Dear Mr. Verma

21

Greetings from Audi Mumbai South

We thank you for your trailing email.

At the onset, we do understand the inconvenience caused to yourself due to the reported concerns.

Mr. Verma, we would like to apprise you that the water content and foreign material is observed in the fuel tank of the vehicle. We have also inspected the fuel filler neck for any possible leakages, however, we have observed no leakages from the filler neck. The possibility of water seepage into the fuel tank is only through the fuel filler neck. We have also inspected fuel lines for any form of damages or leakages, however we have observed no leakages. Based on our observations, Mr. Verma, it is conclusive that the water and foreign materials have seeped into the fuel tank through the fuel. We request your kind understanding in this regards.

The following repairs needs to be performed on your Audi:

- Fuel tank cleaning
- Replacement of fuel pump located in the fuel tank and fuel filter
- Replacement of fuel injectors, fuel distributor rail and high pressure fuel pump.

↳ Not replaced in Jan 2014

We have attached the estimate for necessary repairs for your ready reference. We request you to please accord your approval for the same allowing us to procure the spares. We would require 8 to 10 working days for procuring the spares subject to receipt of approval

Mr. Verma, if required by your goodself, at your behest we can have the fuel tested by an external authorized agency. The approximate expense for this test would be approximately Rs. 30,000/- (Excl. Taxes)

Please feel free to contact us for any further clarifications you may require.
