

THWACK™ SFX 5000

THWACK™ JFX 3000

Ex World Champion Xiong Guobao or Backhand King, his nickname from his playing days is a legend of the game of badminton. He has won thirteen international titles in the game. But his most vital contribution to the sport is his patented design launched in collaboration with Thwack. **The SFX for seniors and JFX rackets for juniors.** A scientifically developed racket design that can make a difference in the way the sport is played.

Coach Guobao realized that an incorrect grip was the reason why people couldn't develop their backhand. So we developed a unique embedded fingerprint grip to make it easy for the player. The grip literally hand holds the player through the various skills of force generation for backhand or forehand. Even advanced strokes such as a backhand clear/smash, backhand sliding drop shot, become easy to master.

THWACK SUPER 5 SERIES

High Performance Badminton Rackets

Rackets with exceptional hitting power, control & reflexes.

Each racket is designed keeping specific playing styles in mind like for offensive, defensive, hard hitting, overall play, net play..etc

The end product goes through rigorous technical quality control tests to ensure optimum results and personal recommendations from experts like Ex World Champion Xiong Guobao.

Every racket comes with a:

Quadra Point Response system (QPR):

Thwack has exclusively developed the Quadra-Point Response (QPR) technology introduced on the four sides of the hitting frame for exceptional handling and raw hitting power. This technology stands way ahead against the standard rackets which give lesser handling and control.

Extended Frame Design (EFD):

The EFD has been effectively used across all Thwack Badminton Rackets to increase the sweet spot area and help in effectively playing off centre shots.

Ergo Shaped Frame Design:

We have designed the best ergo shape design for the frame for optimum performance which is a combine of a box frame at the top and a girder shaped grove design for superior control.

Dyna Air Frame:

Dynamic Air Resistance Frame helps faster swings resulting in accurate shots without loss of any power.

The Dyna Air frame helps wind travel through faster resulting in better control and lesser pressure on swing and improved performance.

HEAD™ SUPER 5 SERIES **COUNTERSTRIKE**

Super Reflex: An excellent racket for defensive strokes, blocking, drops and net play.

Weight	Length	Balance	RA(Hardness)	Shaft Flex	String tension
83-87 g	675mm	285.00	8.0 -8.5	Medium	22-28 lbs
