CAR BROCHURE

Maruti WagonR

Your Favourite WagonR Now Available in CNG.

The new WagonR Green offers you an eco-friendly and fuel efficient drive.

The blue-eyed boy

WAGONR Green

Next generation CNG technology is the smart way to stay ahead.

There's even more to fall in love with in the new WagonR. State-of-the-art CNG technology featuring Intelligent Gas Port Injection system or I-GPI. Fully compliant with BS IV norms, powerful and fuel-efficient, the new WagonR Green is the car for you.

I-GPI

CNG is the least expensive fuel option available, and gives you the lowest running cost compared to conventionally fuelled cars.

What makes I-GPI a smarter CNG technology

- ★ CNG is injected into different parts of the engine near the combustion chamber, which results in homogenous combustion.
- ★ The quantity of CNG that is injected into the engine, as well as the change over from petrol to CNG are both intelligently controlled.
- ★ Dual onboard computers to give enhanced and pleasurable performance in both CNG & Petrol mode.

Your new WagonR Green comes with the following additional features as compared to gasoline cars:

- ★ Equipped with MSIL CNG, powered by I-GPI technology.
- ★ A parcel tray for greater storage.
- ★ A 'GREEN' decal.

The new WagonR Green is a smarter choice in many other ways as well. It offers higher levels of reliability, safety and convenience, complete with advanced technology.

Read on to find out more.

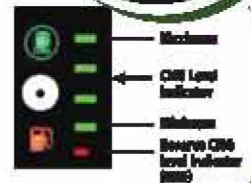

MODIFIED SUSPENSION

SPECIAL MATERIAL IN ENGINE PARTS

EASY CHANGE OVER SWITCH

Smarter Ideas for enhanced safety and reliability

- ★ WagonR Green has been specially designed keeping in mind safety of passengers. The vehicle has been evaluated to meet stringent test conditions.
- ★ High pressure CNG pipes and joints are made of stainless steel, which provides additional safety against vibration, corrosion and leakage.
- ★ The car's body has been designed to take on the added weight and load of the CNG system, while also ensuring a safe layout.
- ★ A micro-switch that cuts off fuel supply is provided in the fuel lid, which prevents accidental starting of the vehicle during CNG refuelling.
- ★ All CNG system related harnesses are integrated with main harnesses, which ensure safety against fire.
- ★ Every WagonR Green comes with a fire extinguisher for added safety.

Smarter Ideas for greater convenience and comfort

- ★ The CNG refuelling process is easy as the filling nozzle is positioned in the fuel box adjacent to the petrol filling nozzle.
- ★ The CNG cylinder frame has been specifically designed to facilitate easy removal of spare tyre by simply folding the rear seat.
- ★ The CNG cylinder is covered with a convenient parcel tray which increases your storage options while also hiding the cylinder out of sight.
- ★ There is also a conveniently located easy "Change over switch" between Petrol & CNG with Automode option.
- ★ Special CNG malfunction indicator lamp on Digital meter cluster for easy detection in case of CNG system malfunction.
- ★ NGV receptacle for faster CNG filling means quick IN & OUT of CNG stations.

EQUIPMENT LIST
