness is and the better the engine start capability is. The number on the right side means the viscosity at high temperature. The larger this figure is, the stronger the oil resistance to heat is and the better the engine protection performance is.

Running-in

NOTICE

The future performance and reliability of the engine depends on the care and restraint exercised during its early life. It is especially important to observe the following precautions during the first 960 km of vehicle operation.

- After starting, do not race the engine. Warm it up gradually.
- Avoid prolonged vehicle operation at a constant speed. Moving parts will break in better if you vary your speed.
- · Start off from a stop slowly. Avoid full throttle starts.
- Avoid hard braking, especially during the first 320 km of driving.
- · Do not drive slowly with the transmission in a high gear.
- Drive the vehicle at moderate engine speeds.
- Do not tow a trailer during the first 960 km of vehicle operation.

Catalytic Converter

80G106

The purpose of the catalytic converter is to minimize the amount of harmful pollutants in your vehicle's exhaust. Use of leaded fuel in vehicles equipped with catalytic converters is prohibited, because lead deactivates the pollutant-reducing components of the catalyst system.

The converter is designed to last the life of the vehicle under normal usage and when unleaded fuel is used. No special maintenance is required on the converter. However, it is very important to keep the engine properly tuned. Engine misfiring, which can result from an improperly tuned engine, may cause overheating of the catalytic converter. This may result in permanent heat damage to the catalytic converter and other vehicle components.

NOTICE

To minimize the possibility of catalytic converter or other vehicle damage:

- Maintain the engine in the proper operating condition.
- In the event of an engine malfunction, particularly one involving engine misfire or other apparent loss of performance, have the vehicle serviced promptly.
- Do not turn off the engine or interrupt the ignition when the transmission is in gear and the vehicle is in motion.
- Do not try to start the engine by pushing or towing the vehicle, or coasting down a hill.
- Do not idle the engine with any spark plug wires disconnected or removed, such as during diagnostic testing.
- Do not idle the vehicle for prolonged periods if idling seems rough or there are other malfunctions.
- Do not allow the fuel tank to get near the empty level.

59RN06060

▲ WARNING

Be careful where you park and drive; the catalytic converter and other exhaust components can get very hot. As with any vehicle, do not park or operate this vehicle in areas where combustible materials such as dry grass or leaves can come in contact with a hot exhaust system.

Fuel Filler Opening

Make sure to read "Refueling" in this section.

WARNING

Be sure to observe the following points when refueling. Otherwise, gasoline may catch a fire from fuel and it may cause a fire.

- Always stop the engine first.
- Close all the doors and windows when refueling.
- As gasoline is highly flammable, open sparks such as lit cigarettes are strictly prohibited.

Fuel Filler Door

80T070270

A fuel filler cap is located on the right rear side of the vehicle. The fuel filler door can be unlocked by pulling up the opener lever located on the outboard lower side of the driver's seat and locked by simply closing the door.

Fuel Filler Cap

57L51093

- · To open the fuel filler cap, turn it counterclockwise.
- · To close the fuel filler cap, turn it clockwise until you hear more than 2 clicks.

80T070410

NOTE:

The cap holder (1) holds the fuel filler cap (2) by hooking the groove (3) when refueling.

WARNING

- If you open the fuel filler cap suddenly, fuel may be under pressure and may spray out. Loosen the fuel filler cap slowly. After air deflating sound stops, open the fuel filler cap.
- If fuel spills out, an accident such as a fire may occur. Also, if you leave spilled fuel as it is, it may cause paint staining, discoloration or cracking. Be careful not to spill out fuel. If you spill it out, wipe it off with a soft cloth.
- If the fuel filler cap is not closed securely, it may cause fuel leakage or a fire. After refueling, close the fuel filler cap until you hear more than 2 clicks.
- If you use the fuel cap other than a genuine Maruti Suzuki cap, it may cause fuel leakage. Do not use the fuel cap other than a genuine Maruti Suzuki cap.

Refueling

Watch Out for Fire

69RHS186

WARNING

Be sure to observe the following points when refueling. Otherwise, gasoline may catch a fire from fuel and it may cause a fire.

- Always stop the engine first.
- Close all the doors and windows when refueling.
- As gasoline is highly flammable, open sparks such as lit cigarettes are strictly prohibited.

When Refueling at a Self-service Gas Station

WARNING

When refueling at a self-service gas station, be sure to observe the following points.

- If substantial static electricity is accumulated within your body, a spark could ignite fuel vapors and possibly cause burns. Before opening the fuel filler cap, discharge any static electricity* that might have accumulated in your body, by touching a metal part of the vehicle body or the gas pump machine. In addition, do not re-enter the vehicle while refueling, as static electricity could be charged to your body again.
- Do not allow others who have not discharged their static electricity to come close to the fuel filler opening.
 - *Take special care when air is dry, as this can cause your body to become charged with static electricity more easily. In addition, wearing layers of clothing can generate static electricity due to the friction of the fibers.

(Continued)

WARNING

(Continued)

- If you open the fuel filler cap suddenly, fuel may be under pressure and may spray out. Loosen the fuel filler cap slowly. After air deflating sound stops, open the fuel filler cap.
- If you do not insert the fuel filler nozzle securely into the fuel filler opening, fuel may spill out. Insert the fuel filler nozzle securely into the fuel filler opening until it stops.
- Pull the gas pump filler nozzle lever until it stops.

(Continued)

WARNING

(Continued)

69RHS070

- If you continue to refuel after the automatic stop to top up the tank, fuel could overflow. When the automatic stop function of gas pump filler nozzle is activated, stop refueling.
 - *Depending on the type of gas pump machine being used, the automatic stop function could activate early and refueling might not be possible. Please follow the instructions of the employees at the gas station.

(Continued)

WARNING

(Continued)

- If fuel spills out, an accident such as a fire may occur. Also, if you leave spilled fuel as it is, it may cause paint staining, discoloration or cracking. Be careful not to spill out fuel. If you spill it out, wipe it off with a soft cloth.
- If the fuel filler cap is not closed securely, it may cause fuel leakage or a fire. After refueling, return the fuel filler nozzle to its original position and close the fuel filler cap until you hear more than 2 clicks.
- Fuel contains substances harmful to the human body. Do not breathe in vaporized fuel.
- In addition, be sure to observe all the warnings posted at the gas station.

Use Unleaded Gasoline Only

NOTICE

Using leaded gasoline, low-quality gasoline or other types of fuel (such as alcohol and diesel oil) can cause harmful effects to the engine and fuel delivery system.

Do not use fuel other than unleaded gasoline.

Hood

WARNING

- As the hood is heavy, if a child tries to open or close it, the child may get injured. Do not allow a child to open or close the hood.
- As the engine compartment becomes hot, it may cause burns.
 When opening the hood, do not allow a child to come close to the hood.
- If you leave any tool or cloth in the engine compartment, it may cause a malfunction. Also, as the engine compartment becomes hot, it may result in vehicle fire. Do not leave any tool or cloth for inspection or cleaning in the engine compartment.

A CAUTION

If you come close to a running drive belt or a cooling fan (radiator fan), hands, hair, clothing, etc. may be caught and you may get injured. When the engine is running, keep away from the drive belt or the cooling fan (radiator fan).

Opening the Hood

77R50040

 Pull up the hood release lever (1) located under the driver's side instrument panel in the outboard position. This will disengage the hood lock halfway.

2) Push the under-hood release lever (2) sideways with your finger, as shown in the illustration. While pushing the lever. lift up the hood.

A CAUTION

The under-hood release lever can be hot enough to burn your finger while the engine is running or right after the engine stopped.

If you try to open the hood while the engine is running or right after the engine stopped, touch the underhood release lever after it becomes cool enough.

NOTICE

If you lift up the hood with the wiper arms raised, the wiper arms and the hood may get damaged.

Do not lift up the hood with the wiper arms raised.

80T070040

3) While holding the hood, pull the prop rod (3) out from the holding clip (4), and then insert the end of the rod into the designated hole (5).

A CAUTION

- The prop rod can be hot enough to burn your finger while the engine is running or right after the engine stopped. If you would like to use the prop rod while the engine is running or right after the engine stopped, touch the prop rod after it becomes cool enough.
- If the prop rod slips out, you may get caught in the closing hood. Insert the end of the prop rod into the hole securely.
- The prop rod may slip out when the hood is blown by wind. If this occurs, you may get caught in the closing hood. Be very careful when you open the hood on a windy day.

NOTF.

When you pull out the prop rod from the holding clip, hold the **x** part.

Closing the Hood

80T070050

- Lift up the hood slightly and remove the prop rod from the hole. Put the prop rod back into the holding clip.
- Lower the hood to about 20 cm above the hood latch, and then let it drop down. Check that the hood is securely latched after closing.

WARNING

If the hood is not fully closed, it can fly up unexpectedly during driving, obstructing your view and resulting in an accident. Check that the hood is fully closed and latched before driving.

A CAUTION

When closing the hood, the occupant's body such as hands may get caught in the hood and get injured. Also, pushing on the hood from the top may damage it.

When closing the hood, check that no part of the occupant's body such as hands is in the path of the hood.

NOTICE

Pushing on the hood from the top may damage it.

Sun Visor

79,1161

The sun visors can be pulled down to block glare coming through the windshield, or they can be unhooked and turned to the side to block glare coming through the side window.

NOTICE

When unhooking and hooking a sun visor, handle it by the hard plastic parts or the sun visor can be damaged.

Card Holder

78RB05008

- (1) Mirror cover
- (2) Card holder

You can put a card in the card holder (2) on the back of the sun visor.

NOTICE

If you park your vehicle outdoors in direct sunlight in hot weather, the inside of the vehicle will become hot. The heat may distort or crack a card. When you park your vehicle outdoors in direct sunlight or in hot weather, do not leave plastic cards in the card holder.

Vanity Mirror

78RB05009

(3) Vanity mirror

To use the vanity mirror (3) on the back of the sun visor, pull up the mirror cover (1).

WARNING

- · If you use the vanity mirror while driving, you may lost control of the vehicle, resulting in an accident. Do not use the vanity mirror while drivina.
- · Do not place any object on the location where an airbag is stored or come close to the location where airbag is stored, when using a vanity mirror. Doing so may cause the airbag to deploy and cause serious injury due to the impact of airbag.

Interior Light

NOTICE

If you turn on the interior light for a long time with the engine stopped, the lead-acid battery may discharge. Do not turn on the interior light for a long time with the engine stopped.

Front

55T070010

This light switch has three positions which function as described below:

ON (1)

The light comes on and stays on regardless of whether the door is open or closed.

NOTE:

The light will automatically be turned off to prevent the lead-acid battery from discharging when the following conditions are simultaneously met:

- The ignition switch is in "LOCK" position or the ignition mode is LOCK (OFF).
- The hazard warning lights, the position lights and the headlights are off.
- 15 minutes passed after the light is turned on.

DOOR (2)

The light comes on when the door is opened. After closing all doors, the light will remain on for about 15 seconds and then fade out. If you insert the key, or press the engine switch to change the ignition mode to ACC or ON during this time, the light will start to fade out immediately. After removing the key from the ignition switch or press the engine switch to change the ignition mode to LOCK (OFF), the light will turn on for about 15 seconds and then fade out.

NOTE:

The light will automatically be turned off to prevent the lead-acid battery from discharging when the following conditions are simultaneously met:

- The ignition switch is in "LOCK" position or the ignition mode is LOCK (OFF).
- About 15 minutes passed after the light is turned on.

OFF (3)

The light remains off even when the door is opened.

Center

80T070400

This light switch has three positions which function as described below:

ON (1)

The light comes on and stays on regardless of whether the door is open or closed.

NOTE:

If your vehicle is equipped with the keyless push start system or the keyless entry system, the light will automatically be turned off to prevent the lead-acid battery from discharging when the following conditions are simultaneously met:

The ignition switch is in the "LOCK" position, or the ignition mode is LOCK (OFF).

- The hazard warning lights, the position lights and the headlights are off.
- After 15 minutes of the light on.

DOOR (2)

- The light comes on when the door is opened. After closing all doors, the light will remain on for 15 seconds and then fade out. If you insert the key, or press the engine switch to change the ignition mode to ACC or ON during this time, the light will start to fade out immediately. After removing the key from the ignition switch or press the engine switch to change the ignition mode to "LOCK" (OFF), the light will turn on for 15 seconds and then fade out.
- When the ignition switch is in LOCK position, or the ignition mode is LOCK (OFF), to prevent the lead-acid battery from discharging, the light will automatically be turned off when a period of 15 minutes has elapsed after any of the doors (including the tailgate) is opened and other operations are not done.

OFF (3)

The light remains off even when the door is opened.

Luggage Compartment Light

68PM00510

When you open the tailgate with the luggage compartment light switch in the "ON" position (1), the light comes on for about 15 minutes.

When the luggage compartment light switch is in the "OFF" position (2), the light remains off regardless of whether the tail-gate is open or close.

80T070290

NOTE:

The number of doors involved in the lighting operation of the interior light depends on the vehicle specification. If there is a switch (rubber protrusion) at the door opening as shown, the door is involved in the lighting operation. The tailgate is also involved in this operation even without the rubber protrusion.

Accessory Socket Center Console

77R50140

Luggage Compartment

80T070250

The accessory socket will work when the ignition switch is in "ACC" or "ON" position or the engine switch is in ACC or ON mode.

This socket can be used to provide 12 volt/ 120 watt/10 ampere power for electrical accessories. Check that the rubber cap remains on the socket when the socket is not in use.

When using the accessory socket, open the rubber cap (1).

▲ WARNING

When the accessory socket is not in use, closed the rubber cap. If any foreign material enters the accessory socket, it may cause a malfunction or short circuit.

NOTICE

- To prevent the fuse from being blown, when using sockets at the same time, do not exceed the total combined power capacity of 12 volt/120 watt/10 ampere.
- Use of inappropriate electrical accessories can cause damage to your vehicle's electrical system. Check that any electrical accessories you use are designed to plug into this type of socket.

(Continued)

NOTICE

(Continued)

- Check that the cap remains on the socket when the socket is not in use.
- When the ignition switch is in "LOCK" position or the ignition mode to LOCK (OFF) during using the accessory socket, the following accidents may occur;
 - the audio or navigation system does not turn off.
 - the keyless entry system does not work, etc.

If they occur, disconnect the item from the accessory socket and check whether the electrical equipments work properly.

If the problem persists, ask your Maruti Suzuki authorized workshop for inspection.

Drink Holder

80T070260

Use the drink holder to put a cup with a lid or a bottle with a cap. Also, you can put small articles in the drink holder.

WARNING

Failure to take the precautions listed below could cause personal injury or vehicle damage.

- Be careful when you are using the cup holders to hold a cup containing hot liquid. Spilling out hot liquid can cause burn injury.
- Do not use the cup holders to hold sharp-edged, hard or breakable objects. Objects in the cup holders may be thrown about during a sudden stop or impact, and could cause personal injury.
- Be careful not to spill liquid or insert any foreign materials into the moving part of the gearshift lever, or any electrical components. Liquid or foreign materials may damage these parts.
- If you spill, or drop liquid accidentally, have your vehicle inspected by a Maruti Suzuki authorized workshop.

NOTE:

- If you place the keyless remote controller in a drink holder or a bottle holder, it may not be detected.
- If you spill or drop liquid accidentally, have your vehicle inspected by a Maruti Suzuki authorized workshop.

Storage Area

80T070080

- (1) Glove box
- (2) Floor console tray

Each item in the figure is a typical example; the actual equipment depends on the vehicle type.

WARNING

- If any object gets caught in the brake pedal or the accelerator pedal, you may not operate the pedal properly, resulting in an accident. If you use a storage area without a lid, do not place the object which may fall out while driving.
- If there is any object within the area where the front passenger's airbag could inflate, the object may be thrown out or the front passenger's airbag may not inflate properly. Do not place a big object on the instrument panel tray.

A CAUTION

If you use a storage area with a lid, do not drive the vehicle with the lid open. In acceleration, a sudden braking or an collision, your body may be hit by the lid or the object which falls out from the storage area.

NOTE:

If you place the keyless remote controller in any of storage areas, it may not be detected.

Using Storage Area with a Lid Glove box

80T070090

- To open the glove box, pull the latch lever (1).
- To close it, push the lid until it is latched securely.

WARNING

- Never drive with the glove box lid open. It could cause injury if an accident occurs.
- Do not leave cigarette lighters or spray cans in the glove box. If a cigarette lighter or spray can is in a place such as the glove box, it may light accidentally when luggage is loaded, causing a fire.

Assist Grips

801070110

Assist grips are provided for convenience.

NOTICE

To avoid damaging the assist grip and the molded headlining, do not hang down the assist grip.

Ride-in Assist Grip

77R50220

Ride-in assist grip (1) provides solid support for the front passenger when entering or exiting the vehicle.

WARNING

- Do not put any objects between the passenger side of the dashboard and the ride-in assist grip. When the passenger's airbag is inflated, objects may be flown toward the passenger and may cause serious injury.
- Front passenger should not grip the ride-in assist grip while seating. In this situation, the passenger would be too close to the inflating airbag, and may suffer severe injury.

Footrest (if equipped)

77R50160

Use the footrest as a support for your left foot only.

Door Pocket

80T070130

This pocket is provided for holding light and soft things such as gloves, newspapers or magazines.

A CAUTION

- If an accident occurs, objects such as bottles, cans, etc. in the door pocket can injure the occupants.
 Do not put hard or breakable objects in the door pocket.
- If you grab and pull the door pocket, it may be broken, resulting in personal injury. When closing a door, do not grab and pull the door pocket.

NOTE:

If you place the keyless remote controller in a door pocket, it may not be detected.

USB Socket

80T070060

Open the cover, and then connect your portable digital music player, etc. to this socket to enjoy music through the vehicle's audio system. Refer to the supplementary manual for details.

WARNING

If foreign material enters the USB socket, a malfunction or a short circuit may occur.

Always close the cover when the USB socket is not in use.

Seatback Pocket

80T070230

This pocket is provided for holding light and soft things such as gloves, newspapers or magazines.

A CAUTION

- If an accident occurs, objects such as bottles, cans, etc. can injure the occupants in the rear seat. Do not put hard or breakable objects in the pocket.
- If you put sharp or heavy objects in the pocket, the seat may be damaged. Do not put sharp or heavy objects in the pocket.

Frame Hooks

It is not recommended that you use the frame hooks for towing another vehicle. They were originally designed to tow your vehicle in emergency situation.

If your vehicle needs to be towed in an emergency, refer to "Towing your vehicle" in "EMERGENCY SERVICE" section.

WARNING

Observe the following instructions when using frame hooks. The frame hook or vehicle body may break and cause serious injury or damage:

- Do not use the frame hooks for towing another vehicle.
- Avoid pulling the vehicle to get out of severe snowy, muddy or sandy conditions, sudden starts or erratic driving maneuvers which could cause excessive stress on the frame hook.

In such case, we recommend that you contact a professional service.

Front

78RB05023

NOTICE

When you use the frame hook (1), avoid the driving that gives significant physical shock on hook. Such operation can damage the hook, or the vehicle body. Do not sudden accelerate.

The hook (A) is provided for trailer or train transport purposes only.

NOTICE

Do not use the hook (A) in emergency situation. If you use this hook (A), the hook or the vehicle may be damaged.

Rear

78RB05024

NOTICE

When you use the frame hook (2), avoid the driving that gives significant physical shock on hook. Such operation can damage the hook, the vehicle body or the drive system.

- Do not sudden accelerate.
- Do not tow the vehicle heavier than your vehicle.

Heating and Air Conditioning System

There are two types of heating and air conditioning systems as follows:

- Manual heating and air conditioning system
- Automatic heating and air conditioning system (climate control)

Air Outlet

80T070150

- (1) Windshield defroster outlet
- (2) Side defroster outlet
- (3) Side outlet
- (4) Center outlet
- (5) Floor outlet

Center outlet

78RB05027

Move the knob (1) vertically or horizontally, to adjust the direction of airflow as desired.

Side outlet

78RB05026

When open, air comes out regardless of the air flow selector position.

A CAUTION

Prolonged exposure to hot air from the heater or air conditioner could result in low temperature burns. All vehicle occupants, particularly children, the elderly, those with special needs, individuals with delicate skin, and sleeping individuals, should maintain sufficient distance from the air outlets to prevent prolonged exposure to hot airflow.

Manual Heating and Air Conditioning System

Description of Controls

80T070390

- (1) Temperature selector
- (2) Blower speed selector
- (3) Air intake selector
- (4) Air flow selector
- (5) Air conditioning switch

Temperature selector (1)

This is used to adjust the temperature.

Blower speed selector (2)
This is used to turn on the blower and to select blower speed.

Air intake selector (3)

78RM50020

This selector is used to select the following modes.

FRESH AIR (a)

When this mode is selected by moving the lever to the position of (a) in the above illustration, outside air comes in.

RECIRCULATED AIR (b)

When this mode is selected by moving the lever to the position of (b) in the above illustration, inside air is recirculated. This mode is suitable when driving through dusty or polluted air such as in a tunnel, or when attempting to quickly cool down or warm up the interior or to reduce unwanted odor from entering the vehicle.

NOTE:

If you select RECIRCULATED AIR for an extended period of time, the air in the vehicle may become contaminated.

Therefore, you should occasionally select FRESH AIR.

52RS50180

NOTE:

The mark of "USE WITH" (6)

To clear fog on the windshield and/or the side windows quickly, set the air flow selector (4) to "HEAT & DEFROST" or "DEFROST" and air intake selector (3) to "FRESH AIR". These positioning will clear the fogged windshield and/or the side windows faster than the "RECIRCULATED AIR".

Air flow selector (4)

52RM50250

This is used to select one of the following functions.

VENTILATION (c)

80T070160

Temperature-controlled air comes out of the center and side air outlets.

BI-LEVEL (d)

80T070170

Temperature-controlled air comes out of the floor outlets and cooler air comes out of the center and side outlets. When the temperature selector (1) is in the fully cold position or fully hot position, however, the air from the floor outlets and the air from the center and side outlets will be the same temperature.

HEAT (e)

80T070180

Temperature-controlled air comes out of the floor outlets and the side outlets, also comes out of the windshield defroster outlets and also comes slightly out of the side defroster outlets.

HEAT & DEFROST (f)

80T070190

Temperature-controlled air comes out of the floor outlets, the windshield defroster outlets, the side defroster outlets and the side outlets.

DEFROST (g)

80T070200

Temperature-controlled air comes out of the windshield defroster outlets, the side defroster outlets and the side outlets.

Air conditioning switch (5)

To turn on the air conditioning system, set the blower speed selector to a position other than off and push in "A/C" switch. With this "A/C" switch operation, a indicator light will come on when the air conditioning system is working. To turn off the air conditioning system, push "A/C" switch again.

During operation of the air conditioner, you may notice slight changes in engine speed. These changes are normal, the system is designed so that the compressor turns on or off to maintain the desired temperature.

Less operation of the compressor results in better fuel economy.

System Operating Instructions

Natural ventilation

Select VENTILATION and FRESH AIR, the temperature selector to the desired temperature position, and the blower speed selector to off. Fresh air will flow through the vehicle during driving.

Forced ventilation

The base settings are the same as for natural ventilation except you set the blower speed selector to a position other than off.

Normal heating (using outside air)

Select HEAT and FRESH AIR, the temperature selector to the desired temperature position and the blower speed selector to the desired blower speed position. Setting the blower speed selector to a higher blower speed position increases heating efficiency.

Quick heating (using recirculated air)

The base settings are the same as for normal heating except you select RECIRCU-LATED AIR. If you use this heating method for an extended period of time, the air in the vehicle may become contaminated and the windows can become misty. Therefore, use this method only for quick heating and change to the normal heating method as soon as possible.

Head cooled/Feet warmed heating

Select BI-LEVEL and FRESH AÏR, the temperature selector to the desired temperature position, and the blower speed selector to the desired blower speed position. Unless the temperature selector is in the fully cold position or fully hot position, the air that comes out of the center and side outlets will be cooler than the air that comes out of the floor outlets.

Normal cooling

Set the air flow selector to VENTILATION, the temperature selector to the desired temperature position and the blower speed selector to the desired blower speed position, and turn on "A/C" switch. Setting the blower speed selector to a higher blower speed position increases cooling efficiency.

You can switch the air intake selector to either FRESH AIR or RECIRCULATED AIR as you desire. Choosing RECIRCULATED AIR increases cooling efficiency.

Quick cooling (using recirculated air)

The base settings are the same as for normal cooling except you select RECIRCU-LATED AIR and the highest blower speed.

NOTE:

 If you select RECIRCULATED AIR for an extended period of time, the air in the vehicle can become contaminated and the windows tend to get misted. Therefore, you should select FRESH AIR whenever possible. If your vehicle has been left in the sun with the windows closed, it will cool faster if you open the windows briefly while you operate the air conditioner with the air intake selector at FRESH AIR and the blower at high speed.

Dehumidifying

Set the air flow selector to a desired air flow selector position, the temperature selector to the desired temperature position and the blower speed selector to the desired blower speed position. Also select FRESH AIR and turn on "A/C" switch.

NOTE:

Because the air conditioner dehumidifies the air, turning it on will help keep the windows clear, even when blowing heated air using DEFROST or HEAT & DEFROST functions.

80T070240

NOTE:

If you need maximum defrosting:

- select DEFROST and FRESH AIR.
- · set the blower speed selector to high.
- adjust the temperature selector to the hot end.
- · turn on "A/C" switch, and
- adjust the side outlets so the air blows on the side windows.

Models with ENG A-STOP System

- If the cooling and heating performance can no longer perform at a sufficient level due to automatically stopping engine, press the ENG A-STOP OFF switch to deactivate the ENG A-STOP system. (The engine will automatically restart and the air conditioning performance will be restored.)
- If the windshield and/or the driver's side/ passenger side door windows are fogged during the automatic engine stop, stop the ENG A-STOP system and restart the engine. Then, turn the air flow selector (4) to change the air flow to the HEAT & DEFROST or DEFROST position to defog the windows.

Maintenance

If you do not use the air conditioner for a long period, such as during winter, it may not give the best performance when you start using it again. To help maintain optimum performance and durability of your air conditioner, it needs to be run periodically. Operate the air conditioner at least once a month for one minute with the engine idling. This circulates the refrigerant and oil and helps protect the internal components.

If your air conditioner is equipped with air filters, clean or replace them as specified in "Maintenance schedule" in "INSPECTION AND MAINTENANCE" section.

(For models with air conditioner refrigerant R-134a)

NOTE:

Your vehicle uses the air conditioning refrigerant HFC-134a, commonly called R-134a. R-134a replaced R-12 around 1993 for automotive applications. Other refrigerants are available, including recycled R-12, but only R-134a should be used in your vehicle.

NOTICE

Using the wrong refrigerant may damage your air conditioning system. Use R-134a only. Do not mix or replace the R-134a with other refrigerants.

Automatic Heating and Air Conditioning System (climate control)

Description of Controls

- (1) Temperature selector
- (2) Blower speed selector
- (3) Air intake selector
- (4) Air flow selector
- (5) Defrost switch
- (6) Air conditioning switch
- (7) "OFF" switch
- (8) "AUTO" switch
- (9) Display

Temperature selector (1)

78RB05037

Turn the temperature selector (1) to adjust the temperature.

NOTE:

If you turn the temperature selector (1) until "HI" or "LO" appears on the display, the climate control system will operate at maximum heating or cooling. The temperature of the air from the outlets may change suddenly while "LO" or "HI" is displayed, but this is normal.

NOTE:

When you change the unit of temperature in the information display, the unit of temperature in the air conditioning system will be changed. Refer to "Information Display" in "INSTRUMENT CLUSTER" section for details.

Blower speed selector (2)

78RB05038

The blower speed selector (2) is used to turn on the blower and to select blower speed.

If "AUTO" switch (8) is pushed, the blower speed will vary automatically as the climate control system maintains the selected temperature.

Air intake selector (3)

78RB05039

Push the air intake selector (3) to change between the recirculated air and fresh air mode.

If "AUTO" switch (8) is pushed, the air intake will vary automatically as the climate control system maintains the selected temperature.

NOTE:

When the recirculated air mode is selected, the automatic operation system is deactivated even if you push "AUTO" switch (8).

RECIRCULATED AIR (a)

When this mode is selected, inside air is recirculated. This mode is suitable when driving through dusty or polluted air such as a tunnel, or when attempting to quickly cool down or warm up the interior or to reduce unwanted odor from entering the vehicle.

FRESH AIR (b)

When this mode is selected, outside air is introduced.

FRESH AIR and RECIRCULATED AIR are selected alternately each time the air intake selector is pushed.

NOTE:

If you select RECIRCULATED AIR for an extended period of time, the air in the vehicle may become contaminated.

Therefore, you should occasionally select FRESH AIR.

Air flow selector (4)

78RB05040

VENTILATION (c)

80T070160

BI-LEVEL (d)

80T070170

Push the air flow selector (4) to change among the following functions. The indication of the selected mode appears in the display.

If "AUTO" switch (8) is pushed, the air flow will vary automatically as the climate control system maintains the selected temperature.

Temperature-controlled air comes out of the center and side outlets.

Temperature-controlled air comes out of the floor outlets and cooler air comes out of the center and side outlets. When the temperature selector (1) is in the fully cold position or fully hot position, however, the air from the floor outlets and the air from the center and side outlets will be the same temperature.

HEAT (e)

80T070180

Temperature-controlled air comes out of the floor outlets and the side outlets, a small amount of air comes out of the windshield defroster outlets and also comes slightly out of the side defroster outlets.

HEAT & DEFROST (f)

80T070190

Temperature-controlled air comes out of the floor outlets, the windshield defroster outlets, the side defroster outlets and the side outlets.

Defrost switch (5)

78RB05045

Push the defrost switch (5) to turn on the defroster.

DEFROST

80T070200

Temperature-controlled air comes out of the windshield defroster outlets, the side defroster outlets and the side outlets.

NOTE:

When the defrost switch (5) is pushed to turn on the defroster, the air conditioning system will operate and FRESH AIR mode will be selected automatically. In very cold weather, however, the air conditioning system will not operate.

Air conditioning switch (6)

78RB05047

The air conditioning switch (6) is used to turn on and off the air conditioning system only when the blower is on. To turn on the air conditioning system, push in the switch and "A/C" will appear in the display. To turn off the air conditioning system, push in the switch again and "A/C" will go off.

System Operating Instructions

Automatic operation

78RB05048

You can let the climate control system work automatically. To set the system for fully-automatic operation, follow the procedure below.

- 1) Start the engine.
- 2) Push "AUTO" switch (8).
- 3) Set the desired temperature by turning the temperature selector (1).

The blower speed, air intake and air flow are controlled automatically to maintain the set temperature. However, the air flow is not changed to DEFROST position automatically.

NOTE:

When the recirculated air mode is selected, the automatic operation system is deactivated even if you push "AUTO" switch (8).

You can use the air conditioning switch (6) to manually turn the air conditioner on or off according to your preference. When you turn the air conditioning switch off, the climate control system cannot lower the inside temperature below outside temperature.

To turn the climate control system off, push "OFF" switch (7).

NOTE:

If "AUTO" in the display blinks, there is a problem in the heating system and/or air conditioning system. You should have the system inspected by a Maruti Suzuki authorized workshop.

NOTE:

- To find the temperature at which you are most comfortable, start with the 22°C (72°F) or 25°C (75°F) setting. (the temperature vary depending on vehicle specifications.).
- If you turn the temperature selector (1) until "HI" or "LO" appears on the display, the climate control system will operate at maximum heating or cooling and the blower will run at full speed.
- To avoid blowing cold air in cold weather or hot air in hot weather, the system will delay turning on the blower until warmed or cooled air is available.
- If your vehicle has been left in the sun with the windows closed, it will cool faster if you open the windows briefly.
- Even under the automatic operation, you can set individual selectors to the manual

mode. The manually selected functions are maintained, and the other functions remain under automatic operation.

- If the windshield and/or the front door windows are fogged, push the defrost switch (5) to turn on the defroster, or push the air flow selector (4) to change the air flow to HEAT & DEFROST position to defog the windows.
- To return the blower speed selector (2), air intake selector (3), and air flow selector (4) to automatic operation, push "AUTO" switch (8).

80T070210

80T070220

Be careful not to cover the interior temperature sensor (10) located between the steering wheel and the climate control panel, or the solar sensor (11) located at the top of the passenger's side dashboard. These sensors are used by the automatic system to regulate temperature.

Manual operation

You can manually control the climate control system. Set the selectors to the desired positions.

80T070240

NOTE:

If you need maximum defrosting:

- push the defrost switch (5) to turn on the defroster (the air conditioning system will operate and FRESH AIR mode will be selected automatically),
- set the blower speed selector to high,
- adjust the temperature selector to "HI" indication on the display, and
- adjust the side outlets so the air blows on the side windows.

Models with ENG A-STOP system

If the cooling and heating performance is insufficient when the engine is stopped automatically, push the ENG A-STOP OFF switch to deactivate the ENG A-STOP system. (The engine is restarted automatically, and the cooling and heating performance is restored.)

 If the windshield and/or front door windows are fogged, push the defrost switch. (When the defrost switch is pushed, the engine is restarted automatically and the defroster is turned on.)

Maintenance

If you do not use the air conditioner for a long period, such as during winter, it may not give the best performance when you start using it again. To help maintain optimum performance and durability of your air conditioner, it needs to be run periodically. Operate the air conditioner at least once a month for one minute with the engine idling. This circulates the refrigerant and oil and helps protect the internal components.

If your air conditioner is equipped with air filters, clean or replace them as specified in "Maintenance schedule" in "INSPECTION AND MAINTENANCE" section. Have this job done by a Maruti Suzuki authorized workshop as the lower glove box must be lowered for this job.

(For models with air conditioner refrigerant R-134a)

NOTE:

Your vehicle uses the air conditioning refrigerant HFC-134a, commonly called R-134a. R-134a replaced R-12 around 1993 for automotive applications. Other refrigerants are available, including recycled R-12, but only R-134a should be used in your vehicle.

NOTICE

Using the wrong refrigerant may damage your air conditioning system. Use R-134a only. Do not mix or replace the R-134a with other refrigerants.

How to Use Air Conditioning System Effectively

Parking under the blazing sun

After parking for a long time under the blazing sun, the interior temperature can become very high. Use the air conditioning system, with the windows or doors opened to ventilate the interior.

Radio Antenna Removal and Installation

63J055

The radio antenna on the roof is removable. To remove the antenna, turn it counterclockwise. To reinstall the antenna, turn it clockwise firmly by hand.

NOTICE

To avoid damage to the radio antenna:

- Remove the antenna when using an automatic car wash.
- Remove the antenna when the antenna hits anything such as a low ceiling in a parking garage or putting a car cover over your vehicle.
- Remove the antenna when parking your vehicle for a long time on a snowy day.

Installation of Radio Frequency Transmitters

We recommend that you always ask an authorized Maruti Suzuki workshop about frequency band, max output power, antenna position of vehicle and specific conditions for installation and/or use before installing a radio transmitter in your vehicle. Such equipments may cause the electronic control system to malfunction if they are incorrectly installed or they are not suited for the vehicle.

Audio Function

When Using Audio System with Appropriate Volume not to Disturb Safe Driving

- When playing music or other audio, if a mobile phone is used inside or nearby the vehicle, noise may be heard from the speakers. This does not indicate a malfunction.
- Navigation and audio equipment may not function properly if they are interfered with unauthorized radio waves.
- For further information about the features of the navigation or audio equipment, refer to the instruction manuals.

WARNING

If you operate the navigation or audio equipment, you may be distracted by them, resulting in an accident. Do not operate the navigation or audio equipment while driving.

NOTICE

While the engine is stopped, using the navigation or audio equipment for a long period of time may cause the lead-acid battery to run out.

Do not use the navigation or audio equipment for a long period of time while the engine is stopped.

NOTE:

Due to poor quality of FM/AM signal, some disturbance/noise may be heard from speakers. It is recommended to switch off the tuner system to prevent the said disturbance/noise in the speaker.

Remote Audio Controls (if equipped)

Controlling basic functions of the audio system is available using the switches on the steering wheel.

The remote audio switches are available when the ignition switch is in "ACC" or "ON" position or engine switch is in ACC or ON mode.

- For operation of an audio system or a navigation system, refer to the supplementary manual, provided along with it.
- The operating procedure may be different depending on an audio system or a navigation system.

80TM07001

- (1) Volume switch
- (2) Mute switch
- (3) "MODE" switch
- (4) Select switch
- (5) Hands-free switch
- (6) Voice recognition switch (if equipped)
- (7) Bluetooth® setup switch (if equipped)

NOTE:

To use the button (5), (6) or (7), press each button in the arrow direction as shown in the illustration.

Volume Switch (1)

You can adjust volume with this switch.

- To increase the volume, press "+" side.
- To decrease the volume, press "-" side.
- The volume will continue to increase or decrease until this switch is released.

Mute Switch (2)

To mute this sound, press the switch (2).

"MODE" Switch (3)

Every time you press this switch, the audio modes such as radio, etc. will be switched in order.

Depending on a navigation system or an audio systems, you can turn on the system by pressing this switch, even when the equipment itself is turned off.

Select Switch (4)

Every time you press this switch, you can select broadcast station or music according to your preference, along with the currently selected mode.

Hands-free Switch (5)

You can use this switch for the equipment which has the hands-free function. To use the function, you need to set up for the equipment. Refer to the supplementary manual for details.

Voice Recognition Switch (6)* (if equipped)

You can use this switch for the equipment which has the voice recognition function. To use the function, you need to set up for the equipment. Refer to the supplementary manual for details.

*: When using Apple CarPlay[®] or Android Auto[™] on infotainment system

Apple CarPlay[®] may not be available in your country or region.

Bluetooth® Setup Switch (7) (if equipped)

To use the function, you need to set up for the equipment. Refer to the supplementary manual for details.

Bluetooth

The Bluetooth[®] word mark and logo are registered trademarks and are owned by the Bluetooth SIG, Ink.

Stop using this unit and a Bluetooth® ready device whenever requested.

This unit shares the communication frequency with other private or public wireless communication equipment such as a wireless LAN and other wireless communication radios.

You should stop using this unit immediately whenever you are notified that your unit disturbs other wireless communication.

OTHER CONTROLS AND EQUIPMENT	•	
MEMO		

VEHICLE LOADING AND TOWING

Vehicle Loading	8-	1
Trailer Towing		

Vehicle Loading

Your vehicle was designed for specific weight capacities. The weight capacities of your vehicle are indicated by the Gross Vehicle Weight Rating (GVWR) and the Permissible maximum Axle Weight (PAW, front and rear). The GVWR and PAW (front and rear) are listed in the "SPECIFICATIONS" section.

GVWR – Maximum permissible overall weight of the fully loaded vehicle (including all the occupants, accessories and cargo plus the trailer nose weight if towing a trailer).

PAW – (Front and Rear) Maximum permissible weight on an individual axle.

Actual weight of the loaded vehicle and actual loads at the front and rear axles can only be determined by weighing the vehicle. Compare these weights to the GVWR and PAW (front and rear). If the gross vehicle weight or the load on either axle exceeds these ratings, you must remove enough weight to bring the load down to the rated capacity.

WARNING

- Never overload your vehicle. The gross vehicle weight (sum of the weights of the vehicle, all the occupants, accessories, cargo plus trailer nose weight if towing a trailer) must never exceed the Gross Vehicle Weight Rating (GVWR). In addition, never distribute a load so that the weight on either the front or rear axle exceeds the Permissible maximum Axle Weight (PAW).
- Always distribute cargo evenly. To avoid personal injury or damage to your vehicle, always secure cargo to prevent it from shifting if the vehicle moves suddenly. Place heavier objects on the floor and as far forward in the cargo area as possible. Never pile cargo higher than the top of the seat backs.

Trailer Towing

Your vehicle was originally designed to carry people and a normal amount of cargo. Do not to tow a trailer.

NOTE:

If your vehicle needs to be towed in an emergency, refer to "Towing your vehicle" in "EMERGENCY SERVICE" section.

Maintenance Schedule	9-2
Periodic Maintenance Schedule	9-2
Drive Belt	9-7

Air Conditioning System	9-46
Preparation Before Winter Season	9-48

59RN05750

WARNING

Take extreme care when working on your vehicle to prevent accidental injury. Carefully observe the following precautions:

 To prevent damage or unintended activation of the airbag system or seat belt pretensioner system, check that the lead-acid battery is disconnected and the ignition switch has been in "LOCK" position or the ignition mode has been in LOCK (OFF) position for at least 90 seconds before performing any electrical service work on your Maruti Suzuki vehicle. Do not touch airbag system components, seat belt pretensioner system components or wires.

The wires are wrapped with yellow tape or yellow tubing, and the couplers are yellow for easy identification.

• Do not leave the engine running in garages or other confined areas.

(Continued)

WARNING

(Continued)

- When the engine is running, keep hands, clothing, tools, and other objects away from the fan and drive belt. Even though the fan may not be moving, it can automatically turn on without warning.
- When it is necessary to perform service work with the engine running, check that the parking brake is set fully and the transmission is in Neutral (for manual transmission vehicles) or Park (for automatic transmission vehicles)
- Do not touch ignition wires or other ignition system parts when starting the engine or when the engine is running, or you could receive an electric shock.
- Be careful not to touch a hot engine, exhaust manifold and pipes, muffler, radiator and water hoses.
- Do not allow smoking, sparks, or flames around fuel or the battery.
 Flammable fumes are present.

(Continued)

WARNING

(Continued)

- Do not get under your vehicle if it is supported only with the portable jack provided in your vehicle.
- Be careful not to cause accidental short circuits between the positive and negative battery terminals.
- Keep used oil, coolant, and other fluids away from children and pets.
 Dispose of used fluids properly; never pour them on the ground, into sewers, etc.

Maintenance Schedule

The following table shows the times when you should perform regular maintenance on your vehicle. This table shows in kilometers and months when you should perform inspections, adjustments, lubrication and other services.

WARNING

MARUTI SUZUKI recommends that maintenance on your Maruti Suzuki vehicle should be performed by a Maruti Suzuki authorized workshop.

Periodic Maintenance Schedule

"C": Clean

"R": Replace or Change

"I": Inspect, clean, adjust, lubricate or

replace as necessary

"L": Lubricate

"T": Tighten to Specified Torque

"O": Rotate

NOTE:

This table includes services as scheduled up to 80,000 km mileage. Beyond 80,000 km, carry out the same services at the same intervals respectively.

			FREE	INSPEC	TION	PERIODIC MAINTENANCE AT COST

Drive Belt

WARNING

When the engine is running, keep hands, hair, clothing, tools, etc. away from the moving fan and drive belts.

Check that the drive belt tension is correct while the engine is stopped. If the belt is too loose, insufficient battery charging, engine overheating, poor air conditioning, or excessive belt wear can result. When you push the belt with your thumb midpoint between the pulleys, there should be a deflection according to the following chart.

The belts should also be examined to ensure that they are not damaged.

If you need to replace or adjust the belt have it done by a Maruti Suzuki authorized workshop.

78RB07001

- (1) Water pump (2) Generator
- (3) Idler pulley
- (4) Air conditioner compressor

Drive belt deflection (100 N)

- (a) New:
 - 4.8 5.9 mm Readjustment: 6.2 - 7.1 mm
- (b) New:

3.2 - 4.1 mm Readjustment: 4.4 - 5.0 mm

Engine Oil and Filter Specified Oil

For India

56RM07013

(1) Preferred

For India, check that the engine oil you use comes under the quality classification of API SN. Select the appropriate oil viscosity according to the above chart.

For India, be sure that the engine oil you use comes under the quality classification as listed below.

- · API SN, SP
- ILSAC GF-6

SAE 0W-16 (1) is the best choice for good fuel economy and good startability in cold weather.

Except for India

(1) Preferred

Except for India, be sure that the engine oil you use comes under the quality classification as listed below.

- API SL, SM, SN, SP
- ILSAC GF-6

SAE 0W-16 (1) is the best choice for good fuel economy and good startability in cold weather.

NOTE:

- We recommend that you use Maruti Suzuki genuine oil. To purchase it, see a Maruti Suzuki authorized workshop.
- The replacement timing varies with the type of engine oil that you choose. Refer to "Maintenance schedule" in this section for corresponding maintenance schedule.

Oil Level Check

It is important to keep the engine oil at the correct level for proper lubrication of your vehicle's engine. Check the oil level with the vehicle on a level surface. The oil level indication may be inaccurate if the vehicle is on a slope. The oil level should be checked either before starting the engine or at least 5 minutes after stopping the engine.

Pull out the oil dipstick, wipe the oil off with a clean cloth, insert the dipstick all the way into the engine, and then remove it again. The oil on the stick should be between the upper and lower limits shown on the stick. If the oil level indication is near the lower limit, add enough oil to raise the level to the upper limit.

NOTICE

Failure to check the oil level regularly could lead to serious engine trouble due to insufficient oil.

Refilling

55T090140

Remove the oil filler cap and pour oil slowly through the filler hole to bring the oil level to the upper limit on the dipstick. Be careful not to overfill the oil. Too much oil is almost as bad as too little oil. After refilling, start the engine and allow it to idle for about a minute. Stop the engine, wait about 5 minutes and check the oil level again.

Changing Engine Oil and Filter

Drain the engine oil while the engine is still warm.

80T090020

1) Remove the oil filler cap (1).

80T09003

- 2) Place a drain pan under the drain plug.
- 3) Using a wrench, remove the drain plug(2) and drain the engine oil.

A CAUTION

The engine oil temperature may be high enough to burn your fingers when the drain plug is loosened. Wait until the drain plug is cool enough to touch with your bare hands.

WARNING

Engine oil can be hazardous. Children and pets may be harmed by swallowing new or used oil. Keep new and used oil and used oil filters away from children and pets.

Repeated, prolonged contact with used engine oil may cause skin cancer.

Brief contact with used oil may irritate skin.

To minimize your exposure to used oil, wear a long-sleeve shirt and moisture-proof gloves (such as dishwashing gloves) when changing oil. If oil contacts your skin, wash thoroughly with soap and water.

Launder any clothing or rags if it is with oil.

Recycle or properly dispose of used oil and oil filters.

4) Reinstall the drain plug with new gasket. Tighten the plug with a wrench to the specified torque.

Tightening torque for drain plug: 35 Nm (3.6 kg-m)

NOTE:

Ask your Maruti Suzuki authorized workshop for changing engine oil and filter if you have difficulties.

Oil Filter Replacement

- 00
- (1) Loosen (counterclockwise)
- (2) Tighten (clockwise)
- 1) Using an oil filter wrench, turn the oil filter (3) counterclockwise and remove it.
- Using a clean rag, wipe off the mounting surface on the engine where the new filter will be seated.
- Smear a small amount of engine oil around the rubber gasket of the new oil filter.
- Screw the new filter by hand until the filter gasket contacts the mounting surface.

Tightening (viewed from filter top)

80T090050

- (4) Oil filter
- (5) 3/4 turn

NOTICE

To tighten the oil filter properly, it is important to accurately identify the position at which the filter gasket first contacts the mounting surface.

5) Turn the oil filter clockwise as specified below from the point of contact with the mounting surface (or to the specified torque) using an oil filter wrench.

Tightening torque for oil filter: 3/4 turn or 14 Nm (1.4 kg-m)

NOTICE

To prevent oil leakage, check that the oil filter is tight, but do not overtighten it.

Refilling with Oil and Oil Leakage Check

- 1) Pour oil through the filler hole and install the filler cap.
 - For the approximate capacity of the oil, refer to "Recommended fuel / lubricants and capacities (approx.)" in "SPECIFICATIONS" section.
- Start the engine and carefully check the oil filter and the drain plug for leakage. Run the engine at various speeds for at least 5 minutes.
- Stop the engine and wait about 5 minutes. Check the oil level again and add oil if necessary. Check for leakage again.

NOTICE

- When replacing the oil filter, it is recommended that you use a genuine Maruti Suzuki replacement filter. If you use an aftermarket filter, check that it is of equivalent quality and follow the manufacturer's instructions.
- Oil leakage from the periphery of the oil filter or drain plug indicate incorrect installation or gasket damage. If you find any leakage or are not sure that the filter has been properly tightened, have your vehicle inspected by a Maruti Suzuki authorized workshop.

Engine Coolant

Selection of Coolant

To maintain optimum performance and durability of your engine, use Maruti Suzuki genuine coolant or equivalent.

This type of coolant is the best for cooling system for the following reasons:

- The coolant helps maintain proper engine temperature.
- It gives proper protection against freezing and boiling.
- It gives proper protection against corrosion and rust.

Failure to use the proper coolant can damage your cooling system. Your Maruti Suzuki authorized workshop can help you select the proper coolant.

NOTICE

SUZUKI LLC: Super (Blue) coolant; This coolant is already diluted to the proper percentage. Do not dilute with distilled water additionally. Doing so may result in the possibility of freezing and/or overheating coolant.

NOTICE

To avoid damaging your cooling system:

- Always use a high quality ethylene glycol base non-silicate type coolant diluted with distilled water or deionized water at the correct mixture concentration.
- Check that the proper mix is 50/50 coolant to distilled water or deionized water and in no case higher than 50/50. Concentrations greater than 50/50 coolant to distilled water or deionized water will cause overheating conditions.
- Do not use straight coolant nor plain water.
- Do not add extra inhibitors or additives. They may not be compatible with your cooling system.
- Do not mix different types of base coolants. Doing so may result in accelerated seal wear and/or the possibility of severe overheating and extensive engine/automatic transmission damage.

Coolant Level Check

Check the coolant level at the reservoir tank, not at the radiator. With the engine cool, the coolant level should be between "FULL" and "LOW" marks.

Adding Coolant

WARNING

Swallowing engine coolant can cause severe injury or death. Inhaling coolant mist or vapors or getting coolant in your eyes could result in severe injury.

- Do not drink antifreeze or coolant solution. If swallowed, do not induce vomiting. Immediately contact a poison control center or a physician.
- Avoid inhaling coolant mist or hot vapors. If inhaled, remove to a fresh air area.
- If coolant gets in the eyes, flush with water and seek medical attention.
- · Wash thoroughly after handling coolant.
- · Keep engine coolant out of the reach of children and pets.

NOTICE

SUZUKI LLC: Super (Blue) coolant; This coolant is already diluted to the proper percentage. Do not dilute with distilled water additionally. Doing so may result in the possibility of freezing and/or overheating coolant.

80T090060

If the coolant level is below "LOW" mark. coolant should be added. While the engine is cool, remove the reservoir tank cap and add coolant until the reservoir tank level reaches "FULL" mark. Never fill the reservoir tank above "FULL" mark.

NOTICE

When putting the cap on the reservoir tank, line up the mark on the cap and the mark on the tank. Failure to follow this can result in coolant leakage.

Coolant Replacement

Since special procedures are required, ask vour Maruti Suzuki authorized workshop for this job.

Air Cleaner

If the air cleaner is clogged with dust, there will be greater intake resistance, resulting in decreased power output and increased fuel consumption.

80T090070

- 1) Unclamp the side clamps (1).
- 2) Hold up the air cleaner upper case (2).
- 3) Remove the element from the air cleaner case. If it appears to be dirty, clean or replace it with a new one.
- 4) Reinstall the air cleaner case securely.

Spark Plugs

Spark Plug Replacement and Inspection

80T090080

To access the spark plug:

- 1) Disconnect the coupler (1) while pushing the release lever.
- 2) Remove the bolt (2).
- 3) Pull out the ignition coil (3) straight.

NOTE:

During installation, check that the wires, couplers, sealing rubber of air cleaner chassis and washers, are correctly returned in place.

78K179

NOTICE

- When pulling out the ignition coils, do not pull on the cable. Pulling on the cable can damage it.
- When servicing the iridium/platinum spark plugs (slender center electrode type plugs), do not touch the center electrode, as it is easy to be damaged.

60G160S

NOTICE

- When installing the spark plugs, screw them in with your fingers to avoid stripping the threads. Tighten the spark plugs with a torque wrench to 17.5 Nm (1.7 kgm). Do not allow contaminants to enter the engine through the spark plug holes when the plugs are removed.
- Never use spark plugs with the wrong thread size.

a"·

Spark plug gap "a":

KR6A-10 0.95-1.05mm

NOTICE

When replacing spark plugs, you should use the brand and type specified for your vehicle. For the specified plugs, refer to "SPECIFICATIONS" section in the end of this book. If you wish to use a brand of spark plug other than the specified plugs, consult with a Maruti Suzuki authorized workshop.

Automatic Transmission Fluid

Specified Fluid

Use an automatic transmission fluid SUZUKI ATF3317 or Mobil ATF3309.

Fluid Level Check

When checking the automatic transmission fluid level, perform it when the fluid temperature is 70 to 80 °C (158 to 176°F). If the fluid temperature can not be measured, ask your Maruti Suzuki authorized workshop for this job.

NOTICE

Driving with too much or too little fluid can damage the transmission.

You must check the fluid level with the automatic transmission fluid at normal operating temperature.

To check the fluid level:

- To warm up the transmission fluid, drive the vehicle or idle the engine until the engine coolant temperature light (blue color) goes off.
- 2) Then drive for ten more minutes.

NOTICE

Be sure to use the specified automatic transmission fluid. Using automatic transmission fluid other than SUZUKI ATF3317 or Mobil ATF3309 may damage the automatic transmission of your vehicle.

NOTE:

Do not check the fluid level if you have just driven the vehicle for a long time at high speed, or if you have driven in city traffic in hot weather. Wait until the fluid cools down (about 30 minutes), or the fluid level indication will not be correct.

80T090090

- 3) Park your vehicle on level ground.
- 4) Apply the parking brake and then start the engine in "P" (Park). Let it idle for

- two minutes and keep it running during the fluid level check.
- 5) With your foot on the brake pedal, move the gearshift lever through each gear, pausing for about three seconds in each range. Then move it back to the "P" (Park) position.

WARNING

Be sure to depress the brake pedal when moving the gearshift lever, or the vehicle can move suddenly.

81PN159

 Remove the dipstick, clean it and push it back in until the cap seats. Then pull out the dipstick. Check both sides of the dipstick, and read the lowest level. The fluid level should be between the two marks on the dipstick.

78RB07055

- (1) FULL
- (2) LOW
- (3) The lowest point = Fluid level
- 8) Add just enough specified fluid through the dipstick hole to fill the transmission oil to the proper level.

NOTICE

After checking or adding oil, be sure to insert the dipstick securely.

Changing Oil

Since special procedures, materials, and tools are required to change the automatic transmission oil, ask your Maruti Suzuki authorized workshop for this job.

Gear Oil

Manual Transmission Oil / transfer Oil / Front/rear Differential Oil

When adding gear oil, use gear oil with the appropriate viscosity and grade as shown in the chart below.

We highly recommend you use "MARUTI GENUINE GEAR OIL 75W" for manual transmission oil and transfer oil.

Manual transmission oil/Transfer oil

54P120706

We highly recommend you use "MARUTI GENUINE GEAR OIL 75W-85" for front/rear differential oil.

Front/rear differential oil

78RB07007

Gear Oil Level Check

Manual transmission

80T090100

- (1) Oil filler and level plug
- (2) Oil drain plug

Transfer

80T090110

- (3) Oil filter and level plug
- (4) Oil drain plug

Front/rear differential

30T090120

- (5) Oil filter and level plug
- (6) Oil drain plug

To check the gear oil level, use the following procedure:

- Park the vehicle on a level surface with the parking brake applied. Then, stop the engine.
- 2) Remove the oil filler and level plug.

For the manual transmission;

3) If gear oil flows from the plug hole, the oil level is correct. Reinstall the plug. If gear oil does not flow from the plug hole, add oil through the filler plug hole until oil flows a little from the plug hole. For the transfer and front/rear differential;

- Check the inside of the hole with your finger. If the oil level comes up to the bottom of the plug hole, the oil level is correct. If so, reinstall the plug.
- 4) If the oil level is low, add gear oil through the oil filler and level plug hole until the oil level reaches the bottom of the filler hole, and then reinstall the plug.

Tightening torque for oil filler and level plug

Manual transmission (1)(2): 23 Nm (2.3 kg-m)

Transfer (3)(4): 23 Nm (2.3 kg-m)

Front/rear differential (5)(6): (5)50 Nm (5.0 kg-m) (6)55 Nm (5.6 kg-m)

A CAUTION

After driving the vehicle, the gear oil temperature may be high enough to burn you. Wait until the oil filler and level plug are cool enough to touch with your bare hands before inspecting gear oil level.

NOTICE

Be sure to use new plug with new gasket to avoid looseness of the plug and oil leakage.

Gear Oil Change

Since special procedures, materials and tools are required, ask your Maruti Suzuki authorized workshop for this job.

Clutch

Clutch Pedal

54G274

Clutch pedal play "d": MAX 10 mm

Measure the clutch pedal play by moving the clutch pedal with your hand and measuring the distance it moves until you feel slight resistance. The play in the clutch pedal should be less than the specified values. If the play is more than the above, or clutch dragging is felt with the pedal fully depressed, have the clutch inspected by a Maruti Suzuki authorized workshop.

Clutch Fluid

80T090130

Check the clutch pedal for smooth operation and clutch fluid level from time to time. If clutch dragging is felt with the pedal fully depressed, have the clutch inspected by a Maruti Suzuki authorized workshop. If the clutch fluid level is near "MIN" line. fill it up to "MAX" line with DOT3 or SAF J1703 brake fluid.

NOTICE

Clutch fluid is supplied from brake fluid reservoir. If your clutch fluid level is increased or near the "MIN" line, there is a possibility of clutch or brake fluid leakage or abnormal wear of clutch. Have your vehicle inspected by a Maruti Suzuki authorized workshop.

Brakes

Brake Fluid

80T090130

Check the brake fluid level by looking at the reservoir in the engine compartment. Check that the fluid level is between "MAX" and "MIN" lines

WARNING

- Failure to follow the guidelines below can result in personal injury or serious trouble in the brake system.
 - If the brake fluid in the reservoir drops below a certain level, the brake warning light on the instrument cluster will come on (the engine must be running with the parking brake fully disengaged). Should the light come on, immediately ask your Maruti Suzuki authorized workshop to inspect the brake system.
 - A rapid fluid loss indicates leakage in the brake system. In this case, immediately ask your Maruti Suzuki authorized workshop to inspect the brake system.
 - Do not use any fluid other than DOT3 or SAE J1703 brake fluid.
 Do not use reclaimed fluid or fluid that has been stored in old or open containers. It is essential that foreign particles and other liquids are kept out of the brake fluid reservoir.

(Continued)

WARNING

(Continued)

 Brake fluid is harmful or fatal if swallowed, and harmful if it comes in contact with skin or eyes. If swallowed, do not induce vomiting. Immediately contact a poison control center or a physician. If brake fluid gets in eyes, flush eyes with water and seek medical attention. Wash thoroughly after handling. Solution can be poisonous to animals. Keep out of reach of children and animals.

NOTICE

- If your brake fluid level is near the "MIN" line, there is a possibility of brake pad and/or shoe wear and brake fluid leakage. In this case, ask your Maruti Suzuki authorized workshop to inspect the brake system.
- Brake fluid can damage painted surfaces. Be careful when refilling the reservoir.

NOTE:

- The fluid level can be expected to gradually fall as the brake pad and/or shoe wear.
- Brake fluid absorbs water over time and brake fluid with high water content may cause vapor lock or brake system malfunction.

Replace the brake fluid according to the maintenance schedule in this owner's manual.

Brake Pedal

Check brake pedal stroke. If the stroke is so large, have the brake system inspected by a Maruti Suzuki authorized workshop. If you doubt the brake pedal is at its normal height, check it as follows:

54G108

Minimum distance between brake pedal and floor carpet "a"

89 mm

With the engine running, measure the distance between the brake pedal and floor carpet when the pedal is depressed with approximately 30 kg of force. The minimum distance required is as specified. Since your vehicle's brake system is self-adjusting, there is no need for pedal adjustment.

If the pedal to floor carpet distance as measured above is less than the minimum distance required, have your vehicle inspected by a Maruti Suzuki authorized workshop.

NOTE:

- When measuring the distance between the brake pedal and floor wall, be sure not to include the floor mat or rubber on the floor carpet in your measurement.
- Measure the distance at the brake pedal's side facing toward the driver's door.

52RM70500

WARNING

If the brake pad lining becomes worn and it has reached its minimum thickness, squealing noise sounds during braking.

If you hear this noise, have your vehicle inspected by a Maruti Suzuki authorized workshop.

Continued driving with this condition can cause an accident.

A CAUTION

If you experience any of the following problems with your vehicle's brake system, have your vehicle inspected by a Maruti Suzuki authorized workshop.

- Poor braking performance
- Uneven braking (brakes not working uniformly on all wheels)
- Excessive pedal travel
- Brake dragging

Parking Brake

80T090140

Ratchet tooth specification "b": 4th – 9th Lever pull force (1): 200 N (20 kg)

Check the parking brake for proper adjustment by counting the number of clicks made by the ratchet teeth as you slowly pull up on the parking brake lever to the point of full engagement. The parking brake lever should stop between the specified ratchet teeth and the rear wheels should be securely locked. If the parking brake is not properly adjusted or the brakes drag is suspected even after the lever has been fully released, have the parking brake inspected and/or adjusted by a Maruti Suzuki authorized workshop.

Brake Discs and Brake Drums Brake disc

80T090150

Brake location	Minimum thickness "a"
Front wheels	15.0 mm

Brake drum

80T090160

Brake location	Maximum inner diameter "b"
Rear wheels	222 mm

If the measured thickness or inner diameter of the most worn part falls below or exceeds the value indicated above, the parts should be replaced with a new one. The measurement involves disassembling each brake and requires the use of a micrometer or caliper, which must be done according to the instructions described in the relevant service manual or available from the relevant repair information site.

Steering Wheel

78RB07012

Steering wheel play "c": 0-30 mm

Check the free play of the steering wheel by gently turning it from left to right and measuring the distance that it moves before you feel slight resistance. The play should be between the specified values.

Check that the steering wheel turns easily and smoothly without rattling by turning it all the way to the right and to the left while driving very slowly in an open area. If the amount of free play is not as specified or you find anything else to be wrong, an inspection must be performed by a Maruti Suzuki authorized workshop.

Tyres

80T090180

The front and rear tyre pressure specifications are listed in the tyre information label (1). Both front and rear tyres should have the specified tyre pressure.

Note that the value does not apply to the compact spare tyre, if equipped.

Tyre Inspection

Inspect your vehicle's tyres at least once a month or before long trip by performing the following checks:

 Measure the air pressure with a tyre gauge. Adjust the pressure if necessary.

WARNING

- Air pressures should be checked when the tyres are cold or you may get inaccurate readings.
- Check the tyre pressure from time to time while inflating the tyre gradually, until the specified pressure is obtained.
- Never under-inflate or over-inflate the tyres.

Under-inflation can cause unusual handling characteristics or can cause the rim to slip on the tyre bead, resulting in an accident or damage to the tyre or rim.

Over-inflation can cause the tyre to burst, resulting in personal injury. Over-inflation can also cause unusual handling characteristics which may result in an accident.

80T090190

- (1) Tread wear indicator
- (2) Indicator location mark
- 2) Check that the depth of the tread groove is more than 1.6 mm. To help you check this, the tyres have moldedin tread wear indicators in the grooves. When the indicators appear on the tread surface, the remaining depth of the tread is 1.6 mm or less and the tyre should be replaced.
- Check for abnormal wear, cracks and damage. Any tyres with cracks or other damage should be replaced. If any tyres show abnormal wear, have them inspected by a Maruti Suzuki authorized workshop.

A CAUTION

Hitting curbs and running over rocks can damage tyres and affect wheel alignment. Have tyres and wheel alignment checked periodically by a Maruti Suzuki authorized workshop.

- 4) Check for loose wheel nuts.
- 5) Check that there are no nails, stones or other objects sticking into the tyres.

WARNING

 Your Maruti Suzuki vehicle is equipped with tyres which are all the same type and size. This is important to ensure proper steering and handling of the vehicle. Never mix tyres of different size or type on the four wheels of your vehicle. The size and type of tyres used should be only those approved by Maruti Suzuki as standard or optional equipment for your vehicle.

(Continued)

WARNING

(Continued)

- Replacing the wheels and tyres equipped on your vehicle with certain combinations of aftermarket wheels and tyres can significantly change the steering and handling characteristics of your vehicle.
- Therefore, use only those wheel and tyre combinations approved by Maruti Suzuki as standard or optional equipment for your vehicle.

NOTICE

- Replacing the original tyres with tyres of a different size may result in false speedometer or odometer readings. Check with a Maruti Suzuki authorized workshop before purchasing replacement tyres that differ in size from the original tyres.
- Replacing a tyre with one of a different size, or using different brands among the four tyres can result in damage to the drive train.

Tyre Rotation 5-tyre rotation

80T090200

4-tyre rotation

65D459

To avoid uneven wear of your tyres and to prolong their life, rotate the tyres as illustrated. Tyres should be rotated every 10000 km. After rotation, adjust front and rear tyre pressures to the specification listed on your vehicle's Tyre Information Label.

NOTE:

 To change the tyres, refer to "Changing Wheels" in "EMERGENCY SERVICE" section.

Wheel Balancing

If the vehicle vibrates abnormally on smooth road, have the wheel balanced at a Maruti Suzuki authorized workshop.

Wheel Alignment

In case of abnormal tyre wear or pulling towards one side, have the wheel aligned at a Maruti Suzuki authorized workshop.

Tubeless Tyres

The vehicle is equipped with Tubeless Tyres. In tubeless tyre, a thin layer of butyl rubber is used for lining the inside of the tubeless tyre. This layer is to prevent air loss and fulfilling the purpose of tube. The air pressure is maintained by the sealing between tyre bead and wheel rim. Tubeless tyres are having advantage of slow air loss and preventing sudden deflation while driving.

Care and maintenance tips for tubeless tyres

- Always maintain recommended inflation pressure. Driving continuously at low inflation pressure can lead to tyre damage.
- In case any leakage is found, check for any nail penetration/valve core damage or rim bent. Damaged wheel must not be used.
- 3) In case tyre has run at low pressure, it must be inspected for any defect.
- Whenever new tyre is fitted, replace the valve.
- If continuous high speed driving is required, increase tyres pressure by 5 psi over recommended inflation pressure.
- 6) Never run the tyre beyond TWI (Tread wear indicator). The tyre is recommended to be replaced when the remaining tread has worn to this point. The indicators are spaced across the tread around the tyre marked by a triangular symbol (TWI).
- Always prefer tubeless tyre mounting machine. In case of manual mountingtyre/wheel rim damage may occur.
- In case of any problem, please get in touch with a Maruti Suzuki authorized workshop.

Battery

WARNING

- Batteries produce flammable hydrogen gas. Keep flames and sparks away from the battery or an explosion may occur. Never smoke when working near the battery.
- When checking or servicing the battery, disconnect the negative cable. Be careful not to cause a short circuit by allowing metal objects to contact the battery posts and the vehicle at the same time.
- To avoid harm to yourself or damage to your vehicle or battery, follow the jump-starting instructions in "EMERGENCY SERVICE" section if it is necessary to jump-start your vehicle.
- Diluted sulfuric acid spilled from battery can cause blindness or severe burns. Use proper eye protection and gloves. Flush eyes or body with ample water and get medical care immediately if suffered. Keep batteries out of reach of children.

80T090530

For maintenance-free battery (cap-less type), you need not add water. For traditional type battery, which has water filler caps, the level of the battery solution must be kept between the upper level line "MAX" (1) and the lower level line "MIN" (2) at all times. If the level is found to be below the lower level line (2), add distilled water to the upper level line (1). You should periodically check the battery, battery terminals, and battery hold-down bracket for corrosion. Remove corrosion using a stiff brush and ammonia mixed with water, or baking soda mixed with water. After removing corrosion, rinse with clean water.

If your vehicle is not going to be driven for a month or longer, disconnect the cable from the negative terminal of the battery to help prevent discharge.

WARNING

If the battery is used with battery level being less than the lower level line "MIN" (2), it may cause reduced battery life, an exothermic heat, or an explosion by hydrogen gas occurring from the battery. Do not use the battery with battery level being less than the lower level line "MIN" (2).

NOTICE

 If the battery liquid is added more than the upper level line "MAX" (1), liquid may leak by vibrations during driving or liquid may spray out in some case depending on the condition of battery charging. These may cause damage to the parts near the battery. If the battery liquid overspills, immediately wash away with water. Do not add the battery liquid more than the upper level line "MAX" (1).

(Continued)

NOTICE

(Continued)

 If your vehicle is equipped with the ENG A-STOP system and the battery which is exclusive for the ENG A-STOP system is used, only use the specified type of battery for ENG A-STOP system. Refer to "SPECIFICATIONS" section for details. Otherwise, you could damage your vehicle, and the ENG A-STOP system could not be available. If a vehicle battery has to be replaced, consult with a Maruti Suzuki authorized workshop.

NOTE:

The battery liquid is consumed when the battery is used. If the level is found to be less than the center of upper level "MAX" (1) and lower level "MIN" (2), add distilled water till it reaches the upper level line "MAX" (1).

Replacement of the battery

78RB07019

To remove the battery:

- 1) Disconnect the negative cable (1).
- 2) Disconnect the positive cable (2).
- 3) Remove the retainer nuts (3) and remove the retainer (4).

To install the battery:

- Install the battery in the reverse order of removal.
- 2) Tighten the bracket bolt and battery cables securely.

NOTE:

- When the battery is disconnected, some of the vehicle's functions will be initialized and/or deactivated.
 - These functions must be required to reset after the battery is reconnected.
- Do not disconnect the battery terminals for at least one minute after the ignition switch is turned off, or the engine switch is pressed to change the ignition mode to "LOCK" (OFF).

WARNING

Batteries contain toxic substances including sulfuric acid and lead. They could have potential negative consequences for the environment and human health. Used batteries must be disposed of or recycled according to applicable rules or regulations and must not be disposed of with ordinary household trash. Make sure not to tip over the battery when you remove it from the vehicle. Otherwise, sulfuric acid could run out and you might get injury.

NOTICE

After stopping the engine, controller and system are operated for a while. Therefore, before removing the battery, wait for more than one minute after turning the ignition switch to "OFF" or changing the ignition mode to "LOCK" (OFF).

(Battery label)

51KM042

- (5) Crossed-out wheeled bin symbol
- (6) Chemical symbol of "Pb"

The crossed-out wheeled bin symbol (5) located on the battery label indicates that the used battery should be collected separately from ordinary household trash. The chemical symbol of "Pb" (6) indicates the battery contains more than 0.004% lead.

By ensuring the used battery is disposed of or recycled correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate trash handling of the battery. The recycling of materials will help to conserve natural resources. For more detailed information about disposing of or recycling the used battery, consult with a Maruti Suzuki authorized workshop.

Fuses

Your vehicle has three types of fuses, as described below:

Main fuse

The main fuse takes current directly from the lead-acid battery.

Primary fuses

These fuses are between the main fuse and individual fuses, and are for electrical load groups.

Individual fuses

These fuses are for individual electrical circuits.

To remove a fuse, use the fuse puller provided in the fuse box cover.

(1) Fuse puller

(2) Spare fuse

Fuses in Engine Compartment

80T09021

- (1) Main fuse box
- (2) Relay box

Main fuse box

78RB07022

Relay box

78RB07023

MAIN	MAIN FUSE / PRIMARY FUSE								
(1)	120 A	FL1							
(2)	100 A	FL2							
(3)	80 A	SPARE							
(4)	100 A	FL4							
(5)	50 A	FL5							
(6)	50 A	Ignition switch							
(7)	40 A	ABS motor							
(8)	_	Blank							

(9)	30 A	Blower fan
(10)	30 A	Starter motor
(11)	30 A	Headlight cleaner
(12)	15 A	Headlight (Right)
(13)	15 A	Headlight (Left)

(30)	5 A	T/M 2
(31)	5 A	Starter motor signal
(32)	15 A	Headlight high (Left)
(33)	15 A	Headlight high (Right)

The main fuse, primary fuses and some of the individual fuses are located in the engine compartment. If the main fuse blows, no electrical component will function. If a primary fuse blows, no electrical component in the corresponding load group will function. When replacing the main fuse, a primary fuse or an individual fuse, use a genuine Maruti Suzuki replacement parts or equivalent for individual fuses.

To remove a fuse, use the fuse puller provided in the fuse box. The amperage of each fuse is shown in the back of the fuse box cover.

55T090620

WARNING

If the main fuse or a primary fuse blows, have your vehicle inspected by a Maruti Suzuki authorized workshop. Always use a genuine Maruti Suzuki replacement. Never use a substitute such as a wire even for a temporary repair, or extensive electrical damage and a fire can result.

NOTE:

Check that the fuse box always carries spare fuses.

55T090630

WARNING

Always replace a blown fuse with a fuse of the correct amperage. Never use a substitute such as aluminum foil or wire to replace a blown fuse. If you replace a fuse and the new one blows in a short period of time, you may have a major electrical problem. Have your vehicle inspected by a Maruti Suzuki authorized workshop.

Headlight Aiming

Since special procedures are required, ask your Maruti Suzuki authorized workshop for this job.

ITEM: Lights

No.

WATT-

AGE

BULB

No.

Bulb Replacement

(1)	Headlight		12V 60/55W	H4	
(2)	Headlight*1		LED	-

(11)	Reversing light		12V21W	W21W	
(12)	License light	plate	12V5W	W5W	
If you need to replace the following lights					

If you need to replace the following lights indicated in the above table, consult with a Maruti Suzuki authorized workshop.

^{*1:} Since the lights are non-disassemble type, you cannot replace a bulb. Replace the target assembly if any light is defective.

A CAUTION

- Light bulbs can be hot enough to burn your finger right after turning off lights. This is true especially for halogen headlight bulbs. Replace the bulbs after they become cool enough.
- The headlight bulbs are filled with pressurized halogen gas. They can burst and injure you if they are hit or dropped. Handle them carefully.
- To avoid injury by sharp-edged parts of the body, wear gloves and a long-sleeved shirt when replacing light bulbs.

NOTICE

- The oils from your skin may cause a halogen bulb to overheat and burst when the lights are on. Grasp a new bulb with a clean cloth.
- Frequent bulb replacement indicates the need for an inspection of the electrical system. This should be carried out by a Maruti Suzuki authorized workshop.
- During bulb replacement always use same bulb number as used in vehicle which is imprinted on the said bulb/unit and/or mentioned in this section.

NOTE:

The inner surface of lens such as the headlights or the rear combination lights may be clouded or dew condensation may occur by driving on a rainy day or washing the vehicle. This is a temporary phenomenon caused by temperature difference between the inside and the outside of the lights. (This is the same phenomenon as the windows are clouded on a rainy day.) Also, it sometimes seems that water gets into the lights because of waterdrop on the edge of the lens. This is a temporary phenomenon caused by water adherence to the outside of the lights.

The above-mentioned phenomena are not vehicle malfunction.

However, if water is piled up in the lights or large waterdrop adheres to the inner surface of lens, have the vehicle inspected by a Maruti Suzuki authorized workshop.

Non-disassembled Type Lights

Since the lights shown below are non-disassemble type, you cannot replace a light. Replace the target assembly if any light is defective.

If you need to replace the assembly, ask your Maruti Suzuki authorized workshop.

- Headlight (LED type) (if equipped)
- Position light (vehicle with LED headlights)
- Side turn signal light on fender
- High mount stop light

Headlights

LED type

Since special procedures are required, it is recommended that you take your vehicle to a Maruti Suzuki authorized workshop for light replacement.

Halogen type

80T090460

(1) Bulb

 Open the engine hood while the engine is stopped. Disconnect the coupler (2). Remove the sealing rubber (3) by pulling the grip (4).

78RB07027

 Push the retaining spring (5) forward and unhook it. Then remove the bulb. Install a new bulb in the reverse order of removal.

80T090470

NOTE: You can see the position of retaining spring from the hole of headlight.

Front Turn Signal Light and Front Position Light

For front LED position light (if equipped), it is recommended that you take your vehicle to a Maruti Suzuki authorized workshop for light replacement since special procedures are required.

Vehicle with the halogen headlights

80T090440

- (1) Front turn signal light
- (2) Front position light

Vehicle with the LED headlights

80T090450

- (1) Front turn signal light
- (2) Front LED position light

80T090390

 Open the engine hood while the engine is stopped. To remove the bulb holder of the front turn signal light or the front position light (for vehicle with halogen headlights) from the light housing, turn the holder counterclockwise and pull it out.

78RB07051

- (2) Removal
- (3) Installation
- To remove and install the bulb of the front position light (1), simply pull out or push in the bulb.

Side Turn Signal Light

78RB07031

Since the bulb is built-in type, replace it as the light assembly. Remove the light assembly by sliding the light housing leftward with your finger.

Front Fog Light (if equipped)

 Start the engine. Turn the steering wheel to the opposite side of the fog light to be replaced to replace the bulb easily. Then turn off the engine.

80T090540

2) Remove the clips (1) and screw (2) at the bottom of bumper.

For removing the clip, use a flat-bladed screwdriver as shown in the illustration.

78RB07033

Open the end of the cover inside the fender.

52R70140

 Disconnect the coupler (3) by pushing the lock release. Turn the bulb holder (4) counterclockwise and remove it.

Rear Combination Light

80T090400

1) Remove the clips (1) and then remove the cover (2).

80T090410

2) Remove the nuts (3) and pull the rear combination light from the rear bumper by pushing the hooks (a).

80T090430

- (4) Tail / brake light
- (5) Rear turn signal light
- (6) Reversing light

 To remove the bulb holder of the above light from the light housing, turn the holder counterclockwise and pull it out.

- (7) Removal
- (8) Installation
- To remove and install the bulb of the tail / brake light (4), the rear turn signal light (5), the reversing light (6), simply pull out or push in the bulb.

License Plate Light

1) Remove the cover (1) by turning it counterclockwise.

76MH0A126

 To remove and install the bulb of the license plate light (2), simply pull out or push in the bulb.

High-mount Stop Light

LED is used. It is recommended that you take your vehicle to a Maruti Suzuki authorized workshop for light replacement since special procedures are required.

Interior Light

Front

80T090280

To prevent scratches, insert a commercially available flat-blade screwdriver covered with a soft cloth into the notches (1), and then remove the lens (2).

- (3) Removal
- (4) Installation
- 2) Pull the bulb out and then insert a new one.
- After replacing the bulb, install the center interior light lens in the reverse order of removal.

Center

55T090460

To prevent scratches, insert a commercially available flat-blade screwdriver covered with a soft cloth into the notch (1), and then remove the lens (2).

55T090050

- (3) Removal
- (4) Installation
- 2) Pull the bulb out and then insert a new one.
- After replacing the bulb, install the center interior light lens in the reverse order of removal.

Luggage compartment (if equipped)

80T090290

To prevent scratches, insert a commercially available flat-blade screwdriver covered with a soft cloth into the notch (1), and then remove the lens (2).

55T090040

- (3) Removal
- (4) Install
- 2) Pull the bulb out and then insert a new one.
- After replacing the bulb, install the luggage compartment light lens in the reverse order of removal.

Headlight Washer Fluid

Check that there is washer fluid in the tank in the engine room. Refill it if necessary. Use a good quality windshield washer fluid, diluted with water as necessary.

WARNING

· Do not use radiator antifreeze in the windshield washer reservoir. This can severely impair visibility when sprayed on the windshield, and also can damage your vehicle's paint.

(Continued)

WARNING

(Continued)

• Do not add washer fluid when the engine is hot or operating as washer fluid contains alcohol and may catch fire if spilled on the engine, etc.

NOTICE

- Damage may result if the washer motor is operated with no fluid in the washer tank.
- · In winter season, be sure to remove snow or ice on the nozzle at the front bumper before operating headlight washer.
- · To avoid the frozen damage to the nozzle of the headlight washer, be sure to use the specific washer fluid.

Wiper Blades

59RN09450

If the wiper blades become brittle or damaged, or make streaks when wiping, replace the wiper blades.

To install new wiper blades, follow the procedures below.

NOTICE

To avoid scratching or breaking the window, do not let the wiper arm strike the window while replacing the wiper blade.

NOTE:

Some wiper blades may be different from the ones described here depending on vehicle specifications. If so, consult with a Maruti Suzuki authorized workshop for proper replacement method.

For Windshield Wipers

 Hold the wiper arm away from the window.

 Squeeze lock (1) towards wiper arm (2) and remove the wiper frame from the arm as shown.

3) Unlock the lock end of the wiper blade and slide the blade out as shown.

- (3) Retainer
- 4) If the new blade is provided without the two metal retainers, move them from the old blade to the new one.

- (A) Up
- (B) Down

NOTE:

When you install the metal retainers (3), make sure the direction of metal retainers as shown in the above illustration.

- (4) Locked end
- 5) Install the new blade in the reverse order of removal, with the locked end positioned toward the wiper arm. Make sure the blade is properly retained by all the hooks. Lock the blade end into place.
- 6) Reinstall wiper frame to arm, making sure that the lock lever is snapped securely into the arm.

NOTICE

Fit the stopper side (5) of the wiper blade in the driver's seat side. Otherwise, the wiper blade may be misaligned while the wiper operates.

For Rear Window Wiper

80T090520

- (1) Lock end
- (2) Wiper blade
- Lift the rear wiper arm a little from the rear window. Remove the wiper frame from the rear wiper arm by pushing the lock end (1) from the side of wiper blade frame and then by pushing the wiper frame to the direction of the arrow with the lock end (1) free from locking in the above illustration.

NOTE:

Return the rear wiper arm slowly after removing the rear wiper blade.

77R60050

- (3) Stopper
- (4) Hook
- (5) Retainer
- Pull and remove the wiper blade from the wiper frame until the stopper (3) of the wiper frame is taken out of the hook (4). Remove the retainers (5) from the wiper blade.

63R60160

 If the new blade is provided without the two metal retainers, install them from the old blade to the new one.

77R60030

4) Install the retainers along the direction of camber as shown in the illustration.

63R60180

5) Slide the new wiper blade into the wiper frame. When installing the wiper blade, put into the side that has no stopper on the wiper blade.

80T100110

- (6) Stopper (7) Hook
- 6) Fix the wiper blade securely by pushing the hook (7) into the stopper (6).
- Reinstall the wiper frame to the rear wiper arm in the reverse order of removal. Make sure that the rear wiper blade is installed securely.

Windshield Washer Fluid

80T090300

Check that there is washer fluid in the tank in the engine room. Refill it if necessary. Use a good quality windshield washer fluid, diluted with water as necessary.

WARNING

- Do not use radiator antifreeze in the windshield washer reservoir.
 This can severely impair visibility when sprayed on the windshield, and also can damage your vehicle's paint.
- Do not add washer fluid when the engine is hot or operating as washer fluid contains alcohol and may catch fire if spilled on the engine, etc.

NOTICE

- Damage may result if the washer motor is operated with no fluid in the washer tank.
- Avoid use of hard water to prevent building of lime scale on the vehicle.

Air Conditioning System

If you do not use the air conditioner for a long period, such as during winter, it may not give the best performance when you start using it again. To help maintain optimum performance and durability of your air conditioner, it needs to be run periodically. Operate the air conditioner at least once a month for one minute with the engine idling. This circulates the refrigerant and oil and helps protect the internal components.

Air Conditioner Filter Replacement

Since special procedures are required, ask your Maruti Suzuki authorized workshop for this job.

77R50340

 To approach the air conditioner filter, remove the glove box by pressing both sides of the glove box inward and pulling it out.

80T090310

- 2) Unlock the holder (1) and release it from the air conditioner unit.
- 3) Slide the tab (2) of the holder (1) in an arrow direction and remove the holder.

77R50420

NOTICE

Do not apply excessive force to the tab when removing the holder. Otherwise, the tab may be damaged.

80T090320

4) Pull out the air conditioner filter (3)

NOTE:

When you install a new filter, check that the UP mark (4) faces upward.

Preparation Before Winter Season

Windshield Washer Fluid

To prevent windshield washer fluid from freezing, dilute it by the ratio according to outside temperature.

Lead-acid Battery

Check the liquid measure and the specific gravity of lead-acid battery. When it becomes cold, the battery performance gets worse. Also, it becomes difficult to start the engine by the weak battery. Refer to "Battery" in the "INSPECTION AND MAINTENANCE" section.

Engine Coolant

To prevent the inside of engine from corroding and freezing, use the designated engine coolant. Refer to "Specifications" in the "SPECIFICATIONS" section.

NOTE:

To check the concentration of engine coolant or replace it, ask your Maruti Suzuki authorized workshop.

Winter Tyres and Chocks

_

(1) Winter tyre (2) Chock

Winter tyres and chocks are necessary to drive on the snow roads or the frozen roads.

Before Your Driving Snow on the Roof

80 130

Remove snow on the roof before your driving. If you do not remove it, snow may fall during your driving and it may hinder your view.

Frozen Wiper Blades

65P60060

Melt ice by pouring lukewarm water. After melting it, wipe off water to prevent refreezing. If you operate the wiper blades forcedly when ice stays freezing, the wiper rubbers may be damaged and the wiper blades may be broken.

Snow and Frost on the Window Glasses

82K261

Use the plastic board (1). You can remove snow and frost not to damage the window glasses.

Frozen Outside Rearview Mirrors

65P60070

Melt ice by pouring lukewarm water. After melting it, wipe off water to prevent refreezing. If you operate the outside rearview mirrors forcedly when ice stays freezing, the outside rearview mirrors may be broken.

NOTICE

- For the outside rearview mirror folding switch, check if you can move the mirrors by your hands first. Then, operate the switch. If you repeat to operate the switch when ice stays freezing, the mirrors may be broken.
- For the remote folding mirrors, deactivate the function of the remote folding mirrors in the cold condition where the outside rearview mirrors are frozen. If you repeat to operate them when ice stays freezing, the mirrors may be broken.

Frozen Doors

65P60080

Pour lukewarm water except the keyhole on the door. After opening the door, wipe off water. If you open the door forcedly when ice stays freezing, the rubbers around the door may be come off and broken.

Snow Attaching to Shoes

80J312

Remove snow attaching to shoes before getting in your vehicle. If you do not remove it, you may slip when operating the pedals and the window glasses may mist easily because of high humidity inside the vehicle.

When Parking the Vehicle Outside

80J315

NOTICE

- If you park the vehicle under eaves or trees, the roof of the vehicle may be dented by accumulated snow or fallen snow.
 - When it is snowing, do not park the vehicle under eaves or trees.
- If you park the vehicle outside when it is snowing, the wiper arms may be deformed or the wiper blades may be frozen on the windshield by snow weight. Raise the wiper arms away from the windshield when parking the vehicle.

Engine Trouble: Does not Start	10-12
Engine Trouble: Overheating	10-13
Warning Triangle	10-14

EMERGENCY SERVICE

Towing Your Vehicle

If you need to have your vehicle towed, contact a professional service. A Maruti Suzuki authorized workshop can provide you with detailed towing instructions.

54G586

WARNING

When you tow your vehicle, refer to the following instructions to avoid accidents and damage to your vehicle. In addition, be sure to observe government and local requirements regarding vehicle lighting and trailer hitches or tow bars.

WARNING

A safety chain should always be used when you tow your vehicle.

NOTICE

Do not tow your vehicle with the rear wheels directly on the ground (and the transmission in neutral). If you do, the transmission will be damaged fatally.

NOTICE

Observe the following instructions when towing your vehicle.

- · To help avoid damage to your vehicle during towing, proper equipment and towing procedures must be used.
- · Using the frame hook, tow your vehicle on paved roads for short distances at low speed.

Before towing

80TM1000

If you tow your vehicle with the front wheels on the ground, shift the transmission into Neutral and make sure the 4WD indicator on the instrument cluster comes on when you use the transfer lever to shift into 4-wheel drive high range position ("4H") and goes off when you use the transfer lever to shift into 2-wheel high drive position ("2H") with the engine running. If the 4WD indicator does not come on or it does not go off, that means, the airlocking hubs cannot be locked or unlocked, the vehicle must be towed with the front wheels lifted and the rear wheels on a dolly.

Towing a Disabled Vehicle

If your vehicle is disabled, and if the steering and drive train are in good condition (and the engine can be started for 4WD vehicles), the vehicle can be towed according to the instructions in this section. Your vehicle may also be towed by a tow truck with the front or rear wheels lifted, according to the instructions below.

Front wheels lifted

Your vehicle may be towed by a tow truck with the front wheels lifted and a dolly under the rear wheels.

EMERGENCY SERVICE

80T100060

- (a) Vehicle without keyless push start system
- (b) Vehicle with keyless push start system

Rear wheels lifted

Your vehicle may be towed by a tow truck with the rear wheels lifted and the front wheels on the ground. Towing speed should not exceed 90 km/h (56 mph).

For this type of towing:

- Shift the manual transmission to Neutral or the automatic transmission to "P" position and start the engine.
- 2) Shift the transfer lever to 2WD position ("2H").
- 3) Make sure the 4WD indicator on the instrument cluster is turned off.

NOTICE

If the air-locking hubs cannot be unlocked, tow the vehicle with the rear wheels lifted and a dolly under the front wheels.

4) Turn the ignition key to the "ACC" position or change the ignition mode to ACC to stop the engine and to unlock the steering wheel.

NOTICE

The steering column lock is not strong enough to withstand shocks transmitted from the front wheels during towing.

5) Make sure the front wheels are facing straight forward and secure the steering wheel with a steering wheel clamping device designed for towing service.

Jacking Instructions

- 1) Place the vehicle on level, hard ground.
- 2) Set the parking brake firmly and shift into "P" (Park) if your vehicle has an automatic transmission, or shift into "R" (Reverse) if your vehicle has a manual transmission.

WARNING

- Be sure to shift into "P" (Park) for an automatic transmission vehicle, or into "R" (Reverse) for a manual transmission vehicle when you jack up the vehicle.
- Never jack up the vehicle with the transmission in "N" (Neutral). Otherwise, unstable jack may cause an accident.
- Turn on the hazard warning switch if your vehicle is near traffic.

59RN10010

 Block the front and rear of the wheel diagonally opposite to the wheel being lifted

80T100070

5) Prepare the jack (1), jack handle (2) and wheel wrench (3).

80T100040

- 6) Position the jack as shown in the illustration. Turn the jack handle mounting part clockwise by hand to unfold the jack and lightly contacts the jack-head hole (4) to the suspension arm boss (5) beneath the vehicle body.
- Check that the jack-head hole (4) fits in the suspension arm boss (5) by shaking the jack-head lightly by hand.

EMERGENCY SERVICE

80T100050

- 8) Install the jack handle to the jack.
- Turn the jack handle and carefully lift the vehicle until the tyre is slightly off the ground. Do not raise the vehicle more than necessary.

WARNING

- Use the jack only to change wheels on level, hard ground.
- Never jack up the vehicle on an inclined surface.
- Never raise the vehicle with the jack in a location other than between the frame bosses near the wheel to be changed.
- Make sure that the jack is raised at least 25 mm before it contacts the boss. Use of the jack when it is within 25 mm of being fully collapsed may result in failure of the jack.
- Do not use wooden blocks or similar objects as a jack underlay.
- No person should place any portion of their body under a vehicle that is supported by a jack. Never place your hands or feet under the raised vehicle when it is supported by a jack.
- Never run the engine when the vehicle is supported by the jack and never allow passengers to remain in the vehicle.

Raising Vehicle with Garage Jack

- Apply the garage jack to one of the points indicated below.
- Always support the raised vehicle with jack stands (commercially available) at the points indicated below.
- (1) Front
- (2) Jack stand
- (3) Rear
- (4) Garage jack
- (5) Jacking point for garage jack

WARNING

As the vehicle may get damaged or an accident may occur, observe the following points.

- Observe the designated points shown in the illustration.
- When holding the lifted vehicle, use the jack stand.
- When jacking up the front side or the rear side only, put a chock (commercially available) on front and back of the grounded tyre.

80T100030

Changing Wheels

WARNING

Never change a wheel in traffic lane. Always move the vehicle off the road on level, hard ground away from traffic for changing a wheel. For any further assistance contact your nearest Maruti Suzuki authorized workshop.

To change a wheel, use the following procedure:

80T100070

1) Prepare the jack (1), jack handle (2), wheel wrench (3).

80T070520

2) Remove the spare wheel half cover (4).
 Remove the center nut by turning it counterclockwise with the wheel

wrench (5).

80T070530

 Remove three wheel nuts of the spare wheel by turning them counterclockwise with the wheel wrench (5).

4) Remove the spare wheel with both hands

NOTICE

Carefully lower the spare wheel to the ground.

- 5) Loosen the wheel nuts, but do not remove them.
- 6) Jack up the vehicle (refer to the "Jacking Instructions" in this section).

WARNING

- Shift into "P" (Park) for an automatic transmission, or into "R" (Reverse) for a manual transmission vehicle when you jack up the vehicle.
- Never jack up the vehicle with the transmission in "N" (Neutral). Otherwise, unstable jack may cause an accident.

A CAUTION

Immediately after the vehicle has been driven, the wheels, the wheel nuts and the area around the brakes might be extremely hot. Touching these areas may cause burn injury Do not touch these areas, immediately after the vehicle has been driven.

7) Remove the wheel nuts and wheel.

80T100090

- 8) Before installing the new wheel, clean any mud or dirt off from the surface of the wheel (6), hub (7), thread part (8), surface of the wheel nuts (9) and surface of the wheel holes (10) with a clean cloth. Clean the hub carefully; it may be hot from driving.
- 9) Install the new wheel and replace the wheel nuts. Tighten each nut snugly by hand until the wheel is securely seated on the hub.

80T100010

Tightening torque for wheel nut: 100 Nm (10.0 kg-m, 72.3 lb-ft)

10)Lower the jack and fully tighten the nuts in a crisscross fashion with a wrench as shown in the illustration.

WARNING

Use genuine wheel nuts and tighten them to the specified torque as soon as possible after changing wheels. Incorrect wheel nuts or improperly tightened wheel nuts may come loose or fall off, which can result in an accident. If you do not have a torque wrench, have the wheel nut torque checked by a Maruti Suzuki authorized workshop.

EMERGENCY SERVICE

80T070510

- 11)Check the direction of the bracket (11) attached to the spare wheel carrier (12).
 - The "195" mark (A) should be facing up.

NOTE:

If you install the bracket upside down, the center nut of the spare wheel half cover will not tighten securely.

80T070540

- 12)Install the spare wheel to the spare wheel carrier (12).
 - Hold the spare wheel firmly in both hands and align the bolts of the spare wheel carrier (12) with the wheel holes (three locations).
- 13)Tighten the wheel nuts (13) evenly and securely with the wheel wrench.
- 14)Check that the wheel nuts (13) are securely tighten.

80T070550

- 15)Install the spare wheel half cover (4).
 - Align the hole of the spare wheel half cover with the bolt of the bracket (11) so that the hole of the cover is positioned below the center of the spare wheel half cover as shown in the illustration.
 - Tighten the center nut (14) securely with the wheel wrench.

NOTICE

Do not tighten the nut more than necessary. The spare wheel half cover may be damaged.

Jump-starting Instructions

WARNING

- · Never attempt to jump-start your vehicle if the lead-acid battery appears to be frozen. Batteries in this condition may explode.
- · When making jump lead connections, check that your hands and the jump leads remain clear from pulleys, belts or fans.
- · Lead-acid batteries produce flammable hydrogen gas. Keep flames and sparks away from the battery or an explosion may occur. Never smoke when working near the battery.
- · If the booster battery you use for jump-starting is installed in another vehicle, check that the two vehicles are not touching each other.
- If your lead-acid battery discharges repeatedly, for no apparent reason, have your vehicle inspected by a Maruti Suzuki authorized workshop.
- · To avoid harm to yourself or damage to your vehicle or battery, follow the jump-starting instructions below.

If you are in doubt, call for qualified road service.

NOTICE

Your vehicle should not be started by pushing or towing. This starting method could result in permanent damage to the catalytic converter. Use jump leads to start a vehicle with a weak or flat battery.

- 1) Use only a 12-volt lead-acid battery to jump-start your vehicle. Position the good 12-volt lead-acid battery close to your vehicle so that the jump leads will reach both batteries. When using a battery installed on another vehicle, check that two vehicles do not touch each other. Set the parking brakes fully on both vehicles.
- 2) Turn off all vehicle accessories, except those necessary for safety reasons (for example, headlights or hazard lights).

- 3) Connect jump leads as follows:
 - 1. Connect one end of the first jump lead to the positive (+) terminal of the discharged battery (1).
 - 2. Connect the other end to the positive (+) terminal of the booster battery
 - 3. Connect one end of the second jump lead to the negative (-) terminal of the booster battery (2).
 - 4. Make the final connection to an unpainted, heavy metal part (3) of engine cylinder head in the vehicle with the discharged battery (1).

WARNING

Never connect the jump lead directly to the negative (-) terminal of the discharged battery, or an explosion may occur.

A CAUTION

Connect the jump lead to the engine mount bolt securely. If the jump lead disconnects from the engine mount bolt because of vibration at the start of the engine, the jump lead could be caught in the drive belts.

- 4) If the booster battery you are using is fitted to another vehicle, start the engine of the vehicle with the booster battery. Run the engine at moderate speed.
- 5) Start the engine of the vehicle with the discharged battery.
- Remove the jump leads in the exact reverse order in which you connected them.

Running Out of Battery

In the following cases, the lead-acid battery is running out.

- The starter does not engage when attempting to turn on the engine. Or, the starter rotation is too weak to make the engine start.
- The headlight illumination is extremely low or the horn volume is low.

If You Get a Flat Tyre While Driving

Firmly hold the steering wheel and carefully apply the brakes to slow down the vehicle and stop it in a safe place.

Engine Trouble: Starter Does not Operate

- 1) Try turning the ignition switch to "START" position or try pressing the engine switch to change the ignition mode to START with the headlights turned on to determine the lead-acid battery condition. If the headlights go excessively dim or go off, it usually means that either the lead-acid battery is discharged or the battery terminal contact is poor. Recharge the lead-acid battery or correct battery terminal contact as necessary.
- 2) If the headlights remain bright, check the fuses. If the reason for failure of the starter is not obvious, there may be a major electrical problem. Have the vehicle inspected by a Maruti Suzuki authorized workshop.

Engine Trouble: Does not Start

Make sure that your vehicle has enough fuel and battery.

If the engine does not start under very cold condition, press the accelerator pedal all the way to the floor and hold it while cranking the engine.

Refer to "Starting / Stopping Engine (Vehicle without Keyless Push Start System)" or "Starting / Stopping Engine (Vehicle with Keyless Push Start System)" in "OPERATING YOUR VEHICLE" section.

If the engine still does not start have your vehicle inspected by a Maruti Suzuki authorized workshop.

 Do not operate the starter motor for more than 12 seconds.

(Vehicle with keyless push start system)

NOTE:

If the engine refuses to start, the starter motor automatically stops after a certain period of time. After the starter motor has automatically stopped or if there is anything abnormal in the engine starting system, the starter motor runs only while the engine switch is held pressed.

Engine Trouble: Overheating

The engine could overheat temporarily under severe driving conditions. If the high engine coolant temperature warning light comes on as overheating during driving:

- 1) Turn off the air conditioner.
- 2) Take the vehicle to a safe place and park.
- Run the engine at a normal idle speed for a few minutes until the high engine coolant temperature warning light goes off.

WARNING

If you see or hear escaping steam, stop the vehicle in a safe place and immediately turn off the engine to cool it. Do not open the hood when steam is present. When the steam can no longer be seen or heard, open the hood to see if the coolant is still boiling. If it is, you must wait until it stops boiling before you proceed.

If the high engine coolant temperature warning light does not go off:

- Turn off the engine and check that the water pump belt and pulleys are not damaged or slipping. If any abnormality is found, correct it.
- 2) Check the coolant level in the reservoir. If it is found to be lower than "LOW" line, check radiator, water pump, radiator hoses and heater hoses for leakage. If leakage that may cause overheating is found, do not run the engine until these problems have been corrected.
- If leakage is not found, carefully add coolant to the reservoir and then the radiator, if necessary. (Refer to "Engine Coolant" in "INSPECTION AND MAIN-TENANCE" section.)

NOTE:

If engine overheats and you are not sure what to do, consult with a Maruti Suzuki authorized workshop.

79J007

WARNING

- It is hazardous to remove the radiator cap when the water temperature is high, because scalding fluid and steam may be blown out under pressure. The cap should only be taken off when the coolant temperature has lowered.
- To help prevent personal injury, keep hands, tools and clothing away from the engine cooling fan and air-conditioner fan. These electric fans can automatically turn on without warning.

Warning Triangle

55T100010

In case of vehicle break-down or during emergency stopping, where, your vehicle could become a potential traffic hazard, keep the warning triangle, provided with your vehicle, on the road free from any obstacles behind your vehicle so as to warn the approaching traffic, at an approximate distance of 50–100 m (164–328 ft). The reflecting side of the triangle should face the oncoming traffic. Please activate the hazard warning lamps before alighting the vehicle to keep the warning triangle.

55T100020

- Remove the warning triangle carefully from the cover as shown by arrow (1).
- Open both the reflector arms as shown by arrow (2) and lock the arms with each other with the clip provided in the right arm. Open the bottom stand in counter clock-wise direction as shown by arrow (3). Position the warning triangle behind the vehicle on a plain surface.
- Reverse the removal procedure for keeping inside the cover.

55T100030

EMERGENCY SERVICE						
MEMO						

APPEARANCE CARE

APPEARANCE CARE

Corrosion Prevention	11-1
Cleaning Exterior	11-2
Cleaning Interior	11-7

Corrosion Prevention

It is important to take good care of your vehicle to protect it from corrosion. Listed below are instructions for how to maintain your vehicle to prevent corrosion. Please read and follow these instructions carefully.

Important Information about Corrosion

Common causes of corrosion

- Accumulation of road salt, dirt, moisture or chemicals in hard-to-reach areas of the vehicle underbody or frame.
- Chipping, scratches and any damage to treated or painted metal surfaces resulting from minor accidents or abrasion by stones and gravel.
- 3) Any or all of the below mentioned points:
- · Continuous exposure to sunlight.
- Hard water & sea water coming in contact with vehicle.
- · Foot rubbing (skirting).

Environmental conditions which accelerate corrosion

- Road salt, dust control chemicals, sea breeze or industrial pollution will all accelerate the corrosion of metal.
- High humidity will increase the rate of corrosion particularly when the temperature range is just above the freezing point.

- Moisture in certain areas of a vehicle for an extended period of time may promote corrosion even when other body sections are completely dry.
- 4) High temperatures will cause an accelerated rate of corrosion to parts of the vehicle which are not well-ventilated to permit quick drying.

This information illustrates the necessity of keeping your vehicle (particularly the underbody) as clean and dry as possible. It is equally important to repair any damage to the paint or protective coatings as soon as possible.

How to Help Prevent Corrosion

WARNING

Do not apply additional undercoating or rust preventive coating on or around exhaust system components such as the catalytic converter and the exhaust pipes. It may catch a fire if the undercoating substance becomes overheated.

Wash your vehicle frequently

The best way to preserve the finish on your vehicle and to help avoid corrosion is to keep it clean with frequent washing. Wash your vehicle at least once during the winter and once immediately after the winter. Keep your vehicle, particularly the underside, as clean and dry as possible. If you frequently drive on salted roads, your vehicle should be washed at least once a month during the winter. If you live near the ocean, your vehicle should be washed at least once a month throughout the year.

For washing instructions, refer to "Cleaning Exterior" in this section.

Remove foreign material deposits

Foreign materials such as salts, chemicals, road oil or tar, tree sap, bird droppings and industrial fall-out may damage the finish of your vehicle if it is left on painted surfaces. Remove these types of deposits as quickly as possible. If these deposits are difficult to wash off, an additional cleaner may be required. Check that any cleaner you use is not harmful to painted surfaces and is specifically intended for your purposes. Follow the manufacturer's directions when using these special cleaners.

Repair finish damage

Carefully examine your vehicle for damage to the painted surfaces. Should you find any chips or scratches in the paint, touch them up immediately to prevent corrosion from starting. If the chips or scratches have gone through to the bare metal, have a qualified body shop make the repair.

Keep passenger and luggage compartments clean

Moisture, dirt or mud can accumulate under the floor mats and may cause corrosion. Occasionally, check under these mats to ensure that this area is clean and dry. More frequent checks are necessary if the vehicle is used for off-road driving or in wet weather.

Certain cargos such as chemicals, fertilizers, cleaners, salts, etc. are extremely corrosive by nature. These products should be transported in sealed containers. If they are spilled or leaked, clean and dry the area immediately.

Park your vehicle in a dry, well-ventilated area

Park your vehicle to save it from continuous exposure to direct sunlight. Do not park your vehicle in a damp, poorly-ventilated area. If you often wash your vehicle in the garage and place it there in wet condition, your garage may be damp. The high humidity in the garage may cause or accelerate corrosion. A wet vehicle may corrode even in a heated garage if the ventilation is poor.

Use mud and gravel shields

Use mud and gravel shields

The use of mud and gravel shields will help protect your vehicle, especially if you frequently drive on gravel or salted roads. Full-size shields, which extend as close to the road as is practical, are the best. The fittings for such shields should also be corrosion resistant. Please check with your Maruti Suzuki authorized workshop for information on these shields.

Cleaning Exterior

For Keeping the Paintwork Beautiful

To keep your vehicle's beautiful appearance for a long term, daily care is important.

- For parking and storing the vehicle, we recommend garages with good ventilation and locations with roofs.
- The following situations may cause rusting and discoloration of the paint. Wash your vehicle promptly.
 - When driving in coastal areas or on roads sprayed with antifreeze agent (Wash the underside of the vehicle and around the wheel wells especially)
 - When bird droppings, dead insects, sap, iron dust, soot or smoke residue, coal tar, etc., adhere to the paint or when the vehicle gets wet with acid rain
 - When the vehicle is dirty with dust or mud
- Give the vehicle a wax about once a month or whenever the water-repelling ability of the painted surfaces has declined. Follow all instructions on the package of the wax (sold separately).

APPEARANCE CARE

NOTE:

Do not use wax on plastic parts that are not coated. Waxing these surfaces could result in a whitened or uneven appearance.

80J302

 Chips from flying rocks, scratches, etc. can cause rust. Repair these areas as soon as possible.

NOTICE

- When repairing scratches on painted surfaces, consult with a Maruti Suzuki authorized workshop. Using an inappropriate material for repair could cause damage to the paint.
- It is important that your vehicle be kept clean and free from dirt. Failure to keep your vehicle clean may result in fading of the paint or corrosion to various parts of the vehicle body.

Washing

WARNING

- Never attempt to wash and wax your vehicle with the engine running.
- When cleaning the underside of the body and fender, where there may be sharp-edged parts, wear gloves and a long-sleeved shirt to protect your hands and arms from being cut.
- After washing your vehicle, carefully test the brakes before driving to check that they have maintained their normal effectiveness.

NOTICE

84S09240

 When washing or waxing the vehicle, do not lean on the vehicle body or do not push it hard.
 This might cause it to deform.

(Continued)

NOTICE

(Continued)

80T030330

 When washing or waxing the vehicle, do not put your foot on the side sill splash guard (1).
 This might cause it to damage.

Washing by hand

0J303

When washing the vehicle, park it in the place where direct sunlight does not fall on it as much as possible and follow the instructions below:

 Flush the underside of body and wheel housings with pressurized water to remove mud and debris. Use plenty of water.

NOTICE

When washing the vehicle:

- Avoid directing steam or hot water of more than 80°C (176°F) on plastic parts.
- Getting water or other liquids into the engine components may cause an engine starting problem or an electrical components to fail.

To avoid damaging engine components, do not spray the engine components with water or other liquids.

80TM11001

2) Rinse the body to loosen the dirt. Remove dirt and mud from the body exterior with running water. You may use a soft sponge or brush. Do not use hard materials which can scratch the paint or plastic. Remember that the headlight covers or lenses are made of plastic in many cases.

NOTICE

To avoid damage to the paint or plastic surface, do not wipe the dirt off without ample water. Follow the above procedure.

APPEARANCE CARE

3) Wash the entire exterior with a mild detergent or car wash soap using a sponge or soft cloth. The sponge or cloth should be frequently soaked in the soap solution.

NOTICE

When using a commercial car wash product, observe the cautions specified by the manufacturer. Never use strong household detergents or soaps.

- 4) Once the dirt has been completely removed, rinse off the detergent with running water.
- Wipe off the vehicle body with a wet chamois or cloth and allow it to dry in the shade.
- 6) Check carefully for damage to painted surfaces. If there is any damage, touch up the damage following the procedure below:
 - 1. Clean all damaged spots and allow them to dry.
 - Stir the paint and touch up the damaged spots lightly using a small brush.
 - 3. Allow the paint to dry completely.

Washing by an automatic car wash

NOTICE

If you use an automatic car wash, check that your vehicle's body parts, such as antenna, cannot be damaged. If you are in doubt, consult the car wash operator for advice.

Washing by a high-pressure cleaner

NOTICE

If you use a high-pressure cleaner, keep away the nozzle from your vehicle sufficiently.

- Pointing the nozzle to the surrounding parts of camera can allow water to enter the camera.
 - This may cause a fire, malfunction, dew condensation, etc.
- For vehicle with rear view camera, do not point to the nozzle to the camera.
- Bringing the nozzle to your vehicle too close or pointing the nozzle to the opening of front grill or bumper etc. can cause damage and malfunction of the vehicle body and parts.
- Pointing the nozzle to door glasses and door frames can allow water to enter the cabin.

Caring for the Windshield

If an oil film, etc. adheres to the windshield and the windshield wipers cannot clean it, use a glass cleaner (sold separately) to clean the windshield by hand.

Caring for Lights

Wash the lens part of light and wipe it off with a soft cloth.

NOTICE

- Do not use the detergent including organic solvent on the lens surface of the light. The lens surface may be cracked.
 - If you use the detergent including organic solvent, rinse it off with ample water.
- Do not wipe the lens surface by wax or a hard brush. This may damage the lens or hasten its deterioration.

Caring for Cameras

Wash the lens part of camera and wipe it off with a soft cloth. If the lens part is very dirty, use a mild detergent.

NOTICE

- Using alcohol, benzine, thinner etc. to wipe the camera may cause discoloration.
 - When you wipe the camera, do not use alcohol, benzine, thinner etc.
- Hard coating is used for the lens of camera not to be easily scratched. However, if you use the brush for a vehicle, it may be difficult for you to see the image on the camera. Be very careful not to scratch the lens.
- The resin cover of the camera may be damaged if an organic solvent adheres to the camera.
 Do not let organic solvent, body wax, oil film remover, or glass coating agent adhere to the product.
- If the camera is subjected to a sudden temperature change, it may be damaged.
 - Do not expose the camera to sudden temperature changes such as melting frozen snow with hot water.

Caring for Aluminum Wheels

NOTE:

- Do not use an acidic or alkaline detergent, or a cleaner containing petroleum solvent to wash aluminum wheels. These types of cleaners will cause permanent spots, discoloration and cracks on the finished surface and damage to the center cap.
- Do not use a bristle brush and a soap containing an abrasive material. These will damage the finished surface.

Waxing

60G412

After washing the vehicle, waxing and polishing are recommended to further protect and beautify the paint.

- Only use waxes and polishes of good quality.
- When using waxes and polishes, observe the precautions specified by the manufacturers

Cleaning Interior

- Clean out any dirt, sand, etc. using a vacuum cleaner, or wipe off the surfaces using a soft cloth moistened with cold or lukewarm water. If the interior is left dirty, scratches can occur.
- Quickly clean off any liquids such as those from air fresheners or spilled beverages by using tissue paper or a soft cloth. Leaving spilled liquids can cause staining, discoloration or cracking.

WARNING

 Do not spray the interior with water or other liquids. If the navigation equipment, audio components, switches, wiring under the floor, or other electrical parts become wet, there is a risk of fire or malfunction, and the SRS airbag system could fail to function normally.

If you pour water or spill a drink in the vehicle, consult with a Maruti Suzuki authorized workshop as soon as possible for inspection.

NOTICE

- Do not use chemical products containing the following ingredients.
 Doing so may cause staining, discoloration, deformation, or a deterioration in strength, etc.
 - Solvents such as benzine, gasoline, thinner, or sticker peeling agents
 - Acidic or alkaline detergents
 - Bleaches or dyes
- Do not use chemical products that include silicone for cleaning the areas around the air conditioner, electronic equipment such as the audio or navigation systems or switches. Contact with silicone may cause them to malfunction.
- Do not leave colored leather goods, furs, vinyl articles, etc. in your vehicle for long periods. Doing so could cause discoloration or deformation of the interior.

NOTE:

To prevent liquid-based air fresheners from spilling, it is recommended to fix their containers in place, or use solid-type air fresheners instead.

Vinyl Upholstery

Prepare a solution of soap or mild detergent dissolved in warm water. Apply the solution to the vinyl with a sponge or soft cloth and let it soak for a few minutes to loosen dirt.

Rub the surface with a clean, damp cloth to remove dirt and the soap solution. If some dirt still remains on the surface, repeat this procedure.

Fabric Upholstery

Remove loose dirt with a vacuum cleaner. Using a mild soap solution, rub stained areas with a clean damp cloth. To remove soap, rub the areas again with a cloth dampened with water. Repeat this until the stain is removed, or use a commercial fabric cleaner for tougher stains. If you use a fabric cleaner, carefully follow the manufacturer's instructions and precautions.

Leather Upholstery

Remove loose dirt with a vacuum cleaner. Using a mild soap or saddle soap solution, wipe dirt off with a clean damp soft cloth. To remove soap, wipe the areas again with a soft cloth dampened with water. Wipe the areas dry with a soft dry cloth. Repeat this until the dirt or stain is removed, or use a commercial leather cleaner for tougher dirt or stains. If you use a leather cleaner, carefully follow the manufacturer's instructions and precautions. Do not use solvent type cleaners or abrasive cleaners.

NOTE:

- In order to keep the leather upholstery looking good, it should be cleaned at least twice a year.
- If the leather upholstery becomes wet, immediately wipe it dry with a tissue paper or a soft cloth. Water may cause the leather to harden and shrink if it is not wiped off.
- When parking on sunny days, select a shady place or use a sunshade. If the leather upholstery is exposed to the direct sunlight for a long time, it may discolor and shrink.
- As is common with natural materials, leather is inherently irregular in grain and cowhide has spots in its natural state. These do not affect the performance of the leather in any way.

Seat Belts

Clean seat belts with mild soap and water. Do not use bleach or dye on the belts. They may weaken the fabric of the belts.

Vinyl Floor Mats

Ordinary dirt can be removed from vinyl with water or the mild soap. Use a brush to help loosen dirt. After the dirt is loosened, rinse the mat thoroughly with water and dry it in the shade.

Carpets

Remove the dirt and soil as much as possible with a vacuum cleaner. Using a mild soap solution, rub stained areas with a clean damp cloth. To remove soap, rub the areas again with a cloth dampened with water. Repeat this until the stain is removed, or use a commercial carpet cleaner for tougher stains. If you use a carpet cleaner, carefully follow the manufacturer's instructions and precautions.

APPEARANCE CARE

Instrument Panel and Console

Remove loose dirt with a vacuum cleaner. Gently wipe dirt off with a tightly squeezed damp clean cloth. Repeat this until the dirt is removed.

WARNING

Do not use chemical products that contain silicon to wipe electrical components such as the air conditioning system, audio, navigation system, or other switches. These will cause damage to the components. Do not spray water or any liquid directly on instrument cluster or any other electrical or electronic components. This may cause damage and/or lead to non-functioning of the part or may cause fire.

80TM11002

Inside of the Tailgate Window

NOTE:

Wipe the window along the antenna wires or heat wires by a soft cloth dampened with water to avoid damaging these wires.

SPECIFICATIONS

Vehicle Identification

Chassis Serial Number

80T120030

tion plate.

80T120040

The chassis and/or engine serial numbers are used to register the vehicle. They are also used to assist a Maruti Suzuki authorized workshop when ordering or referring to special service information. Whenever you have occasion to consult a Maruti Suzuki authorized workshop, remember to identify your vehicle with this number. Should you find the number difficult to

read, you will also find it on the identifica-

Engine Serial Number

80T120020

The engine serial number is stamped on the cylinder block as shown in the illustration.

FASTag (if equipped)

As per Ministry of Road Transport and Highways, the FASTag (1) is mandatory for each vehicle for the purpose of electronic toll collection or any other purpose as may be defined by the Government of India.

In case of any damage to FASTag or replacement of front windscreen, please contact your nearest Maruti Suzuki authorized workshop.

As seen from inside of the vehicle

NOTE:

The picture shown is for indicative purpose only. Internal structure of actual device mounted on vehicle may be different.

As seen from outside of the vehicle

NOTE:

The picture shown is for indicative purpose only. Internal structure of actual device mounted on vehicle may be different.

NOTE:

- Any attempt to remove the tag from the windscreen will result in permanent damage to the tag.
- Use of chemical cleaners to clean the windscreen area where the tag is mounted can damage the tag.
- Use of any sharp objects on the tag can damage the tag.

High Security Registration Plate (HSRP) (if applicable)

As per Ministry of Road Transport and Highways, every new vehicle must have HSRP.

HSRP contains;

- Front and rear HSRP, which will be fitted with 2 snap-locks each on number plate area.
- Third license plate on front windshield.

Third License Plate

80TM12002

(1) Third license plate

Third license plate - As seen from outside of the vehicle

80T120090

- (a) HSRP issuing authority name
- (b) Vehicle registration number
- (c) Unique laser number Front plate
- (d) Unique laser number Rear plate
- (e) Date of 1st registration
- (in DD-MM-YYYY format)
- (f) Green strips (BS6 vehicle)

NOTE:

The picture shown is for indicative purpose only. Internal structure of actual label mounted on vehicle may be different.

NOTE:

 Any attempt to remove the third license plate from the windscreen will result in permanent damage to the label.

- Use of chemical cleaners to clean the windscreen area where the label is mounted can damage the same.
- Use of any sharp objects on the label can damage the label.
- In the event of any replacement of the third license plate, may please contact the approved authority.

Third license plate - As seen from inside of the vehicle

Notice

It is unlawful for any person to duplicate, alter, change, deface, destroy, multilate, remove, tear down this Third Registration Plate Sticker, except if done by authority of law. Do not wipe with harsh abrasive materials, detergents, etc. as it may deface or damage this Sticker.

80T120100

NOTE:

The picture shown is for indicative purpose only.

NOTE:

Color of third license plate (back) is as per HSRP regulation as defined by Ministry of Road Transport and highways.

Fuel Recommendation Petrol Engine

To avoid damaging catalytic converter, you must use unleaded petrol with an octane number (RON) of 91 or higher.

Gasoline/Ethanol blends

Blends of unleaded gasoline and ethanol (grain alcohol), also known as gasohol, are commercially available in certain areas. Blends of this type are recommended for this vehicle if they are no more than 10% ethanol. The vehicle may also be plied with blend of no more than 20% ethanol.

NOTE:

If you are not satisfied with the driveability or fuel economy of your vehicle when you are using 20% ethanol blend, you should switch back to blend of no more than 10% ethanol.

Gasoline containing MTBE

Unleaded gasoline containing MTBE (methyl tertiary butyl ether) may be used in your vehicle if the MTBE content is not greater than 15%. This oxygenated fuel does not contain alcohol.

A CAUTION

Use of spurious, low quality, adulterated fuel can cause damage to the engine and engine auxilliaries, affect functioning of engine and degrade engine performance including but not limited to engine seizure.

NOTICE

- The fuel tank has an air space to allow for fuel expansion in hot weather. If you continue to add fuel after the filler nozzle has automatically shut off or an initial blowback occurs, the air chamber will become full. Exposure to heat when fully fuelled in this manner will result in
- leakage due to fuel expansion. To prevent such fuel leakage, stop filling after the filler nozzle has automatically shut off, or when initial vent blowback occurs, if using an alternative non-automatic system.
- Be careful not to spill fuel containing alcohol while refueling. If fuel is spilled on the vehicle body, wipe it up immediately. Fuels containing alcohol can cause paint damage, which is not covered under the New Vehicle Limited Warranty.
