

now you can.

Can you imagine a car within the reach of all?

Can you fit your family into the smallest of cars?
Without a squeeze?

Can you feel the safety of a big car?
In a car nearly half its size?

Can you find more miles in your every litre?
Almost as much as a two wheeler?

Can you make a difference to the environment?
By hurting it the least?

Can you imagine a car that will change
the world? Again?

nano

It's amazing what you can do in a Nano. Like, with its 23.6 kmpl mileage, you can save on fuel and all the worries that rising fuel prices bring. And the Bharat III compliance means you won't be taking Mother Nature for a ride. You could also comfortably fit five and (with the high safety standards it boasts of), have plenty of room left for fun and laughter. The 4 metre turning radius will come in handy when you want to squeeze into that parking space behind the pillar. (Or get out, when Mr. Sharma has parked his car right in front of yours). The 180mm ground clearance lets you sail over rough roads like you do over smooth. And with power windows and central locking, you can enjoy the privileges that were just meant for the privileged before. And that's just the beginning. With 36 patented technologies, there's a lot more you couldn't do, that now you can.

Range Starts from Rs. xxx

23.6 kmpl as per ARAI

Bharat III compliant

Exceeds Safety Standards

Incredibly Spacious Interiors

Top Speed of 105 kmph

Smallest Turning Radius of 4 m.

High Ground Clearance of 180mm

Best Gradability of 30%

Power Windows

Central Locking
