GENUINE ACCESSORIES PRODUCT DEVELOPMENT

All Triumph Genuine Accessories go through a full testing and development process to ensure industry leading levels of quality, reliability and safety.

CONCEPT

Customer and dealer feedback, design clinics attended by riders and in-house knowledge are pooled together to create the ideal range of Accessories for each new model.

What many people do not realise is that the concept stage for Accessories takes place at exactly the same time as the bikes. How else can we ensure they work so harmoniously together?

TECHNICAL DESIGN AND STYLING

Once a design concept has been chosen it is then down to the business of making it a reality. Production materials and methods need to be appraised at this early stage, as they will have an affect on the ultimate styling and function of the product.

There is a process of prototyping, testing, reviewing and making any changes necessary to make sure the product looks and performs as it should.

TESTING AND QUALITY

All Triumph Accessories go through a gruelling, and often destructive, series of tests. This way we can be sure that the Accessories are up to the job.

Take Pavé testing for example. This involves riding a bike over rough cobbles, such as you may find in quaint Belgian towns (only potholed, uneven and extremely bumpy) to simulate the enormous mileages that a bike and its Accessories may find itself doing.

The lucky accessory will also find itself being subject to humidity and salt tests, UV and X-rays, cosmetic inspections and numerous other tests dependant on the product.

For approved exhaust systems this process involves the development of a bespoke engine tune for each exhaust to ensure the engine and silencer perform at the optimum level.

Rest assured that Triumph Accessories perform as intended.

AFTERSALES

Why do we go to these lengths with our Accessories? The answer is simple.

We want to be sure that our range offers the high levels of reliability, quality and performance our customers expect.

As a result we're pleased to offer a full 2 year warranty on all Triumph Genuine Accessories.

TIGER
EXPLORER

EXPLORER PANNIER SYSTEM

✂ 1.0

Fully weatherproof injection moulded construction, single key locking mechanism that is matched to the ignition key. Supplied complete with mounting hardware and dynamic mounting system. Capacity LH 37 Litres, RH 25Litres. Can accommodate a full face helmet in LH pannier. 5kg Load Limit per pannier.

A9508119

EXPLORER TOP BOX (POWERED)

✂ 02

Fully weatherproof injection moulded construction, single key locking mechanism that is matched to the ignition key. Features integrated electrical connection with integral 12v power socket for convenient charging. Requires sliding Carriage, A9508162. 36 Litre Capacity with 10kg load limit.

T2351060

SLIDING CARRIAGE

✂ 0.5

Sliding carriage to allow installation of Explorer Top Box, T2351060. Features include an automatic electrical connection to Top Box and integral sliding mechanism to aid stability.

A9508162

PANNIER/TOP BOX INNER BAG

✂ 0.0

LH Pannier Inner Bag available singularly for use with Adventure Top Box.

A9501031

PANNIER INNER BAG KIT (PAIR)

✂ 0.0

Waterproof roll top bags designed for Triumph Adventure Luggage. Roll top sealing with nylon clips. Supplied with integral carry handle and detachable shoulder straps.

A9501033

TOP BOX BACK REST PADS

✂ 0.3
